## 2.4 GHz 256 QAM High-Power Amplifier

---

---

### Features

- High Gain:
  - Typically 33 dB gain across 2.4–2.5 GHz over temperature -40°C to +85°C
- High linear output power, typical performance:
  - 1.75% dynamic EVM up to 23 dBm, MCS8, 256 QAM, 40 MHz
  - 2.5% EVM up to 24 dBm, 802.11n, HT40
  - 3% EVM up to 25 dBm for 54 Mbps 802.11g signal
  - Meets 802.11g OFDM spectrum mask requirement up to 28.5 dBm
  - Meets 802.11b ACPR requirement up to 28.5 dBm
- High-speed power-up/down
  - Turn on/off time (10%-90%) <100 ns
- 10:1 VSWR survivability (unconditionally stable up to 28.5 dBm)
- On-chip power detection
  - 20 dB dynamic range
  - VSWR- and temperature-insensitive
- Simple input/output matching
- Packages available
  - 16-contact UQFN (3mm x 3mm)
- All non-Pb (lead-free) devices are RoHS compliant

### Applications

- WLAN (IEEE 802.11b/g/n)
- AP router
- WiMax (IEEE 802.16e)
- Home RF
- Cordless phones
- 2.4 GHz ISM wireless equipment
- 1.8-2.3 GHz femtocell base stations

### Product Description

SST12CP12 is a high-power, 256 QAM power amplifier (PA) based on the highly-reliable InGaP/GaAs HBT technology.

Operating over the 2.4–2.5 GHz frequency band, the PA will typically provide 33 dB gain with 25% power-added efficiency @  $P_{OUT} = 28$  dBm for 802.11g.

SST12CP12 has excellent linearity, providing less than 1.75%

dynamic EVM up to 23 dBm with MCS8, 40 MHz bandwidth modulation. It will also provide typically 3% added EVM at 25 dBm output power with 54 Mbps 802.11g operation while meeting 802.11g spectrum mask at 28.5 dBm. SST12CP12 also has a single-ended power detector for active power control.

The power amplifier IC also features high-speed power-up/-down control with the  $V_{REF}$  control pins.

SST12CP12 is offered in 16-contact UQFN package. See [Figure 2-1](#) for pin assignments and [Table 3-1](#) for pin descriptions.

## TO OUR VALUED CUSTOMERS

It is our intention to provide our valued customers with the best documentation possible to ensure successful use of your Microchip products. To this end, we will continue to improve our publications to better suit your needs. Our publications will be refined and enhanced as new volumes and updates are introduced.

If you have any questions or comments regarding this publication, please contact the Marketing Communications Department via E-mail at [docerrors@microchip.com](mailto:docerrors@microchip.com). We welcome your feedback.

### Most Current Data Sheet

To obtain the most up-to-date version of this data sheet, please register at our Worldwide Web site at:

<http://www.microchip.com>

You can determine the version of a data sheet by examining its literature number found on the bottom outside corner of any page. The last character of the literature number is the version number, (e.g., DS30000000A is version A of document DS30000000).

### Errata

An errata sheet, describing minor operational differences from the data sheet and recommended workarounds, may exist for current devices. As device/documentation issues become known to us, we will publish an errata sheet. The errata will specify the revision of silicon and revision of document to which it applies.

To determine if an errata sheet exists for a particular device, please check with one of the following:

- Microchip's Worldwide Web site; <http://www.microchip.com>
- Your local Microchip sales office (see last page)

When contacting a sales office, please specify which device, revision of silicon and data sheet (include literature number) you are using.

### Customer Notification System

Register on our web site at [www.microchip.com](http://www.microchip.com) to receive the most current information on all of our products.

## 4.0 ELECTRICAL SPECIFICATIONS

The AC and DC specifications for the power amplifier interface signals. Refer to Table 4-2 for the DC voltage and current specifications. Refer to Figures 5-1 through 6-5 for the RF performance.

**Absolute Maximum Stress Ratings** (Applied conditions greater than those listed under “Absolute Maximum Stress Ratings” may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these conditions or conditions greater than those defined in the operational sections of this data sheet is not implied. Exposure to absolute maximum stress rating conditions may affect device reliability.)

|   |                      |
|---|----------------------|
| Input power to pins 2 and 3 ( $P_{IN}$ )                            | 5 dBm                |
| Supply Voltage at pins 5, 12, 14, 16 ( $V_{CC}$ )                   | +6V                  |
| Reference voltage to pins 4 ( $V_{REF1}$ ) and pin 7 ( $V_{REF2}$ ) | +3.5V                |

7.0 PACKAGE INFORMATION

FIGURE 7-1: 16-CONTACT ULTRA-THIN QUAD FLAT NO-LEAD (UQFN)  
PACKAGE CODE: QUC

- Note: 1. Complies with JEDEC JEP95 MO-248D, variant UEED-4 except external paddle nominal dimensions.  
 2. From the bottom view, the pin #1 indicator may be either a 45-degree chamfer or a half-circle notch.  
 3. The external paddle is electrically connected to the die back-side and possibly to certain V<sub>SS</sub> leads. This paddle can be soldered to the PC board; it is suggested to connect this paddle to the V<sub>SS</sub> of the unit. Connection of this paddle to any other voltage potential can result in shorts and/or electrical malfunction of the device.  
 4. Untoleranced dimensions are nominal target dimensions.  
 5. All linear dimensions are in millimeters (max/min).

## THE MICROCHIP WEB SITE

Microchip provides online support via our WWW site at [www.microchip.com](http://www.microchip.com). This web site is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the web site contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

## CUSTOMER CHANGE NOTIFICATION SERVICE

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip web site at [www.microchip.com](http://www.microchip.com). Under "Support", click on "Customer Change Notification" and follow the registration instructions.

## CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or field application engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

**Technical support is available through the web site at: <http://microchip.com/support>**

## 8.0 PRODUCT IDENTIFICATION SYSTEM

To order or obtain information, e.g., on pricing or delivery, refer to the factory or the listed sales office.

| <u>PART NO.</u>     |           | <u>XXX</u>   |
|---------------------|-----------|--|
| Device              |           | Package  |
| Device:             | SST12CP12 | = 2.4 GHz High-power and High-gain Power Amplifier |
| Package:            | QUCE      | = UQFN (3mm x 3mm), 0.6 max thickness 16-contact   |
| Evaluation Kit Flag | K         | = Evaluation Kit                                   |

**Valid Combinations:**  
 SST12CP12-QUCE  
 SST12CP12-QUCE-K

---

**Note the following details of the code protection feature on Microchip devices:**

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as “unbreakable.”

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
