HCT-900 SYSTEM CONVECTION REWORK SYSTEMS

The HCT-900 can be used for the removal and replacement of electronic components, including lead-free, from 0201 up to 304-Pin QFP. It is also effective at reworking pin-hole devices such as sockets and connectors. And, using it with solder braid and flux is a fast and efficient way to remove solder shorts and splashes. It can also be used in plastic applications such as applying shrink wrap to components or the formation of plastic rivets.

HCT Hand Held Convection Tool

The HCT-900 Hand Held Convection Tool offers a low cost, versatile rework solution for a wide variety of production and rework application challenges. It has a compact, robust design comprising of analog controls for both airflow and heat. A closed loop feedback circuit controls the temperature allowing the desired temperature to be achieved and maintained regardless of changes in the volume of airflow.

MX-5000 SERIES REWORK AND SOLDER SYSTEMS

The MX-5000 Soldering, Desoldering and Rework Systems is the next generation of the trusted Metal Soldering Systems that enable increased productivity and process control for a wide range of applications. Building on the renowned strength of its popular MX-500 predecessor, the MX-5000 Series increased output power, adds process feedback, and improves application flexibility with new hand-pieces.

MX-5200 DUAL SIMULTANEOUS SOLDERING, DESOLDERING AND REWORK SERIES

The MX-5200 Soldering, Desoldering and Rework Series offers the same increased productivity and process control as the MX-5000 Series, now with dual-simultaneous ports. The MX-5200 can be operated with two hand-pieces dynamically sharing the 80 watts output power based on demand adding even more application flexibility and speed.

PS-900 SOLDERING SYSTEMS

PS-900 Solar Soldering System

OK International has launched a new soldering system for PV tabbing and bussing applications proven to reduce micro cracking. The PS-900 with specially designed hoof tip geometry optimizes the power delivered to the solder joint while it's temperature-sensitive heater ensures low temperature soldering thus minimizing thermally induced stresses on cell surfaces.

PS-900 Soldering System

The PS-900 increases productivity by performing a wide range of applications. It is suited for lead-free soldering processes, multilayer boards and thermally demanding components. What's more, SmartHeat technology enables the PS-900 to solder at lower temperatures, even for such demanding applications as lead-free soldering processes. This means operators are more productive and materials are safe from damaging temperatures.

System Includes PS-PW900 Power Supply With Power Cord, PS-HC3 Hand-Piece With Coil Assembly, WS2-NS Workstand With Sponge And AC-CP2 Tip Removal Pad.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
