

With accessories to the system

You decided to use terminals made by Weidmüller. Now you can choose out of a large accessory portfolio.

SIHA fuse holder

The SIHA fuse holder turns your disconnect test terminal into a fuse terminal within seconds.

Just remove the disconnect lever, and plug-in the fuse connector – ready!

Cross-connections

Cross-connections are used to make potential distribution simple. You can cross connect terminal blocks that are direct neighbouring, but you can also skip one or more terminals.

Test plugs

Test plugs and test adapters are used for final testing of completed wired terminal strips. These products are also helpful for practical tests during operation.

Tools

As one of the leading manufacturers, Weidmüller produce professional hand-tools and machines for cable preparation for electricians and electronic technicians.

Our product range includes precision tools for:

- Cutting
- Stripping
- Crimping
- Screwdriving and testing as well as
- Customized solutions

Mounting rails, shaped rails, end brackets

Active and passive components as well as intelligent modules are installed on mounting rails. This method has been used successfully for years. To complete the installation, however, a number of seemingly insignificant items are necessary.

In this chapter you will find various mounting rails and shaped rails for use in installing components, as well as end brackets for holding components in position and blanking off the last terminal.

These apparently trivial items ensure that components are seated firmly and insulated. Weidmüller supplies components which are totally co-ordinated in their functionality.

Terminal markers

If you wish to avoid confusion with cables, terminals and equipment in an installation, all operational material must be marked clearly and visibly.

DIN/EN 60204 Part 1 and VDE 0133 regulations on marking equipment and machinery stipulate comprehensive marking. Electrical conductors must also be clearly identifiable at every point of connection and in accordance with the technical documentation, e.g. wiring diagram.

There are two methods of achieving this:

- marking based on a system of colour codes or
- marking with the number of the connection.

Our ready-to-use markers are pre-printed with the majority of commonly used numbers, letters and symbols used by electricians and fitters. Good legibility, sturdy and lasting print and easy availability are just some of the welcome features. We can also print “just-in-time” from your CAD data or from your lists. Depending on the material used for the markers, we will plot, print or engrave using high-quality laser print. Custom-printed markers are easy to use, incur no storage costs and make best use of the material.

Weidmüller supplies almost all marking materials as blank markers for the customer to engrave on-site. To complement these blank markers we offer a complete range of hardware and software for on-site machine-assisted marking that deliver professional and quickly produced results. This chapter is subdivided in line with common working practices in:

- ready-to-use markers with standard or custom printing
- blank markers for inscription on-site.

Mounting rails

The mounting rail can also be used as a protective busbar. Weidmüller protective conductor terminals of the W, Z, I, AKZ and SAK series meet the requirements specified in IEC 60947-7-2. In accordance with VDE 0100 Part 540, at conductor cross-sections of 10 mm² and more, protective conductor and neutral conductor can be combined into one line with the symbol PEN. If mounting rail is used as a PEN busbar, the following criteria must be observed:

- Only E-Cu or aluminium profiles may be used
- The short-circuit currents and the rated terminal currents must be observed
- The mounting rails must be insulated for the protective measure, "protective insulation".

Depending on the various applications, the mounting rails are made of steel, aluminium or copper. All steel versions are electroplated and additionally passivated with a yellow chromate coating. All mounting rails are available in pieces of 1 and 2 m length. All non-slotted mounting rails can be provided with fixing holes (please state dimensions b and l₂). Additionally, all non-slotted steel rails can be supplied with welded steel bolts (please state dimensions "a" and the desired bolt).

10 x 6.1 mm + 7.5 mm
= 68.5 mm

Cut-out length

The end brackets are fitted at both ends of a terminal strip, preventing undesired displacement and ensuring absolutely secure terminal positioning. End brackets can also accept marking tags and thus serve as group markings.

End brackets WEW 35/1 and WEW 35/2 can also be used as busbar support blocks.

EK, WPE and AKE earth terminals can also be used as end brackets.

Mounting bases

Mounting bases for TS 32 and TS 35

MOFU

FM

MB

Mounting bases are used to fix components onto mounting rails. Weidmüller offers a polyamide mounting base and a steel snap-on base for the TS 35 mounting rail. The FM 4 snap-on base fits all "top-hat" mounting rails. The PA mounting base fits the TS 35 x 7.5 and the TS 35 x 15 slotted rails.

The sliding nut for TS 32 mounting rails has 2 tapped holes for M 3 + M 5 / M 6 + M 4 / M 5 + M 3 screws. It is used to fix components which cannot be directly mounted on the TS 32 and, in particular, to accept the smaller TS 15 "top-hat" rail. In this way, for example, small terminals can first be mounted on the TS 15 and this rail can then be mounted on the TS 32 with the aid of the sliding nut together with the terminals.

Cross-connection systems

WQV

- Pre-assembled units 2-, 3-, 4- and 10-pole.
- Captive fixing screws. Screwdriver guidance due to counter sunk arrangement.
- Engageable in terminal support – simple overhead assembly
- Offset arrangement in terminal support – parallel use of two potentials possible.
- No end plates or partitions for neighbouring cross-connections up to 400 V.
- The full terminal rated current can be fed across all numbers of poles.

The insulated cross-connection units guarantee absolute finger and back-of-hand safety in conjunction with the W series terminal blocks, in accordance with the Accident Prevention Regulations, Electrical Installations and Equipment (VGB 4) and VDE 0106 Part 100/3.83.

Arrangement of two potentials

Simple

Parallel

The WQV cross-connection system cannot only be used for feed-through terminals, but also when these are combined with protective conductor terminals and N-disconnect terminals. Highly economical terminal strips can be assembled in this way.

The individual cross-connection bridges can be easily broken off by bending once, after removing the screw. The WTA type test adapter can also be used for function testing with mounted cross-connections.

Cross-connections with more than 10-pole. In order to cross-connect more than 10 terminals, the screwdriver guidances and the fixing crews on the end of the WQV are to be connected and removed. A 2-pole WQV is set in parallel against it.

WQV cross-connection with STB and PS

The fixing screw and the WQV insulation component must be removed. A socket serves to fix and receive the test plug.

Cross-connection systems

Pluggable cross-connection of the W-series

Cross-connection with a system

40 % of all terminals are cross-connected. Weidmüller offers the screw cross-connection system WQV and the pluggable cross-connection system ZQV.

The cross-connection system ZQV can be used for 75% of all applications (feed-through and double-deck terminals 2.5 and 4 mm², disconnect-test and fuse terminals)

Cross-connection system

- parallel routing of 2 potentials
- parallel routing of 3 potentials
- no small partitions for adjacent cross-connections up to 400 V
- the full rated current of the terminal can be conducted over all pole numbers
- safe from finger-touch according to VDE 0160 Part 100 (VGB 4)
- colour coding
- pluggable and quick assembly and disassembly
- free choice between WQV and ZQV for WDU 2.5 and WDU 4
- easy extension
- endless cross-connection can be easily cut to the required number of poles

No partitions or small partitions for neighbouring cross-connections up to 400 V

Cross-connections are safe from finger-touch according to VDE 0106, Part 100 (VGB 4)

Triple use up to 125 V with ZQV 2.5N for WDU 2.5 or with ZQV 4N for WDU 4.

Parallel use up to 400 V with ZQV¹⁾ 2.5N or WQV 2.5 for WDU 2.5 or WDU 4

1) When using the outer cross-connection holes (Vibration-proof to IEC 68)

Pluggable cross-connection WDU 2.5

Coloured cross-connection ZQV 2.5N

Pluggable cross-connections of Z-series

Standard accessories for terminals with tension-clamp technology offer a time-saving and easy-to-use cross-connection capability:

Pluggable cross-connections - ZQV

- **ZQV 2.5** as 2- to 10-pole combs and ZQV 2.5/50 - endless (50-pole),
- **ZQV 4** as 2- to 10-pole combs,
- **ZQV 6** as 2- to 4-pole combs and ZQV 6/30 - endless (30-pole),
- **ZQV 10, ZQV 16** and **ZQV 35** as 2-pole combs (jumpers)
- **ZQV 2.5N** als 2- to 10-pole combs and ZQV 2.5N/50 - endless (50-pole)

The above-mentioned variants are finger-touch protected. It should however be noted that the rated voltage is reduced to 400 V when cross-connections are used. This limitation applies to, for example: Terminals of type ZDU 2.5 to ZDU 35 and ZDU 2.5-2.

This principle need not be applied when the rated voltage of the used terminals is lower than 500 V.

In these cases, the rated voltage of the used terminals applies. This applies to, for example: ZTR 2.5 and ZTR 2.4/3AN terminals.

Terminals can be skipped as required by breaking off one or more (max. 60 %) of the contact elements from the cross-connections.

ZQS 2.5/4	1633220000	20
ZQS 2.5/5	1633230000	20

Cross-connections can be inserted and replaced quickly and easily.

The length of the cross-connections can be shortened using a suitable cutting tool, e.g. KT ZQV (Cat. No. **900217**). However, at least three contact elements must remain.

Caution:
Do not deform the contact elements!

If the cross-connections are shortened by the user, partitions and/or end plates (ZAP/TW...) must be used to maintain the rated voltage of 250 V, if terminals of type ZDU 2.5/... are used.

Types of cross-connection

The following table lists the possible types of cross-connection for a selection of terminals of the same type.

Terminal type	Cross-connection type	Single	Side by side	Skipped	Linked bridge	Parallel/skipped	Parallel/extended

Cross-connection variants

Terminals with the same cross-sections but different numbers of connections:

Terminals with different cross-sections:

Fuse terminals with the same cross-section:

Protective earth conductor function (PE) + neutral conductor function (N) = PEN function
The PE and N conductor functions combined as part of the system in the PEN conductor:

TN-C-S-supply

Further cross-connectable terminals of Z-series

Terminals without cross-connection channel:

ZDU 2.5 – 2 / 4AN

A special cross-connection option for two ZDU 2.5 – 2/4 AN terminals arises when the terminals are cross-connected with the ZQB 2.5 cross-connection comb.

Cross-connection comb:

ZQB 2.5

The illustration shows how to correctly mount a ZQB 2.5. It must be noted during mounting that the conductor is positioned between the tension clamp and the ZQB 2.5. Due to the usage of the ZQB 2.5, the conductor cross-section is reduced to 1.5 mm², “solid” and “flexible”, for these connections.

ZQB 2.5

Type	Cat. No.	Qty.

Fitting the ZZA 2.5

Place the locating hook in the screwdriver guide of the contact part in the cross-connection channel and subsequently press into place. A 6 mm pitch is provided so that only each second terminal can be used.

The ZBW 1-6 and ZBW W can be used for actuating the 1.5 mm² and 2.5 mm² terminal clamping units. The ZBW W additionally offers easier access in confined spaces. The plastic actuating tools increase safety when working on energised systems.

The bus support ZST is used to park test plugs, cross-connections and fuses which are used by service engineers. The bus support can be locked at the end of a terminal strip on the TS 35 mounting rail.

Fitting the ZQB 2.5

The cross-connection bridge ZQB 2.5 extends the cross-connection units ZQV 2.5/... for the terminals ZDU 2.5, ZDU 2.5-2 and ZDUB-series. The clamping units are opened with the actuating tool ZBW 2, Cat. No. **1650670000**

Made-to-measure cross-connections

The ZQV 2.5/50 is a cross-connection with which up to 20 terminals can be quickly and easily interconnected. The 50 pole cross-connection comb can be easily cut to the required number of poles.

Using this system, you will be able to reduce storage requirements but still have a cross-connection with the correct number of poles available. Left-overs occur infrequently due to the high number of poles (50).

The ends of the endless cross-connections are blank. An end plate must be inserted between neighbouring ZQVs with blank edges. For ZDU 2.5 and WDU 2.5 it is sufficient to stagger the ZQVs. The rated voltage is 400 V. Generally, the ZQV 2.5/50 can be used with up to 20 poles.

Pluggable, 50-pole endless cross-connection for made-to-measure stripping

Type	Cat. No.	Qty.
ZBS 1	1764540000	10
ZBS 1 f. LED	1764550000	10

The component plug is for housing electronic components.

The ZBS1 can be fitted to two tension-clamp terminals ZDK 2.5/1.5 in either the upper or the lower level cross-connection channel. In the lower level the plug has only one position, whereas in the upper level it can be fitted in two positions (turned 180°). The plug can be customised by soldering in the required components.

Two basic versions are available (empty housings):

1. ZBS 1 closed for use with e.g. a temperature compensation element.
2. ZBS 1 with two openings at the top (Ø 3 mm) e.g. for use with LEDs.

Cross-connection systems

Q/QL

Q pre-assembled cross-connections

With pre-assembled cross-connections, the cross-connection link, connection sleeve and the fixing screw are already captively mounted with the corresponding number of poles.

During assembly, the pre-assembled cross-connections only require insertion into the individual terminal rows. These cross-connection units are available in 2-, 3-, 4- and 10-pole versions.

QL cross-connection links

Cross-connection links are used to cross-connect several terminals of the same potential. The cross-connection links are made of copper or brass. The surface is tin-plated. Available in 2-, 3-, 4- and 10-pole lengths, matched to the respective terminal width. The cross-connection link is electrically connected to the terminal's current bar via a connection sleeve.

VH connection sleeves

The length of the connection sleeve is matched to the respective terminal. They are made of copper or brass. The surface is SnPb. A connection sleeve must be used for each terminal to be cross-connected.

BS fixing screws

A steel fixing screw is used to connect the cross-connection link to the connection sleeve on the terminal's current bar. The purpose of the steel screw is to mechanical connect the cross-connection unit firmly to the current bar. Two types of screw shape are used. The A-shape has a full-length thread and the B-shape has a threadless shank on its upper half. The B-shape also has a rolled lock washer.

Cross-connection over more than 10 terminals

For SAKD 2.5 N, SAK 2.5, SAK 4, SAK 6 N and AKZ 4 it is possible to construct a cross-connection of more than 10 poles, e.g. 20-pole: 2 x Q 10 and 1 QL 2.

The first and last fixing screws are removed from the corrosion sleeve of the Q 10. The QL 2 is inserted between, and both fixing screws are screwed into the connection sleeve again.

20 poles can be cross-connected, using this combination.

Accessories for SIHA fuse holder

The SIHA fuse holder turns your disconnect-test terminal into a fuse terminal within seconds. Just remove the disconnect lever, and plug in the fuse connector – ready!

- Even fits onto 5 mm wide terminals
- Easy handling – without tools
- Wemid housings (V0)
- Easy fuse replacement
- Power loss 1.6 W

5 x 20

The SIHA fuse holder fits onto 5 mm wide terminals, even with 5 x 20 G fuse inserts.

The design does it. With only two variants, SIHA1 and SIHA2, nearly all disconnect-test terminals from the W-series, Z-series and I-series can be used.

Version

Wemid

Rated data

Rated voltage	400 V
Rated current	6.3 A

Power loss according to DIN VDE 0611-6 at 23°C ambient temperature and 1.5 times rated current interconnection (compound configuration) 1.6 W

G fuse inserts 5 x 20

Fuse replacement made easy

1. Open fuse holder by hand or with screwdriver
2. Push out old fuse
3. Position new fuse
4. Press fuse holder together

Unmisplaceable

The SIHA/V plastic cord can be mounted post installation and ensures that the fuse holder does not get misplaced when dismantled (Cat. No.: 953768 / Qty. 20)

- Marker slot is used to attach the cord
- The cord attachment piece has a marker space, so you'll not lose marking options
- Can be clipped either on the left or right-hand edge of fuse holder

2 types of marker

- Marker slots for **dekafix 5** on top and
- Labelling space for **E-Fix** self-adhesive labels, size 8/20

Switching accessories

Switching accessories for disconnect test terminals types WTL/D/Q and SAKT

Cross-connection slide Disconnect lock

Fixing parts in the individual terminals require VH 19 connection sleeves and BS 25 fixing screws (or StB 35 socket). The fixing screws have an insulation sleeve that acts as a colour code and a screwdriver guide. The cross-connection slides are designed so that the sockets located in the terminal remain free for test plugs in any position. The 2-pole design, Type QVS 2-S, is designed so that operation with inserted test plugs is possible. If the possibility to test is also required with inserted cross-connections, the fixture can be constructed with the StB 35 socket (see page 3/13). The creepage and clearance distances required for the rated voltage of the terminal can be changed by installing accessory components.

WTD 6/1 and WTL 6/1/SAKT 1

For adjacent QVS	63 V
For adjacent StB 25	63 V

SAKT 2

For adjacent QVS	63 V
For adjacent StB 25	63 V

In order to maintain the rated voltage, TW partitions or TSch 2 small partitions must be inserted between adjacent components.

SSP WTL + SSP 3 and SSP 4 prevent the undesired opening and closing of circuits. They block the disconnect slide in its respective position. The disconnect lock can easily be pressed into the terminal from above. It can only be released with a tool.

QVSK 2 (167036)

SAKT2

QVS 2 (030730)

SAKT2

SAKT1, WTL6/1, WTD6/1

Cross-connection comb QB

For SAKT 1, SAKT 2, WTL 6/1, WTD 6/1 and WTQ 6/1

The QB can be inserted into the terminal strip from above when using type SAKT 1/Q cross-disconnect terminals. The connection or disconnection is then made through the installed disconnect slide.

Cross-connections WQV

For WTL 6/2 and WTL 6/3

Cross-connection links QL

Type QL cross-connection links serve as fixed, i.e. non-switchable, cross-connections for the disconnect-test terminal types SAKT 1, SAKT 2 and SAKT 4. VH 12 connection sleeves and BS M 3 x 20 fixing screws made of CuNi 60 (or StB 30.5 sockets) are required for fixing.

The creepage and clearance distances required for the rated voltage of the terminal can be changed by installing accessory components. This applies in particular to the cross-connection of adjacent terminals of differing potentials. The following restrictions must be observed:

WTL 6/1, WTD 6/1/SAKT 1 for adjacent QL	250 V
SAKT 2 for adjacent QL	63 V
SAKT 4 In order to maintain the rated voltage, the TW partitions or TSch 2 small partitions must be inserted between adjacent components.

Test socket screws

StB test socket screws

StB test socket screws are inserted into the current bar or screwed into the terminal in place of the clamping screw. They accept PS test plugs and QS cross-connecting plugs.

If a possibility to test is required with inserted cross-connection, an StB 29.5 or 30.5 which has an insulation sleeve and can accept test plug PS 4 is inserted instead of the fixing screw.

Test socket screws

StB

for WTL/SAKT

The type StB 25 socket accepts the PS 4 test plug in type WTL 6/1, SAKT 1 and SAKT 2 disconnect-test terminals or the type QS cross-connecting plug.

The **Type StB 35** socket is used when **simultaneous** testing must be carried out with inserted cross-connection slide.

With insulation sleeves as contact-protection and colour-coding for test plugs and cross-connecting plugs with a diameter of 4 mm.

Test plugs

Type PS test plugs

are used for final testing of completed, wired terminal strips. Test plugs for 2.0, 2.3 and 4.0 mm diameter sockets are available.

The ZS 2.3/4 adapter plug allows a 4 mm diameter plug to be converted for a socket with a diameter of 2.3 mm.

Conversion to a 4 mm diameter test socket is possible with the flexible adapter plugs FZS 2/4 and WTA/ZS 4.

Busbars

In panels and control systems it may be necessary to unite the N and PE conductors at a central point.

For this, busbars are available to which numerous conductors can be attached without taking up too much space (up to 70 conductors on a busbar with length of 1 m). The conductors are attached via a pressure piece or a clamping yoke (see page 3/21). With the first of these variants, the lugs need not be bent. The clamp simply snaps on tightly onto the busbar. The clamping yoke is pushed onto the busbar and thus can take the wiring in the entire installation. The busbar can be used unperforated in any length. Fixing uses support blocks SH, which for long busbars can be sited between the clamping yokes.

flexible	= 5...10 mm
stranded	= 16...50 mm ²

Clamping yokes

To unite the N- or PE-conductor at a central point it is best to use the ZB clamping yoke together with the busbar 10 x 3 or 6 x 6.

The clamping yokes can be slid onto the busbar and the entire wiring is matched to the installation.

The clamping yoke can be supplied with green/yellow protective caps. These caps emphasise the protection function and permit unmistakable allocation of the lead using the available marking tags.

If the clamping yoke is being used to connect the N-conductor, it can be marked with a blue insulating cap.

The ZBE 6 is also hingeable after subsequent fitting to the busbar.

Small partitions

Small partitions type TSch

Partitions can be retrofitted between the cross-connections or the sockets for terminals up to max.12 mm.

Type	Cat. No.	Qty.
TSch 1	0319160000	100
For use between fixed cross-connections with differing potentials for terminal types: SAK 2.5...SAK 16 and DK 4.		
		
TSch 2	0353660000	100
For use between removable cross-connections with differing potentials for terminal types: SAK 4...16 and disconnect test terminals SAKT and WTL 6/1		
		
TSch 2 (orange)	0132460000	100
with cut-out for SAKT 2		
TSch 3	0366860000	100
For use with terminal type SAKD 2.5 N		
		
TSch 4	0363360000	100
For terminal types: AKZ 4, AKB 4, AK 4, DK 4 and DKB 4/10		
		
TSch 6	0190260000	100
For terminal types: DK 4 S, DK1 4, DKIS 4 and DKIT 4		
		

Partitions

WTW/TW

Depending on the operating voltage, a partition may be needed between neighbouring cross-connection groups. This is essential to maintain creepage and clearance distances.

For some terminals we supply partitions in tropical-grade cardboard (HP 020628). Partitions in cardboard type 020610 are available on request.

End plates

WAP/AP

With few exceptions, the last terminal in a row must be covered with a type WAP / AP end plate.

End plates must also be inserted in terminal strips with different sized terminals. The external dimensions of the end plates correspond to the outer dimensions of the respective terminals. The end plate is fixed by an end bracket.

Covers

Several safety regulations, such as the accident prevention regulation "Electrical Installations and Equipment" (VBG 4) and VDE 0106 Part 100/3.83, require that the live elements in electrical equipment be protected against direct contact.

In the case of terminal, this protection must be provided by additional covers where cross-connections or test sockets are used. For this purpose, Weidmüller provides cover profiles with matching cover supports which can be used with the major terminal sizes.

The cover supports can be attached to the end or along the length of the terminal strip.

They can be attached to TS 32, TS 35 or TS 15 mounting rails.

Longitudinal spacing of the cover supports:

The longitudinal spacing of ADP 1, 2 and 3 between the cover supports should not significantly exceed approx. 500 mm.

The cover profile is snapped onto lateral ridges.

Additional fixing is provided by pins on the cover supports to which seals can also be attached.

In the case of SAK 95 terminal strips, the ADP 3 cover profile can be snapped directly onto the terminals. The profiles are transparent which enables the terminals, their accessories and markings to be visible at all times. Additional identification marks, such as group markings, can be attached.

Covers

Several VDE specifications (VDE 0106 Part 100/3.83) require that mains terminals be covered over. Weidmüller provides a range of cover plates that are overprinted with a warning flash and the international danger sign. The reverse side displays a warning flash with the text "Danger! High voltage". The covers are fastened onto the terminals with plastic screws. Covers are available for 3 and 4-pole terminal blocks. Plastic screws type BSK are used to fasten them in place.
BSK = PA 66

Covers AD/WAD

Individual covers type WAD are available for the W-series of terminals. Although each individual terminal, with or without an insulated jumper, is protected against accidental contact, covers featuring a flash symbol according to DIN 30 600 can of course be attached to any of the W-series terminals.

Covers

TBS 2 / BST 2

for the SAK series

Version

- For covering blank cross-connections on SAK 2.5 ... SAK 16
- For labelling functional groups
- Simple assembly by sliding the new type of separator into the existing separator slot in the terminal
- Marking tag snaps onto the new separator
- Sturdy marking tags can be labelled with a fibre-tip pen for permanent identification or a pencil for temporary markings that can be wiped off

Assembly can be achieved with either two end plates or with one end plate and one separator with a mounting bracket.

Cover plates with adhesive label

Cover plate dimensions

2 mm thick

Hoods

In the case of open-type terminals such as SAKG, hoods are used instead of cover plates in order to achieve the required degree of protection against accidental contact (VBG 4).

Hoods are simply fitted onto the terminals. See table for ordering details and dimensions.

Cover profiles for terminal strips

To protect against shock, dust and moisture. Weidmüller offers cover profiles which, for example, are used in signal masts or in lighting column distributions.

Weidmüller produces completely fitted and marked terminal strips according to your wishes.

End plates

End plate with mounting bracket EP ... /32

End plate with mounting bracket EP ... /32

Type	a	b	Cat. No.
EP 1 for SAKG 28 and SAKG 70	120	75.5	0271800000
EP 2 for SAKG 32, 40, 46 and 54	160	90.5	0271900000

Type	a	b	Cat. No.
EP 1/35 for SAKG 32 and SAKG 70	120	76.5	1381600000
EP 2/35 for SAKG 32, 40, 46 and 54	160	91.5	0182000000

Strain relief clamp

ZU 1

Strain relief clamp for cable up to 30 mm diameter. The strain relief clamp is fitted between the TS and the base with the TS fixing screw. The second fixing screw is used for spacers.

Type	Cat. No.	Qty.
ZU 1	0240600000	2

Accessories for terminal markers

dekafix

Dekafix (DEK) markers are intended for use with the Weidmüller SAK and Z series. They are flush-fitting, so ensuring an optimal and secure fit. With dekafix you have access to one of the largest ranges with standard print. Dekafix is of course also compatible with all other Weidmüller connectors.

- Connector markers suitable for all Weidmüller wiring and plug-in connectors, also for electronics modules
- The system is especially suitable for short sequences of numbers with ready-to-use print
- Large selection of ready-to-use printed markers
- Strip assembly for rapid fitting in one operation
- Markers available ex-stock in all colours of the international colour code.
- Easy to read high-contrast print.
- Available in 5 widths.

For individual printing

- Marking as plotter print,
- Data acquisition possible from many CAD programs, files or manual lists.
- Available in **MultiCard** format.

Technical data

Material	Polyamide, halogen-free
Flammability acc. to UL 94	V2
Temperature range	– 40 °C to +100 °C
Dimensions	Height x width (pitch) Example: Card height is always 5mm DEK 5 = 5 mm wide, for terminals with 5mm pitch DEK 5/6.5 MC=5mm high, 6.5 mm wide
Colours	available in colours of international resistance colour code, for MC on request ● black, ● brown, ● red, ● orange, ● yellow, ● green, ● blue, ● violet, ● grey, ○ white
Possible marker systems	SMark, Printjet, Plotter, MC-Mobilo, STI Standard print or individual print acc. to specifications (file or list). Wipe resistance based on DIN IEC 50.
Assembly instructions	Strip assembly if the marker pitch (width) corresponds to the terminal pitch. e.g. DEK 0 5mm pitch for terminals with 5mm pitch, such as WDU 2.5. fitting of individual tags if the terminal pitch is larger than the marker pitch, e.g. DEK 6.5 can be individually mounted on WDU 6. Weidmüller markers with pitch (width) 5 mm are suitable for all terminal widths.

Ordering details - DEK cards

Definition of quantity	1 card = 50 pieces (DEK 6.5, DEK 8) 1 double card = 10 strips = 100 pieces (DEK 5; DEK 6)
Order quantity	Order and delivery quantity in number of individual plates, e.g. 500 units
Minimum order quantity	1 package = 500 pieces
Packing	Box or foil bag
Ordering example	Standard print for DEK 5, consecutively horizontal (FW), with numbers 51 ... 100 Cat. No. 0473460000 and Variant No. 0051= 0473460051
Print variants	See appendix; please add Variant No. to Cat. No.

Ordering details - Multicard

Definition of qty.	1mat
Minimum order qty.	See page...
Packing	Box

Number of chars. for using the following plotter fonts

Pen size	0.18	0.25	0.35	0.18	0.25	0.35
Font (Pt.)	10	10	10	4	5	6
Length 3.5	2	2	2	5	4	3
Length 5	2	2	2	5	4	3
Length 6	2	2	2	6	5	4
Length 6.5	3	3	3	7	5	4
Length 8	4	4	4	9	7	6

Notes regarding individual print:

- Please send along with your written order via disc or e-mail your specifications
 - as Excel file (all data in one column)
 - as ASCII file (all data in one column)
 - additional information such as person in charge or tel. no. for queries should be included in the files
 - E-mail address: Printdata@Weidmueller.de
- Please indicate the file name with your order
- Non-electronic orders (Cat. No. for manual input = 1578800000) will cause a higher price and longer delivery time.
- For individual print MultiCard, we offer to you the order-software **M-Comm 2** (no. 1759790000); see Internet page www.m-comm.de.
For Cat. No., see under software **M-Comm 2**.

Terminal markers

WS

WS markers are ideally suited for the W range of wiring connectors (WS = W-series strips). They fit flush with the marking channels provided, thus ensuring a fit which is as secure as possible. But even with wiring connectors of the SAK and Z series, the generous marking space can be used, for Weidmüller markers are system-compatible.

WS strips are used mainly for manual marking. For individual production of print, the **WS** strip in **MultiCard** format is the ideal solution. It has all the features for efficient processing.

- The system is especially suitable for efficient marking with long, individually produced sequences of characters.
- Large marking surfaces allow long sequences of characters per tag and line.
- Multi-line marking and small script possible.
- Marking is possible with plotter, laser, MC-Mobilo or simply by hand.
- **WS cards are available for standard and laser prints.**

Data acquisition from many CAD programs possible.

Technical data

Material	Polyamide	
Temperature range (constant)	-40 °C to +100 °C	
Flammability acc. to UL 94	V2	
Colours	Available in the colours of the international resistance colour code ● black, ● brown, ● red, ● orange, ● yellow, ● green, ● blue, ● violet, ● grey, ○ white	
Size definition	Length x width (pitch) Ordering example: WS 12/5 = 12 mm long (vertical) 5 mm wide (horizontal) Width = Pitch	
Assembly	Strip assembly when the marker pitch (width) corresponds to the terminal pitch, e.g. WS 10/5 = 5 mm pitch width for terminals with 5 mm pitch width, e.g. WDU 2.5 Individual tag fitting if the terminal pitch is greater than the marker pitch, e.g. WS 12/6.5 can be individually fitted on to WDU 6. Weidmüller markers with 5 mm pitch (width) will fit all terminal widths.	
Imprint	Colour	black
	Wipe resistant as specified in DIN IEC 50	

MultiCard-Variants see section: MultiCard.

Numbers of characters

Pen size	0.18	0.25	0.35	0.18	0.25	0.35

Length 12	5	5	5	13	11	9
Length 15	7	7	7	17	14	11

Ordering details WS strip

Only WS 10/6 and WS 10/6.5	
Definition of quantity	1 strip = 10 units
Order quantity	Order and delivery quantity in number of individual plates, e.g. 200 units
Minimum order qty.	1 Qty. = 20 strips = 200 units
Packaging	Polythene bag

Ordering details WS cards 5 standard print

Only WS .../5	
Definition of quantity	1 card = 30 units
Minimum order qty.	1 Qty. = 300 units
Packaging	Carton

Example WS 10/5
printed FSZ: 1 - 10
Cat. No. **1773420001**
= 300 pieces single tags,
Colour on request

Notes regarding individual print:

1. Please send along with your written order via disc or e-mail your specifications
 - as Excel file (all data in one column)
 - as ASCII file (all data in one column)
 - additional information such as person in charge or phone no. for queries should be included in the files
 - E-mail address: Printdata@Weidmueller.de
2. Please indicate the file name with your order.
3. Non-electronic orders (Cat. No. for manual input: 157880) will cause a higher price and longer delivery time.
4. For individual print MultiCard, we offer to you the order-software **M-Comm 2**. See Internet page (www.m-comm.de) for further details.
For Cat. No., see under software **M-Comm 2**.

Carrier system	Z-Reihe, W-Reihe, SAK-Reihe
----------------	--------------------------------

ZS-labels in MultiCard are particularly suitable for compact Z-terminals due to their folding hinge mechanism. The label can be raised, for example to access the cross-connection. Depending on the label length, printing of 6 – 9 characters in normal script is possible.

- Hinged marking surface
- Individual labels mountable as strip to reduce marking exercise.
- Stripwise project designation area ordered by strips
- Simple separation of labels
- Inlay required with order number **1610080000**

¹⁾ Formation of BZT blocks not recommended

²⁾ When using BZT 1

³⁾ Only restricted usage with BZT 1

Cutting tools

KT 8 cutting tool

- Blade geometry for different conductor sizes increases the precision when cutting smaller conductors

KT 8

Cutting tool for pinch-free cutting of copper and aluminium cables up to 8 mm Ø

Maximum cutting capacity:

Copper cable

- 16 mm² solid
- 16 mm² stranded
- 16 mm² flexible

Aluminium cable

- 16 mm² stranded

Not suitable for cutting steel wire, steel-shielded cables, aluminium alloys and hard-drawn copper conductors!

KT 12 cutting tool

- Blade geometry for different conductor sizes increases the precision when cutting smaller conductors

KT 12

Cutting tool for pinch-free cutting of copper and aluminium cables up to 12 mm Ø

Maximum cutting capacity:

Copper cable

- 16 mm² solid
- 25 mm² stranded
- 35 mm² flexible

Aluminium cable

- 16 mm² stranded

Not suitable for cutting steel wire, steel-shielded cables, aluminium alloys and hard-drawn copper conductors!

KT ZQV cutting tool

KT ZQV

Cutting tool for pinch-free cutting of cross-connections from the Weidmüller Z-series.

Stripping tools

stripax®

- Stripping and cutting tool for flexible, stranded and solid conductors with PVC insulation for cross-sections 0.08... 6 mm² (~AWG 28... 10)

stripax® 16

- Stripping and cutting tool for flexible, stranded and solid conductors with PVC insulation for cross-sections 6... 16 mm² (~AWG 10... 6)

stripax®

- Stripping length adjustable by setting wire stop
- Jaws open automatically after stripping
- No splaying of individual strands
- Special self-adjusting stripping blades avoid damage of the strands
- Adjustable to different insulation cross-sections
- Strips multiple conductors, even several flat-ribbon conductors simultaneously
- Strips double-insulated conductors in two steps, no additional adjustment necessary
- Precise, self-adjusting cable-cutter
- Long working life
- Improved ergonomic design

stripax® 16

- Stripping length adjustable by setting wire stop
- Jaws open automatically after stripping
- No splaying of individual strands
- Adjustable to different insulation cross-sections
- Strips double-insulated conductors in two steps, no additional adjustment necessary
- Cuts flexible, stranded and solid conductors for cross-sections up to 6 mm² (AWG 10)

DMS 3 cordless torque screwdriver

DMS 3 cordless torque screwdriver

DMS 3 rechargeable torque screwdriver

- One-hand operation under all working conditions
- Switchable to clockwise and counter-clockwise rotation
- Two speeds: 200 and 400 rpm
- Torque settings approx. 0.2...3 Nm in 6 steps
- Consistent performance until complete discharge of battery
- Handle swings easily from pistol to rod form
- Takes 1/4" bits held by ball-bearing clamping mechanism
- Safety lock prevents inadvertent switch-on
- Easy to change from battery drive to hand-operation up to 15 Nm

WAW 1

To break off the W-range cross-connection, (types WQV 2.5 to WQV 35)

Cross-connection for disconnect terminal WTR 2.5 and fuse terminal WSI 6

The cross-connection link is screwed directly onto the busbar. For this, the cut-out is removed, the fixing screw inserted and the terminal snapped on the rail. The cross-connection link is pushed in laterally. Then the screws are tightened. The side window of the last terminal must not be broken out.

WAW 2

To remove the cross-connection window from the terminal insulator of WSI 6 and WTR 2.5

Type	Cat. No.
WAW 1	9004500000

Type	Cat. No.
WAW 2	9004510000

Clamping 2 conductors

Additional accessories

Terminals are to be regarded as an identification system in electrical installations. By assigning them to individual circuits, marking and classification of individual functional units can take place in an optimum manner, provided only one conductor is always connected to each clamping unit.

In other words:

- For design purposes, only one conductor should always be connected to one clamping unit for classification
- For the purpose of change or extension, two identical conductors can be connected to each clamping unit.

Weidmüller feed-through terminals, type WDU have been specially designed for this purpose!

Tension-clamp connection elements type ZDU allow only one conductor per clamping unit.

VDE 0611 Part 1/8.92 (IEC 60 947-7-1: 1989) Section 4.3.5 specifies: "The conductor could be rigid (solid or stranded) or flexible. The manufacturer of the terminals shall state the types and the maximum and minimum cross-sections of conductors that can be connected and if applicable, the number of conductors simultaneously connectable to each terminal. He shall also state any necessary preparation of the end of the conductor."

VDE 660 Part 100/7.92 (IEC 947-1: 1988) adds the following: "The manufacturer shall state the type (rigid-solid or stranded or flexible), the minimum and the maximum cross-sections of conductors simultaneously connectable to the terminal."

Terminal type	Cond. end bare (solid, stranded, flexible)	Ferrules acc. to DIN 46228/1	With insulating collar
WDU 2.5			
Insul. stripping l. (mm) 10		10	10
Conductor ø mm ² 0.5...1.5		0.5...1.0	0.5
WDU 4			
Insul. stripping l. (mm) 10		10	10
Conductor ø mm ² 0.5...1.5		0.5...1.5	0.5
WDU 6			
Insul. stripping l. (mm) 12		12	12
Conductor ø mm ² 0.5...2.5		0.5...2.5	0.5...1.0
WDU 10			
Insul. stripping l. (mm) 12		12	12
Conductor ø mm ² 1.0...4.0		1.0...4.0	1.0...1.5
WDU 16			
Insul. stripping l. (mm) 16		16	16
Conductor ø mm ² 1.5...4.0		1.5...4.0	1.5...4.0
WDU 35			
Insul. stripping l. (mm) 18		18	18
Conductor ø mm ² 2.5...6.0		2.5...6.0	2.5...6.0

Ask for information about clambability when preparing your conductors in other ways!

IMPORTANT: Only one conductor may be connected to each clamping unit in protective conductor terminals.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
