C5000™ Ultra-Low-Power DSP Audio Capacitive Touch BoosterPack

Product Bulletin

For MSP430™ Value Line LaunchPad Development Kit

The Audio Capacitive Touch BoosterPack (ACTBP) is a plug-in board for the LaunchPad development kit and MSP430 Value Line microcontrollers. The kit offers a complete reference design for capacitive touch solutions, using the capacitive touch I/O ports of select MSP430 Value Line microcontrollers. This reference design allows designers to easily control the C5000 ultra-low-power DSP using Tl's MSP430 microcontroller for crystal clear

playback and record of MP3 audio/voice files. Using the Audio BoosterPack, programmers realize the power and efficiency of the C5000 DSP without having to learn how to program the DSP. And the combination of the lowest standby power microcontroller (MSP430) with the lowest total power DSP (C5000) allows manufacturers to deliver ultra-low-power devices with extremely long battery life.

Key benefits

- Includes MSP430G2553IN20 Value Line microcontroller – pre-programmed with demo firmware to easily control complex DSP algorithms
- Includes the TMS320C5535 digital signal processor (DSP) – lowest active power for crystal clear audio/voice MP3 encode and decode
- Supported by a user interface for OLED display and MP3 playback/record application APIs
- Capacitive touch scroll wheel, proximity sensor and on-board LEDs
- Supported by a complete capacitive touch software library
- Stereo single-jack headset connector (supports stereo/mono headphones with built-in mic)
- microSD card with pre-programmed DSP code for MP3 playback, record and music storage (file storage)
- USB mass storage device capability for the microSD card with provided USB cable
- OLED display (monochrome, 96×16 pixels)
- · Quick Start Guide included

Technical Details

The Audio Capacitive Touch BoosterPack allows quick evaluation and simplified design of audio capacitive touch products and includes:

- BoosterPack board with ultra-low-power C5000 DSP for crystal clear playback and recording of MP3 audio and video files
- microSD card pre-programmed with the DSP function code -- MP3 playback, record and music storage (file storage)
- Mini-USB cable for connection with a computer to power up the system
- Stereo single-jack headset connector (supports stereo/mono headphones with built-in mic)
- Initial demo headset with integrated microphone
- MSP430G2553 Value Line Microcontroller pre-programmed with the ACTBP host demo application – this will replace the MSP430 on the separate LaunchPad (not included).
- Supported by a user interface for OLED display and MP3 playback/record application APIs
- Capacitive touch scroll wheel, proximity sensor and on-board LEDs
- Supported by a complete capacitive touch software library
- USB mass storage device capability for the microSD card with provided USB cable
- OLED display (monochrome, 96×16 pixels)
- Quick start quide

Software

Through the MSP430 LaunchPad (not included), designers can interface with integrated software environments such as Code Composer Studio version 4 or IAR Embedded Workbench. These free IDEs include an assembler, linker, simulator, source-level debugger and C-compiler to help developers integrate new and customized audio and voice applications. TI also offers a complete capacitive touch software library, enabling designers to quickly and easily prototype and test new designs.

Support

With the Audio Capacitive Touch BoosterPack designers also get unlimited access to the LaunchPad Wiki. This Wiki promotes collaboration and simple sharing of solutions and ideas, making LaunchPad along with the BoosterPack a complete development environment for audio capacitive touch designs. This active and growing online community supplements the hardware and software components of the LaunchPad and

BoosterPack package and provides instant support, projects and helpful hints that will be shared through the Wiki pages and E2ETM forums.

For customers looking for extra support for the C5000 DSP, TI offers complete support by TI's extensive Developer Network, as well as a complete Chip Support Library, comprehensive application notes, reference designs, application guides, videos and online communities.

Get Started Today

Easily upgrade low-power applications with Ti's new C5000 DSP-based Audio Capacitive Touch BoosterPack for the MSP430 LaunchPad development kit. For the first time, new functionalities can be enabled on the DSP and controlled solely by the MCU, including crystal clear audio capabilities.

For more information on the C5000 Audio Capacitive Touch BoosterPack, please visit www.ti.com/audioboosterpack.

Important Notice: The products and services of Texas Instruments Incorporated and its subsidiaries described herein are sold subject to TI's standard terms and conditions of sale. Customers are advised to obtain the most current and complete information about TI products and services before placing orders. TI assumes no liability for applications assistance, customer's applications or product designs, software performance, or infringement of patents. The publication of information regarding any other company's products or services does not constitute TI's approval, warranty or endorsement thereof.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

Applications

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001:
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
