

500 Watts

- Convection/Forced-cooled Ratings
- Universal 80 - 264 VAC Input
- IT & Medical Safety Approvals
- < 0.5 W Standby Power
- -40° C to +70° C Operation
- Remote On/Off
- 5 V/2 A Standby Output
- 3 Year Warranty

The GSP500 has been designed to offer a full 500W of output power in a very small mechanical footprint, whilst still providing peak power to 650W, a 5V standby output with 2Amps of current capability and an input standby power draw of < 0.5W when the inhibit is activated.

Approved for both IT and medical applications the series has output versions from 12V to 48V and can be supplied as a U channel for system cooling or with optional very quiet integral fans (-EF). These fans are intelligently controlled to provide the most optimised acoustic noise in the system and further more the GSP500 can provide up to 180W without forced cooling, thus allowing fans to be switched off during periods of lower system loading.

Dimensions:

GSP:

6.00 x 4.00 x 1.65" (152.4 x 101.6 x 41.9 mm)
 (-EF): 6.71 x 4.00 x 1.65" (170.4 x 101.6 x 41.9 mm)

Models & Ratings

Output Voltage	Output Current V1		Standby Supply		Fan Supply	Max Output Power		Model Number ⁽¹⁻³⁾
	Convection	Forced	Convection	Forced		Nom	Peak ⁽²⁾	
12.0 VDC	15.00 A	42.0 A	5 V/1 A	5 V/2 A	12 V/0.3 A	500 W	650 W	GSP500PS12-EF
24.0 VDC	7.50 A	21.0 A	5 V/1 A	5 V/2 A	12 V/0.3 A	500 W	650 W	GSP500PS24-EF
48.0 VDC	3.75 A	10.5 A	5 V/1 A	5 V/2 A	12 V/0.3 A	500 W	650 W	GSP500PS48-EF

Notes

1. Remove suffix -EF (EndFan) for use with integral system cooling.
2. Peak power available for 100 ms maximum with a 10% duty cycle. The average power in a period should be equal or less than the normal power.
3. For optional current share version, add suffix 'P', e.g. GSP500PS24P or GSP500PS24P-EF.

Signals & Controls

Characteristic	Notes & Conditions
Power Fail (PF)	Open collector referenced to negative sense, transistor normally on when power is good (see fig. 5); power is considered good when PFC bulk capacitor voltage is normal. PF: Provides ≥ 5 ms warning of loss of output from power failure.
Inhibit	Uncommitted isolated optocoupler diode, powered diode inhibits both V1 and fan supply (see fig. 6). During inhibit the standby supply and current should be limited to 1 A for thermal reasons.
Output Good	LED Indicator
Fan Speed Control GSP500PSxx-EF Models	The fan speed is set to one of 4 states (high, mid, low or off) dependant on the internal power supply ambient temperature, input voltage and output load at any given time.
Standby Supply	5V/2A Isolated supply present when AC applied.
Remote Sense	Compensates for 0.5 V total voltage drop.
Current Share	Optional, on 'P' version only. Connecting pins 5 or 6 on one unit to pins 5 or 6 on another like voltage unit will force the current to be shared within 10% between the two outputs. Up to three units can share current. (see fig. 7)

Thermal Considerations - GSP500PSxx Models Only

In order to ensure safe operation of the PSU in the end-use equipment, the temperature of the components listed in the table below must not be exceeded. Temperature should be monitored using K type thermocouples placed on the hottest part of the component (out of direct air flow). See below for component locations.

Temperature Measurements (At Ambient 50 °C)	
Component	Max Temperature °C
T1 Coil	120 °C
L3 Coil	120 °C
Q7 Body	120 °C
Q102 Body	120 °C
C20	105 °C
C102	105 °C

Service Life

The estimated service life of the GSP500PSxx Series is determined by the cooling arrangements and load conditions experienced in the end application. Due to the uncertain nature of the end application this estimated service life is based on the actual measured temperature of a key capacitors with in the product when installed by the end application. The worst case of the two figures should be taken as the indicative service life in 24/7 operation.

The graph below expresses the estimated lifetime of a given component temperature and assumes continuous operation at this temperature.

Estimated Service Life vs Component Temperature

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
