

Data Sheet

SCA3100-D07 3-AXIS HIGH PERFORMANCE ACCELEROMETER WITH DIGITAL SPI INTERFACE

Features

- 3.3V supply voltage
- ± 6 g measurement range
- 3-axis measurement XYZ directions
- ± 70 mg offset accuracy over temp range
- Internal temperature sensor
- SPI digital interface
- Enhanced self diagnostics features
- Size 7.6 x 3.3 x 8.6 mm (w x h x l)
- Qualified according to AEC-Q100 standard
- Package, pin-out and SPI protocol compatible with VTI digital accelerometer product family
- RoHS compliant Dual Flat Lead (DFL) plastic package suitable for lead free soldering process and SMD mounting
- Proven capacitive 3D-MEMS technology

Applications

SCA3100-D07 is targeted to automotive applications with high stability requirements and vibration robustness. Typical applications include

- Electronic Stability Control (ESC)
- Hill Start Aid (HSA)
- Electronic Parking Brake (EPB)
- Roll Over
- Suspension
- Inclination
- Integrated inertial measurement
- Industrial applications

General Description

SCA3100-D07 is a high performance three axis accelerometer component based on VTI capacitive 3D-MEMS technology. The component integrates high accuracy micromechanical acceleration sensing together with a flexible SPI digital interface. Dual Flat Lead (DFL) housing of the component guarantees robust operation over the product lifetime.

SCA3100-D07 is designed, manufactured and tested for high stability, reliability and quality requirements of automotive applications. The accelerometer has extremely stable output over wide range of temperature, humidity and mechanical noise. The component is qualified against AEC-Q100 standard and has several advanced self diagnostics features. The DFL housing is suitable for SMD mounting and the component is compatible with RoHS and ELV directives.

SCA3100-D07 is a part of VTI digital accelerometer family and fully compatible with single axis accelerometers (SCA800 series) and other multi axis accelerometers (SCA2100 series and SCA3100 series).

Performance Characteristics

Vdd=3.3 V and ambient temperature unless otherwise specified.

Parameter	Condition				
		Min	Typ	Max	Units
Analog and digital Vdd		3.0		3.6	V
Current consumption	Active mode		3	5	mA
	Power down mode		0.05		mA
Measurement range ^{A)}	Measurement axes (XYZ)	-6		6	g
Saturation warning limit ^{B)}	Measurement axes (XYZ)		6.3		g
Operating temperature		-40		125	°C
Offset total error ^{C)}	Temperature range -40 ... +125 °C	-100		100	mg
	RT 25 °C ±5°C	-50		50	mg
Offset temperature dependency ^{D)}	Temperature range -40 ... +125 °C	-70		70	mg
Sensitivity	13 bit output		650		Count/g
Total sensitivity error		-3		3	% FS
Linearity error	+1g ... -1g range	-20		20	mg
	+3g...+1g, -1g...-3g	-40		40	mg
	+5g..+3g, -3g..-5g	-60		60	mg
				±3.5	%
Cross-Axis sensitivity					
Zero acceleration output	2-complement		0		Counts
Amplitude response ^{E)}	-3dB frequency	30		55	Hz
Noise				10	mg RMS
Power on setup time				0.1	s
Output data rate			2000		Hz
Output load				50	pF
SPI clock rate				8	MHz
ESD protection	Human Body Model			2	kV
	Charged Device Model			1	kV
Moisture sensitivity level	IPC/JEDEC J-STD-020C, Level 3				
Mechanical shock				20 000	g
ID register value	Customer readable ID register (27hex)		C4		

A) Range defined as ball sphere $\sqrt{x^2+y^2+z^2} \leq 6g$

B) See product family specification for details on SAT-bit handling

C) Includes offset deviation from 0g value including calibration error and change over lifetime, temperature and supply voltage.

D) Offset dependency due to temperature. Value is a relative value and has not to be centered to zero.

E) See figure 4.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
