# The World of Industrial Connectivity

As experienced experts we support our customers and partners around the world with products, solutions and services in the industrial environment of power, signal and data. Immerse yourself in our world of Industrial Connectivity. Let's connect.

# Dear Customers,

The PDF versions of our catalogues offer practical additional functions, helping you to find your way around our product range and simplifying the ordering process.

In addition to the catalogue, the PDF also contains:

- Internal page links
- Links to the online catalogue

Try it out for yourself. Click the order number to obtain more detailed information and close-up images via your web browser. The links in the PDF file also enable you to go directly to the next desired catalogue page.

Further Weidmüller product catalogues can be accessed by clicking the following:

## Klippon® – Proven over the years

The Klippon® brand has long stood for competence and quality in enclosures – in particular for industrial standard applications and for applications in explosive and harsh environments. Klippon® is a trademark of the Weidmüller Group, which operates worldwide in 70 countries through its sales offices, production facilities and sales agencies.

Weidmüller had already started producing enclosures in the 1960s. Weidmüller has demonstrated its reputation as a competent and reliable partner innumerable times. Weidmüller's name has stood for innovative products that can cope with even the most demanding market needs since then.

Weidmüller meets these requirements with a range of steel enclosures from the Klippon® TB range, available in Multi-Hinge (MH), Quarter-Lock (QL) and Fixing-Screw (FS) versions, and from the new Klippon® TBi range, available in Quarter-Lock (QL) and Fixing-Screw (FS) versions, as well as the Klippon® STB range and the aluminium enclosures

of the Klippon® K range. The portfolio is complimented by the polyester enclosures of the Klippon® POK range and polycarbonate enclosures. In addition, a wide range of different accessories are available including cable glands, sealing plugs, adaptors, pressure compensation elements, etc. Regardless of the application being designed, Weidmüller offers many customised enclosure and individually tailored services to its customers. These include turnkey enclosure solutions with customer specific configurations (such as mounting rails, drilled holes, cable glands, cut-outs, special coatings, etc.).

*Additional information can be found in Section W – Technical Appendix.*

## Harmonisation – the key to market success!

Weidmüller's products and services meet not only its own internal high standards, but also international quality and safety standards. The Klippon® TB enclosure range is one of the first products to be approved and certified as being compliant with IEC /EN 60079. This range of standards provides a harmonised approach to the development and manufacture of equipment for use in potentially explosive atmospheres.

Weidmüller enclosures are specially tailored to meet the ever changing and extremely harsh environments of these industries. Certified in accordance with international standards, they also meet the new ATEX and IECEx regulations for potentially explosive atmospheres and have further certifications for use in standard industrial applications. You can find innovative solutions from Weidmüller everywhere; from power distribution or control and monitoring systems in boiler and turbine control systems, in fuel management and combustion control systems, or in transmission and distribution applications.

### Experts in EX for application-specific solutions

Weidmüller's Customer-specific Solutions division offers application-specific EX solutions. Our competent team is here to take care of each individual customer requirement.

Special measures must be taken to guarantee employee health and safety in explosive hazard areas. This is regulated by the ATEX European Community directives 1999/92/EC and 94/9/EC, which classify the various areas of danger and associated selection of explosion-protected equipment into zones.

Weidmüller's customer-specific production is monitored by a notified body in accordance with European regulations. It meets all the requirements of the IECEx scheme for equipment based on the standards of the International Electrotechnical Commission.

*More on this can be found in chapter W - Technical Appendix.*

## When quality is the key

Weidmüller's enclosures are often used in harsh environments. They remain reliable for many years thanks to the high quality levels, even when exposed to external influences like water, dust, hard impacts, shock, vibration, corrosion, and extreme temperature fluctuations.

All components used in potentially explosive atmospheres are subject to strict safety regulations and are checked to the finest detail in terms of their functionality as well as their resistance and resilience against the prevailing environmental conditions.

As each enclosure is only as strong as its weakest point, Weidmüller consistently ensures that each individual component is of the highest quality and that it will not therefore cause a weak point in the enclosure. Evidence of this high quality and the functionality of the enclosure is provided by our own laboratory following intensive and careful testing to the international standards.

### IP protection class testing

The most important function of an enclosure is to protect the internal components from external influences like moisture or dust.

Enclosures are therefore classified in terms of IP (Ingress Protection) protection classes. To certify this, the enclosures are tested in line with DIN EN 60529 in an accredited Weidmüller laboratory.

Further tests are carried out in our accredited laboratory:

- Impact resistance testing (IK number)
- Shock and vibration test
- Salt spray test (proof of corrosion resistance)
- Long-term testing in accordance with IECEx
  - Heat resistance
  - Cold resistance
- Computer tomography (CT)

## Application specific solutions – your requirements are our motivation

Each branch has its own specific requirements and increasingly need individual solutions in addition to our standard product range. Many applications are subject to high levels of mechanical stress, for example due to vibrations or direct forces. Extreme temperature conditions or use in potentially explosive atmospheres are additional factors which the enclosure must be designed to cope with. Weidmüller provides competent and goal-oriented support to assist in the choice of the optimum product for every application.

Be it individual product development, customer specific assembly or ready-made application-specific products, Weidmüller helps to optimise work sequences with the perfect product solution. This ensures cost effectiveness for our customers not just today, but also enduring into the future.

## Customer-specific assembly

### Product consulting, development and manufacture – all from a single source

Weidmüller is a reliable partner; we tailor-make individual enclosure solutions intelligently which meet the needs of our customers. Customer costs are reduced, efficiency increased and the customer can concentrate fully on their core business. Weidmüller has the application knowledge and the capacity to provide these tailor-made solutions quickly, flexibly and economically. Weidmüller forms a partnership with its customers, providing advice and always being on-hand to deal with any questions. When it comes to designing the task, we do so together. In the larger process, Weidmüller can choose from its wide product range to provide the ideal components to allow the appropriate solution to be set up.

## Highest level manufacturing expertise

Weidmüller is globally known for its high quality enclosures. To guarantee these high quality standards only the highest quality materials were used for the production of the new Klippon® TB range. Their production was done using state of the art techniques.

High quality Klippon® TB enclosures are manufactured in nine steps:

- Fully automated laser cutting
- Computer-aided bending
- Process-safe welding
- Innovative welding of the female threaded sockets
- Surface treatment (electropolishing)
- Sealing gasket cutting
- Final assembly
- In-process quality controls
- Innovative packaging

## Drawing design – For chapter B

The drawings contained in chapter B are constructed in the following way.

To identify the enclosure side views, these are marked with the letters A, B, C, D, E, and F. The schematic 3D representations shown underneath are of an enclosure that has been wall mounted.

- F** shows the view of the enclosure lid (front aspect),
- E** shows the interior surface of the enclosure (rear wall of the enclosure with the cover removed).
- A** shows the view of the enclosure from above and
- B** the view of the enclosure from underneath.
- C** shows the left and
- D** the right side of the enclosure.
- E** is the front view of the enclosure interior with the cover removed (enclosure rear wall).

You can find the dimensions of the enclosure sides for all enclosure sizes in each drawing.

- A** = Top
- B** = Bottom
- C** = Left
- D** = Right
- E** = Enclosure rear wall
- F** = Enclosure lid

# Klippon® TB MH - Multi Hinge

## Steel enclosures for use in industrial and in potentially explosive atmospheres

The Klippon® TB enclosure range features excellent performance characteristics, even under the most difficult environmental conditions, and also comply with the stricter requirements of potentially explosive atmospheres found in the process or power generation industries. The Klippon® TB MH enclosure range offers further improvements to a product line that is already successfully leading the market.

Weidmüller can manufacture and supply this enclosure to match customer specifications and fitted with all necessary terminals and cable glands.

## Overview of enclosures

#### Note

\* Placeholder for the number of gland plates (1, 2, 3, 4). Klippon® TB MH enclosures are available without gland plates on request.

## Technical Overview

### Features

- Available in 12 sizes and 3 standard depths
- Equipped with up to 4 gland plates
- The gasket is protected against compression
- Completely removable padlock tab
- Cover lock outside the sealed zone
- Improved temperature performance
- IP 66/IP 67 protection
- Lid can be removed without a tool
- Earth studs in enclosure cover and bottom section
- Welded mounting feet
- International approvals

## Integrate, expand and customise: the perfect supplement to every application

The fully structured range of system accessories for the Klippon® TB enclosure range allows you to easily adapt the enclosure to meet the specific requirements of every application.

The following options are available:

### 1 Document holder

Document holders for storage of important documents in the enclosure.

### 2 Earthing studs

Earthing studs are replaceable. Available in two versions – brass and stainless steel.

### 3 Gland plates

Gland plates are available as spares and also in various material thicknesses.

### 4 Mounting plates

Mounting plates with and without a drilling pattern, for horizontal and vertical mounting of rails, or components fitted directly.

### 5 Mounting hardware kits

Mounting hardware kits are available for quick and easy installation of label holders, mounting plates, gland plates, document holders and rain hoods.

### 6 Door stay

A door stay prevent the door from being closed unintentionally, regardless of the mounting position of the enclosure. This item is **only** available Ex-works.

### 7 Locking systems

Various locking systems are available for the safe securing of the enclosure. There are padlocks for the Klippon® TB MH enclosures and a range of lock inserts for the Klippon® TB QL enclosures.

### 8 Type label holder

A range of label holders are available for product identification.

### 9 Rain hoods

The rain hood provides an ideal, additional level of protection for the enclosure. Particularly useful against heavy rainfall or extreme levels of direct sunlight.

Klippon® TB MH 221513

Depth 133 mm

Height/Width/Depth 229 / 152 / 133 mm

**Note**

### Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 2x35     | 2x34       |
| 4 mm <sup>2</sup>                   | 1x30     | 1x29       |
| 6 mm <sup>2</sup>                   | 1x22     | 1x22       |
| 10 mm <sup>2</sup>                  | 1x18     | 1x17       |
| 16 mm <sup>2</sup>                  | 1x15     | 1x14       |
| 35 mm <sup>2</sup>                  |          |            |

### Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.

**Note**

### Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 2x44     | 2x43       |
| 4 mm <sup>2</sup>                   | 2x37     | 2x36       |
| 6 mm <sup>2</sup>                   | 2x28     | 2x27       |
| 10 mm <sup>2</sup>                  | 1x22     | 1x22       |
| 16 mm <sup>2</sup>                  | 1x19     | 1x18       |
| 35 mm <sup>2</sup>                  | 1x14     | 1x13       |

### Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
 Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.  
 Recommended order:

**Note**

### Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 2x53     | 2x34       |
| 4 mm <sup>2</sup>                   | 1x44     | 2x29       |
| 6 mm <sup>2</sup>                   | 1x33     | 2x22       |
| 10 mm <sup>2</sup>                  | 1x27     | 2x17       |
| 16 mm <sup>2</sup>                  | 1x22     | 1x14       |
| 35 mm <sup>2</sup>                  |          | 1x11       |

### Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.

## Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 3x73     | 4x58       |
| 4 mm <sup>2</sup>                   | 2x62     | 3x48       |
| 6 mm <sup>2</sup>                   | 2x46     | 3x36       |
| 10 mm <sup>2</sup>                  | 2x37     | 2x29       |
| 16 mm <sup>2</sup>                  | 2x31     | 2x24       |
| 35 mm <sup>2</sup>                  | 1x23     | 1x18       |

## Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.

### Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm²                             | 4x132    | 7x82       |
| 4 mm²                               | 4x111    | 6x69       |
| 6 mm²                               | 3x83     | 5x52       |
| 10 mm²                              | 3x67     | 5x42       |
| 16 mm²                              | 2x56     | 4x35       |
| 35 mm²                              | 2x42     | 3x26       |

### Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.

| M63                     | 6     | 8     |
| M75                     | 4     | 6     |

### Note

Our IP 68 brass cable glands serve as a reference for these recommended values.

### Dimensions of mounting plate

# Klippon® TB QL - Quarter Lock

## Steel enclosures

for use in industrial and in explosive hazard areas

The Klippon® TB enclosure range features excellent performance characteristics, even under the most difficult environmental conditions, and comply with the stricter requirements of explosive hazard areas found in the process or power generation industries. The Klippon® TB QL enclosure range offers further improvements to a product line that is already successfully leading the market.

Weidmüller can manufacture and supply this enclosure to match customer specifications and fitted with all necessary terminals and cable glands.

#### Note

\* Placeholder for the number of gland plates (1, 2, 3, 4). Klippon® TB QL enclosures are available without gland plates on request.

## Technical Overview

### Features

- Available in 12 sizes and 3 standard depths
- Equipped with up to 4 gland plates
- The gasket is protected against compression
- Quick-locking lid, comes with a slot as standard
- Improved temperature performance
- IP66 protection class
- Earth studs in enclosure cover and bottom section
- Welded mounting feet

## Integrate, expand and customise: the perfect supplement to every application

The fully structured range of system accessories for the Klippon® TB enclosure range allows you to easily adapt the enclosure to meet the specific requirements of every application.

The following options are available:

### 1 Document holder

Document holders for storage of important documents in the enclosure.

### 2 Earthing studs

Earthing studs are replaceable. Available in two versions – brass and stainless steel.

### 3 Gland plates

Gland plates are available as spares and also in various material thicknesses.

### 4 Mounting plates

Mounting plates with and without a drilling pattern, for horizontal and vertical mounting of rails, or components fitted directly.

### 5 Mounting hardware kits

Mounting hardware kits are available for quick and easy installation of label holders, mounting plates, gland plates, document holders and rain hoods.

### 6 Door stay

A door stay prevent the door from being closed unintentionally, regardless of the mounting position of the enclosure. This item is **only** available Ex-works.

### 7 Locking systems

Various locking systems are available for the safe securing of the enclosure. There are padlocks for the Klippon® TB MH enclosures and a range of lock inserts for the Klippon® TB QL enclosures.

### 8 Type label holder

A range of label holders are available for product identification.

### 9 Rain hoods

The rain hood provides an ideal, additional level of protection for the enclosure. Particularly useful against heavy rainfall or extreme levels of direct sunlight.

Klippon® TB QL 221513

Depth 133 mm

Height/Width/Depth 229 / 152 / 133 mm

**Note**

## Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 1x29     | 1x15       |
| 4 mm <sup>2</sup>                   |          | 1x13       |
| 6 mm <sup>2</sup>                   |          | 1x9        |
| 10 mm <sup>2</sup>                  |          | 1x7        |
| 16 mm <sup>2</sup>                  |          | 1x6        |
| 35 mm <sup>2</sup>                  |          |            |

## Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.  
Recommended order:

## Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
 Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.

| 10 mm <sup>2</sup>                  | 1x32     | 2x21       |
| 16 mm <sup>2</sup>                  | 1x26     | 2x18       |
| 35 mm <sup>2</sup>                  | 1x20     | 1x13       |

## Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
 Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.

**Note**

### Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 4x78     | 4x77       |
| 4 mm <sup>2</sup>                   | 3x65     | 3x64       |
| 6 mm <sup>2</sup>                   | 3x49     | 3x48       |
| 10 mm <sup>2</sup>                  | 2x39     | 3x39       |
| 16 mm <sup>2</sup>                  | 2x33     | 2x32       |
| 35 mm <sup>2</sup>                  | 1x25     | 2x24       |

### Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.

Note

### Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 2x91     | 4x52       |
| 4 mm <sup>2</sup>                   | 2x76     | 4x43       |
| 6 mm <sup>2</sup>                   | 2x58     | 4x32       |
| 10 mm <sup>2</sup>                  | 2x46     | 3x26       |
| 16 mm <sup>2</sup>                  | 1x39     | 3x22       |
| 35 mm <sup>2</sup>                  | 1x29     | 2x16       |

### Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.

Note

### Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 3x105    | 5x71       |
| 4 mm <sup>2</sup>                   | 3x88     | 5x59       |
| 6 mm <sup>2</sup>                   | 3x66     | 4x45       |
| 10 mm <sup>2</sup>                  | 2x53     | 4x36       |
| 16 mm <sup>2</sup>                  | 2x44     | 3x30       |
| 35 mm <sup>2</sup>                  | 1x33     | 2x22       |

### Note

\*For enclosure versions with zero, one or two gland plates, the horizontal gap between the mounting feet is reduced by 30 mm.  
Assembly with terminal blocks provides for 10 mm clearance to the ends of the mounting rail.

# Klippon® TB FS - Fixing Screw

## Steel enclosures for use in industrial and in explosive hazard areas

The Klippon® TB enclosure range features superior performance characteristics, even in the most extreme environmental surroundings. In addition, it meets the rigorous requirements of potentially explosive atmospheres that can be found in the process or power generation industries. The new Klippon® TB FS enclosure range complements our Klippon® TB MH and Klippon® TB QL standard enclosures.

Weidmüller can manufacture and supply this enclosure to match customer specifications and fitted with all necessary terminals and cable glands.

Klippon® TB FS enclosures without flange plates are available on request. |                                   |                                   |                               |

## Technical Overview

### Features

- Available in 12 sizes and 3 standard depths
- Equipped with up to 4 gland plates
- The gasket is protected against compression
- Cover lock outside the sealed zone
- Improved temperature performance
- IP66/IP67 protection
- Earth studs in enclosure cover and bottom section
- Welded mounting feet

#### Note

### Technical data

## Integrate, expand and customise: the perfect supplement to every application

The fully structured range of system accessories for the Klippon® TB enclosure range allows you to easily adapt the enclosure to meet the specific requirements of every application.

The following options are available:

### 1 Document holder

Document holders for storage of important documents in the enclosure.

### 2 Earthing studs

Earthing studs are replaceable. Available in two versions – brass and stainless steel.

### 3 Gland plates

Gland plates are available as spares and also in various material thicknesses.

### 4 Mounting plates

Mounting plates with and without a drilling pattern, for horizontal and vertical mounting of rails, or components fitted directly.

### 5 Mounting hardware kits

Mounting hardware kits are available for quick and easy installation of label holders, mounting plates, gland plates, document holders and rain hoods.

### 6 Door stay

A door stay prevent the door from being closed unintentionally, regardless of the mounting position of the enclosure. This item is **only** available Ex-works.

### 7 Locking systems

Various locking systems are available for the safe securing of the enclosure. There are padlocks for the Klippon® TB MH enclosures and a range of lock inserts for the Klippon® TB QL enclosures.

### 8 Type label holder

A range of label holders are available for product identification.

Klippon® TB FS 221513

Depth 133 mm

Height/Width/Depth 229 / 152 / 133 mm

Note

## Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 1x29     | 1x15       |
| 4 mm <sup>2</sup>                   | 1x22     | 1x13       |
| 6 mm <sup>2</sup>                   | 1x16     | 1x9        |
| 10 mm <sup>2</sup>                  | 1x13     | 1x7        |
| 16 mm <sup>2</sup>                  | 1x11     | 1x6        |
| 35 mm <sup>2</sup>                  | 1x8      | 1x3        |

## Note

\*For the enclosure versions with no, one or two gland plates, the horizontal distance between the mounting feet is reduced by 30 mm.

The assembly with modular terminals gives consideration to a distance of 10 mm from the end of each mounting rail.

Order recommendations:

Note

## Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 2x35     | 2x34       |
| 4 mm <sup>2</sup>                   | 1x30     | 1x29       |
| 6 mm <sup>2</sup>                   | 1x22     | 1x22       |
| 10 mm <sup>2</sup>                  | 1x18     | 1x17       |
| 16 mm <sup>2</sup>                  | 1x15     | 1x14       |
| 35 mm <sup>2</sup>                  | 1x10     | 1x10       |

## Note

\*For the enclosure versions with no, one or two gland plates, the horizontal distance between the mounting feet is reduced by 30 mm.

The assembly with modular terminals gives consideration to a distance of 10 mm from the end of each mounting rail.

Order recommendations:

TS 35 mounting rail (screw terminal) WDU 2.5 1020000000 / (tension clamp terminal)

ZDU 2.5 1608510000 / (tension clamp terminal) PDU 2.5 1896110000

TS 32 mounting rail (screw terminal) SAK 2.5 0279660000

TS 15 mounting rail (screw terminal) AKZ 2.5 0697160000

Note

## Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm²                             | 2x44     | 2x43       |
| 4 mm²                               | 2x37     | 2x36       |
| 6 mm²                               | 2x28     | 2x27       |
| 10 mm²                              | 1x22     | 1x22       |
| 16 mm²                              | 1x19     | 1x18       |
| 35 mm²                              | 1x14     | 1x13       |

## Note

\*For the enclosure versions with no, one or two gland plates, the horizontal distance between the mounting feet is reduced by 30 mm.

The assembly with modular terminals gives consideration to a distance of 10 mm from the end of each mounting rail.

Order recommendations:

TS 35 mounting rail (screw terminal) WDU 2.5 1020000000 / (tension clamp terminal)

Note

## Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm²                             | 2x53     | 2x34       |
| 4 mm²                               | 1x44     | 2x29       |
| 6 mm²                               | 1x33     | 2x22       |
| 10 mm²                              | 1x27     | 2x17       |
| 16 mm²                              | 1x22     | 1x14       |
| 35 mm²                              | 1x15     | 1x11       |

## Note

\*For the enclosure versions with no, one or two gland plates, the horizontal distance between the mounting feet is reduced by 30 mm.

The assembly with modular terminals gives consideration to a distance of 10 mm from the end of each mounting rail.

Order recommendations:

TS 35 mounting rail (screw terminal) WDU 2.5 1020000000 / (tension clamp terminal)

Note

## Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 3x73     | 4x58       |
| 4 mm <sup>2</sup>                   | 2x62     | 3x48       |
| 6 mm <sup>2</sup>                   | 2x46     | 3x36       |
| 10 mm <sup>2</sup>                  | 2x37     | 2x29       |
| 16 mm <sup>2</sup>                  | 2x31     | 2x24       |
| 35 mm <sup>2</sup>                  | 1x23     | 1x18       |

## Note

\*For the enclosure versions with no, one or two gland plates, the horizontal distance between the mounting feet is reduced by 30 mm.

The assembly with modular terminals gives consideration to a distance of 10 mm from the end of each mounting rail.

Order recommendations:

Note

### Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 4x78     | 4x77       |
| 4 mm <sup>2</sup>                   | 3x65     | 3x64       |
| 6 mm <sup>2</sup>                   | 3x49     | 3x48       |
| 10 mm <sup>2</sup>                  | 2x39     | 3x39       |
| 16 mm <sup>2</sup>                  | 2x33     | 2x32       |
| 35 mm <sup>2</sup>                  | 1x25     | 2x24       |

### Note

\*For the enclosure versions with no, one or two gland plates, the horizontal distance between the mounting feet is reduced by 30 mm.

The assembly with modular terminals gives consideration to a distance of 10 mm from the end of each mounting rail.

Order recommendations:

Note

### Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 2x91     | 4x52       |
| 4 mm <sup>2</sup>                   | 2x76     | 4x43       |
| 6 mm <sup>2</sup>                   | 2x58     | 4x32       |
| 10 mm <sup>2</sup>                  | 2x46     | 3x26       |
| 16 mm <sup>2</sup>                  | 1x39     | 3x22       |
| 35 mm <sup>2</sup>                  | 1x29     | 2x16       |

### Note

\*For the enclosure versions with no, one or two gland plates, the horizontal distance between the mounting feet is reduced by 30 mm.

The assembly with modular terminals gives consideration to a distance of 10 mm from the end of each mounting rail.

Order recommendations:

Note

### Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 3x105    | 5x71       |
| 4 mm <sup>2</sup>                   | 3x88     | 5x59       |
| 6 mm <sup>2</sup>                   | 3x66     | 4x45       |
| 10 mm <sup>2</sup>                  | 2x53     | 4x36       |
| 16 mm <sup>2</sup>                  | 2x44     | 3x30       |
| 35 mm <sup>2</sup>                  | 1x33     | 2x22       |

### Note

\*For the enclosure versions with no, one or two gland plates, the horizontal distance between the mounting feet is reduced by 30 mm.

The assembly with modular terminals gives consideration to a distance of 10 mm from the end of each mounting rail.

Order recommendations:

TS 35 mounting rail (screw terminal) WDU 2.5 1020000000 / (tension clamp terminal)

# Klippon® TBi QL - Quarter Lock

## Stainless steel enclosures for use within harsh industrial environments

**NEW**

Even under moderate environmental conditions, there is an increasing need for complex, individual automated solutions. A harsh industrial environment places additional, heavy demands on applications and determines the design of the industrial enclosures to meet these demands. With complete protection and excellent durability, our Klippon® TBi stainless steel enclosures offer the best protection for the components inside them. Its electro-polished surface makes the enclosure extraordinarily resistant to corrosion.

- Available in 11 sizes and 2 depths
- Operating temperature range -40 °C to +85 °C
- Impact resistance of 10 J Industrial application
- Dedicated internal mounting support bracket for fixing terminal rail or mounting plates with self forming screws
- External Earth point – suitable for M6 threaded screw
- Concealed hinges
- Internal earth stud – M6 screw fitted to enclosure lid and base
- Supplied in 0 or 1 gland plate version
- Direct enclosure mounting is provided via the fixing positions placed into the rear of the enclosure
- Mounting feet in stainless steel are optionally available and can be rotated 90°
- Dust and moisture channel
- Double-bit locking system

Our assembly service can supply these enclosure preassembled with terminals and cable glands according to customer requirements.

## Overview of enclosures

## Technical Overview

### Features

- Available in 11 sizes and 2 standard depths
- Welded mounting bracket for securing the mounting plate or mounting rail by means of self-tapping screws
- External earth - M6 earth tab rivet
- Concealed hinges
- M6 earthing bolt welded in the cover and base of the enclosure
- Available with 0 or 1 flange plates
- Optimised laser welding, high quality standard
- Direct mounting of the enclosure with rear mounting holes
- Mounting feet in stainless steel are optionally available, and can be rotated by 90°
- Moisture and dust channel
- Double-bit locking system
- Permanent labelling of items
- Multi-functional tool included
- Packaging optimally designed for enclosure

# Klippon® TBi FS – Fixing Screw

## Stainless steel enclosures for use within harsh industrial environments

Even under moderate environmental conditions, there is an increasing need for complex, individual automated solutions. A harsh industrial environment places additional, heavy demands on applications and determines the design of the industrial enclosures to meet these demands. With complete protection and excellent durability, our Klippon® TBi stainless steel enclosures offer the best protection for the components inside them. Its electro-polished surface makes the enclosure extraordinarily resistant to corrosion.

- Available in 11 sizes and 2 depths
- Operating temperature range -40 °C to +85 °C
- Impact resistance of 10 J Industrial application
- Dedicated internal mounting support bracket for fixing terminal rail or mounting plates with self forming screws
- External earth point – suitable for M6 threaded screw
- Concealed hinges
- Internal earth stud – M6 screw fitted to enclosure lid and base
- Supplied in 0 or 1 gland plate version
- Direct mounting of the enclosure by means of rear mounting holes
- Mounting feet in stainless steel are optionally available, can be rotated by 90°
- Moisture and dust channel
- Double-bit locking system

Our assembly service can supply these enclosure preassembled with terminals and cable glands according to customer requirements.

## Technical Overview

### Features

- Available in 11 sizes and 2 standard depths
- Welded mounting bracket for securing the mounting plate or mounting rail by means of self-tapping screws
- External earth - M6 earth tab rivet
- M6 earthing bolt welded in the cover and base of the enclosure
- Available with 0 or 1 flange plates
- Optimised laser welding, high quality standard
- Direct mounting of the enclosures with rear mounting holes
- Mounting feet in stainless steel are optionally available, and can be rotated by 90°
- Permanent labelling of items
- Packaging optimally designed for enclosure

## Note

## Max. number of terminals (industry)

| Max. number of terminals (industry) | vertical | horizontal |
|-------------------------------------|----------|------------|
| 2.5 mm <sup>2</sup>                 | 8x133    | 11x94      |
| 4 mm <sup>2</sup>                   | 8x111    | 11x79      |
| 6 mm <sup>2</sup>                   | 8x84     | 11x60      |
| 10 mm <sup>2</sup>                  | 8x67     | 11x48      |
| 16 mm <sup>2</sup>                  | 8x56     | 11x40      |
| 35 mm <sup>2</sup>                  | 8x42     | 11x30      |

## Note

The assembly with modular terminals gives consideration to a distance of 10 mm from the end of each mounting rail.

Order recommendations:

TS 35 mounting rail (screw terminal) WDU 2.5 1020000000 / (tension clamp terminal)

ZDU 2.5 1608510000 / (tension clamp terminal) PDU 2.5 1896110000

TS 32 mounting rail (screw terminal) SAK 2.5 0279660000

TS 15 mounting rail (screw terminal) AKZ 2.5 0697160000

## Number of cable entries

| Number of cable entries | A / B | C / D |
|-------------------------|-------|-------|
| M12                     | 85    |       |
| M16                     | 58    |       |
| M20                     | 50    |       |
| M25                     | 32    |       |
| M32                     | 17    |       |
| M40                     | 14    |       |
| M50                     | 6     |       |
| M63                     | 5     |       |
| M75                     | 4     |       |

## Note

Our IP 68 brass cable glands are used as the reference for these guideline values.

# Klippon® STB – Small Terminal Box

## Steel enclosures

Ideally suited for the energy and process industry and transportation, the Klippon® STB range is the perfect complement to our existing Klippon® enclosure product line. Enclosures of this range comply with international standards such as EN 62208 and EN 60079-0/7 (ATEX).

Some of the many advantages of these cases are:

- Available in stainless steel or in steel sheet
- Higher temperature resistant seals than the standard (extended temperature range of -60 °C to +100 °C / 120 °C, on request)
- Flexible options when mounting the internal rail
- The gasket is protected against compression; this ensures that a permanent and secure seal is maintained.
- Earth studs in the lid and in the enclosure base
- Lasered welding seams offer improved quality
- Delivered with welded mounting feet to ensure an sturdy enclosure installation

Weidmüller can manufacture and supply this enclosure to match customer specifications and fitted with all necessary terminals and cable glands.

## Overview of enclosures

Note

# Klippon® K – Aluminium enclosures

Klippon® K range enclosures can be used in a variety of applications, e.g. for mounting terminals, switches, power supplies, operational and display elements or electronic modules.

The extensive Klippon® K enclosure range has the following advantages:

- More flexibility – 19 different sizes
- Available in two surface finishes – powder-coated and natural
- Mounting holes not within the sealed area
- Fastening thread to attach mounting rails and plates
- Closed moulded gasket (no glue seam)

Weidmüller can manufacture and supply this enclosure to match customer specifications and fitted with all necessary terminals and cable glands.

## Technical Overview

### Features

- Two surfaces: natural and powder-coated
- High IP protection up to IP 68
- Moulded silicone gasket for applications with high temperatures
- A uniform Torx®-slotted screw head is used for over 19 different enclosure sizes.
- Alloy is resistant to salt water
- Approved according to the latest international standards (e.g. ATEX, cULus, GOST)

**Note** We deliver enclosures through our assembly service which are ready to be connected and suitable for every application

Accessories

| Terminal rail, Set       | Order No.  |
|--------------------------|------------|
| 15 mm width              | 1909980000 |
| Mounting plate           |            |
| Steel sheet, zinc plated | 1905280000 |
| Torx® screwdriver        |            |
| Uninsulated Torx® TH20   | 9009160000 |

**Note** The accessory sets contain the necessary mounting material.

Max. number of terminals (industry)

| Assembly with terminal | vertical | horizontal |
|------------------------|----------|------------|
| 2.5 mm²                | 1x1*     | 1x5        |
| 4 mm²                  | 1x1*     | 1x1*       |
| 6 mm²                  |          |            |
| 10 mm²                 |          |            |
| 16 mm²                 |          |            |

**Note** \*Please refer to the Terminal Block Catalogue or the SAK Range for more information about populating the enclosures with terminal blocks. For vertical installations, we recommend using not more than one BK 4 or BK 4 CRN (0625120000). For horizontal installations with 2.5mm² 1x5 AKZ terminal blocks (only possible on a TS 15) for 4mm², use not more than one BK 4. There are no pre-defined mounting points set within this enclosure for installing internal equipment in a vertical position.

Number of cable entries

| Number of cable entries | A / B | C / D |

#### Dimensions of mounting plate

## Standardised distribution boxes – Product overview: Aluminium enclosure

Use the product overview to find the right solution for you! Combine your own industrial version consisting of an enclosure, with or without threaded holes, a suitable mounting rail or pre-fitted terminal strips. The compatible components are always shown in a row.

Distribution boxes with Ex protection for use in explosive areas can be found in the last column. They come with threaded holes and are already equipped with a terminal strip.

## Klippon® POK – Polyester enclosures

The Klippon® POK range is based on a high-quality glass fibre-reinforced polyester enclosure which represents an economical solution for electrical connections. The enclosures are ideal wherever corrosion resistance, impact resistance and a high IP protection class are required.

Features of the enclosure range:

- 17 sizes and 2 versions
- Stainless Steel lid screws
- Fixing holes located outside the sealed area
- Threaded holes for mounting rails
- Approved to the latest international standards

Our assembly service can supply these enclosures preassembled with terminals and cable glands according to customer requirements.

### Overview of enclosures

## Technical Overview

### Features

- For use in hazardous area and industrial applications
- Extremely robust and impact resistant due to the high amount of glass fibre
- Approved to the latest international standards (e.g. ATEX, cULus, GOST)

**Note** The enclosure range Klippon® POK can be assembled with terminals or other approved equipment by our Application-Specific Solutions service.

|                                  | 9510900000 |

**Note** Accessories described above as sets, are supplied with fixing materials. For this enclosure only one hinge is required to be fitted to the longest side.

#### Max. number of terminals (industry)

| Assembly with terminal | vertical | horizontal |
|------------------------|----------|------------|
| 2.5 mm <sup>2</sup>    | 1x1*     | 1x5        |
| 4 mm <sup>2</sup>      | 1x1*     | 1x4        |
| 6 mm <sup>2</sup>      |          |            |
| 10 mm <sup>2</sup>     |          |            |
| 16 mm <sup>2</sup>     |          |            |

#### Note

\*Please refer to the Terminal Block Catalogue or the SAK Range for more information about populating the enclosures with terminal blocks. We recommend at most one BK 6 or BK 6 CRN (0625220000) in vertical installations. There are no pre-defined mounting points set within this enclosure for installing internal equipment in a vertical position.

#### Number of cable entries

| Number of cable entries | A / B | C / D |

|---------------------------------|------------|
| Standard, grey                  | 1565430000 |
| RAL 9011                        | Order No.  |
| Ex environment enclosure, black | 9510290000 |

**Note** The overview page lists the ambient temperatures. Colour variations may occur under certain circumstances.

#### Accessories

| Terminal rail, Set               | Order No.  |
|----------------------------------|------------|
| 15 mm width                      |            |
| Mounting plate                   | Order No.  |
| Steel sheet, zinc plated         | 9510650000 |
| Hinge, diecast zinc, Set         | Order No.  |
|                                  | 1580360000 |
| Brass Earth Continuity Plate     | Order No.  |
|                                  | 1391040000 |
| External mounting feet, set of 4 | Order No.  |
|                                  | 9510910000 |

**Note** Accessories described above as sets, are supplied with fixing materials. For this enclosure only two hinges are required to be fitted to the longest side.

#### Max. number of terminals (industry)

| Assembly with terminal | vertical | horizontal |
|------------------------|----------|------------|
| 2.5 mm <sup>2</sup>    | *        | 2x67       |
| 4 mm <sup>2</sup>      | *        | 2x55       |
| 6 mm <sup>2</sup>      | *        | 2x41       |
| 10 mm <sup>2</sup>     | *        | 2x33       |
| 16 mm <sup>2</sup>     | *        | 2x27       |

**Note** The mounting rails are designed to be installed directly. Assembly with terminals provides for 10 mm clearance to the ends of the mounting rail. Ordering recommendations: TS 35 mounting rail (screw-type terminals) WDU 2.5 1020000000 / (tension clamp terminals) ZDU 2.5 1608510000. \*There are no pre-defined mounting points set within this enclosure for installing internal equipment in a vertical position.

#### Number of cable entries

| Number of cable entries | A / B | C / D |

## Standardised distribution boxes – Product overview: Polyester enclosure

Use the product overview to find the right solution for you! Combine your own industrial version consisting of an enclosure, with or without threaded holes, a suitable mounting rail or pre-fitted terminal strips. The compatible components are always shown in a row.

Distribution boxes with Ex protection for use in explosive areas can be found in the last column. They come with threaded holes and are already equipped with a terminal strip.

### Polyester enclosure

## TBF – Large polyester enclosures

The enclosures in the TBF range are made from sturdy glass-fibre reinforced polyester. They offer a universal solution for protection of components such as controllers, measuring instruments, valves and other devices. Suitable applications include photovoltaics and energy distribution.

Key features of this product range include:

- Available in 9 sizes, with grey or transparent lids
- The lid has nylon screws fitted
- Mounting holes are outside the sealed area
- Thread for fitting to terminal rails and mounting plates
- High Ingress Protection (IP 66 and IP 67)

Weidmüller can manufacture and supply this enclosure to match customer specifications and fitted with all necessary terminals and cable glands.

Note

## Technical Overview

### Features

- Extremely tough and impact resistant thanks to the glass-fibre reinforced polyester
- Extremely weather resistant
- High IP rating
- Approved according to the latest international standards (e.g. GOST)

**Note** We deliver enclosures through our assembly service which are ready to be connected and suitable for every application.

## MPC – Small polycarbonate enclosures

The polycarbonate enclosures of the MPC range are ideal for enclosing electrical, electro-mechanical and pneumatic devices as well as PCBs. The enclosures are used in situations with extreme mechanical and chemical conditions.

The characteristics of the enclosures are:

- Available in 17 sizes, with grey or transparent lids
- Lid fixing screws equipped with sealing holes
- Fixing holes outside the sealed area
- Thread for fitting to terminal rails, mounting plates and PCBs

Weidmüller can manufacture and supply this enclosure to match customer specifications and fitted with all necessary terminals and cable glands.

### Overview of enclosures

Note

## Technical Overview

### Features

- High thermal stability thanks to the polycarbonate
- Extremely tough and impact resistant thanks to the high fibre-glass content.
- Good IP rating, due to use of polyurethane (PUR) gasket material
- Approved according to the latest international standards

**Note** We deliver enclosures through our assembly service which are ready to be connected and suitable for every application.

### Technical data

|                       |                                                                    |
|-----------------------|--------------------------------------------------------------------|
| Enclosure material    | Polycarbonate                                                      |
| Cover                 | Grey or transparent                                                |
| Surface finish        | Grey, similar to RAL 7035                                          |
| IP protection class   | IP 66, IP 67                                                       |
| Installation mounting | Self-tapping screws                                                |
| Enclosure mounting    | 4 holes (4.5 mm diameter) or external mounting brackets (optional) |
| Lid fixing            | 4 cross-head screws (polyamide)                                    |
| Gasket material       | Polyurethane foam                                                  |
| Temperature range     | -50 °C...+130 °C                                                   |
| <b>Note</b>           |                                                                    |

## Note

## FPC – Medium-sized polycarbonate enclosures

The FPC enclosure range is the next generation of the MPC range. The enclosures have the same technical characteristics and are ideal for enclosing electrical, electro-mechanical and pneumatic devices and PCBs. The enclosures are used in situations where extreme mechanical and chemical conditions exist.

The characteristics of the enclosures are:

- Available in 6 sizes, with grey or transparent lids
- Lid fixing screws equipped with sealing holes
- Fixing holes outside the sealed area
- Thread for fitting to terminal rails, mounting plates and PCBs

Weidmüller can manufacture and supply this enclosure to match customer specifications and fitted with all necessary terminals and cable glands.

### Overview of enclosures

#### Ordering data

| Description  | Dimensions in mm | Grey lid   | Transparent lid |
|--------------|------------------|------------|-----------------|
| FPC 20/20/13 | 200 x 200 x 130  | 9535690000 | 9535680000      |
| FPC 20/30/13 | 300 x 200 x 130  | 9535710000 | 9535700000      |
| FPC 20/40/13 | 400 x 200 x 130  | 9535730000 | 9535720000      |
| FPC 30/30/13 | 300 x 300 x 130  | 9535750000 | 9535740000      |
| FPC 30/40/13 | 400 x 300 x 130  | 9535770000 | 9535760000      |
| FPC 40/60/13 | 600 x 400 x 130  | 9535810000 | 9535820000      |
| <b>Note</b>  |                  |            |                 |

#### Technical data

|                       |                                                                    |
|-----------------------|--------------------------------------------------------------------|
| Enclosure material    | Polycarbonate                                                      |
| Cover                 | Grey or transparent                                                |

## Cable entries

Weidmüller offers a variety of add-on components for a multitude of applications; complementing its wide range of enclosure products.

In addition to cable glands in brass, plastic and stainless steel, we provide sealing plugs, pressure compensation elements, adaptors and matching accessories, including lock nuts, flat gasket seals and earthing rings.

As with the enclosures, the cable glands come in IP protective classes from IP 54 to IP 69K and can be used as required in industrial standard applications, EMC applications or indeed in explosive hazard areas. They have the appropriate approvals for use in these areas. Ex certified Klippon® cable glands also allow the connection of braided and shielded armour with or without a lead sheath, as well as single wire reinforcement and metal foil armoured cables and wires. They can be used in temperatures from -60 °C to +180 °C.

Depending on the connector range and the application area, the cable glands, sealing plugs, adaptors, pressure compensation elements and accessories are certified and manufactured in line with the following standards:

- EN 60423 (metric thread)
- EN 40430 (PG and NPT thread)
- EN 60079-0 (General ATEX regulations)
- EN 60079-1 (Ex d ATEX regulations)
- EN 60079-7 (Ex e ATEX regulations)
- EN 60079-11 (Ex i ATEX regulations)
- EN 50262 (strain relief)
- EN 60529 (IP protection degree)

The range of cable glands, sealing plugs and pressure compensation elements is available in metric (M) and highstrength (PG) threads in sizes from M 12 to M 75 and PG 7 to PG 48. When choosing glands and sealing plugs, please refer to the table for the sealing characteristics of the O-rings, flat gaskets and seal inserts. The O-ring or flat gasket is always used to seal the connecting thread of an enclosure, while the seal insert for the cable gland actually seals and clamps the connection cable.

You should always observe the maximum drill-hole diameter when installing a cable gland, sealing plug, adaptor or pressure compensation element (e.g. onto the gland plate of an enclosure). These must not exceed the following specified maximum values / tolerances so that the protection degree of the whole enclosure can be guaranteed.

#### Through-hole information

| M thread  | Through-hole, in mm |
|-----------|---------------------|
| M 12      | 12.2                |
| M 16      | 16.2                |
| M 20      | 20.2                |
| M 25      | 25.2                |
| M 32      | 32.2                |
| M 40      | 40.2                |
| M 50      | 50.2                |
| M 63      | 63.2                |
| M 75      | 75.2                |
| PG thread | Through-hole, in mm |
| PG 7      | 12.4                |
| PG 9      | 15.1                |
| PG 11     | 18.5                |
| PG 13.5   | 20.4                |
| PG 16     | 22.5                |
| PG 21     | 28.3                |
| PG 29     | 37.4                |
| PG 36     | 47.2                |
| PG 42     | 54.2                |

## Standard cable glands - Plastic

## Cable glands - Plastic - IP 67

Inexpensive cable gland for industrial applications, without approvals.

## Technical data

|                     |                        |
|---------------------|------------------------|
| Material / Colour   | Polyamide 6 / RAL 7035 |
| Seal insert         | CR                     |
| Temperature range   | -20 °C...80 °C         |
| Protection degree   | IP 67                  |
| Flammability rating | V-2                    |

## Note

Version with moulded sealing lip  
Length L varies depending on the cable diameter used

## Note

Integrated strain relief, halogen-free without sealing ring.

Cable glands - Plastic - IP 68

Plastic cable gland with integrated strain relief for industrial applications requiring IP 68 protection.

## Standard cable glands - Brass

## Cable glands - Brass - ZR

Brass cable gland with incision seal for standard industrial applications. The seal insert which is used contains several removable or separable inlets. This enables cables with a diameter of 4 mm to 41 mm to be connected.

## Cable glands - Brass - IP 68

Standard brass cable gland for industrial applications that require IP 68 or IP 69K protection.

## Technical data

|                             |                       |
|-----------------------------|-----------------------|
| Material                    | Brass, nickel-plated  |
| O-ring / Seal insert        | NBR / CR              |
| Temperature range           | -40 °C...100 °C       |
| Clamp insert                | Polyamide             |
| Protection degree with GWDR | IP 68 - 5 bar, IP 69K |

## Note

Length „L“ varies depending on the cable diameter used; IP 69K applies to all metric cable glands; the following thread sizes PG29, PG36, PG42 and PG48 are excluded from IP 69K.

## Standard cable glands - Brass

## Cable glands - Brass - ZE

Brass cable glands with external, centrally positioned strain relief provided by clamping jaws. The seal insert which is used contains several removable or separable inlets.

## Technical data

|                   |                      |
|-------------------|----------------------|
| Material          | Brass, nickel-plated |
| Seal insert       | NBR                  |
| Temperature range | -20 °C...80 °C       |
| Protection degree | IP 54                |

**Note** Optional sealing ring  
Length „L“ varies depending on the cable diameter used.

## EMC cable glands

## Cable glands - Brass - 1/EMC

Brass cable gland for shielding against interference frequencies with a shield attenuation of up to 90 dB. Conical metal cage ensures multiple contacts with the cable shielding. On installation, the cable gland does not have to be divided into its individual parts, enabling particularly simple installation.

## Technical data

|                      |                      |
|----------------------|----------------------|
| Material             | Brass, nickel-plated |
| O-ring / Seal insert | NBR / CR             |
| Temperature range    | -40 °C...100 °C      |
| Protection degree    | IP 68 - 10 bar       |
| Clamp insert         | Polyamide            |

**Note** Length „L“ varies according to cable diameter used

## Cable glands - Stainless steel - IP 68

Stainless steel cable glands for standard industrial applications that require a high degree of protection (IP 68). These cable glands - with their resistance to impact and sea water - are also suitable for use in applications under extreme environmental conditions.

## General

### Health & Safety

When Weidmüller cable glands and the accessories are used and installed as prescribed within the data sheet provided, they will not cause any danger or hazard to the health or safety of persons, animals or property. The products should be installed by suitably trained/skilled personnel and in full accordance with the relevant legislative regulations and the accepted code of practice for the industry concerned.

### Warning

Weidmüller cable glands and accessories should not be used within any application other than those specified for each product, unless Weidmüller issue a statement in writing that the product is suitable for the specified application. For further information on each product, we refer you to the specific Assembly Instructions and General Arrangement drawings, which are available on request. Weidmüller takes no responsibility for any damage, injury or other consequential loss caused where the glands are not installed or used according to our Assembly Instructions.

### Installation in hazardous area applications

If cable glands and accessories are installed in hazardous area applications, international and national standards of the Explosion Protection have to be considered.

## Klippon® KDSU Cable Glands

The KDSU type glands provide a universal armour clamp for steel wire, steel tape, screened or braided cables. An electrical bond between the cable armour and the gland is ensured. The gland can also be used to terminate un-armoured cables. In addition, the gland is fitted with two separate seals to seal the outer and inner cable insulation.

When choosing the gland with a neoprene sealing a temperature range from -20 °C to +85 °C will be achieved. Whereas the gland with silicone sealing ensures a temperature range from -60 °C to +180 °C.

With both sealing materials an IP rating of IP 68 to 25 metres (30 min. at 2.5 bar) is maintained. The KDSU type gland is approved for Flameproof Ex d and Increased Safety Ex e applications.

### Important Notes

- The gland size does not necessarily equate to the entry thread size.
- In some cases several gland sizes can be chosen due to overlapping inner as well as outer cable diameters. Due to the wide range of armoured cables available, it is necessary to select the correct clamping range. This is achieved by taking the inner and outer clamping range values to determine the best fit (as close as possible to the Min/Max values average).
- All cable glands have a 1.5 mm pitch.
- For Flameproof Ex d applications the female thread into which the gland is to be fitted must achieve an engagement of at least 5 full threads in compliance with clause 5.3 of EN/IEC 60079-1.
- Where KDSU glands are fitted into non-metallic Increased Safety Ex e enclosures they must be included within the earth circuit of the system.
- Fully assembly instructions are supplied with the glands. The instructions must be read prior to installation and adhered to in full.
- When the gland is used to terminate un-armoured cables, the gland is suitable only for fixed installation.

The KDSW glands provide an armour clamp for steel wire, steel tape and lead sheathed cables. An electrical bond between the cable armour and the gland is ensured. In addition, the gland is fitted with two separate sealings to seal the outer and inner cable insulation.

When choosing the gland with a neoprene sealing a temperature range from -20 °C to +85 °C will be achieved, whereas the gland with silicone sealing ensures a temperature range from -60 °C to +180 °C.

With both sealing materials an IP rating of IP 66 and IP 68 to 25 metres (30 min at 2.5 bar) is maintained.

The KDSW gland is approved for Flameproof Ex d and Increased Safety Ex e applications.

### Structure of the part description

### Important Notes

- The gland size does not necessarily equate to the entry thread size.
- In some cases several gland sizes can be chosen due to overlapping sizes as well as outer cable diameters. Due to the wide range of armoured cables available, it is necessary to select the correct clamping range. This is achieved by taking the inner and outer clamping range values to determine the best fit (as close as possible to the Min/Max values average).
- All cable glands have a 1.5 mm pitch.
- For Flameproof Ex d applications the female thread into which the gland is to be fitted must achieve an engagement of at least 5 full threads in compliance with clause 5.3 of EN/IEC 60079-1.
- Where KDSW glands are fitted into non-metallic Increased Safety Ex e enclosures they must be included within the earth circuit of the system.
- Fully assembly instructions are supplied with the glands. The instructions must be read prior to installation and adhered to in full.
- When the gland is used to terminate un-armoured cables, the gland is suitable only for fixed installation.
- KDSW gland size G20 with silicone seal, the silicone inner seal only seals to a minimum of 11 mm and NOT 6.7 mm.

## Klippon® KDSX Cable Glands

The KDSX glands provide an armour clamp for braided cables. An electrical bond between the cable armour and the gland is ensured. In addition, the gland is fitted with two separate sealings to seal the outer and inner cable insulation.

The gland maintains a temperature range from -60 °C to +180 °C. With both sealing materials an IP rating of IP 66 and IP 68 to 25 metres (30 min at 2.5 bar) is maintained. The KDSX gland is approved for Flameproof Ex d and Increased Safety Ex e applications.

### Important Notes

- The gland size does not necessarily equate to the entry thread size.
- In some cases several gland sizes can be chosen due to overlapping inner as well as outer cable diameters. Due to the wide range of armoured cables available, it is necessary to select the correct clamping range. This is achieved by taking the inner and outer clamping range values to determine the best fit (as close as possible to the Min/Max values average).
- All cable glands have a 1.5 mm pitch.
- For Flameproof Ex d applications the female thread into which the gland is to be fitted must achieve an engagement of at least 5 full threads in compliance with clause 5.3 of EN/IEC 60079-1.
- Where KDSX glands are fitted into non-metallic Increased Safety Ex e enclosures they must be included within the earth circuit of the system.
- Fully assembly instructions are supplied with the glands. The instructions must be read prior to installation and adhered to in full.
- When the gland is used to terminate un-armoured cables, the gland is suitable only for fixed installation.
- KDSX gland size G20 with silicone seal, the silicone inner seal only seals to a minimum of 11 mm and NOT 6.7 mm.

The KSG gland is designed to terminate un-armoured cables. When choosing the gland with a neoprene sealing a temperature range from -20 °C to +85 °C will be achieved, whereas the gland with silicone sealing ensures a temperature range from -60 °C to +180 °C. With both sealing materials an IP rating of IP 66 and IP 68 to 25 metres (30 min. at 2.5 bar) is maintained. The KSG type gland is approved for Flameproof Ex d and Increased Safety Ex e applications.

### Structure of the part description

### Important Notes

- The gland size does not necessarily equate to the entry thread size.
- In some cases several gland sizes can be chosen due to overlapping inner as well as outer cable diameters. Due to the wide range of armoured cables available, it is necessary to select the correct clamping range. This is achieved by taking the inner and outer clamping range values to determine the best fit (as close as possible to the Min/Max values average).
- All cable glands have a 1.5 mm pitch.
- For Flameproof Ex d applications the female thread into which the gland is to be fitted must achieve an engagement of at least 5 full threads in compliance with clause 5.3 of EN/IEC 60079-1.
- Where KSG glands are fitted into non-metallic Increased Safety Ex e enclosures they must be included within the earth circuit of the system.
- Fully assembly instructions are supplied with the glands. The instructions must be read prior to installation and adhered to in full.
- When the gland is used to terminate un-armoured cables, the gland is suitable only for fixed installation.

## Klippon® KUB Cable Glands

The KUB gland provide an armour clamp for steel tape, steel wire and braided cables. An electrical bond between the cable armour and the gland is ensured. The gland can also be used to terminate unarmoured cables. Additionally, the gland provides a single pull resistant seal on the outer sheath of any cable. After clamping the cable armour onto the cone, the cable has to be filled with the provided compound to seal the free spaces between the single conductors.

The gland maintains a temperature range from -60 °C to +85 °C. When filled, the gland fulfills an IP rating of IP 68 to 100 metres (30 Min. at 10 bar). The KUB gland is only suitable for Ex d applications.

## Structure of the part description

| G63                     | M63                        | 19                                   | 88.0                                | 115.0         | 120                          | 50.0 | 56.0               | 58.4                         | 65.8 | 53.8 | 61.2 | 0.30 - 2.50                   | EL80           |
| G75S                    | M75                        | 19                                   | 99.0                                | 122.0         | 140                          | 55.4 | 62.0               | 64.8                         | 72.2 | 60.2 | 68.0 | 0.30 - 2.50                   | EL90           |
| G75                     | M75                        | 19                                   | 99.0                                | 122.0         | 140                          | 60.8 | 68.0               | 71.1                         | 78.0 | 66.5 | 73.4 | 0.30 - 2.50                   | EL90           |
| Dimensions in mm        |                            |                                      |                                     |               |                              |      |                    |                              |      |      |      |                               |                |

## Important Notes

- The gland size does not necessarily equate to the entry thread size.
- In some cases several gland sizes can be chosen due to overlapping inner as well as outer cable diameters. Due to the wide range of armoured cables available, it is necessary to select the correct clamping range. This is achieved by taking the inner and outer clamping range values to determine the best fit (as close as possible to the Min/Max values average).
- X = Maximum numbers of cores
- Y = Maximum over cores
- Z = Maximum inner sheath
- All cable glands have a 1.5 mm pitch.
- For Flameproof Ex d applications the female thread into which the gland is to be fitted must achieve an engagement of at least 5 full threads in compliance with clause 5.3 of EN/IEC 60079-1.
- Where KUB glands are fitted into non-metallic Increased Safety Ex e enclosures they must be included within the earth circuit of the system
- Fully assembly instructions are supplied with the glands. The instructions must be read prior to installation and adhered to in full.
- When the gland is used to terminate un-armoured cables, the gland is suitable only for fixed installation

# Selection Guide Klippon® Cable Glands

## Purpose: Generation of the article description

By selecting the suitable cable gland different factors have to be considered, such as

- The environment of the application
- The conditions inside the enclosure
- The construction of the cable

By using the Selection Guide Klippon® Cable Glands the article description will be generated following the step by step process to create the 7 character order key. From this the order number can be identified.

## The order key consists out of the following attributes:

| Order key                   | [Type]                                                                                                                                                                                                                                                                                                                                                                 | [a] | [b] | [c] | [d] | [e] | [f] | [ggg] |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----|-----|-----|-----|-----|-------|
| Example Article Description | KDSU                                                                                                                                                                                                                                                                                                                                                                   | M20 | B   | S   | 0   | SC  | 1   | G16   |
| Meaning                     | [Type] = Gland type (KDSU, KDSW, KDSX, KSG, KUB)<br>[a] = Entry thread (M20-M75)<br>[b] = Material (B = brass)<br>[c] = Seal material (S=Silicone, N=Neoprene)<br>[d] = Continuity for lead sheath (L = yes, 0 = no)<br>[e] = Plating (SC = self-coloured, NI = nickel-plated)<br>[f] = Cable outer sheath (1 = Reduced, 2 = Standard)<br>[ggg] = Gland size (G16-G75) |     |     |     |     |     |     |       |

## Application example

Within an Ex d application on an Off-Shore platform a suitable cable gland for the termination into an enclosure is required. Following details about the application are given:

- The enclosure will be used for the control of a motor circuit breaker
- The enclosure has a volume of 1.3 dm<sup>3</sup> and is installed outdoor.
- The application is in the field, a place in which an explosive atmosphere is likely to occur in normal operation, occasionally (Zone 1)
- The surrounding atmosphere of the enclosure consists Ethylene (gas group IIB)
- The enclosure operates in a temperature range of -25 °C to +45 °C
- The armour of the cable is unknown, no lead sheathed cable
- The cable outer sheath diameter is 10 mm
- The cable inner sheath diameter is 8 mm

Based on the information in the above shown example case the article description will be determined on the following pages.

1. Selection of the cable gland type [type] and continuity for lead sheath [d]

| Order key                   | [Type] | [a] | [b] | [c] | [d] | [e] | [f] | [ggg] |
|-----------------------------|--------|-----|-----|-----|-----|-----|-----|-------|
| Example Article Description |        |     |     |     |     |     |     |       |

1a) Selection of the cable gland type in regard to the ignition protection type

| [Type] | Ignition Protection Type |
|--------|--------------------------|
| KDSU   | Ex d / Ex e              |
| KDSW   | Ex d / Ex e              |
| KDSX   | Ex d / Ex e              |
| KSG    | Ex d / Ex e              |
| KUB    | Ex d                     |

Because it is an Ex d application all cable gland types (marked in blue) can come into consideration.  
 For Ex d applications the following questionnaire according to the IEC 60079-14 standard has to be passed to find out if a barrier gland ([Type]=KUB) or if a cable gland with a sealing ring ([Type]=KDSU,KDSW,KDSX) has to be used.

By passing this questionnaire with the given information of the example case the orange marked way has to be followed and the result is that a cable gland with sealing ring has to be used. Consequently the blue marked cable gland types below can come into consideration.

| Gland type | Type of sealing |
|------------|-----------------|
| KDSU       | Sealing ring    |
| KDSW       | Sealing ring    |
| KDSX       | Sealing ring    |
| KSG        | Sealing ring    |
| KUB        | Compound        |

**1b) Selection of the cable gland type in regard to the continuity for lead sheath**

| [Type] | [d]   | Continuity for lead sheath |
|--------|-------|----------------------------|
| KDSU   | 0     | No                         |
| KDSW   | L / 0 | Yes                        |
| KDSX   | 0     | No                         |
| KSG    | 0     | No                         |
| KUB    | 0     | No                         |

In the example case a cable without lead sheath is to be terminated, therefore the option to clamp a lead sheathed cable is not needed.  
Consequently is

**[d] = 0**

All four gland types marked in blue can be used.

**1c) Selection of the cable gland type in regard to the type of armour**

| [Type] | Armour                 |
|--------|------------------------|
| KDSU   | Universal              |
| KDSW   | Steel wire, steel tape |
| KDSX   | Braided                |
| KSG    | No armour              |
| KUB    | Universal              |

Because the type of armour of the cable is unknown, the cable gland type KDSU has to be selected.  
Consequently is

**[Type] = KDSU**

The generated information has to be filled into the order key below:

| Order key                   | [Type] | [a] | [b] | [c] | [d] | [e] | [f] | [ggg] |
|-----------------------------|--------|-----|-----|-----|-----|-----|-----|-------|
| Example Article Description | KDSU   |     |     |     | 0   |     |     |       |

## 2. Selection of the material [b], the sealing material [c] and the plating [e] of the cable gland

| Order key                   | [Type] | [a] | [b] | [c] | [d] | [e] | [f] | [ggg] |
|-----------------------------|--------|-----|-----|-----|-----|-----|-----|-------|
| Example Article Description | KDSU   |     |     |     | 0   |     |     |       |

### 2a) Selection of the material [b]

All cable gland types are made from brass "b". Other materials can also be provided upon request.

Consequently is

[b] = B

### 2b) Selection of the sealing material [c] based on the required temperature range

The cable glands can be ordered with either a neoprene seal "N" or a silicone seal "S".

Glands with a neoprene seal can be used in a temperature range from -20 °C to +85 °C, whereas glands with silicone seal maintain a temperature range from -60 °C to +180 °C. (KUB glands are certified to a temperature of -60 °C to +85 °C).

| [Type] | [c] | Seal material                                        |
|--------|-----|------------------------------------------------------|
| KDSU   | N,S | Neoprene, Silicone                                   |
| KDSW   | N,S | Neoprene (with continuity for lead sheath), Silicone |
| KDSX   | S   | Silicone                                             |
| KSG    | N,S | Neoprene, Silicone                                   |
| KUB    | N   | Silicone (-60 °C to +85 °C)                          |

Because the enclosure in the example case operates in a temperature range of -25 °C to +45 °C, a cable gland with a silicone seal has to be used.

Consequently is

[c] = „S“ (Silicone)

### 2c) Selection of the plating [e]

All cable glands can be provided either with nickel plated surface "NI" or with self-coloured surface "SC".

In the example case the enclosure is used outdoor, therefore it can come into contact with water in form of rain, so that a cable gland with nickel plated surface as protection against corrosion and wear has to be selected. Consequently is [e] = „NI“

The generated information has to be filled into the order key below:

| Order key                   | [Type] | [a] | [b] | [c] | [d] | [e] | [f] | [ggg] |
|-----------------------------|--------|-----|-----|-----|-----|-----|-----|-------|
| Example Article Description | KDSU   |     | B   | S   | 0   | NI  |     |       |

## 3. Selection of the entry thread [a], the cable outer sheath variant [f] and the gland size [ggg]

| Order key                   | [Type] | [a] | [b] | [c] | [d] | [e] | [f] | [ggg] |
|-----------------------------|--------|-----|-----|-----|-----|-----|-----|-------|
| Example Article Description | KDSU   |     | B   | S   | 0   | NI  |     |       |

The suitable gland size [ggg] will be selected based on the inner and outer sheath diameters of the cable. Thereby the entry thread size [a] and the cable outer sheath variant [f] result.

In the example case the following diameters are given:

Cable Outer Sheath: 10 mm (By looking into the below shown dimensions chart of the KDSU the orange marked clamping ranges (Cable Outer Sheath [D]) can be selected).

Cable Inner Sheath: 8 mm (By looking into the below shown dimensions chart of the KDSU the orange marked clamping ranges (Cable Inner Sheath [C]) can be selected).

## Dimensions

| Dimensions           |              |                     |                    |            |                        |                        |      |               |      |      |                         |             |
|----------------------|--------------|---------------------|--------------------|------------|------------------------|------------------------|------|---------------|------|------|-------------------------|-------------|
| Gland Size           | Entry thread | Entry thread Length | Max Outer Diameter | Max Length | Gland Seal Range       |                        |      |               |      |      | Armour Acceptance Range | Shroud Size |
|                      |              |                     |                    |            | Cable Inner Sheath [C] | Cable Outer Sheath [D] |      |               |      |      |                         |             |
|                      |              |                     |                    |            |                        | Standard [f]=2         |      | Reduced [f]=1 |      |      |                         |             |
|                      |              |                     |                    |            |                        | Min                    | Max  | Min           | Max  | Min  |                         |             |
| [ggg]                |              | [B]                 | [A]                |            | Min                    | Max                    | Min  | Max           | Min  | Max  |                         |             |
| G16                  | M20          | 16                  | 28.0               | 78.0       | 3.4                    | 8.4                    | 9.0  | 13.5          | 6.7  | 10.3 | 0.15 - 1.25             | L24         |
| G20S                 | M20          | 16                  | 28.0               | 78.0       | 7.2                    | 11.7                   | 11.5 | 16.0          | 9.4  | 12.5 | 0.15 - 1.25             | L24         |
| G20                  | M20          | 16                  | 33.0               | 78.0       | 9.4                    | 14.0                   | 15.5 | 21.1          | 12.0 | 17.6 | 0.15 - 1.25             | EL30        |

All dimensions in mm

By the selection of the inner [C] resp. outer [D] clamping range, a range should be used where the diameter of the cable outer and inner sheath are as near as possible to the average of the Min/Max Values. In doing so, the reduced cable outer sheath with the gland size G20S and the entry thread of M20 has to be selected.

Consequently is

[f]=1

[ggg]=G20S

[a]=M20

The generated information has to be filled into the order key below:

| Order key           | [Type] | [a] | [b] | [c] | [d] | [e] | [f] | [ggg] |
|---------------------|--------|-----|-----|-----|-----|-----|-----|-------|
| Article description | KDSU   | M20 | B   | S   | 0   | NI  | 1   | G20S  |

Resulting from the complete article description the relating order number (brown marked) can be determined.

## Cable glands for Ex applications - Brass

### Klippon® cable glands - Brass - Ex e, Ex d, IP 68 for armoured and non-armoured cables

All-purpose cable gland for cables and lines with single-wire armouring, metal-foil armouring and braided armouring. Non-armoured cables and lines can also be connected.

#### Technical data

#### Note

- All cable glands have a thread pitch of 1.5 mm.
- In the case of Ex d applications, the inner threads used for cable glands must meet the requirements of section 5.3 of EN/IEC 60079-1. In the screwed in position, at least 5 threads must be engaged.
- If the cable glands are installed in non-metallic Ex e connection equipment, these must be connected to the protective earth of the system.
- The connection cable must be laid securely and inflexibly to rule out tensile stress.

## Klippon® cable glands - Brass - Ex e, Ex d, IP 68 for armoured and non-armoured cables

All-purpose cable gland for cables and lines with single-wire armouring, metal-foil armouring and braided armouring. Non-armoured cables and lines can also be connected.

## Note

- All cable glands have a thread pitch of 1.5 mm.
- In the case of Ex d applications, the inner threads used for cable glands must meet the requirements of section 5.3 of EN/IEC 60079-1. In the screwed in position, at least 5 threads must be engaged.
- If the cable glands are installed in non-metallic Ex e connection equipment, these must be connected to the protective earth of the system.
- The connection cable must be laid securely and inflexibly to rule out tensile stress.

## Cable glands for Ex applications - Brass

## Klippon® cable glands - Brass - Ex e, Ex d, IP 68 for armoured and non-armoured cables

All-purpose cable gland for cables and lines with single-wire armouring, metal-foil armouring and braided armouring. Non-armoured cables and lines can also be connected.

## Note

- All cable glands have a thread pitch of 1.5 mm.
- In the case of Ex d applications, the inner threads used for cable glands must meet the requirements of section 5.3 of EN/IEC 60079-1. In the screwed in position, at least 5 threads must be engaged.
- If the cable glands are installed in non-metallic Ex e connection equipment, these must be connected to the protective earth of the system.
- The connection cable must be laid securely and inflexibly to rule out tensile stress.

## Cable glands for Ex applications - Brass

## Klippon® cable glands - Brass - Ex e, Ex d, IP 66 / IP 68 for armoured cables

Cable gland for cables and lines with single-wire armouring.

**Note**

- All cable glands have a thread pitch of 1.5 mm.
- In the case of Ex d applications, the inner threads used for cable glands must meet the requirements of section 5.3 of EN/IEC 60079-1. In the screwed in position, at least 5 threads must be engaged.
- If the cable glands are installed in non-metallic Ex e connection equipment, these must be connected to the protective earth of the system.
- The connection cable must be laid securely and inflexibly to rule out tensile stress.

## Cable glands for Ex applications - Brass

## Klippon® cable glands - Brass - Ex e, Ex d, IP 66 / IP 68 for armoured cables

Cable gland for cables and lines with single-wire armouring.

**Note**

- All cable glands have a thread pitch of 1.5 mm.
- In the case of Ex d applications, the inner threads used for cable glands must meet the requirements of section 5.3 of EN/IEC 60079-1. In the screwed in position, at least 5 threads must be engaged.
- If the cable glands are installed in non-metallic Ex e connection equipment, these must be connected to the protective earth of the system.
- The connection cable must be laid securely and inflexibly to rule out tensile stress.

## Cable glands for Ex applications - Brass

## Klippon® cable glands - Brass - Ex e, Ex d, IP 66 / IP 68 for armoured cables

Cable gland for cables and lines with single-wire armouring and lead-sheath armouring.

**Note**

- All cable glands have a thread pitch of 1.5 mm.
- In the case of Ex d applications, the inner threads used for cable glands must meet the requirements of section 5.3 of EN/IEC 60079-1. In the screwed in position, at least 5 threads must be engaged.
- If the cable glands are installed in non-metallic Ex e connection equipment, these must be connected to the protective earth of the system.
- The connection cable must be laid securely and inflexibly to rule out tensile stress.

## Cable glands for Ex applications - Brass

## Klippon® cable glands - Brass - Ex e, Ex d, IP 66 / IP 68 for armoured cables

Cable gland for cables and lines with braided armouring.

**Note**

- All cable glands have a thread pitch of 1.5 mm.
- In the case of Ex d applications, the inner threads used for cable glands must meet the requirements of section 5.3 of EN/IEC 60079-1. In the screwed in position, at least 5 threads must be engaged.
- If the cable glands are installed in non-metallic Ex e connection equipment, these must be connected to the protective earth of the system.
- The connection cable must be laid securely and inflexibly to rule out tensile stress.

## Klippon® cable glands - Brass - Ex e, Ex d, IP 66 / IP 68 for armoured cables

Cable gland for cables and lines with braided armouring.

## Technical data

## Note

- All cable glands have a thread pitch of 1.5 mm.
- In the case of Ex d applications, the inner threads used for cable glands must meet the requirements of section 5.3 of EN/IEC 60079-1. In the screwed in position, at least 5 threads must be engaged.
- If the cable glands are installed in non-metallic Ex e connection equipment, these must be connected to the protective earth of the system.
- The connection cable must be laid securely and inflexibly to rule out tensile stress.

## Cable glands for Ex applications - Brass

## Klippon® cable glands - Brass - Ex d, IP 68 for armoured and non-armoured encapsulated cables

Barrier cable glands for cables and lines with a single-wire, metal-foil armouring, and braided armouring for Ex-d IIC enclosure, with a volume of more than two litres.

| <b>Note</b> <ul style="list-style-type: none"> <li>All cable glands have a thread pitch of 1.5 mm.</li> <li>In the case of Ex d applications, the inner threads used for cable glands must meet the requirements of section 5.3 of EN/IEC 60079-1. In the screwed in position, at least 5 threads must be engaged.</li> <li>The connection cable must be laid securely and inflexibly to rule out tensile stress.</li> </ul> |            |                  |                  |          |    |      |      |            |

## Klippon® cable glands - Brass - Ex d, IP 68 for armoured and non-armoured encapsulated cables

Barrier cable glands for cables and lines with a single-wire, metal-foil armouring, and braided armouring for Ex-d IIC enclosure, with a volume of more than two litres.

## Note

Sealing plugs

Sealing plugs - Plastic - Ex e, IP 66

Sealing plugs with accessible hexagon recess, made from glass-fibre-reinforced nylon. They are used to seal unused threaded holes so that cable glands can be connected in the future – also recommended for Ex applications.

Compensating elements

Compensation elements - EWS

We recommend using the EWS drainage plug in order to drain moisture out of the enclosure. This component is not suitable for providing ventilation to the enclosure.

Breather drains – Klippon® BDX

The BDX compensating element is used for ventilating the enclosure and preventing a build up of moisture, particularly in Ex applications.

| <b>Note</b><br>- The breather-drain is only to be fitted on the bottom side of the enclosure, aligned vertically with the thread upwards, and at the lowest point to permit proper drainage.<br>- Fully assembly instructions are supplied with the breather drain. The instructions must be read prior to installation and adhered to in full.<br>- The water flow rate has been tested by a water filled empty enclosure (no pressure or heat producing internal components). The water flow rate can slightly differ by influences from operational parameter and environmental conditions. |                                                       |

Cable entry system

Would you prefer to connect a pre-assembled cable to an installation enclosure or cabinet, or install it later, without having to dismantle the plug or cut it from the cable? If so, you can save time and money by using our modular Cabtite cable entry system. These systems are a combination of splittable cable entry strips or cable glands connected with clamping grommets.

The use of split, captive grommets allows different diameters to be fed into the enclosure whilst simultaneously guaranteeing IP 54 protection and strain relief. Thanks to the fact that they have the same design and dimensions, the modular components and grommets can be used in cable entry strips as well as in cable glands. The system is found particularly in measurement, power, computer lines or field bus systems in the areas of:

- Control engineering
- Switchgear cabinet manufacture
- Motor vehicle manufacture
- Systems engineering
- Mechanical engineering
- Electrical installation

Cabtite KEL SNAP frame

Separable cable gland Cabtite KVT

Cabtite sample set

Get a feel for the Cabtite system with our Cabtite sample set. It contains cable entry frames, snap frames, separable cable glands as well as diverse cable grommets.

## Cabtite KEL

### Cabtite KEL

The rectangular panel cutout frames fit exactly into the standard cutout for heavy-duty connectors. This makes it possible to accommodate up to 40 connectors in a very confined space.

- Feeds through prefabricated wiring in confined spaces.
- Two-piece, two-tier system
- Fast and easy mounting
- Standard panel cutout frames for 16 and 24 pole industrial plug-in connectors
- The predefined gap achieves a minimum class of protection of IP 54
- Large numbers of cables in very confined spaces
- Retrofitting of prefabricated wiring also possible
- The manufacturer's guarantee covering the prefabricated cables remains valid
- Integral strain relief to VDE 0619
- Locknuts ensure that working "overhead" is safe and simple

### Cabtite KEL SNAP frame

Snap frame for mounting the cable entry frame in the switchgear cabinet.

- The KEL can be fitted quickly without tools
- The KEL need not be fitted or removed to add or remove individual cables
- The drilling pattern is identical with that of the KEL
- Seals are already integrated on both sides
- Switchgear cabinets can be fitted with KEL SNAP in advance
- KEL Snap is available for KEL 16, KEL 24 and KEL B4.

### Cabtite KEL-DP

The Cabtite KEL-DP feed-through plate system offers an affordable alternative to standard cable glands. It is ideal when multiple cables must be connected within an installation enclosure and when IP 54 protection is adequate. Weidmüller offers this system with round and rectangular entry plates. The entry plates are simply pressed into the standard cut-outs. The position of the system is centred by means of integrated spring-loaded pins.

The advantages of this system are clear:

- High packing density
- Affordable
- Simple, tool free installation in seconds
- Very low profile

### Operating mode

1. The grommet is fitted around the cable.

#### Important:

Choose an appropriately sized grommet for the diameter of the cable!

2. Press the grommet with the cable into the open cable entry frame..

#### Important:

The flat side of the grommet must face upwards!

3. Assemble the two halves of the cable entry frame using the M5x50 Allen screws supplied. This achieves integral strain relief in accordance with VDE 0619 (VDE = German Association for Electrical, Electronic and Information Technologies).

4. Finally, the rubber seal is glued around the cabinet panel cutout and the cable entry frame is secured with 4 screws. The cable entry is now complete, and has a protection class of IP 54!

**Advantage:** The panel cutout frames are the same as those used for heavy-duty connectors. They are supplied by the switchgear cabinet manufacturers. You do not require a new punching die!

## Cable entry strips and panels

### Cable clamping rail Cabtite KEL-EMV

Provides electromagnetic protection for prefabricated cable without interrupting shielding.

#### Advantages:

- Direct, simple and quick contact with the enclosure
- Two-tier version saves space with up to 10 cables
- Strain relief without cable ties in accordance with VDE 0619
- No EMC cable glands necessary for mains-generated interference sources
- Low-impedance shielding contact
- Seals using outer sheath and not the shield = higher class of protection!
- Trouble-free retrofitting

Strain-relief strips

The Cabtite KZL strain-relief strips are used when routing various types of cables to machines and electrical cabinets. A secure grip is ensured by the undercut on the comb-shaped profile. Cable ties provide strain relief for the cables. Undercuts in the teeth of the KZL prevent the cable tie from slipping out.

## Separable cable gland

### Cabtite KVT

KVTs are used to feed through prefabricated cables when space is tight or only a few cables are required. As is the case with its big brother, the KEL, this product is also a two-piece system for easy assembly using the same cable grommets. The preassembled KVT32 can be used for hole diameters up to 35 mm, the KVT63 for hole diameters up to 65 mm. A sealing ring is also included.

- This two-piece system means that the size of the plug-in connector to be fed through is limited only by the size of the hole diameter.
- Two-piece two-tier system
- Fast and easy mounting
- The predefined gap achieves a minimum class of protection of IP54
- Large numbers of cables in very confined spaces
- Retrofitting of prefabricated wiring also possible
- The manufacturer's guarantee covering the prefabricated cables remains valid
- Integral strain relief to VDE 0619

#### Technical data

|  KGM-SUB-D9   | M 32 x 1.5 | 1                                 | -     | 10   | 1828250000 |

**Note:** HDC KVT 63-x types are supplied with a locknut.

### Operating mode

1. The grommet is fitted around the cable.

#### Important:

Choose an appropriately sized grommet for the diameter of the cable!

2. Press the grommet with the cable into the open cable gland. The flat sides of the grommet must face upwards when fitting the KVT 63/4!

3. Squeeze the two halves of the cable gland together until they lock together with an audible "click".

4. Place the seal, which is also supplied, over the thread. Then fit the cable gland into the hole and, if necessary, secure it with a locknut.

## Tools

Weidmüller's professional tools are the result of an intensive development process that has been specifically focussed on the requirements of their use in practice. It is only possible to develop the perfect tool if you fully understand the application of their products and tools. At Weidmüller, everything fits together. Weidmüller offers a variety of useful tools that will assist you in working safely and precisely and in the best possible way when processing and working with enclosures. Weidmüller offers a large range of screwdrivers, for example, using the DMS Manual range you can always make sure you reach the correct torque for mounting rails, gland plates or lid screws.

## Hydraulic hole puncher

The IP protection classes for enclosures, cable glands, heavy-duty connectors and Industrial Ethernet connectors can only be maintained under two conditions: the sheet metal must not be bent during the punching process and the size of the punched-out holes must correspond precisely with the specifications. The IE-KO-HAT hydraulic sheet metal hole puncher, together with its accessories, guarantees you the highest quality workmanship available. It ensures that the connector fits precisely with the punched-out holes so that you can fulfill the proper IP protection class requirements.

The hydraulic hole puncher punches out precise holes for accommodating metric and PG cable glands.

Automatic centre punching at the drill points when punching out holes for heavy-duty connectors.

Punching out holes for a variety of industrial Ethernet connectors.

The table below lists the round splitting stamps and their corresponding tension screws – for manual use and for use with the hydraulic screws

**Note:** Hydraulic screw included in the IE-KO-HAT set.  
Tension screws only used for manual operation.

## Hydraulic hole puncher

Incl. accessories:

- 1 hydraulic screw Ø 19 mm
- 1 hydraulic screw Ø 19 x 9.5 mm
- 1 HSS pre-drill Ø 10 mm
- 1 spacer nut set (3-part)
- 1 bridge

## IE-KO-HAT

- Overpressure valve protects against overloading
- Cylinder head angled 90°
- Angled head can be rotated through 360°
- Ergonomic handle springs back automatically
- The piece of waste no longer becomes jammed thanks to 3-fold cleaving
- Hydraulic punch manufactured from high-strength aluminium (approx. 40 % less weight)

# Screwdrivers

Precisely the proper torque! It's indispensable when you require your work to be precise, effective and repeatable: for example when screwing in sensitive or expensive components, during assembly, final testing, or during quality inspection. This is the ideal job for Weidmüller's manual torque screwdriver with its ergonomic grip and its unique interchangeable bit system.

The Weidmüller screwdriver assortment is the perfect solution; it features the ergonomic design and versatility required for demanding professional applications. Weidmüller safeguards your safety, health, comfort and efficiency with our ergonomic design.

In order to establish secure manual screw connections, all Weidmüller screwdrivers and manual torque screwdrivers feature an advanced geometry, slip protection and a special SoftFinish® area. These qualities enable optimal handling and ensure electrical safety and hand protection even when working on the most critical and potentially dangerous applications.

Weidmüller offers a wide variety of electric screwdrivers, standard bits and innovative quick-change holders – the perfect additions to the manual torque screwdriver. They are the ideal tool for achieving a high level of repetitive accuracy, which is made possible through their ergonomic design and integrated automatic torque control which comes as standard.

Weidmüller also offers innovative solutions for special applications such as cable glands or the fastening of sensor cables.

## DMS manual / DMSI manual

### Torque screwdrivers with insulation up to 1,000 V (VDE) DMSI manual

The „DMSI manual“ with an integral window scale, combined with a Weidmüller 1,000 V insulated (VDE) interchangeable blade, ensures controlled tightening of screws and maximum reliability in electrical applications.

Every 1,000 V insulated (VDE) handle and blade is tested and provides the necessary safety up to 1,000 V AC / 1,500 V DC.

### Torque screwdrivers DMS manual

This is a versatile tool suitable for a variety of jobs, with an integral scale for easy reading of the torque value and a Weidmüller interchangeable blade.

#### Each model is available with two torque ranges:

- 0.5 to 1.7 Nm
- 2.0 to 8.0 Nm
- setting tool included

#### Advantages:

- Compact and especially lightweight design
- Torque set with special tool (included) to ensure the right setting
- Ergonomic handle size to match the torque range
- Every tool checked and given an ID No., 100 % quality control with verification and product reference
- Audible, unmistakable click upon reaching the torque, no unnecessary effort
- Interchangeable blade made from high-quality wear-resistant tool steel
- All tools comply with the accuracy stipulations of: EN ISO 6798, BS EN 26789, ASME B107.14M
- Operating accuracy:  $\pm 6$  % of set scale value

## Cable gland tools

Screwing tool for all types of cable glands.

- Can tighten or loosen several rows of cable glands
- No deforming of the cable glands

### FleCaFix 11/24

Cable gland tool

- Spanner size: 11 to 24 AF
- Infinite adjustment of spanner size
- Ratchet function: not necessary to remove tool between turns
- Authentic one-hand tool

### FleCaFix 24/36

Cable gland tool

- Spanner size: 24 to 36 AF
- Infinite adjustment of spanner size
- Ratchet function: not necessary to remove tool between turns
- Authentic one-hand tool

# Screwdrivers

Weidmüller screwdrivers come in four different grip sizes, and are the result of a consistent grip concept which takes into account both the human hand and the different work requirements and conditions.

- Perfect handling with all grip sizes
- Maximum torques
- Optimum transmission of axial force
- Complete range including all commercial sizes

## SoftFinish® grip

Weidmüller's SoftFinish® grip zone for use in dry conditions and for general applications offers customers a complete range of screwdrivers that enables far higher torques as well as substantially more comfort due to the soft material of the grip.

### Product benefits:

- Made of an especially soft material, which is kind to the skin, the SoftFinish® zone enables maximum torques
- Perfect ergonomic grip design for comfortable screw driving and optimum handling
- You can choose from long-life extremely stressable blades in standard sizes
- ChromTop blade tip offers maximum corrosion protection and greatest possible dimensional accuracy of the blade geometry in the screw head over many years

## SoftFinish® electric

VDE-insulated screwdriver according to DIN EN 60900, IEC 900 for work on live equipment

### Product benefits:

- The protective insulation moulded directly on the screwdriver blade ensures electrical safety, even in critical applications
- Safe for working at up to 1,500 volts DC and 1,000 volts AC
- Each screwdriver is individually tested in a water bath at 10,000 volts according to DIN EN 60900
- Perfect ergonomic grip design for comfortable screw driving and optimum handling
- Made of special soft material which is kind to the skin, the SoftFinish® zone prevents slipping in critical situations and at the same time enables maximum torques

**VDE-insulated screwdriver**

VDE-insulated screwdriver, for working on live parts up to 1.000 V AC and 1.500 V DC.  
DIN EN 60900, IEC 900,  
Each piece „GS Safety“ tested. Bit made from fully hardened, high-alloy  
chromiumvanadium-molybdenum steel, gun-metal finish.

**SDI S**

**VDE insulated slot-head screwdriver, SDI DIN 7437, ISO 2380/2, drive output  
acc. to DIN 5264, ISO 2380/1. SoftFinish® grip**

Cross-Key Master

Universal key

- With bit holder and reversible bit (drives - refer to symbols)
- Material: diecast zinc
- Dimensions: 62 x 90 mm

**Application:** For almost all technical locking systems in buildings including: doors, window handles, radiator bleed valves, sanitary installations, HVAC, gas and water supply

## Application specific solutions – Your requirements are our motivation

Each industry has its own requirements calling for more and more individual solutions aside from standard products. Your new product might have to contend with severe conditions. Many applications are subjected to high mechanical strains – through vibration or directly applied forces. Extreme temperature conditions or an application in hazardous areas are further factors your product must be able to comply with. We can offer you highly competent expertise to support you in the selection of ideal products, whatever your application. Feel free to contact us!

From custom product development, customer-specific assembly or application-specific products that are ready for use - we can help you to optimise your working processes and ensure your company's sustained efficiency, today, as well as for the future.

### Individual product development

Working closely with you, we can develop individual and future-proof products using the latest technologies and which are specifically tailored to your application.

### Customer-specific assembly

Our highly-skilled production expertise and broad product portfolio means that we can deliver superior solutions to meet and exceed your specification requirements.

### Application-specific products

Our cross-industrial solutions set standards: Set up for your application, instantly ready for use and available from stock.

# Individual product development for your success

## We have a passion for simple, innovative solutions

Working with you, we can develop innovative and future-oriented products tailored to your application. Our philosophy is "one customer - one product". It is not the product that is the starting point, but you, your technical specifications and your requirements.

## A connecting partnership

The development of individual products means making the most of the experience and competencies available in the partnership. Our project management provides a professional and quality approach - from concept and design through to development, implementation and production. Our extensive knowledge of electrical connectivity, enclosure and sealing technology, as well as signal conditioning are all at your disposal.

## Benefit from a reliable partner:

- **Increase the efficiency of your development and production processes**

Outsourcing the development and production of your components will shorten your time-to-market. In addition, you have more time to concentrate on your core competencies.

- **Take advantage of our applications and production experience and expertise**

You can draw on the accumulated knowledge of our applications engineers and our specialists in the fields of connection technology, enclosure and surface technology, as well as metal and plastic processing, which is second to none.

- **Feel safe with the professional approach of our project management**

Through innovation workshops, feasibility studies and profitability analyses we define a requirement profile forming the basis for the further development process. In this way, you can be sure of the best possible products for your needs.

## Application specific products – solutions for industries and markets

Industries and applications often have similar or even identical requirements for products or product assemblies. Application specific products that are based on earlier realised solutions are now directly available from stock.

**Your advantage:** You quickly get a suitable and cost-efficient solution.

### Cross industrial solutions as standard

It is our aim to develop solutions that offer the additional advantage of a truly flexible design. Although this may mean an application-specific product may have an additional input or terminal you don't need, it can still be much cheaper than having a custom-made solution. Therefore, you not only save time, but money!

### Reap multiple benefits:

- **High availability**

Application specific products are available from stock without delay. So you can rely on the delivery of your products when you need them.

- **Advice from application engineers**

Using the expertise of our applications engineers means that you can develop the solutions that are not only right, but which deliver added value to your applications.

- **Supportive software**

Project planning and evaluation is made easy with our software solutions such as NetCalc, RailDesigner® or Softclinic.

- **Worldwide application centres**

We stay in constant dialogue with our worldwide application centres, ensuring that our own application knowledge is shared, kept up to date and at your disposal anywhere you need us.

## Customer specific assembly, tailored configuration

You may be looking to bring costs down and increase your efficiency. It may be that you would like more time to focus on your core competencies. You could be looking for a partner who will sent up intelligent solutions for you, that you can trust to deliver your specific requirements. Here at Weidmüller, we have a wealth of expertise, capability, and capacity to deliver custom solutions that are flexible, economically advantageous and on time.

We offer to work closely with you, providing support and advice, and in putting together the job specification. Furthermore, our broad product portfolio means that we can jointly work together on the selection of the best components to make up your custom solution.

### Highest levels of professional production

You have complete access to our highly-skilled project management team and our production expertise, for example, in the ATEX area. We can offer you a comprehensive portfolio of customer-specific assemblies, from simple assembly to the modification of existing electronics products.

Our services include:

- Adaptation and assembly of enclosures for all IP protection classes
- ATEX solutions for hazardous areas
- Assembly of heavy duty connectors
- Assembly of terminal strips
- Customer specific electronics solutions
- Cable assembly

### Take advantage of:

- **Simple ordering and stockholding information**

One solution – one item number! It will no longer be necessary to order single components. Article variety and stockholding will be reduced.

- **Professional assembly**

All individual components will be pre-assembled, reducing your own assembly time and costs.

- **Less costs for documentation**

Our RailDesigner® software will facilitate the generation of parts lists or drawings.

- **Modern processing of enclosures**

Our CNC processing centres can adapt the enclosures to suit your tailored solution.

# Customer specific assembly – consultation, product, development and production – all from a single source

Our application and manufacturing expertise influences decisions on all areas of modern connection technology. They therefore play an integral part of every solution.

## Enclosures

Perfect protection and safety

- Enclosures for all IP protection classes
- ATEX enclosures for hazardous areas
- Placement of inspection glasses, drill holes and threads
- Elaborate machining operations like the milling of contours
- Class C5 welding, according to DIN 6700, for stainless steel and sheet steel enclosures
- Surface coating as and when required
- Individual device and system markers

## Heavy duty connectors

Perfect connection with system

- Placement of drill holes and cable glands
- Equipped with plug-and-play components
- Wiring of subassemblies
- Cable assembly
- All housings are available with individual laser marking

## Terminal strips

Configuration made to measure

- Machining of mounting rails
- Snapping components onto terminal rails
- Placement of cross connections
- Mounting of standard wires
- Marking of terminals, devices, wires and cables

### Electronics

Individual solution from the beginning

- Modular terminal blocks, component plugs, snap on bases, enclosures for electronics: integration of relevant electronic components
- Snap-on base: Component carrier design or simple wiring of the modules
- Interface units
- Modification of existing electronic products: Modification of the circuitry or specific calibration
- Combination of components: Relays or optocouplers in combination with other components

### Cable assembly

Our special service

- Pre cutting of wires and cables
- Installation of
  - Heavy duty connectors
  - PCB connectors or DIN connectors
- Conditioning of wire ends
- Mounting of wire end ferrules and cable lugs
- Connection of wires to terminal rails

## RailDesigner®

### A faster way to configure and order terminal strips

These days, time and cost efficiency are of the essence when it comes to working in planning and production. RailDesigner®, our free configuration and purchasing software, uses its virtual assembly of mounting rails (assembled or unassembled) to help you with the design of your own completely personal solution.

#### **RailDesigner® brings you substantial benefits:**

##### **Less time required**

It speeds up the process of acquiring quotations and placing orders because, for example, all processes can be initiated directly from the software. You configure your projects and the rest virtually takes care of itself!

##### **User friendly operation**

Any potential errors are prevented by automatic installation tips and clear project processing and management. So that you can plan your project realistically, RailDesigner® offers both 2D and 3D displays.

##### **Wide selection from the current product portfolio**

"You can easily download software updates for RailDesigner® from the internet. This means that you will always have access to the latest version of our product database."

##### **Project planning that is compatible with your software**

Plan and design your projects easily using your usual CAE software. With the integrated interface, transferring data from your CAE system has never been so simple. You can export component lists and terminal strip designs in various formats. Marking data is automatically transferred to the M-Print® Pro labelling software.

##### **Simple purchasing of terminal strips**

Once you have completed the planning stages of your projects in RailDesigner®, you can choose to send all of your data to us by email. Then we take over the assembly and deliver the required configuration to you, along with anything else that you still require for your project.

Download the software for free and discover the advantages to using RailDesigner® at **[www.raildesigner.de](http://www.raildesigner.de)**

# Product assistant for distribution boxes and assemblies – The perfect solution, in the shortest time

You can easily and quickly select, combine and purchase the required components, all with the help of the Weidmüller product assistant for distribution boxes and assemblies. This means that you can rapidly obtain your individual enclosure solutions which may include the following components:

## Empty enclosures without holes

Empty enclosures in various sizes of the Klippon® K and Klippon® POK series (aluminium and plastic) with matching mounting rails.

## Empty enclosures with pre-threaded holes

Empty enclosures in different sizes from the Klippon® K and Klippon® POK series (aluminium and plastic), that are already equipped with metric threaded holes.

## Mounting rails

Exactly tailored mounting rails for the enclosure sizes on offer.

## Terminal strips

Mounting rails, which also perfectly match the offered enclosure sizes and are pre-fitted with terminals, optionally with screw or tension clamp connection.

## Distribution boxes with Ex-protection

Enclosures that are already assembled with a terminal strip and already equipped with metric threaded holes.

## Numerous possible combinations

Enclosures with Ex-protection are supplied exclusively with terminal strips that are already fitted. The product assistant offers you various approaches for industry variants so that you can create the right enclosure variant.

You can start off with any of the listed components and then add further components to the combination. This means that, for example, you can select the required terminal strip and the product assistant will then offer the matching enclosure variants.

Or, you can start with the enclosure, and matching terminal strips or mounting rails will then be chosen. The selected products can then be directly included in the query list.

## Provision of all relevant data

During the selection, you can choose filters for the terminal strips, such as length, connection technology or dimensional cross-section and, for the enclosure, you can choose material, size, holes etc. If a product is then selected and combined, the user can view all of the relevant data, including drawings and pictures. This means that you can extensively plan how the enclosure will be integrated into the customer's application.

The product assistant is available at <http://galaxy.weidmueller.com>

## Online product catalogue

If you have questions about the specifications and details of our products, perhaps even outside normal business hours, then our online catalogue at

**<http://catalog.weidmueller.com>**

is opened 24 hours a day, 365 days a year and is the perfect source for information. Besides product features and part numbers, it contains extensive additional information on all product groups.

For further information, offers and your personal contact, simply consult the Weidmüller website at

**[www.weidmueller.com](http://www.weidmueller.com)**

**With one click selection for the product data sheet of your choice.**

## M-Print® PRO label designer

The comprehensive range of Weidmüller services includes the M-Print® PRO software. This is a professional standard, Windows®-based program for printing and ordering labels and markers that is coordinated with our current printing systems and marking materials.

M-Print® PRO enables you to design your labelling materials professionally and quickly. Texts, borders, lines, graphics, barcodes, serial numbers and photographs are all possible. The interface to RailDesigner® or your CAE system enables the transfer of all your configured data.

# ATEX directive 1999/92/EC

Article 137 of the European Community Formation Treaty set out the minimum standards in order to improve workers' health and safety, this can also be put at risk by explosive atmospheres. An explosive atmosphere is a mixture of air and flammable gasses, vapours, mists or dust under atmospheric conditions where, following successful ignition, the burning process will propagate throughout the whole unburned mixture.

The ATEX directive 1999/92/EC was transferred into national law. Compliance with the minimum standards contained in this directive does not guarantee that all relevant national laws are met. It is possible for local regulators to introduce more stringent requirements.

The employer is required, according to the ATEX directive 1999/92/EC, to take measures to ensure the health and safety of the employees. One measure is the division of the area into zones where explosive atmospheres could be present.

Unless the risk analysis conducted by the employer indicates otherwise, all areas where an explosive atmosphere may be present must be equipped with devices and protective systems that meet the relevant category of the ATEX directive 94/9/EC.

In particular in these zones the following categories of equipment should be used, as long as they are suitable for use with gases, vapours, mists or dusts:

- In Zone 0 or Zone 20: category 1 devices,
- In Zone 1 or Zone 21: category 1 or category 2 devices,
- In Zone 2 or Zone 22: category 1, category 2 or category 3 devices.

## Zoning according to the ATEX directive 1999/92/EC

### Zone 0

An area which has a potentially explosive atmosphere that is a mixture of air and **flammable gases, vapours or mists**. The mixture is either permanently present or frequently present over long periods of time.

### Zone 1

An area in which during normal operations a potentially explosive atmosphere of air and **flammable gases, vapours or mists** can occasionally form.

### Zone 2

An area for which during normal operations there is at most only a short-term occurrence of a potentially explosive atmosphere of mixtures of air and **flammables gases, vapours or mists**.

### Zone 20

An area where a potentially explosive atmosphere is present in the form of a **flammable dust** cloud in the air. This cloud is either permanently present or frequently present over long periods of time.

### Zone 21

An area where, during normal operations, a potentially explosive atmosphere in the form of a **flammable dust** cloud in the air can occasionally form.

### Zone 22

An area where, during normal operations, a potentially explosive atmosphere in the form of a **flammable dust** cloud in the air is not normally present or only present for a short time.

For the risk assessment and as well as the zoning concept described above, Ex devices themselves can be considered in an alternative process which uses the equipment protection level (EPL). These protective levels determine the internal ignition risk of a device where the sort of applied protection does not play a role.

The system of EPL classifications (Equipment Protection Level) is shown below.

### **Firedamp (methane) risk mines (Group I)**

#### **EPL Ma**

Equipment for installation in mining applications, offering a „very high“ level of protection and which do not constitute a source of ignition during normal operation, or in the event of rarely occurring faults.

#### **EPL Mb**

Equipment for installation in a mine with a high level of protection. Has sufficient safety to ensure that there is no source of ignition in the period of time between the outbreak of gas and the time the equipment is switched off.

### **Gases (Group II)**

#### **EPL Ga**

Equipment for explosive-risk gas atmospheres with a very high level of protection. No source of ignition is present during normal operation or when errors occur that cannot be necessarily expected on a regular basis.

#### **EPL Gb**

Equipment for explosive-risk gas atmospheres with a high level of protection. No source of ignition is present during normal operation or when errors occur that cannot be necessarily expected on a regular basis.

#### **EPL Gc**

Equipment for explosive-risk gas atmospheres with an elevated level of protection. No source of ignition is present during normal operation and it can have additional safeguards to ensure that none is present during faults which happen regularly (e. g. failure of a lamp).

### **Dust (Group III)**

#### **EPL Da**

Equipment for combustible dust atmospheres with a very high level of protection. No source of ignition is present during normal operation or in very rare faults.

#### **EPL Db**

Equipment for combustible dust atmospheres with a high level of protection. No source of ignition is present during normal operation or when errors occur that cannot be necessarily expected on a regular basis.

#### **EPL Dc**

Equipment for combustible dust atmospheres with an elevated level of protection. No source of ignition is present during normal operation and it can have additional safeguards to ensure that none is present during faults which happen regularly (e. g. failure of a lamp).

## ATEX directive 94/9/EC

Article 95 of the European Community Formation Treaty deals with the equalization of laws of the Member States. The ATEX directive 94/9/EC sets out the basic requirements for health and safety protection as a directive following the new concept. It is aimed at manufacturers of equipment and components designed for used in potentially explosive atmosphere areas.

This directive had to be adopted without deviation into national law. In Germany, this was implemented through the enactment of the Explosion Protection Regulation (11 ExVO) of the Equipment and Product Safety Law (GPSGV). It applies to all industrial potentially explosive areas, including mines, and also covers protection from dust-ignited explosions.

This directive sets out the requirements for the products depending on their equipment group and category. This is the category as set down by the ATEX directive 1999/92/EC applicable for each appropriate zone.

To prove conformity with the basic health and safety regulations, harmonised standards are used. If the requirements as laid out in the Official Journal of the EU are met, then it will be in compliance with the standard requirements for conformity (presumption of conformity). Various, mostly equivalent, protection types have been standardised harmoniously.

This conformity assessment process of the directives sets out different procedures. For device category 3, the manufacturer can perform the conformity assessment itself. For devices of categories 1 and 2, this conformity check must be carried out at a notified body in the form of a EC type-examination. In addition, quality assurance must be monitored for the devices of categories 1, 2 and 3.

Weidmüller has devices and components in its product range. Empty enclosures are components and are certified at the factory as such. Installing certified components does not create a certified equipment. To do this, additional tests must be carried out.

Weidmüller offers customer-specific devices available as certified solutions. The production of assembled enclosures is monitored by a notified body.

# IECEx scheme

The IECEx scheme is an international certification scheme for products which meet the requirements of the international standards, e.g. the technical committee TC31's IEC standards.

The certificates awarded in this scheme are published on the IECEx website ([www.iecex.com](http://www.iecex.com)) as an electronic certificate. They can be viewed online and printed out.

A Certificate of Conformity (CoC) refers to a test report (Ex Test Report ExTR) and on an assessment of the quality assessment report from the manufacturer (QAR).

The standards used for the production of the test report correspond almost entirely to the harmonised standards in Europe. Recent EN standards were initially adopted as IEC standards.

## Protection concepts

The zoning described above provides the basis for the selection of the type of ignition protection. So, as an example, in the ATEX applicable areas, only ignition protection devices meeting Ex ia for Zone 0 (highest probability of an explosive atmosphere being present) are allowed.

### Increased safety Ex e No sparks and a surface temperature limited to a safe level

Increased safety is for products where there are no sparks produced during normal operation or in case of a failure. The surface temperature of the relevant parts is limited to a value below the ignition temperature.

Increased safety is achieved by reducing the current load and raising the isolation properties and by maintaining clearance and creepage distances above the value in an industrial application. The highest voltage permitted for this protection scheme is 11 kV (D.C. or A.C. rms).

This protection scheme is usually used for distribution cabinets..

### Intrinsically safe Ex i Limited to a safe level of ignition energy

Intrinsic safety is for products where electrical energy which flows into the product, or is stored in the product, is not sufficient to ignite the surrounding explosive atmosphere. This also applies in fault conditions. The methods that achieve intrinsic safety mean that it is important that not only the devices installed in direct contact with the explosive atmosphere are constructed correctly, but also the electrical devices to which they are connected.

Intrinsically safe equipment and intrinsically safe parts of the associated equipment are divided into protection levels: ia (for zones 0, 1, and 2), ib (for zones 1 and 2), and ic (only for zone 2).

A typical application area are control and display circuits with low voltage and current.

### Pressure-resistant Ex d encapsulation Limits the explosion to the inside of the enclosure

Pressure-resistant encapsulated enclosures are designed for devices where sparks are generated or which have hot surfaces which are a source of ignition during normal operation. Similarly, industrial components for use in potentially explosive atmospheres are often made suitable by encapsulating them in a pressure-resistant enclosure which otherwise could not be used.

The surrounding possibly explosive atmosphere can enter the enclosure and will produce an internal explosion during the equipment's lifespan.

The enclosure must therefore be stable enough to ensure that it is not deformed or destroyed by the pressure created. All connections of the enclosure are sized so that they cannot transmit an explosion from inside to the surrounding atmosphere. These connections are known as ignition gaps.

For this sort of ignition protection the explosion groups apply (IIA, IIB, IIC). Devices using this protection principle may not be installed in Zone 0.

### Classification of explosive groups in gas Ex protection

Flammable gases, vapours or mists are divided according to their ignition resistance capacity into the explosive groups IIA, IIB and IIC. This classification is based on the respective maximum experimental safe gap (MESG) and the minimum ignition current of the gases. The lower this value, the higher the danger presented by the gases. The danger of the gas increases from IIA to IIC so that all equipment certified for use in IIC areas may also be used in IIA and IIB areas.

| Explosion group | Maximum experimental safe gap (MESG) | Minimum ignition current |
|-----------------|--------------------------------------|--------------------------|
| IIA             | > 0.9 mm                             | > 0.8                    |
| IIB             | 0.5 mm to 0.9 mm                     | 0.45 to 0.8              |
| IIC             | < 0.9 mm                             | < 0.45                   |

### Definition of dust ignition protection

Dust refers to solid particles contained in the atmosphere, which eventually settle due to their own weight, but which for a time are present in the atmosphere as a dust-air mixture.

### Classification of zones and equipment categories

| Combustible ingredients            | Explosive atmospheres | Zone division | Identification  |                 |
|------------------------------------|-----------------------|---------------|-----------------|-----------------|
|                                    |                       |               | Equipment group | Device category |
| Gas, mist, vapours/fumes (G / Gas) | permanent, long-term  | Zone 0        | II              | 1G              |
|                                    | occasionally          | Zone 1        | II              | 2G              |
|                                    | unlikely, short-term  | Zone 2        | II              | 3G              |
| Dusts (D / Dust)                   | permanent, long-term  | Zone 20       | II              | 1D              |
|                                    | occasionally          | Zone 21       | II              | 2D              |
|                                    | unlikely, short-term  | Zone 22       | II              | 3D              |

# Ratings plate of an Ex-certified empty enclosure

- 1 Number of the notified body
- 2 Part No.
- 3 Part designation
- 4 Ex marking
- 5 Equipment group
- 6 Device category
- 7 • G Gas (gas)  
• D flammable dust
- 8 Explosion protection type
- 9 IP ingress protection class (DIN EN 60529)
- 10 EC type-examination certificate
- 11 Year of manufacture
- 12 Name and address of manufacturer

# IP class of protection to DIN EN 60529

The ingress protection class or IP rating is indicated by a code consisting of the two letters IP and two digits representing the class of protection.

Example:

**I P 6 5**

2nd digit: protection from liquids  
1st digit: protection from solid bodies

## Protection against intrusion of external particle matter (1st digit)

| Code digit |  |                                                                                                                                                          |
|------------|--|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0          |  | No protection                                                                                                                                            |
| 1          |  | Protection against ingress of large solid bodies with diameter > 50 mm. (Protection to prevent dangerous parts being touched with the back of the hand.) |
| 2          |  | Protection against ingress of large solid bodies with diameter > 12.5 mm. (Protection to prevent dangerous parts being touched with the fingers.)        |
| 3          |  | Protection against ingress of large solid bodies with diameter > 2.5 mm. (Protection to prevent dangerous parts being touched with a tool.)              |
| 4          |  | Protection against ingress of large solid bodies with diameter > 1 mm. (Protection to prevent dangerous parts being touched with a piece of wire.)       |
| 5          |  | Protection against harmful deposits of dust, which cannot enter in an amount sufficient to interfere with satisfactory operation.                        |
| 6          |  | Complete protection against ingress of dust.                                                                                                             |

## Protection against penetration of liquids (2nd digit)

| Code digit |  |                                                                                                                                                                                    |
|------------|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0          |  | No protection                                                                                                                                                                      |
| 1          |  | Protection against drops of condensed water falling vertically.                                                                                                                    |
| 2          |  | Protection against drops of liquid falling at an angle of 15° with respect to the vertical.                                                                                        |
| 3          |  | Protection against drops of liquid falling at an angle of 60° with respect to the vertical.                                                                                        |
| 4          |  | Protection against liquids splashed from any direction.                                                                                                                            |
| 5          |  | Protection against water jets projected by a nozzle from any direction.                                                                                                            |
| 6          |  | Protection against water from heavy sea on ships' decks.                                                                                                                           |
| 7          |  | Protection against immersion in water under defined conditions of pressure and time.                                                                                               |
| 8          |  | Protection against indefinite immersion in water under defined conditions of pressure (which must be agreed between manufacturer and user and must be more adverse than number 7). |

# Definition of the protection degrees according to NEMA, UL and CSA

| Type           | NEMA                                                                                                                                                                                                    | UL                                                                                                                                                                                                      | CSA                                                                                                                                                                                           |

We cannot guarantee that there are no mistakes in the publications or software provided by us to the customer for the purpose of making orders. We try our best to quickly correct errors in our printed media.

**X**

All orders are based on our general terms of delivery, which can be reviewed on the websites of our group companies where you place your order. On demand we can also send the general terms of delivery to you.

## **Weidmüller – Partner in Industrial Connectivity**

As experienced experts we support our customers and partners around the world with products, solutions and services in the industrial environment of power, signal and data. We are at home in their industries and markets and know the technological challenges of tomorrow. We are therefore continuously developing innovative, sustainable and useful solutions for their individual needs. Together we set standards in Industrial Connectivity.

Order number: 1420920000/03/2013/SMDM

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
