The THN 15N series is the latest generation of high performance 15 Watt DC/DC converters and comes in an encapsulated, shielded 1” x 1” x 0.4” metal package. The new and improved design allows to fully integrate an EN 55032 class A filter and greatly reduces the no-load power consumption (96-336 mW).

Advanced circuit design and a high efficiency of up to 91% enable the THN 15N to operate in a temperature range of –40°C to +70°C without derating. All models have a wide 2:1 input voltage range and precisely regulated, isolated output voltages. Further features include remote On/Off and trim able outputs.

Together with the latest IT safety certifications (UL 62368-1) typical applications for these converters are mobile equipment, instrumentation, distributed power architectures in communication and industrial electronics and everywhere where space on PCB is critical.
