

STR7000+SI-8020 Series

Separate Excitation Switching Type

■Features

- High output current (6A:STR7000 series, 12A: STR7100 series)
- High efficiency (70 to 90%)
- Wide DC input voltage range
- Built-in drooping type overcurrent protection circuit
- Foldback type overcurrent protection can be set externally.
- Output voltage adjustment
- Built-in reference oscillator (35kHz)
- Output ON/OFF control

■Applications

- Electronic equipment

■Lineup

I_o (A) \ V_o (V)	5	12	15	24
6	STR7001+SI-8020	STR7002+SI-8021	STR7002+SI-8022	STR7003+SI-8023
12	STR7101+SI-8020	STR7102+SI-8021	STR7102+SI-8022	STR7103+SI-8023

■Absolute Maximum Ratings

Power Section: STR7000/STR7100 ($T_a=25^\circ\text{C}$)

Parameter	Symbol	Ratings		Unit
		STR7000 Series	STR7100 Series	
Power Transistor Breakdown Voltage	V_{4-1}	60		V
Drive Transistor Breakdown Voltage	V_{4-5}	60		V
Diode Breakdown Voltage	V_{1-2}	60		V
Collector Current	I_c	6(peak 7.5)	12(peak 15)	A
Power Dissipation	P_{D1}	100($T_c=25^\circ\text{C}$)	125($T_c=25^\circ\text{C}$)	W
	P_{D2}	4.3(Without heatsink)		W
Power Transistor Thermal Resistance	$R_{th(j-c)}$	1.25	1.0	$^\circ\text{C/W}$
Power Transistor Junction Temperature	T_j	+150		$^\circ\text{C}$
Operating Temperature	T_{OP}	-30 to +125(T_c)		$^\circ\text{C}$
Storage Temperature	T_{Stg}	-30 to +125		$^\circ\text{C}$

■Control Section: SI-8020 Series ($T_a=25^\circ\text{C}$)

Parameter	Symbol	Ratings	Unit
DC Input Voltage	V_{IN}	55	V
Power Dissipation	P_D	1	W
Operating Temperature	T_{OP}	-20 to +85	$^\circ\text{C}$
Storage Temperature	T_{Stg}	-20 to +100	$^\circ\text{C}$

(unit: mm)

Standard External Circuit

Notes of Pattern Design

- 1) Thick lines in the Standard External Circuit are lines through which a large current flows. Make these pattern lines as thick as possible.
- 2) Place capacitor C₁ on the input side as closely as possible to terminals no.2 and no.4 of the STR7000/7100 series. C₁ may be used in combination with a smoothing capacitor for rectifying, but the above points must be taken into consideration. In cases where C₁ is not provided or it is placed too far from the terminals stated above, abnormal oscillation due to poorer transient response or increased ringing may occur.
- 3) Connect voltage sensing terminal V_{O.S} and GND as closely as possible to output capacitor C₄ (a current of approximately 1mA flows into the V_{O.S} terminal). If they are placed too far from C₄, abnormal oscillation due to decreased regulation or increased switching ripple may occur.
- 4) Connect current sensing terminal C.S and GND as closely as possible to the detection resistor R_s (a current of approximately 0.5mA flows from the CS terminal).
If they are placed too far from R_s, a decrease of the overcurrent setting point due to the voltage drop in the pattern, or malfunction of the protection circuit due to increased ringing may occur.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
