

## TYPE RP13A PUSH-PULL LOCK CONNECTOR

### Scope

RP13A Connector is compact, lightweight, rigid, highly reliable circular connector developed in response to the increasing needs for more compact VTR equipment OA equipment.

The push-pull locking system used for RP13A connector,

was designed with thorough consideration for easy handling and offers easy and quick installation/removal operation. The compact yet smart design is suitable for any type of electronic equipment, particularly small-sized electronic equipment.

### Features

- (1) Compact shape will always fit your equipment.
- (2) Single motion push-pull locking mechanism provides improved quick inserting/extracting capability. High density packaging is also available.
- (3) Multi-slot key mating guide prevents mis-insertion.
- (4) Outer shell, made of strong glass fiber polycarbonate resin, is lightweight yet rigid.
- (5) As the cable connection method, crimping is used for plug, and crimping and PCB dip for receptacle.

## Material and Finish

Part Name	Material	Finish
Molding and connector body	UL94V-0 Glass-filled polycarbonate	(Black)
Pin contact	Phosphor bronze	Silver plating
Socket contact	Phosphor bronze	Silver plating

## Ordering Information

- (1) RP13A : Name of series.
- (2) 12 : Indicates shell size, or outer dia. of plug mating section.
- (3) P : Indicates shape of connector as follows.  
 P : Plug  
 R : Receptacle  
 J : Jack
- (4) A : A, B, C..... are used to distinguish many model types of same shape connectors.
- (5) 13 : Indicates number of terminals.
- (6) S : Indicates shape terminal as follows.  
 P : Male terminal  
 S : Female terminal
- (7) C : Type of connection method.

## RP13A ELECTROSTATIC PROTECTION TYPE

RP13A Electrostatic Protection Type Connector uses male contacts for plug and female connects for receptacle. Please note that there is **NO INTERCHANGEABILITY** with standard type RP13A connectors previously introduced. (Crimping terminals also differ from those of the

standard connector.)

While using the electrostatic protection type and the standard type in parallel, any error shall be occurred due to different terminal connectors, so assorted usage with standard type are widely extended.

## Assembling Procedure

### Plug

1. Fit the body, spring, coupling and bushing respectively in advance on wires having ends suitably treated, and then connect wires to terminals by crimp.
2. Then mount crimped contacts into the plug housing. After mounting, pull the wire slightly and make sure the contact is mounted.
3. Fix a cable clammer to the bushing, insert it into the plug housing, and then crimp cable clammer with Hand Clamping Tool.
4. Assemble coupling, spring and body respectively to plug housing, and mount it with the attached screw by means of torque wrench (2 kg-cm), and the work is completed.
5. Put the cable bushing over the clamp body to complete the job.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
