

Description

The *Premium 3D Printer Filament—HIPS* is made of dissolvable high impact polystyrene (HIPS) with a tight diameter tolerance.

Application & Usages

The HIPS filament is used as support material for 3D printers with dual heads. HIPS supports are easily soluble in d-Limonene, freeing the intricate ABS or PLA printed designs.

Benefits and Features

- **1.75 mm and 3.00 mm diameters**
- **Low diameter variance**

3D-Filament Processing Parameters

<i>Processing Parameters</i>	<i>Temperature</i> ^{a)}	
Working Temperature	235 °C	[455 °F]
Bed Temperature	115 °C	[239 °F]

a) Values may vary depending on the printer type and environmental conditions. Adjust print temperatures by 5 °C until ideal flow and bed adhesion is obtained.
