Hints on Correct Use**Mounting**

The A8A can be mounted on a panel by one-touch. Mount the switch on the panel with the specified cutout dimensions and thickness. Do not use a warped panel or one with a protruding seam.

A mark (1.8-dia. depression) is provided on the case flange to indicate the ON side of the switch. Use this mark for reference when mounting the switch.

Wiring

The terminal Nos. 1 and 3 of the lighted type are at the primary side. The neon lamp of the lighted type illuminates when the switch is turned ON and extinguishes when it is turned OFF.
