This connector requires delicate and careful handling.
 Read through the instructions shown below and handle the connector properly.
 Each values indicating here are for reference and may differ from standard value.

【 INSTRUCTIONS FOR MOUNTING ON THE BOARD 】

◆Warp of Board
 Minimize warp of the board as much as possible.
 Lead co-planarity is 0.1 mm or less.
 Too much warp of the board may result in a soldering failure.

⚠ ◆Load to Connector
 Do not add 1N or greater external force when unreel or pick and place the connector etc.
 or it may get broken.
 In addition, do not insert the FPC or operate the connector before mounting it.

⚠ 【 INSTRUCTIONS FOR PCB HANDLING AFTER MOUNTING THE CONNECTOR 】

◆Load to Board
 - Splitting a large board into several pieces
 - Screwing the board
 Avoid the handling described above so that no force is exerted on the board during the assembly process.
 Otherwise, the connector may become defective.

◆Amount of Warp
 The warp of a 100 mm wide board should be 1 mm or less.
 The warp of board suffers stress on connector and the connector may become defective.

【 INSTRUCTIONS ON INSERTING FFC AND CONNECTION 】

◆Actuator position
 Actuator position as delivered is ready for FFC insertion.
 FFC locked position is that the FFC is inserted and the actuator is rotated by 90° .
 Do not rotate the actuator before FFC is inserted.

◆Direction of contacts
 Insert the FFC in a way that the FFC circuit exposed side faces to the housing,
 and FFC stiffener side to the actuator.

◆Inserting the FFC
 Insert the FFC at a right angle to the connector and properly to the very end.

◆Use of the actuator

1. The actuator rotates around the rotational axis as shown below. Rotate the actuator.
2. The actuator will not open more than 90°. Do not apply any force backward beyond this point. It may cause contact deformation and actuator breakage.
3. Do not pinch or pick the actuator to lift it as shown below. Otherwise, it may break. (Do not carry out any operation other than rotating the actuator as shown above.)

◆Checking the Locking Condition

1. In the locked condition, make sure that the actuator is horizontal on the board surface.
2. After FFC is locked, make sure the position of TAB and guides.

【 INSTRUCTION ON FFC LAYOUT CONNECTION 】

◆Load to FFC

Be very careful not to apply force to the connector directly after inserting FFC. Otherwise, the connector or the FFC may break. In particular, design the FFC layout with care not to bend it sharply in a direction of the actuator side near the insertion operating.

【 INSTRUCTIONS ON REMOVING FFC 】

◆For FFC removal, remove the FFC after unlocking the actuator. Remove the FFC by about 7 degrees perpendicular to PCB.

【 OTHER INSTRUCTIONS 】

◆Instructions on Manual Soldering

Follow the instructions shown below when soldering the connector manually during repair work, etc.

1. Do not perform reflow soldering or manual soldering with the FFC inserted into the connector.
2. Do not heat the connector excessively. Be very careful not to let the soldering iron contact any parts other than connector leads. Otherwise, the connector may be deformed or melt.
3. Do not use excessive solder (or flux).

If excessive solder (or flux) is used on the terminals, solder or flux may adhere to the contacts or rotating parts of the actuator, resulting in poor contact or a rotation failure of the actuator.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
