

# DOGL GRAPHIC SERIES

## 128x64 DOTS

**also available in low quantities !  
flat: 6.5mm with LED B/L mounted**

EA DOGL128W-6 +  
EA LED68x51-W

EA DOGL128B-6 +  
EA LED68x51-W

EA DOGL128W-6 +  
EA LED68x51-A

### TECHNICAL DATA

- \* HIGH-CONTRAST LCD SUPERTWIST DISPLAY (STN AND FSTN) WITH 15µm DOT GAP
- \* OPTIONAL LED BACKLIGHTS IN VARIOUS COLORS
- \* 128x64 PIXELS (CORRESPONDS TO 8x21 CHARACTERS OR 4x16 LARGE CHARACTERS)
- \* ST 7565R CONTROLLER WITH SPI (4-WIRE) INTERFACE
- \* POWER SUPPLY: SINGLE SUPPLY 3.0V TO 3.3V (TYPICALLY 320µA)
- \* NO ADDITIONAL VOLTAGES REQUIRED
- \* OPERATING TEMPERATURE RANGE -20°C TO +70°C (STORAGE -30°C TO +80°C)
- \* LED BACKLIGHTING 5mA TO 90mA
- \* NO MOUNTING REQUIRED: SIMPLY SOLDER ONTO PCB

### ORDERING CODE

GRAPHICS DISPLAY, 128x64, 68x51mm

- x: *W* = white background (FSTN pos. transmissive)  
*E* = yellow/green background (STN pos. transmissive)  
*B* = blue background (STN neg. transmissive)  
*S* = black background (FSTN neg. transmissive)  
*L* = yellow/green background (STN pos. reflective, cannot be backlit)

- LED BACKLIGHT, WHITE  
 LED BACKLIGHT, YELLOW/GREEN  
 LED BACKLIGHT, BLUE  
 LED BACKLIGHT, RED  
 LED BACKLIGHT, AMBER  
 LED BACKLIGHT, GREEN  
 LED BACKLIGHT, FULL COLOR RGB

### ACCESSORIES

- USB TEST BOARD FOR PC (WINDOWS 2000, XP, VISTA)  
 TOUCH PANEL, 4-WIRE, ANALOG, STICK-ON  
 ZIF CONNECTOR FOR TOUCH PANEL, BOTTOM CONTACT  
 SOCKET CONNECTOR 4.8 mm HEIGHT (2 PCS. REQUIRED)  
 CHARACTER SETS PLUS FONTEDITOR

EA DOGL128x-6

- EA LED68X51-W  
 EA LED68X51-G  
 EA LED68X51-B  
 EA LED68X51-R  
 EA LED68X51-A  
 EA LED68X51-E  
 EA LED68X51-RGB

- EA 9780-2USB  
 EA TOUCH128-2  
 EA WF100-04S  
 EA FL-20P  
 EA USBSTICK-FONT

**ELECTRONIC  
ASSEMBLY**

making things easy

## EA DOGL128

The EADOGL128, a 128x64-pixel graphics display, is a new addition to ELECTRONICASSEMBLY's EA DOGL series. It, too, has pins that allow it to be mounted quickly and easily. 7 different optional LED backlights are available. These can be combined with 5 different display technologies, making it possible to have up to around 20 different designs.

Designed for compact, handheld devices, this modern LCD series offers a number of benefits with and without backlighting:

- \* Extremely compact (68x51 mm) with a large viewing area of 64x36 mm
- \* Super-flat: 2.8 mm without backlight module, and only 6.5 mm with a b./l. module mounted
- \* Serial SPI interface (4-wire)
- \* Single supply +3.0 V or +3.3 V or dual power supply +1.8..3.3V
- \* Typical power consumption of only 320µA in full operation (white LED backlight from 5mA)
- \* Easily mounted by soldering
- \* Wide range of design variants orderable as single units, backlighting color changes possible

## CONTRAST ADJUSTMENT

The contrast can be set by means of a command for all the displays in the EA DOGL series. The contrast setting of the display must be set once by the software, and is then kept constant throughout the entire operating temperature range (-20..+70°C), thanks to the integrated temperature compensation.

## LED BACKLIGHT

7 different variants are available for individual backlighting: white, yellow/green, green, blue, red, amber and a full-color version.

There are 3 separate LED paths available for each monochrome backlight that can be switched in parallel or in series to suit the system voltage. This means that most backlights can be run at either 3.3 V or a higher voltage.

To operate the backlight, we recommend a current source (e.g. CAT4238TD) or an external series resistor to limit the current. This can be calculated from  $R=U/I$ ; you can find the values in the table on the right. To prolong the life of the backlights, we recommend that you use a current source.

| LED backlight                    | Forward voltage (V) |                  |                 | Current max. (mA) | Limiting resistor (ohm, each path) |      |
|----------------------------------|---------------------|------------------|-----------------|-------------------|------------------------------------|------|
|                                  | min                 | typ              | max             |                   | @3,3 V                             | @5 V |
| yellow/green<br>EA LED68x51-G    |                     | 2,1              |                 | 60                | 20                                 | 47   |
| white<br>EA LED68x51-W           |                     | 3,3              |                 | 45                | CAT4238                            | 39   |
| amber<br>EA LED68x51-A           |                     | 2,1              |                 | 60                | 24                                 | 52   |
| green<br>EA LED68x51-E           |                     | 3,1              |                 | 45                | CAT4238                            | 33   |
| blue<br>EA LED68x51-B            |                     | 3,3              |                 | 45                | CAT4238                            | 39   |
| red<br>EA LED68x51-R             |                     | 2                |                 | 60                | 24                                 | 52   |
| full color<br>EA<br>LED68x51-RGB | red<br>typ. 4V      | green<br>typ. 4V | blue<br>typ. 4V | 60 each<br>colour | -                                  | 15   |

The operating life of the yellow/green, red and amber backlights is 100,000 hours. The life of the white and blue backlights is considerably shorter. We recommend that you dim these or switch them off whenever possible.

**Important:** Never connect the backlight LEDs directly to a 5 V/3.3 V supply as this will immediately destroy the LEDs. Always use a current source. Please note that derating applies at temperatures exceeding +25°C.

## ASSEMBLING

First, clip the display and backlight modules together by gently pushing the display pins through the corresponding holes on the backlight module. Then insert the entire module into the socket, or into the soldering holes on the pcb. The backlight pins (the 2 rows with 3 pins at the bottom) must be soldered on the top side as well to ensure good contact between the modules.

**Important:** The display has 2 protective films on the top and the bottom (except the version DOGL128L that does have 1 foil on the top only), and there is also one on the backlight. These must be removed. Make sure that neither display nor backlight will never come into contact with any kind of liquid like Fluxer, Cleaner, Water.

**5 DIFFERENT TECHNOLOGIES**

See below for an overview of available technologies, combinations with available backlights and their usability:

| display type  | technology                         | optional backlight                   | readability                       | display color non backlit  | display color with backlit          | recommended backlight color |
|---|------------------------------------|--------------------------------------|-----------------------------------|----------------------------|-------------------------------------|-----------------------------|
|    | FSTN pos. transfective             | it's fine with and without backlight | readable even without backlight   | black on white             | black on backlight color            | white, blue, green, RGB     |
|    | STN pos. yellow/green transmissive | backlight unit required              | readable even without backlight   | dark green on yellow/green | black on yellow/green or amber      | yellow/green, amber         |
|    | STN neg. blue transmissive         | usage only with backlight            | ---                               | ---                        | backlight color on blue background  | white, yellow/green         |
|  | FSTN neg. transmissive             | usage only with backlight            | ---                               | ---                        | backlight color on black background | white, green, RGB           |
|  | STN pos. yellow/green reflective   | no backlight possible                | finest readable without backlight | dark green on yellow/green | ---                                 | ---                         |

**6 AND MORE DIFFERENT BACKLIGHTS**

6 and more different backlight colors are available to match equipments design as much as possible. The most effective and brightest one is the white one EA LED68x51-W.

If you see black and white pictures on this page but you want to see the colors of the displays, you can download a full-colored version of this document at

<http://www.lcd-module.de/eng/pdf/grafik/dogl128-6e.pdf>

EA LED68x51-RGB Full Color

## APPLICATION EXAMPLES

### LOW POWER

+3.0V or +3.3V (single supply) operation requires 9 external capacitors

### LOW VOLTAGE

If an external source of +10.5..+13.5V (does not have to be stabilized) is available, the charge pump is not needed and less external components are required. Power supply voltage for display and logic may be 1.8..3.3V then.

### ZIF CONNECTOR EA WF100-04S:

As an accessory for the touch panel we do provide a ZIF connector (4 pins) with pitch 1.0mm (SMD type). This connector is a „bottom side contact“ type.

alle dimensions are in mm

**TABLE OF PROGRAMMING COMMANDS**

| Command   | Command Code |            |    |                         |    |                                  |                |    |    | Function  |   |
|---|--------------|------------|----|-------------------------|----|----------------------------------|----------------|----|----|---|---|

| (21) Power save   | 0            |            |    |                         |    |                                  |                |    |    |   | Display OFF and display all points ON compound command                          |
| (22) NOP  | 0            | 1          | 1  | 1                       | 0  | 0                                | 0              | 1  | 1  |   | Command for non-operation   |

**DATA TRANSFER**

Data transfer is unidirectional. That means that data can only be written; it cannot be read again. In contrast to other displays, a busy query is not necessary with this display. The clock-pulse rate of the SCL line can be up to 20 MHz at 3.3V, depending on the supply voltage. You will find more detailed information on timing on pages 64 and 65 of the data sheet of the ST7565R controller, which you will find on our website at <http://www.lcd-module.de/eng/pdf/zubehoer/st7565r.pdf>

## INITIALISATION EXAMPLE

Using the internal contrast voltage generator (single supply +3.0..+3.3V).

Application „LOW POWER“.

\*) Make sure that for 6:00 viewing direction ADC has to be set to „reverse“ (mirrored layout) !

### 12:00 VIEWING ANGLE, TOP VIEW OPTION

If the display is read mostly from above (on the front of a laboratory power supply unit, for example), the preferred angle of viewing can be set to 12 o'clock. This rotates the display by 180°. A slightly different initialization setup is required for this. Also keep in mind that the leftmost column (normally numbered as 0) will now change to 4.

Orientation for 12 o'clock (Top View)

| Column address |        |

### TOUCH PANEL EA TOUCH128-2 (OPTIONAL)

An analog touch panel is available as an accessory. It has a self-adhesive material on its rear surface and is simply stuck onto the display. The connection is made by means of a 4-pin flexible cable for a ZIF connector (e.g. EA WF100-04S) with a grid of 1.0 mm. Bending radius is defined with min. 5mm. For optimum readability we recommend that you use a backlight with the display.

Interfacing to a processor can be either done by an external touch panel controller or with a controller that is featured with analogue input. The touch panel is similar to a potentiometer: connecting a voltage of e.g. 3.3V to the pins *Top-Bottom* makes it possible to read out a voltage on pin *Left* or *Right* which is linear to the Y-coordinate of the pressed point. The X-coordinate will result when the voltage will

| Specification    |       |     |        |
|------------------|-------|-----|--------|
| Specification    | min   | max | Unit   |
| Top-Bottom       | 100   | 400 | Ω      |
| Left-Right       | 110   | 410 | Ω      |
| Voltage          | 3     | 12  | V      |
| Current          | 5     | 25  | mA     |
| Linearity        |       | 1,5 | %      |
| Force            | 45    | 65  | g      |
| Contact Bounce   | 5     | 10  | ms     |
| Op. Temperatur   | -20   | +60 | °C     |
| Stor. Temperatur | -20   | +70 | °C     |
| Transmission     | 75    | 85  | %      |
| Life Time        | 10000 |     | Cycles |

be supplied to *Left-Right* and measurement is done at *Top* or *Bottom*. The pinout of the connecting cable is shown in the drawing.

### USB-TEST BOARD EA 9780-2USB

For easy startup, a USB test board is available that can be connected to a PC. A USB cable and Windows software is supplied with the product. This allows text and images (BMP) to be displayed directly on the connected display. You will find more information on the test board in the EA 9780-2USB data sheet.

### SIMULATION WITH WINDOWS

A simulator window also displays the contents of the display. The software can simulate all the displays and colors even without the hardware. You can download the software free from our website:

<http://www.lcd-module.de/deu/disk/startdog.zip>

## DIMENSIONS EA DOGL128

| Pin | Symbol | Level | Function             | Pin | Symbol | Level | Function                  |

all dimensions are in mm

**Note:**

- LC displays are generally not suited for wave or reflow soldering. Temperatures of over 80°C can cause lasting damage.
- The surfaces of the displays and backlights are protected from scratching by self-adhesive protective foils. Please remove these before mounting.
- Make sure that either display nor backlight will never come into contact with any kind of liquid like Fluxer, Cleaner, Water.

## DIMENSIONS EA LED68X51

**Note:**

The 6(4) LED pins A1 to A3 and C1 to C3 also have to be soldered from above to ensure good contact.

# ELECTRONIC ASSEMBLY

making things easy

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
