

●Design Support Tools

Online tools to support device selection and purchasing

Power Device Simulator

The Power Device Simulator (free) is a web-based simulation tool for our DC-DC regulator ICs* and switching MOSFETs. This tool allows you to verify the product specifications, to analyze the characteristics, to make a BOM list, and to purchase desired products, thus reducing your time for product selection.

*Currently, DC-DC regulator IC with built-in power MOS only is available.

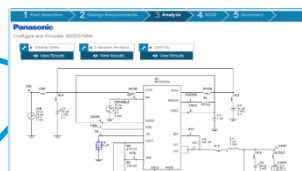

- IC Designer --- Power circuit simulation for DC-DC regulator IC
- Active Datasheet --- Performance simulation for switching MOSFET
- Buck Analyzer --- Power circuit simulation for switching MOSFET

1 Requirement

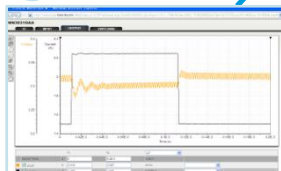

Operation procedure

2 Circuit / Analyze

3 Result

4 BOM list

Ref	Qty	Part Number	Manufacturer	Describe
U1	1	NN30310AA	Panasonic	SA Synd
C3	1	ECJ-4GB1A105M	Panasonic	Multilayer
L1	1	ETQ-P1H1R08FA	Panasonic	COIL PC
R1	1	ERJ-3EKF1003V	Panasonic	Res Thick
R6	1	ERJ-3EKF4531V	Panasonic	Res Thick
R7	1	ERJ-3EKF1001V	Panasonic	Res Thick

DC-DC Circuit Calculator

The DC-DC Circuit Calculator (free) is a web-based tool that calculates the recommended peripheral circuit constants for our DC-DC regulator IC* to meet your power system design specifications. Use this calculator together with the "Power Device Simulator" to make the simulation more effective.

*Currently, DC-DC regulator IC with built-in power MOS only is available.

Panasonic offers a variety of devices as "Total Power simulations." Please visit the URL below to learn more about coil, capacitor, components for suppressing noise or surge, etc.

●Evaluation Board

• We have prepared the DC-DC evaluation boards

NN30195A evaluation board
NN30195A-EVB-R2

NN30196A evaluation board
NN30196A-EVB-R2

NN30295A evaluation board
NN30295A-EVB-0

NN30310AA evaluation board
NN30310AA-EVB-R2

NN30312A evaluation board
NN30312A-EVB-R2

NN30320A evaluation board
NN30320A-EVB-R2

NN30321A evaluation board
NN30321A-EVB-R2

Request for your special attention and precautions in using the technical information and semiconductors described in this book

- (1) If any of the products or technical information described in this book is to be exported or provided to non-residents, the laws and regulations of the exporting country, especially, those with regard to security export control, must be observed.
- (2) The technical information described in this book is intended only to show the main characteristics and application circuit examples of the products. No license is granted in and to any intellectual property right or other right owned by Panasonic Corporation or any other company. Therefore, no responsibility is assumed by our company as to the infringement upon any such right owned by any other company which may arise as a result of the use of technical information described in this book.
- (3) The products described in this book are intended to be used for general applications (such as office equipment, communications equipment, measuring instruments and household appliances), or for specific applications as expressly stated in this book. Consult our sales staff in advance for information on the following applications: Special applications (such as for airplanes, aerospace, automotive equipment, traffic signaling equipment, combustion equipment, life support systems and safety devices) in which exceptional quality and reliability are required, or if the failure or malfunction of the products may directly jeopardize life or harm the human body. It is to be understood that our company shall not be held responsible for any damage incurred as a result of or in connection with your using the products described in this book for any special application, unless our company agrees to your using the products in this book for any special application.
- (4) The products and product specifications described in this book are subject to change without notice for modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements.
- (5) When designing your equipment, comply with the range of absolute maximum rating and the guaranteed operating conditions (operating power supply voltage and operating environment etc.). Especially, please be careful not to exceed the range of absolute maximum rating on the transient state, such as power-on, power-off and mode-switching. Otherwise, we will not be liable for any defect which may arise later in your equipment. Even when the products are used within the guaranteed values, take into the consideration of incidence of break down and failure mode, possible to occur to semiconductor products. Measures on the systems such as redundant design, arresting the spread of fire or preventing glitch are recommended in order to prevent physical injury, fire, social damages, for example, by using the products.
- (6) Comply with the instructions for use in order to prevent breakdown and characteristics change due to external factors (ESD, EOS, thermal stress and mechanical stress) at the time of handling, mounting or at customer's process. When using products for which damp-proof packing is required, satisfy the conditions, such as shelf life and the elapsed time since first opening the packages.
- (7) This book may be not reprinted or reproduced whether wholly or partially, without the prior written permission of our company.

Power device solution, ENELEAD

ENELEAD

Panasonic provides ENELEAD, the "Total solution of power devices," which supports from power system design to purchasing of components, allowing you to select a suitable small, high-efficiency power device, to easily perform a design and evaluation of power systems by using web-based tools, and to purchase peripheral components.

Panasonic will continue to offer the power solutions that satisfy our customers along with the "ENELEAD."

Thank you for your interest in Panasonic Step down DC-DC Regulator. We provide a variety of regulators with wide ranges of input voltage and output current, based on the low power technologies that have been cultivated through the development of customized power supplies for mobile phones. In the next generation, we are going to expand its application for industrial and infrastructure such as server, network and so on with a view to high current not just low power of several hundred mA degree.

Wide product lineup for various applications

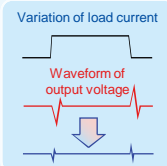

Provides DC-DC solutions with high efficiency, fast response, and small size.

High efficiency

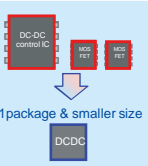

Achieves high efficiency for a wide load range (from light to heavy).
Achieves low power consumption and low heat generation.

Fast response

Suppresses the transient variation of load.
Supplies a stable voltage to equipments.

Small size

Reduces the footprint of parts for power supply.
Achieves miniaturization of equipments.

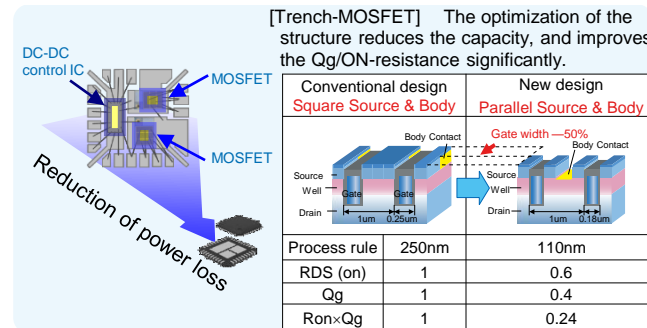

DC-DC Regulator with Built-in Power MOS

DC-DC regulators including both Fast-response control IC with hysteretic control and MOSFET with low ON-resistance in a single package (MCP).

Feature 1 ~High efficiency~

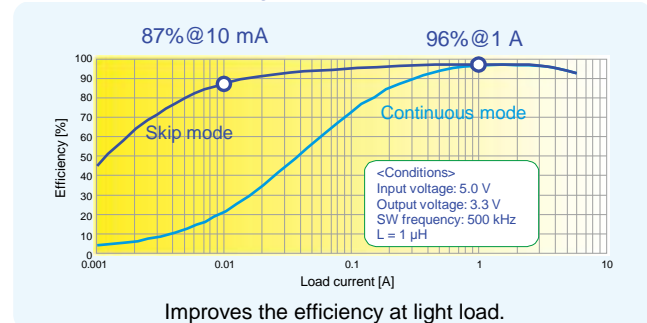

Core Technology

(1) Built-in MOSFET with low ON-resistance

Core Technology

(2) Skip mode (Set at light load)

Improves the efficiency at light load.

Achieves low power consumption and low heat generation.

Feature 2

~Fast response~

Core Technology

Hysteretic control method

Reduces the overshoot/undershoot due to load current transient to ± 10 mVpp.

Ensures stable operation of equipments.

Feature 3

~Small size~

Core Technology

MCP (Multi-Chip Package)

Footprint : 48 mm²

Footprint : 16 mm²

Both DC-DC control IC and MOSFET are included in a single package.

Small footprint, achieving miniaturization of equipments

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
