## **Bringing pictures, sounds and stages to live**

For more than 60 years, EAO has been one of the leading suppliers of switches and indicators for audio/video, lighting and production equipment. No wonder many of the world's best manufacturers use our products in their systems. Our customers not only appreciate the longevity and high quality but also the fair price policy. This has made us the No. 1 A/V switch supplier worldwide.

EAO is relied on to help millions of listeners, viewers and audiences enjoy broadcasts of the F1 World Championship, Grand Slam finals and Olympic Games as well as some of the greatest performances in the world's most prestigious locations – Sydney Opera House, Madison Square Garden and Wembley Stadium to name just a few.

Major film and production studios use EAO products to help capture that perfect moment, so do the many outside broadcasting vehicles as they bring you the news.

Smaller theatres and venues also benefit from EAO switches in their semi-professional audio/video mixers and public address systems, lighting rigs and control panels. Wherever there is entertainment, there is EAO.

Upgrade your Human Machine Interfaces with the unique design of EAO audio/video equipment!

## Product Information

### General notes

The Series 95 is a high quality switch range containing illuminated and non-illuminated pushbuttons for professional Audio and Video applications. According to the switch version, the pushbuttons may be equipped with 2 or 3 SMD LED's with PLCC housing (height 2.1 mm) with a radiation angle of approx. 120 ° and thus generate up to 3 different colors on one pushbutton. The lenses are available matt translucent or clear transparent in flat, concave or convex form.

### Fitting

The pushbutton should be plugged-in to the mounting hole and soldered onto the printed circuit board (PCB), after the soldering of the SMD LED's.

### Mounting

Suitable for mounting on PCB's with thickness of 1.5 to 2.5 mm. The separated spring clip contact holds the switch in place during the assembly and soldering process. The soldered joint makes the electrical contact and fixes the switch in the PCB. Maximum soldering-temperature is 260 °C for 5 seconds. There is a solder stop between the SMD-LED's and the contact mounting areas. The PCB layout and mounting details are shown in the dimensional drawings. The switch must be used in a front panel.

### Marking

The diffuser can either be printed or engraved, or a film insert can be fitted between the diffuser and the lens.

### Illumination

Luminosity and wave length scattering caused by the technology used in the LED manufacturing processes may lead to visual differences in our products.

Lens remover	95-900.005	0.003

Owing to possible mechanical damage removed lens must be replaced by a new part

### Mounting tool

	Typ-Nr.	 kg
Mounting tool	95-900.009	0.003

## Pushbutton- and illuminated pushbutton

### Shock resistance

50 g, 11 ms, as per IEC 60512-4-3

### Switching system

Gold plated momentary contact, 1 normally open, self-cleaning

### Material

#### Plastic parts

PC, as per UL 94 HB, Cd-free

#### Material of contacts

CuSn, contact gold-plated, soldering terminal tinned

### Mechanical characteristics

#### Actuating travel

4.5 mm

#### Actuating force

3 N to end position

#### Switching point

2.3 mm  $\pm$ 0.8 mm at operation

#### Life time

>5 million operations, as per IEC 60512-5-9a

### Electrical characteristics

#### Illumination

recommended SMD-LED types:  
P-LCC package or similar, radiation angle approx. 120 °;  
use of smaller SMD-LED is possible.

#### SMD-LED configurations size:

max. 2 SMD-LEDs for switch size 12.70 mm  
max. 3 SMD-LEDs for switch size 15.88 mm and 19.05 mm, single  
colour or multi-colour.

#### Height of SMD-LED:

max. 2.1 mm

#### Electric strength

$\leq$ 50 m $\Omega$ , as per IEC 60512-2-2b at new state

#### Isolation resistance

>1 T $\Omega$ , as per IEC 60512-2-3a between contacts

#### Switch rating

min. 1 mVDC, 100  $\mu$ A  
max. 48 VDC, 50 mA

#### Electric strength

2.5 kVAC, as per IEC 60512-2-11

### Environmental conditions

#### Front protection

IP 40 before front plate for complete switch

#### Operating temperature

-25 °C ... +70 °C

#### Storage temperature

-40 °C ... +80 °C

#### Vibration resistance

10 g, at 10 - 2000 Hz, 0.75 mm, as per IEC 60512-4-4

## Product Information

### General notes

The series 97 contains indicators and illuminated pushbuttons with maintained and momentary action with one or two contacts which may be either normally open or normally closed or a combination of the two. The illuminated pushbuttons are equipped with the low-level switching system.

The front dimensions are 9 x 9 mm or 9 mm dia.; or with overhanging lens 12.2 x 12.2 mm.

### Mounting

The illuminated pushbuttons of series 97 can be soldered to a printed circuit board. The contact layout conforms to the module of 2.54 mm (1/10 "). A centering pin ensures dimensionally exact mounting in rows or blocks and prevents the button from lifting when being soldered.

### Cleaning of soldered PCB

In many cases the boards are cleaned following mechanical soldering. In this case it is essential to prevent the cleaning fluid containing dirt, grease and flux from entering the switch.

### Lenses

The flat lenses, made of polycarbonate, are obtainable in various colours. The transparent lens is available with translucent or transparent support.

The overhanging lenses consist of a lens bezel, a text plate and a mat transparent lens plate, obtainable in flat form.

### Marking

For further information about engraving, hot stamping and film inserts see part Marking.

### Illumination

Perfect illumination of the different coloured lenses is assured by LED Bi-Pin T 1 lamps. The LEDs are soldered through the pushbutton housing direct onto the PC boards.

Luminosity and wave length scattering caused by the technology used in the LED manufacturing processes may lead to visual differences in our products.

### Position indication

The status of a maintained action switch can be determined by the position of the lens.

## Specimen order

### Indicator :

- Indicator actuator, 9 mm dia. 97-061.007

### Essential accessories :

- Lens, plastic blue transparent flush, 9 mm dia. 97-932.6  
 - Single-LED T1 Bi-Pin, 2.2 VDC, 20 mA, yellow 10-2602.3174F

## Actuator with low level switching element

### Switching system

This low-level switching system was designed for switching low powers in electronic circuits. The switching system assures reliable switching of loads.

Single-break momentary contact, as normally open or normally closed with 4 independent points of contact.

Special features are the long life, extremely short rebound time and stable contact resistance.

Contact combinations: 1 normally open contact, 2 normally open contacts, 1 normally closed/1 normally open contact, 1 normally closed contact

### Material

#### Lens

Polycarbonate (PC)

#### Switch housing

Polyester, self-extinguishing

#### Material of contact

Gold plated

### Mechanical characteristics

#### Actuating force

3.4 N  $\pm$ 0.3 N (130 g)

#### Actuating travel

Lead distance NC contact: 0.6 mm  $\pm$ 0.2 mm

Lead distance NO contact: 1.6 mm  $\pm$ 0.2 mm

Total distance: 3 mm  $\pm$ 0.2 mm

#### Rebound time

typ.  $\leq$ 200  $\mu$ s

#### Mechanical lifetime

$\leq$ 5 million operations, as per IEC 60512-5-9a

### Electrical characteristics

#### Contact resistance

Starting value (initial)  $\leq$ 50 m $\Omega$ , as per IEC 60512-2-2b

#### Isolation resistance

$\geq$ 10<sup>12</sup>  $\Omega$  between contacts at 100 VDC, as per IEC 60512-2-3a

#### Electrical life

$\geq$ 2 million operations at 30 VDC/100 mA, as per IEC 60512-5-9c

#### Switch rating

min. 100  $\mu$ VDC/AC, 10  $\mu$ A

max. 42 VDC/AC, 100 mA

#### Electric strength

500 VAC, 50 Hz, 1 min. between all terminals and earth, as per IEC 60512-2-11

### Environmental conditions

#### Storage temperature

-40 °C ... +85 °C

#### Service temperature

-25 °C ... +65 °C

#### Front protection

IP 40 front side, as per IEC 60529

#### Shock resistance

(single impacts, semi-sinusoidal)

$\geq$ 50 g for 11 ms, as per IEC 60512-4-3

#### Vibration resistance

(sinusoidal)

10 g at 10-2000 Hz, amplitude 0.75 mm, as per IEC 60512-4-4

## General notes

### 1. Engraving

In addition to the most commonly used world languages, in DIN 1451-3 close spacing, other typefaces are available as Scandinavian, Slavic, Greek, Russian and Polish.

Unless requested otherwise by customer, the lettering on white marking plates will be in black.

Standard height of letters is 2 mm. If the height is not specified, we will supply 2 mm engraved letters.

### 2. Hot stamping

For larger series it is worth considering markings by means of hot stamping or laser engraving. We will be pleased to advise you.

For letters and figures, typefaces with 2.5 mm, 3 mm and 4 mm are available.

### 3. Film inserts for overhanging lens

Instead of using engraving the lenses can be fitted with transparent film inserts, placed between the lens plate and the marking plate.

The film thickness is 0.2 mm.

Maximum film size 10 x 10 mm.

## Product Information

### General notes

The series 99 contains indicators and illuminated pushbuttons with maintained and momentary action with one or two contacts which may be either normally open or normally closed or a combination of the two. The illuminated pushbuttons are equipped with the low-level switching system.

The series 99 PCB keylock switch with a spacing of 19.05 mm completes the existing range of indicators and illuminated pushbuttons. The PCB keylock switch is available with two and three positions, with maintained action, and with either one or two normally open contacts as well as with one normally open and one normally closed one.

### Mounting

The illuminated pushbuttons of series 99 can be soldered to a printed circuit board. The contact layout conforms to the module of 2.54 mm (1/10 "). A centering pin ensures dimensionally exact mounting in rows or blocks. With an M1.2 screw the pushbuttons can also be fixed to a printed circuit board. (This screw must be ordered separately.) The pushbuttons can be joined together easily with a coupling piece to form rows or blocks. The layout of the PCB keylock switch conforms to the module of 2.54 mm (1/10 "). Two centering pins ensure a dimensionally exact mounting. The contact layout corresponds to that of series 99 switches.

### Cleaning of soldered PCB

In many cases the boards are cleaned following mechanical soldering. In this case it is essential to prevent the cleaning fluid containing dirt, grease and flux from entering the switch.

### Lenses

The lens consists of a bezel, a marking plate and a transparent lens plate, which may be either flush or concave.

### Marking

For further information about engraving, hot stamping and film inserts see part Marking.

### Illumination

Illumination of the different coloured lenses is by lamps Bi-Pin T1 longlife (6 ... 36 V) or LED Bi-Pin T1. Luminosity and wave length scattering caused by the technology used in the LED manufacturing processes may lead to visual differences in our products.

### Position indication

The status of a maintained action switch can be determined by the position of the lens.

### Keylock switch

Standard lock (Index D). 10 different locks with standard nos. 311 ... 320. If the lock number is not specified, we supply no. 311. Additional 125 locks, no. 321 ... 445, are available on request. Master keys for locks no. 311 ... 445 may be ordered by quoting no. 31-989.300. Two keys are supplied with each keylock switch. Spare keys for standard DOM locks may be ordered by quoting no. 31-989 (please state the lock number).

## Specimen order

### Indicator :

- Indicator actuator single, 18.6 x 18.6 mm 99-050.807

### Essential accessories :

- Lens single complete, plastic colourless transparent flush, 18.6 x 18.6 mm 99-901.9  
 - Single-LED T1 Bi-Pin, 2.2 VDC, 20 mA, yellow 10-2602.3174C

*We reserve the right to modify technical data  
 All dimensions in mm*

## Pushbutton illuminative

- 1 Lens plate
- 2 Marking plate
- 3 Lens bezel
- 4 Switching element

## Indicator actuator single

### Essential Accessories:

-  Lens single, complete page 40
-  Single-LED page 43

	Front protection	Terminals	18.6 x 18.6 Typ-Nr.	Component layout	Mounting dimensions	Technical drawing	Circuit drawing	
<b>Indicator actuator single</b>	IP 40	P	<b>99-050.807</b>	1	1	1	1	0.006

Terminals: P = PCB terminal

Component layout from page 46, Mounting dimensions from page 47, Technical drawing from page 48, Circuit drawing from page 49

## Indicator actuator double

### Essential Accessories:

-  Lens plate double page 41
-  Marking plate double page 41
-  Single-LED page 43

	Front protection	Terminals	18.6 x 37.8 mm Typ-Nr.	Component layout	Mounting dimensions	Technical drawing	Circuit drawing

flush, mat	Plastic colourless transparent	<b>99-927.7</b>	0.001

### Marking plate single

for lens single

	Marking plate	∅ 18.6 x 18.6 mm Typ-Nr.	
<b>Marking plate single</b> can be engraved or hot stamped	Plastic black translucent	<b>99-908.0</b>	0.001
	Plastic white translucent	<b>99-908.9</b>	0.001
for LED	Plastic beige translucent	<b>99-918.A</b>	0.001

### Lens bezel single

for single pushbutton

	Lens bezel	Typ-Nr.	
<b>Lens bezel single</b> rounded	Plastic grey	<b>99-920.82</b>	0.001
	Plastic beige	<b>99-920.9B</b>	0.001
with edges	Plastic black	<b>99-920.0</b>	0.001
	Plastic brown	<b>99-920.9C</b>	0.001
	Plastic grey	<b>99-920.8</b>	0.001
	Plastic white	<b>99-920.9A</b>	0.001

## Lens plate double

for pushbutton double

	Pressure plate	□ 18.6 x 37.8 mm Typ-Nr.	
<b>Lens plate double</b> concave	Plastic colourless transparent	<b>99-962.7</b>	0.001
concave, mat	Plastic colourless transparent	<b>99-974.7</b>	0.001
flush	Plastic colourless transparent	<b>99-961.7</b>	0.001
	Plastic white transparent	<b>99-961.9</b>	0.001
flush, mat	Plastic colourless transparent	<b>99-973.7</b>	0.001

## Marking plate double

for lens double

	Marking plate	□ 18.6 x 37.8 mm Typ-Nr.	
<b>Marking plate double</b> can be engraved or hot stamped	Plastic black translucent	<b>99-963.0</b>	0.001
	Plastic white translucent	<b>99-963.9</b>	0.001

## Lens plate triple

for pushbutton triple

	Pressure plate	□ 18.6 x 56.9 mm Typ-Nr.	
<b>Lens plate triple</b> concave	Plastic colourless transparent	<b>99-967.7</b>	0.002
concave, mat	Plastic colourless transparent	<b>99-979.7</b>	0.002
flush	Plastic colourless transparent	<b>99-966.7</b>	0.002
flush, mat	Plastic colourless transparent	<b>99-978.7</b>	0.002

## Marking plate triple

for pushbutton triple

	Marking plate	□ 18.6 x 56.9 mm Typ-Nr.	
<b>Marking plate triple</b> can be engraved or hot stamped	Plastic black translucent	<b>99-968.0</b>	0.001
	Plastic white translucent	<b>99-968.9</b>	0.001

## Colour foil single

for lens single

	Colour foil	□ 18.6 x 18.6 mm Typ-Nr.	
<b>Colour foil single</b>	blue	<b>99-909.6</b>	1.001
	green	<b>99-909.5</b>	1.001
	orange	<b>99-909.3</b>	1.001
	red	<b>99-909.2</b>	1.001
	yellow	<b>99-909.4</b>	1.001

## Colour foil double

for lens double

	Colour foil	□ 18.6 x 37.8 mm Typ-Nr.	
<b>Colour foil double</b>	blue	<b>99-964.6</b>	0.001
	green	<b>99-964.5</b>	0.001
	red	<b>99-964.2</b>	0.001
	yellow	<b>99-964.4</b>	0.001

## Colour foil triple

for lens triple

	Colour foil	□ 18.6 x 56.9 mm Typ-Nr.	
<b>Colour foil triple</b>	blue	<b>99-969.6</b>	0.001
	green	<b>99-969.5</b>	0.001
	red	<b>99-969.2</b>	0.001
	yellow	<b>99-969.4</b>	0.001

## Blind plug

	Blind plug	□ 19 x 19 mm Typ-Nr.	
<b>Blind plug</b> H = 16 mm	Plastic grey	<b>99-948.81</b>	0.003
H = 17.5 mm	Plastic grey	<b>99-948.82</b>	0.003
H = 19 mm	Plastic grey	<b>99-948.83</b>	0.004

## Spare key

	Typ-Nr.	
<b>Spare key</b> Key lock switch, standard lock 311 (DOM)	<b>31-989.311</b>	0.006

Other lock numbers on request

## Illumination

### Filament lamp

up to pushbutton order 1, 2 or 3 pcs.

	Socket	Operating voltage/-current	Typ-Nr.	
<b>Filament lamp</b>	T1 Bi-Pin	12 VAC/DC, 25 mA	<b>10-1609.1199</b>	0.001
		24 VAC/DC, 20 mA	<b>10-1612.1179</b>	0.001
		28 VAC/DC, 24 mA	<b>10-1613.1189</b>	0.001
		36 VAC/DC, 20 mA	<b>10-1616.1179</b>	0.001
		6 VAC/DC, 70 mA	<b>10-1606.1309</b>	0.001

## Single-LED

up to pushbutton order 1, 2 or 3 pcs.

	Socket	Light colour	Operating voltage/-current	Typ-Nr.	
<b>Single-LED</b>	T1 Bi-Pin	green	2.2 VDC, 20 mA	<b>10-2602.3175C</b>	0.001
		red	2.2 VDC, 20 mA	<b>10-2602.3172C</b>	0.001
		white	3.6 VDC, 20 mA	<b>10-2603.3179C</b>	0.001
		yellow	2.2 VDC, 20 mA	<b>10-2602.3174C</b>	0.001

## Multi-LED

up to pushbutton order 1, 2 or 3 pcs.

	Socket	Light colour	Operating voltage/-current	Typ-Nr.	
<b>Multi-LED</b>	T1 Bi-Pin	green	28 VDC, 12 mA	<b>10-4613.3105B</b>	0.001
		orange	28 VDC, 12 mA	<b>10-4613.3103B</b>	0.001
		red	28 VDC, 12 mA	<b>10-4613.3102B</b>	0.001
		yellow	28 VDC, 12 mA	<b>10-4613.3104B</b>	0.001

## Assembling

### Coupling section

for mounting pushbuttons in rows or blocks

	Typ-Nr.	
<b>Coupling section</b> grey	<b>99-910</b>	0.001

### Fixing screw

	Typ-Nr.	
<b>Fixing screw</b> M 1.2 x 5 mm (DIN)	<b>99-990</b>	0.001

### Lamp remover

	Typ-Nr.	
<b>Lamp remover</b>	<b>11-906</b>	0.003

CAUTION

A switching process might be released when replacing the Lamp/LED !

## Low level switching element

### Switching system

This low-level switching system was designed for switching low powers in electronic circuits. The switching system assures reliable switching of loads.

Single-break momentary contact, as normally open or normally closed with 4 independent points of contact.

Special features are the long life, extremely short rebound time and stable contact resistance.

Contact combinations: 1 normally open contact, 2 normally open contacts, 1 normally closed/1 normally open contact, 1 normally closed contact

### Material

#### Material of contact

Gold plated

#### Switching element

Polycarbonate (PC)

### Mechanical characteristics

#### Rebound time

≤100 μs typical

#### Mechanical lifetime

Illuminated pushbutton	5 million operations
PCB keylock switch	50 000 operations

### Electrical characteristics

#### Contact resistance

Starting value (initial) ≤50 mΩ as per IEC 60512-2-2b

#### Isolation resistance

10<sup>12</sup> Ω between contacts at 100 VDC, as per IEC 60512-2-3a

#### Switch rating

min. 100 μVDC/AC, 10 μA  
max. 42 VDC/AC, 100 mA

#### Electric strength

2500 VAC, 50 Hz, 1 min. between all terminals and earth, as per IEC 60512-2-11

### Environmental conditions

#### Storage temperature

-40 °C ... +85 °C

#### Service temperature

-25 °C ... +55 °C  
for indicators and illuminated pushbuttons mounted as a block, make sure the heat can escape freely

#### Shock resistance

(single impacts, semi-sinusoidal)  
15 g for 11 ms as per IEC 6068-2-27

## Actuator

### Material

#### Lens plate

Polymethylmethacrylate (PMMA), heat-resistant

#### Lens bezel

Polycarbonate (PC), heat-resistant

### Mechanical characteristics

#### Actuating torque

4.7 Ncm ... 6.0 Ncm (measured at the key)

#### Actuating force

Pushbutton with tactile point	2.0 ±0.3 N
Pushbutton without tactile point	1.3 ±0.4 N

#### Actuating travel

Lead distance NC contact 1.1 ±0.2 mm  
Lead distance NO contact 2.1 ±0.2 mm  
total distance 3.6 ±0.2 mm

#### Angle of rotation for print keylock switch

Keylock switch with 2 positions 90°  
Keylock switch with 3 positions 2 x 90°

#### Mechanical lifetime

Illuminated pushbutton	5 million operations
PCB keylock switch	50 000 operations

### Electrical characteristics

#### Electrostatic discharge (ESD)

10 kV

### Environmental conditions

#### Storage temperature

-40 °C ... +85 °C

#### Service temperature

-25 °C ... +55 °C  
for indicators and illuminated pushbuttons mounted as a block, make sure the heat can escape freely

#### Protection degree

frontside IP 40, PCB keylock switch, illuminated pushbutton

## General notes

### 1. Engraving

In addition to the most commonly used world languages, in DIN 1451-3 close spacing, other typefaces are available as Scandinavian, Slavic, Greek, Russian and Polish.

Unless requested otherwise by customer, the lettering on white and black marking plates will be in black or white.

Standard height of letters is 2 mm. If the height is not specified, we will supply 2 mm engraved letters.

### 2. Hot stamping

For larger series it is worth considering markings by means of hot stamping or laser engraving. We will be pleased to advise you.

For letters and figures, typefaces with 2.5 mm, 3 mm and 4 mm are available.

### 3. Film inserts

Instead of using engraving the lenses can be fitted with transparent film inserts, possibly backed by a colour foil placed between the lens plate and the marking plate, as an alternative.

The film thickness is 0.2 mm.

Maximum film size:

for single pushbutton 16 x 16 mm

for double pushbutton 16 x 34.7 mm

for triple pushbutton 16 x 53.8 mm.

## Lenses for Indicators | Illuminated pushbuttons

All dimensions in mm

Front size	Film insert max. size	Height of letters h	Number of lines	Number of (target value) capital letters per line	Number of (target value) small letters per line	Image

## Product Information

### General notes

With the series 92, users have a comprehensive range of applications at their disposal in the PCB key range. In particular, this series is an interesting alternative to the membrane switching system, because it offers convincing advantages, such as: Saving on initial costs, short manufacturing times, all-over illumination and a reliable and nevertheless removable PCB fastening technology.

With the series 92, many different applications are possible even as a discrete switch.

Thanks to front sealing IP 67, and the use of chemical-resistant materials, the elements of this series are suited for industrial use.

The actuator, measuring 18.8 x 18.8 mm at the front (18.8 x 18.4 mm IP 40), is available as an indicator, pushbutton or illuminated pushbutton in marked or unmarked versions.

In order to have matching colours, the actuator element can be supplied with different colours. The switching element complies with international protection level IP 40 and is solder-proof on the connection side. The specially formed connection legs prevent it from falling out when using flow soldering.

### Mounting

The actuators of the series 92 are made for the standard 16 mm dia. mounting hole and fastened tightly to the front panel by means of a fixing nut. Mounting torque max. 50 Ncm.

The switching element is mounted on the printed board independently of the actuator. The arrangement of contacts is based on the matrix dimension 2.54 mm (1/10"). By means of the mounting flange, the PCB can be snapped on the pre-assembled actuator. Later adjustment is no longer necessary. The mounting flange is fastened to the PCB with two 1.8 mm dia. screws, also independent of the actuator. The positioning and the number of flanges is determined by the size of the front panel or PCB.

The actuators are protected against distortion.

### Lenses

The flat front bezel with integrated pressure plate, made of UV resistant TPE has a black finish (standard). Colour variations enable the manufacture of transparent pressure plates of different colours.

### Marking

For further information about hot stamping, laser marking and film inserts see part Marking.

### Illumination

Perfect illumination of the touch surfaces available in various colours is assured by the LEDs Bi-Pin T1 in the colours blue, yellow, green, orange, red and white.

Luminosity and wave length scattering caused by the technology used in the LED manufacturing processes may lead to visual differences in our products.

### Cleaning of soldered PCB

PCBs are often cleaned after machine soldering. When doing this, care must be taken to prevent the "cleaning fluid" polluted with dirt, grease and flux from penetrating the switch.

## Specimen order

### Illuminated pushbutton :

- |   |            |
|---|------------|
| - Illuminated pushbutton actuator, IP 40, fronting black, lens yellow | 92-458.400 |
|---|------------|

### Essential accessories :

- |                                  |               |
|----------------------------------|---------------|
| - Switching element illuminative | 92-851.342    |
| - Single-LED T1 Bi-Pin, yellow   | 10-2602.3174D |
| - Mounting flange                | 92-960.0      |

*We reserve the right to modify technical data  
All dimensions in mm*

## Pushbutton illuminative, IP 40

- 1 Lens
- 2 Actuator housing
- 3 Bezel
- 4 Fixing nut
- 5 Mounting flange
- 6 Switching element
- 7 Fixing screws

## Pushbutton illuminative, IP 67

- 1 Lens
- 2 Front bezel
- 3 Actuator housing
- 4 Fixing nut
- 5 Mounting flange
- 6 Switching element
- 7 Fixing screws

## Arrangement mounting flange

The arrangement of the mounting flanges and their number is determined by the size of the front panel or PCB. To ensure uniform, tactile switching, we recommend a layout of the flanges as per adjacent sketch.

For large PCBs with several switching elements we recommend the following procedure :

1. Fit the actuator to the front panel.
2. Clip the mounting flange to the rear of the intended actuator.
3. Screw the PCB with the components soldered to it to the assembled mounting flange.

This arrangement applies to PCBs 1.6 mm thick.

## Dismantling mounting flange

The tool 92-971.0 must be used for removing the mounting flange from the actuator. Before removing the flange, the PCB fixing screws must be loosened.

If the number of actuators is insufficient, use the spacer 92-965.0 which can be attached to the front panel.

The spacer can be adjusted to the following front panel thicknesses: 1.5/2/2.2/3/3.5/4 mm and can be stuck to the back of the panel free of dirt and grease.

## Indicator actuator

## Pushbutton- and Illuminated pushbutton

### Switching system

Short-travel switching system with 2 independent contact points and tactile operation.  
Guarantees reliable switching even of very light loads.  
Fitted with 1 normally open contact.

### Material

#### Lens

Polycarbonate (PC)

#### Front bezel

Thermoplastic Elastomer (TPE)

#### Frame

Thermoplastic Polyester (PBT)

#### Material of contact

Gold (Au)

#### Switching element

Thermoplastic Polyester (PET, PBT) and Polyacetale (POM)

#### Actuator housing

Thermoplastic Polyester (PBT)

### Mechanical characteristics

#### Tightening torque

Fixing screw 40 Ncm recommended  
Fixing nut max. 50 Ncm

#### Actuating force

2.7 N  $\pm$ 1 N measured at the switching element  
5 N measured at the lens

#### Actuating travel

Switching element 0.4 mm

#### Rebound time

$\leq$ 1 ms

#### Resistance to heat of soldering

260 °C, 5 s, as per IEC 60068-2-20

#### Mechanical lifetime

$\geq$ 1 Million operations as per IEC 60512-5-9a

### Electrical characteristics

#### Contact resistance

Starting value (initial)  $\leq$ 100 m $\Omega$  as per IEC 60512-2-2b

#### Isolation resistance

$\geq$ 10<sup>9</sup>  $\Omega$  between all terminals at 100 VDC, as per IEC 60512-2-3a

#### Electrical life

$\geq$ 500 000 operations at 42 VDC, 50 mA as per IEC 60512-5-9c.  
When attention is paid to the direction of current flow from terminal 3/4 to 1/2 the electrical life can be prolonged.

#### Electrostatic discharge (ESD)

15 kV

### Switch rating

Switching voltage	min. 50 mV AC/DC max. 42 V AC/DC
Switching current	min. 10 $\mu$ A AC/DC max. 100 mA AC/DC
Power rating	max. 2 W

### Electric strength

500 VAC, 50 Hz, 1 min, as per IEC 60512-2-4a

### Environmental conditions

#### Storage temperature

-40 °C ... +80 °C

#### Operating temperature

-25 °C ... +70 °C

#### Front protection

Switching element IP 40 (fluxproof to DIN 41640 Part 84)  
front IP 67 or IP 40

#### Shock resistance

$\leq$ 50 g for 11 ms as per IEC 60512-4-6c

#### Vibration resistance

(sinusoidal)

10 g at 10-2000 Hz, amplitude 0.75 mm as per IEC 60512-4-6d

## Suppressor circuits

When switching inductive loads such as relays, DC motors, and DC solenoids, it is always important to absorb surges (e.g. with a diode) to protect the contacts. When these inductive loads are switched off, a counter emf can severely damage switch contacts and greatly shorten lifetime.

Fig. 1 shows an inductive load with a free-wheeling diode connected in parallel. This free-wheeling diode provides a path for the inductor current to flow when the current is interrupted by the switch. Without this free-wheeling diode, the voltage across the coil will be limited only by dielectric breakdown voltages of the circuit or parasitic elements of the coil. This voltage can be kilovolts in amplitude even when nominal circuit voltages are low (e.g. 12 VDC) see Fig. 2.

The free-wheeling diode should be chosen so that the reverse breakdown voltage is greater than the voltage driving the inductive load. The DC blocking voltage (VR) of the free-wheeling diode can be found in the datasheet of a diode. The forward current should be equal or greater than the maximum current flowing through the load.

**To get an efficient protection, the free-wheeling diode must be connected as close as possible to the inductive load!**

Switching with inductive load  
Fig. 1

Counter emf  
over load without free-wheeling diode  
Fig. 2

## General notes

If desired, the actuators of the series 92 can be supplied ready marked. With your order please enclose a list of the desired markings or a drawing, showing the type or size of script or the symbols desired.

### 1. Laser engraving (Fig. 1)

In addition to the most commonly used world languages, in DIN 1451-3 close spacing, other typefaces are available as Scandinavian, Slavic, Greek, Russian and Polish. Red, blue and black lenses are filled with white colour. Other colour lenses are filled in black. Standard height of letters is 2 mm. If the height is not specified, we will supply 2 mm engraved letters.

### 2. Hot stamping (Fig. 1)

For larger series it is worth considering markings by means of hot stamping. We will pleased to advise you. For letters and figures, typefaces with 2.5 mm, 3 mm and 4 mm are available.

### 3. Film inserts (Fig. 2)

Instead of using engraving, the actuator can be fitted with transparent film inserts. However, for this purpose the use of transparent lens caps is recommended. If smoked lens caps are used the lettering does not become visible until the LED is alight. Max. size of film insert  
11.4 x 11.4 mm for IP 40  
10.4 x 10.4 mm for IP 67  
Film thickness 0.2 mm.

All dimensions in mm

Height of letters h	Number of lines	Number of (target value) capital letters per line	Number of (target value) small letters per line
3	2	5 - 6	6
4	2	4	4
5	1	3	3 - 4
6	1	2 - 3	3
8	1	2	2

Fig. 1

- C Holes for centering pins

Bi-colour-LED

Drilling plan (Elementside)

- A Fixing holes for mounting flange (92-960.0)
- B Holes for Bi-colour LED:  
BA1 (green) + BA2 (yellow or red) = Anodes, BC = Cathode
- C Holes for centering pins

Libraries for the PCB layout-system p-cad 200X see : [www.pcad.com/en/library](http://www.pcad.com/en/library) Third-party Libraries

### 2 Switching element PCB mounting illuminative page 61

Single-LED

Drilling plan (Elementside)

- A Fixing holes for mounting flange (92-960.0)
- B Holes for LED
- C Holes for contact pins  
Pad max. Ø 2.5 mm  
Through-connection recommended

Bi-colour-LED

Drilling plan (Elementside)

- A Fixing holes for mounting flange (92-960.0)
- B Holes for Bi-colour LED:  
BA1 (green) + BA2 (yellow or red) = Anodes, BK = Cathode
- C Holes for contact pins  
Pad max. Ø 2.5 mm  
Through-connection recommended

## Product Information

### General notes

The input button of series 96 is a component specially designed for the requirements of modern electronic control systems. Since there is a choice of different lens shapes and colours, the panel can be arranged to suit the needs of the particular application.

### Mounting

The input button is intended for mounting on printed circuit boards. Its dimensions and the arrangement of its contacts comply with a module of 2.54 mm (1/10 "). Two centering pins ensure that rows or blocks are assembled without gaps, true to drawing. The input button is dust and sprayproof and suitable for machine soldering and cleaning.

### Lenses

Lenses can be pressed singly on to the input button. Depending on requirements, the user can employ lenses having either a momentary or maintained action, with various standard widths and colours.

### Marking

For further information about engraving, hot stamping and film inserts see part Marking.

### Illumination

For illumination, indication or functional check the input button can be equipped with one or two light-emitting diodes (LED) 3 mm dia. For illumination some lenses are provided with recesses for LEDs. Luminosity and wave length scattering caused by the technology used in the LED manufacturing processes may lead to visual differences in our products.

## Specimen order

### Indicator :

- Indicator element 96-302.807

### Essential accessories :

- Cap for Indicator, Plastic grey, 1 LED, 12.4 x 17.4 mm 96-909.8

- Single-LED T1 Bi-Pin, 2.2 VDC, 20 mA, yellow 10-2602.3174E

*We reserve the right to modify technical data  
All dimensions in mm*

## Illuminated pushbutton

- 1 Lens
- 2 Switching element

## Indicator

for Indicator and Blind plug  
 usable for Caps 17.4 x 17.4 mm | 12.4 x 17.4 mm | 14.8 x 17.4 mm

### Essential Accessories:

-  Cap for Indicator page 78
-  Single LED standard page 84

<b>Lens remover</b>	<b>98-968</b>	0.004

## Snap-action switching element

### Switching system

Single-break, self-cleaning, snap-action switching element with tactile feel of operation.

### Material

#### lens Euro-Style

ABS/PC or ABS, self-extinguishing

#### Housing

Polyester, self-extinguishing

#### Material of contact

Gold-plated on nickel

### Front protection

IP 67, as per IEC 60529

### Shock resistance

(single impacts, semi-sinusoidal)  
≥30 g for 11 ms as per IEC 60512-4-3

### Vibration resistance

(sinusoidal)  
10 g at 10 Hz ... 2000 Hz, amplitude 0.75 mm, as per IEC 60512-4-4

## Mechanical characteristics

### Terminals

PCB terminal

### Actuating force

Actuating force 1.4 N ±0.3 N

### Actuating travel

Lead distance 1.0 mm ±0.3 mm

Total distance 1.7 mm ±0.5 mm

### Mechanical lifetime

≥5 million operations, as per IEC 60512-5-9a

### Rebound time

≤2.5 ms

## Electrical characteristics

### Contact resistance

Starting value (initial) ≤100 mΩ, as per IEC 60512-2-2b

### Isolation resistance

≥10<sup>12</sup> Ω between contacts at 100 VDC, as per IEC 60512-2-3a

### Capacity

Between contacts ≤1 pF

### Electrical life

≥5 x 100.000 operations at 30 VDC, 100 mA, as per IEC 60512-5, test 9c

### Conventional free air thermal current I<sub>th2</sub>

100 mA

### Switch rating

### Electric strength

500 VAC, 50 Hz, 1 min. between all terminals and earth, as per IEC 60512-2-11

## Environmental conditions

### Storage temperature

-40 °C ... +85 °C

### Service temperature

-25 °C ... +85 °C

## General notes

### 1. Engraving

In addition to the most commonly used world languages, in DIN 1451-3 close spacing, other typefaces are available as Scandinavian, Slavic, Greek, Russian and Polish.

Red, blue and black lenses are filled with white colour. Other colour lenses are filled in black. Standard height of letters is 2 mm. If the height is not specified, we will supply 2 mm engraved letters.

### 2. Hot stamping

On request. We will be pleased to advise you.

### 3. Film inserts

A special lens, 17.4 x 17.4 mm, available for insertion of a colour foil or film. The film thickness is 0.2 mm.

## Product Information

### General notes

The series 18 comprises compact indicators for direct connection to 2.2, 12 or 24 VDC and illuminated pushbuttons with maintained or momentary action.

The illuminated pushbuttons are equipped with a snap-action switching system with normally open or normally closed contacts.

The dimensions of the front are 9 x 14 mm, 9 x 9 mm or 9 mm dia.

Indicators and illuminated pushbuttons for use with overhanging lenses 14 x 14 mm or 14 mm dia. are also available for flush mounting.

### Mounting

Mounting from the front through the mounting hole 8 mm dia.

(15.8 x 15.8 mm resp. 16 mm dia. for flush mounting) is assured even with the wiring already attached.

The units are provided with soldering terminals.

### Lenses

The flat lenses are available in various colours and a transparent version. The surface is nonreflecting (matt).

### Illumination

Perfect illumination of the lenses, which can be supplied in various colours, is assured by Bi-Pin T1 LEDs (2.2 VDC) in the colours red, yellow and green.

(Compact indicators for connection to 12 or 24 VDC.) The Bi-Pin T1 LED are already integrated in the lenses.

Luminosity and wave length scattering caused by the technology used in the LED manufacturing processes may lead to visual differences in our products.

### Position indication

The status of a maintained action switch can be determined by the position of the lens.

## Specimen order

### Illuminated pushbutton :

- Illuminated pushbutton actuator, 9 x14 mm, 18-147.035  
momentary action, 1 normally open, soldering terminal

### Essential accessories :

- Lens with LED plastic yellow, transparent, 18-941.4  
flush, 9 x 14 mm

*We reserve the right to modify technical data*

*All dimensions in mm*

## Pushbutton illuminative, raised mounting

- 1 Lens
- 2 Switch housing
- 3 Front panel
- 4 Fixing nut

## Pushbutton illuminative, flush mounting

- 1 Lens
- 2 Switch housing
- 3 Front bezel set (upper part)
- 4 Front panel
- 5 Front bezel set (lower part)
- 6 Fixing nut

## Actuator with snap-action switching element

### Switching system

The snap-action switching system was designed for switching low powers in electronic circuits.  
Single-break snap-action contact.

### Material

#### Lens

Polymethylacrylate (PMMA), Polycarbonate (PC)

#### Material of contact

Gold contact on nickel plating

#### Actuator housing

Polyamide, colour black

### Mechanical characteristics

#### Terminals

The terminals can be used as soldering terminals.  
Max.wire diameter: 2 x 0.5 mm<sup>2</sup>  
Max.wire cross-section of stranded cable 1 x 0.75 mm<sup>2</sup>  
Wire cross-section of terminal 1.6 x 0.4 mm

#### Tightening torque

for fixing nut max. 20 Ncm

#### Actuating force

1.4 N

#### Actuating travel

2.2 mm ±0.2 mm

#### Rebound time

≤2.5 ms

#### Mechanical lifetime

Momentary action 2 million cycles of operation  
Maintained action 1 million cycles of operation,  
as per IEC 60512-5-9a

### Electrical characteristics

#### Contact resistance

≤100 mΩ starting value (initial), as per IEC 60512-2-2b

#### Electrical life

≥500 000 cycles of operation at 30 VDC, 100 mA, as per IEC 60512-5-9c

#### Power consumption LED

20 mA

#### Switch rating

min. 10 μA at 100 μV  
max. 100 mA at 42 VAC/VDC

#### Electric strength

500 VAC, 50 Hz, 1 min. between all terminals and earth, as per IEC 60512-2-11

### Environmental conditions

#### Storage temperature

-40 °C ... +80 °C

#### Service temperature

-25 °C ... +65 °C

#### Protection degree

IP 40 front side, as per IEC 60529

## Product Information

### General notes

The series contains indicators and illuminated pushbuttons with maintained and momentary action and one contact which may be normally closed or normally open (snap-action element for closing). The illuminated pushbuttons are fitted with snap-action or low-level switching systems.

The front dimensions are 9 x 9 mm or 9 mm dia.

### Mounting

Mounting from the front through the mounting hole is assured even when the wiring has already been attached.

The units are equipped with soldering/plug-in terminals.

### Lenses

The flat lenses, made of polycarbonate, are obtainable in various colours. The transparent lens is available with translucent or transparent support.

### Marking

A limited amount of marking can be provided.

### Illumination

Perfect illumination of the different coloured lenses is assured by filament lamps Bi-Pin T1 longlife (6 ... 24 V) or LED Bi-Pin T1. LED are available in the colours white, red, yellow, orange and green.

Luminosity and wave length scattering caused by the technology used in the LED manufacturing processes may lead to visual differences in our products.

### Position indication

The status of a maintained action switch can be determined by the position of the lens.

## Actuator with snap-action switching element

### Switching system

Single-break, snap-action switching system.  
1 normally open contact

### Material

#### Material of contact

Gold plated Silver, Silver plated

#### Switch housing

Polyetherimide (PEI), self-extinguishing

#### Actuator housing

Polyphenyleneoxide (PPO), self-extinguishing, colour black

### Mechanical characteristics

#### Terminals

Universal terminal:  
Max. wire diameter 2 x 0.8 mm  
Max. wire cross-section of stranded cable 1 x 0.75 mm<sup>2</sup>

Plug-in terminal: 2.0 x 0.5 mm  
For these terminals we can also supply a plug-in base which, when soldered on to the board, enables the switch to be plugged in.

#### Tightening torque

for fixing nut max. 20 Ncm

#### Actuating force

1.6 N

#### Actuating travel

2.8 mm ±0.2 mm

#### Mechanical lifetime

2 million operations

### Electrical characteristics

#### Switch rating

Silver plated:  
Max. 50 VAC / 72 VDC, 0.8 A or 50 W  
Min. 20 V, 10 mA  
Gold plated:  
Max. 50 VAC / 72 VDC, 100 mA or 5 W  
Min. 100 µV, 50 µA

#### Electric strength

2500 VAC, 50 Hz, 1 min. between all terminals and earth, as per IEC 60512-2-11

### Environmental conditions

#### Storage temperature

-40 °C ... +85 °C

#### Service temperature

without illumination -25 °C ... +65 °C  
with incandescent lamp -25 °C ... +45 °C  
with LED -25 °C ... +65 °C  
for indicators and illuminated pushbuttons mounted as a block, make sure the heat can escape freely

#### Protection degree

IP 40 front side, as per IEC 60529

## Actuator with low level switching element

### Switching system

This low-level switching system was designed for switching low powers in electronic circuits. The switching system assures reliable switching of loads.  
Single-break momentary contact, as normally open or normally closed with 4 independent points of contact.  
Special features are the long life, extremely short rebound time and stable contact resistance.  
1 normally open or 1 normally closed contact.

### Material

#### Material of contact

Gold plated

#### Actuator housing

Polyphenyleneoxide (PPO), self-extinguishing, colour black

### Mechanical characteristics

#### Terminals

Universal terminal:  
Max. wire diameter 2 x 0.8 mm  
Max. wire cross-section of stranded cable 1 x 0.75 mm<sup>2</sup>

Plug-in terminal: 2.0 x 0.5 mm  
For these terminals we can also supply a plug-in base which, when soldered on to the board, enables the switch to be plugged in.

#### Tightening torque

for fixing nut max. 20 Ncm

#### Actuating force

1.8 N ±0.3 N

#### Actuating travel

2.8 mm ±0.2 mm

#### Rebound time

Typ. <100 µs

#### Mechanical lifetime

5 million operations

### Electrical characteristics

#### Contact resistance

≤50 mΩ starting value (initial) as per IEC 60512-2-2b

#### Switch rating

10 µA, 100 µV to 100 mA at 42 VAC/VDC

#### Electric strength

2500 VAC, 50 Hz, 1 min. between all terminals and earth, as per IEC 60512-2-11

### Environmental conditions

#### Storage temperature

-40 °C ... +85 °C

#### Service temperature

without illumination -25 °C ... +65 °C  
with incandescent lamp -25 °C ... +45 °C  
with LED -25 °C ... +65 °C

for indicators and illuminated pushbuttons mounted as a block,  
make sure the heat can escape freely

**Protection degree**

IP 40 front side, as per IEC 60529

**Shock resistance**

(Single impacts, semi-sinusoidal)

15 g for 11 ms, as per IEC 60512-4-3, IEC 60068-2-27

## Product Information

### General notes

The Series 84 consists of indicators, pushbuttons and emergency-stop switches. The indicators and pushbuttons are a modular system of lens, actuator, switching element and a variety of means of connection and mounting. Different front protection of IP 67, IP 65 or IP 40 ensure that the pushbuttons are suited for industrial use.

Anodized aluminium parts can have visible variations due production-technical reasons.

### Mounting

The actuators of the Series 84 are inserted in a 22.5 mm diameter mounting hole and the switching units are clipped on to the rear of the actuators. The pushbutton system can be mounted as a complete unit (actuator and switching unit). Mounting from the front with the wiring already attached is also possible.

When mounted on printed circuit boards the actuators are inserted in the mounting hole 22.5 mm dia. and the switching elements are fixed on the board. The printed circuit board is connected to the preassembled actuator by means of the mounting flange. There is no need for subsequent adjustment or spacing studs.

### Lenses

The lenses are available in various colours and made either from plastic or anodized aluminium.

### Marking

The marking plates of the Series 84 can be marked by engraving or hot stamping.

Specific symbols and markings are available on request.

The lenses are without holder not engravable, since by mounting no accurate position of the engraving text is reached.

### Illumination

To ensure full illumination, the switching elements can be supplied with integrated single LEDs in the colours red, orange, yellow, green, blue or white. The series resistor is integrated.

Luminosity and wave length scattering caused by the technology used in the LED manufacturing processes may lead to visual differences in our products.

### Emergency-stop pushbutton, foolproof

The E-stop pushbutton can be mounted in front panels with a thickness between 1 and 4 mm. It has a low behind-panel depth of 13.5 mm (max.) respectively 18.5 mm with plug-in terminlas and can be safely and easily adapted to PCBs of different heights. The front protection degree is IP 65.

Importantly, the Series 84 emergency-stop requires no additional assembly because of its single-piece 'monoblock' design.

The switch's status is clearly indicated by a black or green colour ring on the shaft, and the foolproof actuator design conforms to DIN EN ISO 13850 and EN IEC 60947.

It can be supplied with LED illumination that is visible even from the side.

- 11 Fixing screws

## Emergency-stop pushbutton

- 1 Emergency-stop pushbutton
- 2 Fixing nut
- 3 Position indication ring green or black

## Arrangement mounting flange for switching- and illumination element, PCB mounting

The arrangement of the mounting flanges and their number is determined by the size of the front panel or PCB. To ensure uniform, tactile switching, we recommend a layout of the flanges as per adjacent sketch.

For large PCBs with several switching elements we recommend the following procedure :

1. Fit the actuator to the front panel.
2. Clip the mounting flange to the rear of the intended actuator.
3. Screw the PCB with the components soldered to it to the assembled mounting flange.

This arrangement applies to PCBs 1.6 mm thick.

## Dismantling mounting flange

The tool 84-998 must be used for removing the mounting flange from the actuator. Before removing the flange, the PCB fixing screws must be loosened.

## Emergency-stop pushbutton, foolproof EN IEC 60947-5-5, complete

Application as per DIN EN ISO 13850 and EN 60204-1

Standard version:

Flat ribbon-cable length 300 mm; Plug-in terminal 2.8 x 0.5 mm.

Other options on request:

Customisation of flat ribbon-cable and connectors.

Switching action: MA = Maintained action

Terminals: FR = Flat ribbon cable, PT 2.8 s = Plug-in terminal 2.8 mm (solderable)

Contacts: NC = Normally closed, NO = Normally open

Component layout from page 147, Mounting dimensions from page 150, Technical drawing from page 151, Circuit drawing from page 155

## Indicator actuator

Illuminated lens, non-illuminated bezel

### Essential Accessories:

-  Illumination element page 135
-  Lens plastic page 131

	Front protection	Front ring	Ø 25 mm Typ-Nr.	Mounting dimensions			Technical drawing
<b>Indicator actuator</b>	IP 40	Plastic black	<b>84-3100.0</b>	1	16	0.004

		PT 2.8 s		<b>84-8001.4620</b>	5	0.005		

Standard version:

Cable length 300 mm with insulated ferrule; Plug-in terminal 2.8 x 0.8 mm.

Other options on request:

Customisation of cable and connectors; Rear side fully sealed (IP 67).

Protection degree (rear side):

IP 40, upgrade to IP 67 with plug typ-Nr. 84-900 possible; With applications where strong vibrations occur, the plugs may become loose.

Terminals: FR = Flat ribbon cable, PT 2.8 s = Plug-in terminal 2.8 mm (solderable)

Circuit drawing from page 155

## Illumination element with Bi-colour illumination

	Illumination	Operating voltage/ current	Protection degree	Terminals	Typ-Nr.	Circuit drawing	
<b>Illumination element with Bi-colour illumination</b> LED and built-in resistor included	Bi-colour LED red/green	24 VDC, 20 mA	IP 40	PT 2.8 s	<b>84-8005.8620</b>	1	0.005
			IP 67	FR	<b>84-8005.8640</b>	2	0.011

			IP 67	FR	<b>84-8005.7640</b>	2	0.011

Standard version:

Cable length 300 mm with insulated ferrule; Plug-in terminal 2.8 x 0.8 mm.

Other options on request:

Customisation of cable and connectors; Rear side fully sealed (IP 67).

Best illumination level will be reached with Alu lens with window, Typ-Nr. 84-7215.x00 and 84-7211.x00.

Protection degree (rear side):

- Plug-in terminal IP 40, upgrade to IP 67 with plug typ-Nr. 84-900 possible. With applications where strong vibrations occur, the plugs may become loose.

- Cable connection IP 67, rear side fully sealed. The illumination element of the cable version cannot be disconnected from the actuator any longer.

Terminals: PT 2.8 s = Plug-in terminal 2.8 mm (solderable), FR = Flat ribbon cable

Circuit drawing from page 155

					PT 2.8 s	<b>84-8511.4620</b>	7	0.006	

Standard version:

Cable length 300 mm with insulated ferrule; Plug-in terminal 2.8 x 0.8 mm.

Other options on request:

Customisation of cable and connectors; Rear side fully sealed (IP 67).

Protection degree (rear side):

IP 40, upgrade to IP 67 with plug typ-Nr. 84-900 possible; With applications where strong vibrations occur, the plugs may become loose.

Contacts: NO = Normally open

Terminals: FR = Flat ribbon cable, PT 2.8 s = Plug-in terminal 2.8 mm (solderable)

Circuit drawing from page 155

## Switching element with Bi-colour illumination

	Protection degree	Contacts	Illumination	Operating voltage/-current	Terminals	Typ-Nr.	Circuit drawing	
<b>Switching element with Bi-colour illumination</b> LED and built-in resistor included	IP 67	1 NO	Bi-colour LED red/green	24 VDC, 20 mA	FR	<b>84-8515.8640</b>	3	0.015
			Bi-colour LED yellow/green	24 VDC, 20 mA	FR	<b>84-8515.7640</b>	3	0.015

Protection degree IP 67, rear side fully sealed. The switching element cannot be disconnected from the actuator any longer.

Best illumination level will be reached with Alu lens with window, Typ-Nr. 84-7215.x00 and 84-7211.x00.

Standard version:

Cable length 300 mm with insulated ferrule.

Other options on request:

Customisation of cable and connectors.

Contacts: NO = Normally open

Terminals: FR = Flat ribbon cable

Circuit drawing from page 155

## Switching element non-illuminated

	Protection degree	Contacts	Terminals	Typ-Nr.	Circuit drawing	
<b>Switching element non-illuminated</b>	IP 40	1 NO	FR	<b>84-8510.0040</b>	6	0.010

## Emergency-stop

### Switching system

The double-break switching system can be supplied for the following switching functions:

1 Normally closed, 2 Normally closed, 1 Normally closed + 1 Normally open.

The Normally closed contacts have forced opening according to EN IEC 60947-5-1

### Material

#### Connection cable

Polyvinylchloride (PVC), operating temperature up to +65 °C

#### Mushroom-head cap

Polybutylenterephthalate (PBT), as per UL 94 V0 (red items)

#### Actuator housing

Polyamide (PA 66), as per UL 94 V0, Flat ribbon cable-cover  
Polyamide (PA 6.6), as per UL 94 V0

#### Material of contact

Silver alloy gold plated

### Mechanical characteristics

#### Front panel thickness

Standard 1 ... 4 mm  
with E-stop protective shroud Typ-Nr. 84-902 1 ... 3 mm

#### Mounting hole

22.5 mm dia. as per EN IEC 60947-5-1 with anti-twist device

#### Terminals

Soldering terminals 2.8 x 0.5 mm (solderable), CuSn6 tin-plated  
Flat ribbon cable 2-, 4-, or 6-poles 0.35 mm<sup>2</sup> (AWG 22)

#### Tightening torque

Fixing nut 80 Ncm

#### Actuating force

22 N ±4 N

#### Actuating travel

approx. 4 mm to release the internal operation part

#### Mechanical lifetime

≥50.000 cycles of operations

### Electrical characteristics

#### Standards

The devices comply with : EN IEC 60947-5-1, EN IEC 60947-5-5 (Emergency-stop), DIN EN ISO 13850, EN IEC 60204

#### Illumination

LED red with pole reversal, constant current source

Operation Voltage 5 VDC ... 30 VDC  
Current consumption 9.7 mA ... 12.4 mA

#### Rated Operational Voltage $U_e$

250 VAC, as per EN IEC 60947-1

#### Rated Insulation Voltage $U_i$

250 V, as per EN IEC 60947-1

#### Rated Impulse Withstand Voltage $U_{imp}$

2.5 kV, as per EN IEC 60947-1

#### Contact resistance

New state ≤ 50 mΩ, as per DIN IEC 60512-2-3

#### Isolation resistance

>10<sup>11</sup> Ω between the open contacts at 500 VDC, as per DIN IEC 60512-2-10

#### Electrical life

≥50 000 cycles of operations (inductive cosφ 0.4), as per EN IEC 60947-5-1

Voltage	120 VAC	240 VAC	125 VDC	250 VDC
Current	3 A	1.5 A	0.55 A	0.27 A

Reduced load ≥50'000 cycles of operations (resistive)

Voltage	1 VAC/DC	42 VAC/DC
Current	100 mA	200 mA

#### Conventional free air thermal current $I_{th}$

5 A, as per EN IEC 60947-5-1  
the maximum current in continuous operation and at ambient temperature must not exceed the quoted maximum values.

#### Switch rating

Switch rating AC with silver contact (gold plated), service category AC-15, as per EN IEC 60947-5-1

Voltage	120 VAC	240 VAC
Current	3 A	1.5 A

Switch rating DC for silver contact (gold plated), service category DC-13, as per EN IEC 60947-5-1 (inductive)

Voltage	12 VDC	24 VDC	48 VDC	60 VDC	125 VDC	250 VDC
Current Plug	5 A	4 A	2.1 A	1.7 A	0.55 A	0.27 A
Current Cable	3 A	3 A	2.1 A	1.7 A	0.55 A	0.27 A

#### Recommended minimum operational data

Silver contacts (gold plated)

Voltage	1 VAC/DC
Current	1 mA

#### Electric strength

500 VAC, 50 Hz, 1 min, as per DIN IEC 60512-2

#### Rated conditional short-circuit current

1000 A, type of short-circuit unit 6 A gG, as per EN IEC 60947-5-1

#### Protection class

Class II, as per EN IEC 60947-5

#### Overvoltage category

II, as per EN IEC 60947-1

#### Degree of pollution

3, as per EN IEC 60947-1

### Environmental conditions

#### Storage temperature

-25 °C ... +80 °C

#### Operating temperature

-25 °C ... +65 °C

#### Front protection

IP 65, as per EN IEC 60529

## Shock resistance

(semi-sinusoidal)  
max. 150 m/s<sup>2</sup>, pulse width 11 ms, 3-axis, as per EN IEC 60068-2-27

## Vibration resistance

(sinusoidal)  
max. 50 m/s<sup>2</sup> at 10 Hz ... 500 Hz, 10 cycles, 3-axis, as per EN IEC 60068-2-6

## Climate resistance

Damp heat, cyclic  
96 hours, +25 °C / 97 %, +55 °C / 93 % relative humidity, as per EN IEC 60068-2-30

Damp heat, steady  
56 days, +40 °C / 93 % relative humidity, as per EN IEC 60068-2-78

Dry heat  
96 hours, +70 °C, as per EN IEC 60068-2-2

Low temperature  
96 hours, -40 °C, as per EN IEC 60068-2-1

Saline mist  
96 Stunden, +35 °C in chemical solution NaCl, as per EN IEC 60068-2-11

## Approvals

### Approbations

SEV  
UL

### Declaration of conformity

CE

## Switching element illuminated pushbutton

## Switching system

Short-travel switching system with 2 independent contact points and tactile operation.  
Guarantees reliable switching even of very light loads.  
Fitted with 1 normally open contact.

## Material

### Connection cable

Polyvinylchloride (PVC), short-time heat-resistant up to 105 °C

### Material of contact

Silver alloy gold plated

### Switching element

Thermoplastic polyester (PET, PBT), as per UL 94 V0 and Polyacetale (POM), as per UL 94 HB

## Mechanical characteristics

### Terminals

Plug-in terminals 2.8 x 0.8 mm (solderable)  
Flat ribbon cable 0.5 mm<sup>2</sup>  
PCB terminal

### Actuating force

4.0 N ±0.2 N (measured at the lens)

### Actuating travel

~0.5 mm

## Rebound time

≤1 ms

## Resistance to heat of soldering

260 °C, 5 s (PCB assembly)  
350 °C, 10 s (when using a soldering iron)  
as per EN IEC 60068-2-20

## Mechanical lifetime

≥1 million cycles of operations

## Electrical characteristics

### Illumination

Single-Chip or Multi-Chip LED, green, orange, red, yellow, white and blue

Operation Voltage 12 VDC 24 VDC

Current consumption 40 mA 20 mA

### Contact resistance

Starting value (initial) ≤100 mΩ, as per DIN IEC 60512-2

### Isolation resistance

≥1 G Ω between all terminals at 100 VDC, as per DIN IEC 60512-2

### Electrical life

as per EN IEC 60512-5

5 million	cycles of operation	24 VAC, 50 mA at 480 Ω
5 million	cycles of operation	24 VAC, 100 mA at 240 Ω
2 million	cycles of operation	42 VAC, 50 mA at 840 Ω
2 million	cycles of operation	42 VAC, 100 mA at 420 Ω
300 000	cycles of operation	42 VAC, 100 mA at cosφ 0,4
250 000	cycles of operation	42 VAC, 200 mA at cosφ 0,395

1 million	cycles of operation	12 VDC, 250 mA at 48 Ω
1 million	cycles of operation	24 VDC, 50 mA at 480 Ω
1 million	cycles of operation	24 VDC, 100 mA at 240 Ω
5 million	cycles of operation	42 VDC, 25 mA at 1680 Ω
1.5 million	cycles of operation	42 VDC, 50 mA at 840 Ω
100 000	cycles of operation	42 VDC, 100 mA at 420 Ω

500 000	cycles of operation	24 VDC, 200 mA at L/R=30 ms
300 000	cycles of operation	42 VDC, 100 mA at L/R=30 ms
100 000	cycles of operation	42 VDC, 200 mA at L/R=30 ms

### Switch rating

Voltage 50 mVAC/DC ... 42 VAC/DC

Current 10 uA ... 100 mA

Power max. 2 W

### Electric strength

500 VAC, 50 Hz, 1 min, as per DIN IEC 60512-2

## Environmental conditions

### Storage temperature

-40 °C ... +85 °C

### Operating temperature

-25 °C ... +70 °C

### Protection degree

Back protection:

IP 40, standard version

IP 67, fully sealed version, with mounted actuator only.

**Shock resistance**

(semi-sinusoidal)

max. 100 m/s<sup>2</sup>, pulse width 11 ms, 3-axis, as per EN IEC 60068-2-27

**Vibration resistance**

(sinusoidal)

max. 50 m/s<sup>2</sup> at 10 Hz ... 500 Hz, 10 cycles, 3-axis, as per EN IEC 60068-2-6

## Actuator

### Material

**Lens**

Polycarbonate (PC), as per UL 94 V2 or Aluminium anodised

**Actuator housing**

Polyetherimid (PEI), as per UL 94 V0 or Aluminium anodised

### Mechanical characteristics

**Mounting hole**

22.5 mm dia. and 30.5 mm dia.

**Tightening torque**

Fixing nut max. 80 Ncm

**Actuating force**

4.0 N ±0.2 N (measured at the lens)

**Actuating travel**

Total switching travel 1.2 mm

**Mechanical lifetime**

≥1 million cycles of operations

### Electrical characteristics

**Electrostatic breakdown value**

Plastic case ≥15 kV

Aluminium case ≥5 kV

as per IEC 61000-4-2, mounted in plastic front panel

### Environmental conditions

**Storage temperature**

-40 °C ... +85 °C

**Operating temperature**

-25 °C ... +70 °C

**Front protection**

IP 67, IP 65 and IP40, as per EN IEC 60529

**Climate resistance**

Damp heat, cyclic

96 hours, +25 °C / 97 %, +55 °C / 93 % relative humidity, as per EN IEC 60068-2-30

Damp heat, state

56 days, +40 °C / 93 % relative humidity, as per EN IEC 60068-2-78

Rapid change of temperature

100 cycles, -40 °C ... +80 °C, as per EN IEC 60068-2-14

## Suppressor circuits

When switching inductive loads such as relays, DC motors, and DC solenoids, it is always important to absorb surges (e.g. with a diode) to protect the contacts. When these inductive loads are switched off, a counter emf can severely damage switch contacts and greatly shorten lifetime.

Fig. 1 shows an inductive load with a free-wheeling diode connected in parallel. This free-wheeling diode provides a path for the inductor current to flow when the current is interrupted by the switch. Without this free-wheeling diode, the voltage across the coil will be limited only by dielectric breakdown voltages of the circuit or parasitic elements of the coil. This voltage can be kilovolts in amplitude even when nominal circuit voltages are low (e.g. 12 VDC) see Fig. 2.

The free-wheeling diode should be chosen so that the reverse breakdown voltage is greater than the voltage driving the inductive load. The DC blocking voltage (VR) of the free-wheeling diode can be found in the datasheet of a diode. The forward current should be equal or greater than the maximum current flowing through the load.

**To get an efficient protection, the free-wheeling diode must be connected as close as possible to the inductive load!**

Switching with inductive load

Fig. 1

Counter emf over load without free-wheeling diode

Fig. 2

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
