

DisplayPort 1.2 to VGA Active Adapter Cable, DP with Latches to HD15 (M/M), 1920x1200/1080p, 6 ft.

MODEL NUMBER: P581-006-VGA-V2

Description

The P581-006-VGA-V2 DisplayPort 1.2 to VGA Active Adapter Cable with inline signal converter connects a DisplayPort computer to the VGA port on a monitor, projector or television. With a latching DisplayPort male connector on one end and an HD15 male connector on the other, this cable requires no separate adapter. It features a low profile VGA connector that fits neatly into the available monitor space, without jamming between the wall and the back of the display or impeding neighboring connectors. It lets you use your existing VGA display instead of buying a new DisplayPort monitor.

Ideal for displaying video on a large monitor or digital sign, this cable supports computer video resolutions up to 1920 x 1200 and high-definition video resolutions up to 1920 x 1080 (1080p). It converts both Single-Mode and Dual-Mode (DP++) DisplayPort output, and is perfect for use with graphics cards, such as AMD Eyefinity, that do not output DP++ signals.

First-class foil and braid shielding delivers reliable, error-free signal quality and protection from EMI/RFI interference. Nickel-plated connectors with gold-plated contacts ensure excellent conductivity. The DisplayPort plug latches to the port to provide a secure connection. Integral strain relief ensures the cable and molded connectors last a long time.
