

Call for additional listings

The CSH-1224W Strobe/Horn Series provides a wide range of candela light output options in a single device. The candela settings include a 12 or 24 volt DC operation for the 1-3 settings candela settings and 24 volt DC operation for the 1-6 candela settings. The candela setting is displayed through the front window and is selectable using a drum wheel.

The horn settings include Temporal, Non-Temporal, March Time and a Chime sound. The horn also has Low, Mid and High volume settings for each pattern and tone. The tones include 2400 Hz, Electro-Mechanical, Broadband and Chime.

The voltage input can be either regulated DC or full wave rectified (FWR) 12 volt or 24 volt operation with an operating range of 8 to

- 3 settings at 12 VDC
- 6 settings at 24 VDC
- Strobe output selection view window
- Pre-wire back plate
- Universal back plate mounting (single gang, double gang, octagon, or 4" square)
- Single screw mounting
- 33 sound output settings
- Indoor or outdoor
- Anodized reflector for true light output
- UL and cUL listed

Patents pending

* Outdoor installation requires the BBK-1 #1500001, BBX-5R #4270048, or BBX-5W #4270049

33V DC. The strobes can be synchronized using a control panel with the Potter (Amseco) sync protocol or SMD10-3A sync module.

The CSH-1224W utilizes a universal mounting plate that will mount on a single gang, double gang, octagon and 4" square electrical boxes. The back plate allows the installer to mount the plate and terminate the wire connections. The strobe/horn attaches in a hinge fashion from the top and is secured by a single mounting screw. The strobe/horn completely covers the mounting back plate, therefore it can be mounted before other trades work is completed and not affect the final look.

The Potter mass notification strobe/horn is listed for indoor and outdoor installations. For outdoor installations, the device must be mounted on a matching BBX-5 or BBK-1 outdoor bell back box.

Installation

Note: Installation must comply in accordance with applicable standards.

⚠ WARNING

High voltage may be present inside the light assembly even though power is not connected. If access to the component board is required (removal or replacement), the capacitor must be discharged by touching a wire to both ends of the flashtube.

DO NOT attempt to touch or move the assembly until the capacitor has been discharged.

Horn Dipswitch

Pattern

- 1 ON - Non-temporal
- 1 OFF - Temporal
- Both 2 = OFF
- 1 and 2 ON = March Time

Tone

- 3 and 4 ON = 2400Hz
- 3 ON and 4 OFF = Electromechanical
- 3 and 4 OFF = Chime
- 3 OFF and 4 ON = Broadband

Volume

- 5 and 6 ON = High
- 5 ON and 6 OFF = Mid
- 5 and 6 OFF = Low
- 7 and 8 ON = Horn/strobe on 2 wires
- 7 and 8 OFF = Horn/strobe on 4 wires

Engineering Specifications

The installer shall provide and install the Potter CSH-1224W selectable strobe/horn. The strobe shall have six (6) selectable settings. The selectable settings shall be selectable using a drum roller and shall display the setting on the front of the device. The strobe shall have a colored lens and anodized reflector. A colored lens on a standard reflector shall not be acceptable. The horn shall have 33 selectable settings configurable by dip switches. The sounder shall be capable of ANSI Temporal Code 3, March Time and produce a chime output. The horn shall have three distinct volume levels. The strobe/horn shall operate at 12 or 24 VDC regulated or full wave rectified. The strobe/horn shall have an operating range between 8 and 33 VDC. The strobe/horn shall utilize a mounting plate that allows the installer to pre-wire the mounting plate. The mounting plate shall be

universal and mount on a single gang, double gang, octagon or 4 inch square box. The mounting plate shall be completely covered by the strobe/horn and shall be secured by a single screw. The device shall be listed for indoor and outdoor applications. Outdoor installations shall require a matching BBX-5 or BBK-1 weatherproof bell back box. The operating range shall be 32°F to 120°F (0°C to 49°C) for the indoor installations and -40°F to 151°F (-40°C to 66°C) for the outdoor installations. The strobe/horn shall be UL listed to standard 1638, General Signaling, and standard 1971, Signaling Devices for the Hearing Impaired. In addition, the strobe/horns shall be cUL listed to CAN-ULC S526. The horn shall be UL listed to standard 464, Audible Signaling Devices.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
