
D Subminiature Connectors

The ITT Cannon D Subminiature family of connectors has grown to include a wide variety of styles, options and accessories and is often the most economical solution to any interconnect problem. Ideally suited for both commercial/industrial applications and military/aerospace applications, ITT Cannon D Subminiature connectors have found worldwide acceptance in a multitude of applications ranging from office equipment to satellites.

 Commercial Micro D
 (MDSM), Pressfit D,
 and Standard D

Our facility is not currently certified by the DLA and this product is not covered by the QPL/QML.

Combo D® is a registered trademark of ITT Cannon in the United States.
 ◆ Connector footprint measured from the front shell.
 ◆◆ Connector footprint measured from the rear shell.

D*NG - Straight Pressfit Termination

See pages 4-5.

The D*NG is based upon the specification CECC75-301-802. These connectors provide a low-cost alternative to traditional through hole solder contacts. Utilizing stamped "Eye of the Needle" compliant contact tails per IEC-352-5, the parts are quickly and easily mounted onto PCBs without soldering, crimping or specialized tooling. The socket contact engaging area utilizes a "spoon" shape with four points of interconnection. Hardware options provide flexibility and ensure that the final product fits the electrical requirements of any application.

Product Features

Quick and easy press-in installation without specialized tooling
 "Spoon" socket contact provides improved interface compared to "Tuning Fork"
 Closed-entry socket for secure blind mating
 Front-shell only design based on CECC 75-301-802
 "Eye of the Needle" compliant contact tails
 Press-in bolt for ground continuity
 #4-40 UNC and M3 hardware options

D*M Straight Solder Termination (Machined) — Standard PC Tails

See pages 6-7.

D*M straight PCB connectors, which are designed to be equivalent to MIL-C-24308 (except for finishes) for printed circuit boards and backplanes in demanding applications. Additional contact lengths, hardware and finish options available; consult factory for details.

Product Features

7.5 A current capacity
 Machined contacts
 2 contact finishes
 Optional vertical standoffs, screw locks, and boardlocks (4 prongs)
 UL file number E8572
 Dimensionally compatible with Combo D®

ZD* - Straight Solder Termination (Stamped)

See pages 8-9.

ZD* straight connectors are available for applications where price is the primary driver. They are available with or without boardlocks and screw locks.

Product Features

Stamped contacts with 5 A current capacity
 Economical
 Optional vertical standoffs with optional harpoon style boardlocks or screw locks

D* - Straight Solder Termination (Machined) — European PC Tails

See pages 10-11.

D* straight connectors are available for high performance uses according to DIN 41652. Available with European length OL contacts.

Select contact finish from 2 performance classes.

Product Features

High performance commercial connectors
 Two contact finish performance classes
 Optional vertical standoffs, threaded inserts and pushfits/boardlocks
 OL2 contact length, other lengths available
 Tin plated contact PC tails (pin & socket)
 Machined contacts

D* - Wrap Post Termination

See pages 12-13.

D* straight connectors are available for high performance uses according to DIN 41652. Contacts available in two popular lengths.

Product Features

High performance commercial class connectors
 Two contact lengths for 2 or 3 wraps
 Machined contacts

Specifications

| | |
|------------------------|----------------------------------|
| Current Rating | 5 A / 25°C, 3.5 A / 70°C ambient |
| Temperature Rating | -55°C to 125°C |
| Contact Resistance | 10 mΩ |
| Test Voltage | 1200 Vrms at Sea Level |
| ∅ Plated Through Hole | 1,09 - 0,94 (.043 - .037) |
| PC Tail Press-in Force | 100N/contact max. |
| PC Tail Push-out Force | 30N/contact min. |
| PC Board Thickness | 3,20 - 1,60 (.125 - .062) |

Materials and Finishes

| Description | Material | Finish |
|-------------|-------------------------|--|
| Shell | Steel | Tin |
| Insulator | Thermoplastic, UL 94V-0 | None (color: black) |
| Contact | Copper Alloy | Gold over Nickel (Standard) or Gold over PdNi (-408) |
| Hardware | Steel/Copper Alloy | Tin/Zinc |

Specifications

| | |
|---------------------------------|--|
| Temperature Rating | -55°C to 125°C |
| Current Rating | 7.5 A |
| Contact Resistance | 55 millivolt max at 7.5 A test current |
| Dielectric Withstanding Voltage | 1000 VAC at Sea Level |

Materials and Finishes

| Description | Material | Finish |
|-------------|-------------------------|---|
| Shell | Steel | Tin |
| Insulator | Thermoplastic, UL 94V-0 | None (color: dark green) |
| Contact | Copper Alloy | Gold over Nickel. Terminating end Tin (Socket only) |
| Hardware | Steel/Copper Alloy | Tin/Zinc |

Specifications

| | |
|---------------------------------|-----------------------|
| Temperature Rating | -55°C to 105°C |
| Current Rating | 5 A |
| Contact Resistance | 15 mΩ |
| Dielectric Withstanding Voltage | 1000 VAC at Sea Level |

Materials and Finishes

| Description | Material | Finish |
|-------------|------------------------|---------------------|
| Shell | Steel | Tin |
| Insulator | Thermoplastic, UL 94-0 | None (color: black) |
| Contacts | Copper Alloy | Gold over Nickel |
| Hardware | Steel/Copper Alloy | Tin/Zinc |

Specifications

| | |
|---------------------------------|-----------------------|
| Temperature Rating | -55°C to 125°C |
| Current Rating | 5 A |
| Contact Resistance | 10 mΩ |
| Dielectric Withstanding Voltage | 1250 VAC at Sea Level |

Materials and Finishes

| Description | Material | Finish |
|-------------|-------------------------|---|
| Shell | Steel | Tin |
| Insulator | Thermoplastic, UL 94V-0 | None (color: dark green) |
| Contacts | Copper Alloy | Gold over Nickel in mating area, Tin on balance |
| Hardware | Steel/Copper Alloy | Tin/Zinc |

Specifications

| | |
|---------------------------------|-----------------------|
| Temperature Rating | -55°C to 125°C |
| Current Rating | 5 A |
| Contact Resistance | 10 mΩ |
| Dielectric Withstanding Voltage | 1250 VAC at Sea Level |

Materials and Finishes

| Description | Material | Finish |
|-------------|-------------------------|--|
| Shell | Steel | Tin |
| Insulator | Thermoplastic, UL 94V-0 | None (color: dark green) |
| Contact | Socket: Copper Alloy | Gold over Nickel. Terminating end Tin (Socket) |
| Hardware | Steel/Copper Alloy | Tin/Zinc |

D*M — 90° Solder Termination (Machined) — Standard Footprint .318♦ or .283 inch♦♦

See pages 16-17.

D*M 90° PCB connectors, designed to be comparable to MIL-C-24308 (except for finishes), for use with printed circuit boards in demanding applications. Additional contact lengths, hardware and finish options available; consult factory for details.

Product Features

- 7.5 A current capacity
- Machined contacts
- Two contact finishes
- Metal bracket with threaded insert standard
- Optional screw locks and boardlocks
- UL file number E8572
- Dimensionally compatible with Combo D®

ZED* — 90° Solder Termination (Stamped) — Standard Footprint .318 inch♦

See pages 18-19.

ZED* 90° connectors are available for applications where price is the primary driver. They are available with integrated plastic brackets with Standard footprints.

Product Features

- Stamped contacts with 5 A current capacity
- Economical
- Plastic bracket with integrated boardlocks and grounding strap
- Optional screw locks

D* — 90° Solder Termination (Machined) — European Footprint 10,2♦ or 9,4 mm♦♦

See pages 20-27.

D* 90° connectors are available for high performance uses according to DIN 41652. Available with European footprint 1AON contacts, plastic and metal brackets, #4-40 or M3 threads and stamped pushfits/boardlocks. Contact finish available in 2 performance classes.

Product Features

- High performance commercial class connectors
- Two contact performance classes
- Optional metal and plastic brackets, threaded standoffs, clinch nuts, and stamped pushfits/boardlocks
- Tin plated contact PC tails (pin & socket)

ZD* — 90° Solder Termination (Stamped) — European Footprint 10,2 mm♦

See pages 28-29.

ZD* 90° connectors are available for applications where price is the primary driver. They are available with integrated plastic brackets with European footprints.

Product Features

- Stamped contacts with 5 A current capacity
- Economical
- Plastic bracket with integrated boardlocks and grounding strap
- Optional screw locks

♦ Connector footprint measured from the front shell.
 ♦♦ Connector footprint measured from the rear shell.

Specifications

| | |
|---------------------------------|---|
| Temperature Rating | -55°C to 125°C |
| Current Rating | 7.5 A |
| Contact Resistance | 55 millivolt max. at 7.5 A test current |
| Dielectric Withstanding Voltage | 1000 VAC at Sea Level |

Materials and Finishes

| Description | Material | Finish |
|------------------------------|-------------------------|---|
| Shell | Steel | Tin |
| Insulator | Thermoplastic, UL 94V-0 | None (Color: dark green) |
| Pin Contact | Copper Alloy | Gold over Nickel |
| Socket Contact | Copper Alloy | Gold over Nickel in mating area, Tin on balance |
| Hardware (except Boardlocks) | Steel | Tin |
| Boardlocks | Copper Alloy | Tin |

Specifications

| | |

D* — Solder Cup Termination (Machined) with Tin Shells

See pages 32-33.

D* solder cup connectors are used for cable or panel mount wiring applications. Solder cup connectors provide maximum flexibility and performance for applications requiring discrete solder terminations and field repair without termination tooling.

Product Features

Machined solder cup termination, 5 A current capacity
 High performance commercial class connectors
 Two contact performance classes
 Optional clinch nuts with #4-40 UNC or M3 threads

ZD* — Solder Cup Termination (Stamped) with Tin Shells

See pages 34-35.

ZD* solder cup connectors are used for cable or panel mount wiring applications. Solder cup connectors provide maximum flexibility and performance for applications requiring discrete solder terminations.

Product Features

Stamped solder cup termination, 5 A current capacity
 Economical

D*A — Crimp Connectors without Contacts

See pages 36-37.

D*A crimp contact connectors are designed for reliable, fast cabling. Available in the industry standard D*A housing, the connectors provide a low-cost, quick cabling alternative compared to soldering.

Product Features

Crimp contacts available in reels of 5,000
 Application tooling:
 – Hand or automatic
 – Stripper crimper

D*W — Discrete Wire IDC

See pages 38-41.

The D*W connector provides insulation displacement connection technology for either solid or stranded wires. With D*W, speed of cabling is increased significantly over solder cup or crimp solutions. Contacts are easily removable and replaceable. Several specialized accessories (including shield cans, ferrules, and plastic boots) are available to provide a complete product solution.

Product Features

Quick harnessing capability with simple hand or semi-automatic tooling
 Accepts 30 AWG to 20 AWG wire; sizes can be mixed
 Shield cans insure reliable shielding continuity

Specifications

◆ Connector footprint measured from front shell.
 ◆◆ Connector footprint measured from rear shell.

Combination D Subminiature connectors offer the advantages of an industry standard shield I/O interconnect, with the flexibility of a customized special, designed for any application.

This connector system is ideal for applications that require optimization of space while improving overall shielding. Combo D® accomplishes this by combining multiple interconnect types into one fully shielded product, decreasing the number I/O interfaces and reducing the possibility of EMI/RFI leakage.

By continually investing in engineering and manufacturing technology, ITT Cannon has improved the performance and features of this popular product. This catalog contains our latest efforts to meet the global requirements of the commercial electronics industry with a flexible, reliable and cost effective connector solution.

Applications

- Video Coaxial Transmission (75 Ω)
- RF and Telecom Transmission (50 Ω)
- Power Interconnects (Up to 40 A)

Product Features

- Standard and European Footprints
- Pre-Installed 75 Ω/50 Ω Coaxial or High Power contacts (One Part Number)
- Vertical Standoffs or 90° Brackets

- 90° or Straight PCB
- PC Boards up to 3,2 (.125) Thick
- PCB Variants Available with Boardlocks and/or Screw Locks (#4-40 or M3)

Specifications

| | | | |
|--|---------------------------------------|--|---|
| Temperature Rating | -55°C to 125°C | Coaxial VSWR | Less than 1.30 + .03F for F up to 500 MHz |
| Signal Contact Current Rating | 7.5 A current capacity | Coaxial Insertion Loss | .3dB loss at 500 MHz |
| Signal Contact Resistance | 55 millivolt max. at 7.5 test current | High Power Current Rating | Up to 40 A |
| Signal Contact Dielectric Withstanding Voltage | 1250 VAC at Sea Level | High Power Dielectric Withstanding Voltage | 1000 VAC at Sea Level |
| Coaxial Current Rating | 5 A | High Voltage Current Rating | 5 A |
| Coaxial Dielectric Withstanding Voltage | 1000 VAC at Sea Level | High Voltage Contact Dielectric Withstanding Voltage | 2800 V at Sea Level |
| Coaxial Impedance | 75 Ω or 50 Ω | | |

Materials and Finishes

Connector Assembly

| Description | Material | Finish/Treatment |
|----------------|---------------------------|---|
| Shell | Steel | Tin |
| Insulator | Black Polyester, UL 94V-0 | None |
| Pin Contact | Copper Alloy | Gold over Nickel |
| Socket Contact | Copper Alloy | Gold over Nickel in mating area, Tin on balance |
| Standoff | Stainless Steel | Passivated |
| Bracket | Steel | Tin |
| Rivnut | Steel | Tin |
| Boardlock | Copper Alloy | Tin |

Coaxial/High Power/High Voltage Contact Assemblies

| | | |
|-------------------------------|---------------|--|
| Contacts and outer shells | Copper Alloy | Gold over Nickel (Tin on coax ground PC tails) |
| Ring, Retaining | Copper Alloy | Nickel |
| Insulator (Coaxial only) | Teflon | None |
| Insulator (High Voltage only) | Thermoplastic | None |

U.L. File Number: E8572

Coaxial 90° — Standard Footprint .318♦ or .283 inch♦♦ (Sizes DE-DC)

Plug

Reader's Resource

For contact cavity arrangements, see page 223.
 For P.C. hole patterns, see pages 241-242.
 For panel cutouts, see page 221.
 For alternate 50 Ohm coaxial configuration, see page 225.

For M3 threads replace MV with MT, MZ with MQ, MN with MU.
 Notes: * For 50 Ohm Coaxial substitute X for C. Example: DEMV5X1SYA197
 For performance class 2 substitute K126 for A197. Example: DEMV5C1SYK126
 For DD shell sizes, see page 59.
 ♣ Keyed.

For M3 threads replace MP with MS, MC with ML, MD with MO, MG with MJ.
 Notes: For tin plated PC tails add A226 (signal contacts only). Example DEMP5P1PVK87A226
 For performance class 2 substitute K127 for K87. Example: DEMP5P1PVK127
 ♣ Keyed.

Screw lock, boardlock, and signal contacts removed for clarity

Screw lock, boardlock, and high power contact removed for clarity

Note: ♥ Dimension varies with alternate bracket configuration, see Reader's Resource page 226.

Insertion/Extraction Instructions for Coaxial, High Power and High Voltage Contacts

Insertion Tool

No insertion tool is required. The contact is easily snapped in from the rear of the connector manually.

Insertion Instructions

Extraction Tool

CET-C6B-2

Operating Instructions

The CET-C6B-2 tool extracts all coaxial, high power and high voltage contacts (plug and receptacle).

To extract the coaxial contact, hold the tool by the body and insert the tip into the front of the contact cavity until it bottoms and closes the coaxial retaining ring. Holding the body in this position

securely enough to keep coaxial retaining ring closed, push the plunger; contact will be pushed out of the rear of the assembly.

| Description | Part Number |
|-------------|-------------|
| CET-C6B-2 | 070064-0002 |

Coaxial Assembly Instructions

Straight and 90° Coaxial Assembly
STEP 1:

Slide the outer ring over the cable jacket. Trim the cable as specified in the table of Coaxial Cable Trim Dimensions (see this page). Insert the cable dielectric and center conductor into the inside diameter of the inner sleeve. Then solder the center conductor to the coaxial center contact.

Straight Coaxial

90° Coaxial

Straight and 90° Coaxial Assembly
STEP 2:

Slide the outer ring forward until it is flush with the coaxial shell containing the braid between the outer ring and the inner sleeve. For solder type coaxes, soft solder the outer ring to the assembly through the cross-drilled solder hold. For crimp type coaxes, crimp with the appropriate tool in the area defined.

MDSM is the commercial industry's smallest D-type connector for shielded I/O wire-to-board applications. Requiring less than 1/3 the area of a traditional D Subminiature connector, MDSM is designed for situations where space and EMI shielding are the primary design drivers.

Unlike other micro connectors, MDSM's rugged construction and unique contact design combined with a PdNi contact finish provide durability of 10,000 mating cycles. All of this comes in a sleek package that includes a snap together shield can and a slide over boot producing a cable assembly with an overmolded look and a low assembled cost. MDSM is an ideal solution for applications where size, shielding, durability and aesthetics are key design criteria.

Applications:

- Electronic Notepads
- VME Cards
- Multiplexors
- Serial Storage Devices
- Computer Workstations
- Hand Held Devices
- Bar Code Scanners

Product Features

1,27 (.050) Pitch / Saves Space
 Fully Shielded / Reduces EMI
 Crimp Contacts / Applied Cost Savings
 Accessories Included / Fewer Part Numbers
 PdNi Plating / 10,000 Mating Cycles

Stacked Versions / Saves Horizontal Space
 Slide Over Boot / Results in Overmolded Appearance
 Choice of Two Different Latching Options (Thumbscrew / Push-Pull)

Approvals & Certifications
 SSA (Serial Storage Architecture)
 U.L. File Number E8572
 ISO 9001

Specifications

| | |
|---------------------------------|----------------------|
| Temperature Rating | - 55°C to 125°C |
| Current Rating | 1 A — temp dependent |
| Contact Resistance | 20 mΩ Max. |
| Insulation Resistance | 5000 MΩ Min. |
| Dielectric Withstanding Voltage | 350 V at Sea Level |
| Durability | 10,000 Mating Cycles |
| Shock / Vibration | 50 G's / 50 G's |
| Wire Size | 26 to 30 AWG |

Materials and Finishes

| Description | Material | Finish |
|-------------|-------------------------|--|
| Shell | Steel | Nickel |
| Shield Can | Steel | Tin |
| Cover | Steel | Tin |
| Insulator | Thermoplastic, UL94 V-O | None |
| Contacts | Copper Alloy | Gold flash over 30 microinches PdNi in mating area, Tin on balance |

Contact Arrangements

(Face View of Pin Insert — Use Mirror Image for Socket Side)

Locking/Latching Options

Jackscrew

The jackscrew locking system is designed for applications which require a secure connection. Utilize thumbscrews when the connectors are infrequently unmated.

Push/Pull

The push/pull latching system is designed for applications which require a quick connect and disconnect. A spring retention mechanism latches to a post on the board side to prevent unintentional unmatings.

Z10 Jackpost

Note: Two Jackposts supplied with boardside connectors.

Z42 Jackpost

Note: Two Jackposts supplied with boardside connectors.

PCB Connector 90° - Single

Note: Standard jackpost offering recommended for use with .060 panel.

Note: VS1 refers to packaging multiples of 100. Contacts are sold separately, see this page.

Crimp Contacts

Wire Trim Dimensions

| Socket | Part Numbers | |
|--------|------------------|-------------------|
| | 1,000 Piece Reel | 10,000 Piece Reel |
| | MDS-S-TS | MDS-S-RL |

For crimp tooling, see page 101.

Contact Crimping Tools

Parallel Action Low Volume Hand Tool

Part Number: CCTP-MDS

Note: For use with individual contacts (break off reel MDS-S-TS or MDS-S-RL.

Hand Tool

Part Number: CCTR-MDS

Note: For use with reeled contacts - Part Number MDS-S-TS.

Semi-Automatic Crimper/Stripper

Part Number: ABT-620-MDS (Lease Only)

Note: For use with reeled contacts - Part Number MDS-S-RL. For additional information, see page 275. Crimp dies for SSA Cable will be offered by ITT Cannon. Consult factory for details.

Contact Insertion/Extraction Tools

Jackpost Tool

Part Number: CIET-MDSM

Note: For use with Z10 Jackpost.

Insertion Tool

Part Number: 120090-0102

Note: Contacts cannot be removed from MDSM connectors.

Shield Crimp Tooling

Shield crimping requires four items; one press, one locator, and one each of the two dies listed below.

Locator and Dies for Shield Termination Ordered Separately

| Layout | Part Numbers | |
|--------|--------------|---------------------------|
| | Locator | Die |
| 9 | 317-8666-013 | 274-8649-332/274-8649-333 |
| 15 | 317-8666-014 | 274-8649-334/274-8649-335 |
| 25 | 317-8666-016 | 274-8649-338/274-8649-339 |

Note: For assembly instructions and crimping information, refer to Manual #MY-1/190.

Hand Press

Part Number: CHP-MDSM-SR

Pneumatic Press

Part Number: CPT-MDSM-SR

MDSM SSA Compatible Cable Assemblies

ITT Cannon's 9 position MDSM connectors have been designed into the ANSI specification called SSA, "Serial Storage Architecture," as the external I/O. SSA is a new serial interface for interconnecting storage devices, storage subsystems, servers and workstations. Storage subsystems are increasing in function, availability, density and performance. With this comes the trend for them to become more complex and ITT Cannon has the interconnect system which meets SSA's high performance requirements.

SSA is an architecture which allows these new subsystems to be implemented more easily and at lower costs than other new high speed parallel

interfaces. SSA permits the transfer of data at progressively higher speeds - 20 MB/sec interface currently available with 40 MB/sec becoming available in 1997/98. ITT Cannon's MDSM connector not only functions at these high speeds, but also brings to SSA smaller, less cumbersome and higher reliability cables and connectors than current options.

ITT Cannon is offering SSA compatible external cable assemblies in six different lengths to meet your needs. These assemblies consist of two MDSM 9SC type cable connectors terminated to SSA specified external cable.

Note: Cables shown with Z50 thumbscrews.

| Part Number | X Meter (Feet) | Tolerance |
|-------------|-------------------|----------------|
| CA112104 | 0,50 (1.600) | ±25,00 (1.000) |
| CA112104-1 | 1,00 (2.200) | ±25,00 (1.000) |
| CA112104-2 | 3,00 (9.800) | ±25,00 (1.000) |
| CA112104-3 | 5,00 (16.400) | ±64,00 (2.500) |
| CA112104-4 | 10,00 (32.800) | ±64,00 (2.500) |
| CA112104-5 | 20,00 (65.600) | ±64,00 (2.500) |

Note: For push/pull assemblies or other thumbscrews, please consult the factory. Crimp dies for SSA applications will be offered by ITT Cannon. Consult factory for details.

D*JK/D*JT

Filter connectors series D*JK and D*JT from ITT Cannon especially designed for commercial applications provide excellent protection against EMI and RFI.

Using D Subminiature standard components a cost-effective production can be achieved as well as 100% compatibility with equivalent products according to DIN 41652. D Subminiature standard accessories can be used.

High quality tubular ceramic capacitors are assembled onto the D*JK contacts and soldered to contact and backshell while series D*JT connectors apply planar array filters.

Applications:

- EMI/RFI Sensitive Electronics
- Test & Measurement Equipment
- Computer Equipment
- Medical Equipment
- Telecommunication Transmission

Product Features

HF-tightness and mechanical stability by closed backshell
Free-stamped grounding fingers (pin connector only)

Straight and 90° solder pins (D*JK)
Solder cups, straight and 90° solder pins (D*JT)

Versatile mounting possibilities (brackets, captive nuts)
Contact finish according to performance class 2 (standard) or class 1

Specifications

Temperature Range Per DIN IEC 68 Part 1 -55°C to 125°C

ITT Cannon Military/High Reliability D Subminiature connectors are used in many applications, including aerospace, transportation, communication systems, information systems and test equipment. Being the inventor of the D Subminiature connector, ITT Cannon is able to use its extensive design expertise and high quality manufacturing processes to insure the optimum performance and reliability.

The D Subminiature connectors with fixed contacts in solder cup, straight and 90° PC contact terminations are designed to be comparable to MIL-C-24308 (see cross reference, pages 142-143). These high-reliability D Subminiature connectors are the finest quality connectors available at the most competitive prices in the market.

Applications:

- Aerospace
- Transportation
- Communication Systems
- Information Systems
- Test Equipment

Product Features

Suitable for a variety of cable and printed circuit board options

Solder cup version accommodates wire size 20 AWG maximum

5 A standard current rating
Clinch Nut and Float Mount Options

Specifications

| | | | |
|--|---------------------------------------|--|---|
| Temperature Rating | -55°C to 125°C | Coaxial VSWR | Less than 1.30 + .03F for F up to 500 MHz |
| Signal Contact Current Rating | 7.5 A current capacity | Coaxial Insertion Loss | .3dB loss at 500 MHz |
| Signal Contact Resistance | 55 millivolt max. at 7.5 test current | High Power Current Rating | Up to 40 A |
| Signal Contact Dielectric Withstanding Voltage | 1250 VAC at Sea Level | High Power Dielectric Withstanding Voltage | 1000 VAC at Sea Level |
| Coaxial Current Rating | 5 A | High Voltage Current Rating | 5 A |
| Coaxial Dielectric Withstanding Voltage | 1000 VAC at Sea Level | High Voltage Contact Dielectric Withstanding Voltage | 2800 V at Sea Level |
| Coaxial Impedance | 75 Ω or 50 Ω | | |

Materials and Finishes

| Description | Material | Finish/Treatment |
|---------------------------|-------------------------------------|---|
| Shell | Steel | Yellow Chromate over Zinc (Cadmium available upon request; order code -A101) |
| Insulator | Polyester, UL 94V-0, Color: Green | None |
| Contacts (Military) | Copper Alloy | 50 microinches of Gold over Nickel in mating area, Gold over Nickel on balance |
| Contacts (Commercial) | Copper Alloy | Gold over Nickel on mating area, Tin on balance |
| Dual Float Mount Hardware | Stainless Steel | Passivated |
| Clinch Nut Hardware | Stainless Steel with plastic insert | Passivated |
| Standoff | Stainless Steel | Passivated |
| Plastic Bracket | Thermoplastic, UL 94V-0 | None |
| Metal Bracket | Steel | Zinc (Tin if boardlocks are attached) |

Coaxial/High Power/High Voltage Contact Assemblies

| | | |
|-------------------------------|---------------|------------------|
| Contacts and Outer Shells | Copper Alloy | Gold over Nickel |
| Ring, Retaining | Copper Alloy | Nickel |
| Insulator (Coaxial Only) | Teflon | None |
| Insulator (High Voltage Only) | Thermoplastic | None |

90° PC Tail with Plastic Bracket

ITT Cannon has a long history of providing high performance D Subminiature connectors for space applications (qualified by NASA/GFSC and the European Space Agency). Space/High Reliability D*M and D*MA connectors meet stringent tests for outgassing and residual magnetism and are suitable for use in space, medical, and high performance military/aerospace applications. D*M and D*MA connectors are designed to be comparable to MIL-C-24308. The newest product group is High Density D*MA crimp connectors.

Applications

- Space - Low/High Orbit Satellites
- Medical

Product Features

Non-Magnetic

No Outgassing

Specifications

| | |
|-------------------------------|---|
| Temperature Rating | -65° at 125°C |
| Signal Contact Current Rating | 5 A (20 AWG) |
| Signal Contact Resistance | 55 millivolt max. at 7.5 A test current |
| Wire Accommodation (Solder) | 20 AWG max. |
| Wire Accommodation (Crimp) | 18/30 AWG |
| Coaxial Impedance | 50 Ohm |
| Loss VSWR | Less than 1,3 - 1,0 up to 500 Mhz |
| Coaxial Insertion Loss | 1db loss at 500 Mhz |

Dielectric Withstanding Voltage

Snap-Together Metalized Plastic

Metalized plastic backshells reduce EMI/RFI emissions. Metalized plastic provides a light weight solution. Design includes integral strain relieving cable clamp.

Product Features

- Improves conformance to FCC DOC #20780 shielding requirements
- No crimp ferrule tooling needed
- Quick and simple assembly using snap-together design feature

Attenuation

Note: Cable grounding tang not available on DE size backshell.

Specifications

| | |
|--------------------|-----------------|
| Attenuation: | -49dB @ 100 MHz |
| Temperature Range: | -20° C to 80° C |

Materials and Finishes

| | |
|-----------|-------------------------------|
| Material: | Thermoplastic, UL 94V-0 rated |
| Finish: | Nickel over Copper |

Straight Exit

Kit consists of 1 front shell, 1 rear shell, 1 cable clamp, 2 screws
Optional locking hardware sold separately, see page 201.

| Shell Size | Layout | Part Number | A ±0,15 (.006) | B ±0,30 (.012) | C ±0,30 (.012) | D ±0,30 (.120) | E ±0,20 (.008) | ØH Max. |

Locking Hardware for Snap-Together EMI Shielded Backshell

Recessed Jackscrew

| | |
|----------------------------------|--------------|
| Part Number: | 250-8501-004 |
| Material: | Brass |
| Finish: | Nickel |
| Quantity Required per Connector: | 2 |

Extended Jackscrew

| | |
|----------------------------------|---|
| Part Number: | 250-8501-009 (M3) 250-8501-010 (#4-40) |
| Material: | Brass |
| Finish: | Nickel |
| Quantity Required per Connector: | 2 |

Thumbscrew

| | |
|----------------------------------|--------------|
| Part Number: | 250-8501-013 |
| Material: | Brass |
| Finish: | Nickel |
| Quantity Required per Connector: | 2 |

Jackpost for In-Line Connections

Rectangular Nut

Jackpost

Jackpost Assembly

Assembly consists of 1 rectangular nut, 1 jackpost, 1 #4-40 lock washer.

| | |
|----------------------------------|------------|
| Part Number: | D121073-19 |
| Material: | Brass |
| Finish: | Nickel |
| Quantity Required per Connector: | 2 |

Die Cast Zinc Metal Backshell

Straight Exit

Die cast metal backshells reduce EMI/RFI emissions. Die cast metal backshells offer improved shielding in a rugged package.

Product Features

- Improves conformance to FCC DOC #20780 shielding requirements
- No crimp ferrule tooling needed
- Kit consists of 1 front shell, 1 rear shell, 2 screws, 2 hex nuts, 2 mounting screws, 2 end brackets, 1 set of compression inserts (see this page)

| Shell Size | Layout | Part Number | A ±0,13 (.005) | B ±0,13 (.005) | C ±0,13 (.005) | D ±0,13 (.005) | Ø E ±0,13 (.005) | F ±0,13 (.005) |

Optional Locking Hardware/Mechanism

Optional hardware provides quick disconnect for either flat IDC cable or round jacketed cable.

Order 2 per connector

Material: Corrosion-resistant steel

Locking Hook

Locking Spring

| Lock Hook Part Number |
|-----------------------|
| 015-8755-000 |
| 015-8755-001 |

| Lock Spring Part Number |
|-------------------------|
| 259-8760-000 |

NOTE: Not for use on rear panel mounted connectors.

Screw Lock Assemblies

ITT Cannon offers the largest variety of locking and latching hardware. Refer to the accessories selection guide on pages 198-199 for use with ITT Cannon backshells.

Product Features

- Ensures positive mating
- Provides locking and latching for high vibration applications

Male Screw Lock

Kit consists of 1 screw and 1 clip
Order 2 per connector

| | |
|-----------|--------------------------------------|
| Material: | Steel |
| Finish: | Yellow Chromate over Cadmium or Zinc |

Female Screw Lock

Kit consists of 1 nut, 3 washers, 1 lock washer, 1 hex nut
Order 2 per connector

Material: Steel

Front Panel Mount

Rear Panel Mount

NOTE: (1) A 6 inch/pound (female) and 4 inch/pound (male) maximum torque during assembly is recommended on steel screw lock assemblies.
(2) A third flat washer is supplied for front panel mounting of tab shell connectors.

| Yellow Chromate over Cadmium | Mil Spec Part Number | Zinc With Clear Chromate | A ±0,38 (.015) |

Slide Lock Assemblies

ITT Cannon offers the largest variety of locking and latching hardware. Refer to the accessories selection guide on pages 198-199 for use with ITT Cannon backshells.

Product Features

- Ensures positive mating
- Provides locking and latching for high vibration applications

Sliding Lock Retainer Assembly

Ideal for Ethernet Applications
 Kit consists of 1 sliding lock plate, 2 mounting screws, 2 lock washers, 2 hex nuts
 Order 1 kit per connector

| Description | Material | Finish/Treatment |
|--------------------|-----------------|--------------------------------------|
| Sliding Lock Plate | Stainless Steel | Passivated |
| Screw, Mounting | Steel | Yellow Chromate Over Cadmium or Zinc |
| Washer, Lock | | |
| Nut, Hex | | |

| Shell Size | Layout | Part Number | A ±0,38 (.015) | B ±0,38 (.015) | C ±0,13 (.005) |
|------------|--------|-------------|-------------------|-------------------|-------------------|
| DE | 9 | DE51224-1 | 35,05 (1.380) | 12,70 (.500) | 25,00 (.984) |
| DA | 15 | DA51220-1* | 43,70 (1.720) | 12,70 (.500) | 33,32 (1.312) |
| DB | 25 | DB51221-1 | 57,40 (2.260) | 12,70 (.500) | 47,04 (1.852) |
| DC | 37 | DC51222-1 | 73,86 (2.908) | 12,70 (.500) | 63,50 (2.500) |
| DD | 50 | DD51223-1 | 71,47 (2.814) | 15,47 (.609) | 61,11 (2.406) |

* Meets IEEE 802.3 Ethernet Specification

Slide Lock Post Assemblies

Kit consists of 1 post, 2 washers, 1 lock washer, 1 hex nut
 Order 2 kits per connector

Part Number: D53018

Materials and Finishes

Material: Steel

Finish: Yellow Chromate over Cadmium or Zinc

NOTE: When rear-mounting connector to a 1/16" panel, delete the 2 washers.

Slide Lock Post for High Volume Applications

Order 2 per connector
 Tool required for installation. See this page.

Part Number: 980-2000-860

Panel Thickness: 1,09-0,91 (.043-.036)

Materials and Finishes

Material: Stainless Steel

Treatment: Passivated

NOTE: Not suitable for rear panel mounting

Tool for High Volume Applications

Part Number: 995-2000-092

Spring Latch Assemblies

ITT Cannon offers the largest variety of locking and latching hardware. Refer to the accessories selection guide on pages 198-199 for use with ITT Cannon Connectors.

Product Features

- Low Cost
- Minimizes field connection time
- Positive lock between connectors
- Packaged 2 kits per bag

Materials and Finishes

| | |
|------------|-----------------|
| Material: | Stainless Steel |
| Treatment: | Passivated |

Unlocked

Locked

Spring Latch Plate Assembly

| Shell Size | Layout | Part Number | A ±0,38 (.015) | B ±0,38 (.015) |

Kit consists of 1 spring, 1 screw, 1 bracket, 1 lock washer, 1 hex nut
Order 2 kits per connector
Front panel mounting

Jackscrew/Jackpost Assemblies

ITT Cannon offers the largest variety of locking and latching hardware. Refer to the accessories selection guide on pages 198-199 for use with ITT Cannon Connectors.

Jackscrew Assembly

Kit consists of 2 studs, 2 heads, 1 tube retaining compound
Order one kit per connector

| | |
|------------------------|-----------------|
| Part Number: | D110550 |
| Materials and Finishes | |
| Material: | Stainless Steel |

Jackpost Assembly

Kit consists of 2 posts, 2 hex nuts, 2 lock washers
Order one kit per connector

| | |
|------------------------|-----------------|
| Part Number: | D110551 |
| Materials and Finishes | |
| Material: | Stainless Steel |
| Treatment: | Passivated |

NOTE: Jackpost is not compatible with rear-panel mount connectors.

Guide Pin Plate

Female

Useful in blind mate applications. Kit consists of 1 plate, 2 screws. Guide pin inserts for Size 8 cavities for Combo D® connectors also available. See page 95.

Plate and Hardware Material: Steel
 Plate and Hardware Finish: Yellow Chromate over Zinc or Cadmium

Gender Changer

Male/Male

Gender Changers modify the mating interface to allow connectors of the same genders to mate.

Product Features

- Low cost way to correct design errors
- Optional hardware allows design flexibility

Note: Grounding dimples available on male/male only.

| Shell Size | Layout | Part Number Without Hardware | Part Number With Hardware | A ±0,38 (.015) | B ±0,13 (.005) | C ±0,13 (.005) |

Dust Cap

Dust caps provide protection from moisture and dust for unused I/O ports.

Product Features

Conductive Dust Caps provide a surface resistivity of at least 1×10^9 ohms/sq. Dust Caps meet the static decay test requirements of MIL-B-81705C, Type II. Dust Caps have an integral flange for easy application and removal.

NOTE: C dim. applies at point of maximum integral interface length.

Materials and Finishes

Material: Black Polyethylene

Interfacial Seal

Interfacial seals provide moisture resistance at the mating interface.

Product Features

Other Interfacial Seals in the Combo D® layouts are available upon request.

Materials and Finishes

Material: Silastic Sheet

| Shell Size | Layout | Part Number | A | B |
|------------|--------|--------------|---------------|--------------|
| DE | 9 | DE53750 | 16,66 (.656) | 8,41 (.331) |

Potting Shell

Potting shells are molded with a thin flange 0,76 (.030) to permit the use of D Subminiature locking devices. Potting shells hold epoxy in place during curing.

Materials and Finishes

Material: Nylon

Color: Natural (white)

- Notes:
1. A, B, C and H are dimensions between panels and represent the recommended limit to be used in the design of the connector mounting method.
 2. It is recommended that only one assembly, either pin or socket, be float mounted.
 3. Standard pin assemblies contained 0,38 (.015) thick front shells on E and A sizes; 0,61 (.024) thick front shells on B, C, and D sizes.
 4. Standard connectors accommodate a #4 screw. Float mount connectors accommodate a #2 screw.

ABT-607 Pneumatic Crimper

ABT-607

Products: D*A, MDSM, 75 Ohm Crimp Coax

The ABT-607 is a pneumatic powered and controlled machine. It is designed for customers with moderate volume. This machine is designed to semi-automatically crimp stamped and formed contacts onto pre-stripped stranded or single conductor electrical wire. This machine will accommodate size 34 thru 12 AWG wire and is actuated by the use of a foot pedal.

Machine Crimp Rate: 800 per hour

Power Requirements: Pneumatic = 100 psi, 2 cu. ft. per min.

ABT-620 UCCS Semi-Automatic Crimper/Stripper

ABT-620 UCCS

Products: D*A, MDSM

The ABT-620 Universal Cannon Crimper/Stripper is a pneumatic powered, microprocessor controlled machine. It is designed to semi-automatically strip insulation from stranded or single conductor electrical wire and attach a stamped and formed contact by crimping. The machine will accommodate 34 thru 12 AWG wire. Primary application of the machine is the termination of jacketed cable where the individual leads cannot be stripped on fully automated equipment. The ABT-620 UCCS operates automatically upon insertion of a wire or it can be switched over to foot pedal operation as desired.

Machine Strip/Crimp Rate: 1200+ per hour

Power Requirements: Electrical = 115 VAC, 60 Hz, 20 A
Pneumatic = 80 psi, 3 cu. ft. per min.

CBT-646 Vibra-Bowl Crimper

CBT-646

Products: D*MA

The CBT-646, Vibra-Bowl Crimper is a pneumatically powered, electronically controlled machine. It is designed to semi-automatically crimp closed barrel, machined contacts, as used in the aerospace and commercial industries. The machine will accommodate wire sizes 30 thru 12 AWG. The CBT-646 is actuated automatically upon insertion of a pre-stripped stranded or single conductor wire.

Machine Crimp Rate: 1300+ per hour

Power Requirements: Electrical = 115 VAC, 60 Hz, 5 A
Pneumatic = 85 psi, 2 cu. ft. per min.

Glossary of Terms

In every job speciality there are certain words and phrases used by the "insiders" which after a time become almost a language unique to that speciality. D Subminiature technology is a typical example of that condition.

The following pages provide some explanations, in an attempt to clarify some of the terms that are commonly used by engineers and sales staff at ITT Cannon.

The list is not comprehensive, but highlights many of the expressions commonly used. Should you have any comments or additions please contact us. Feedback will be appreciated.

Accelerated Aging — A connector test in which temperature, voltage, current, or other parameters are increased beyond the normal operating values to observe deterioration in a relatively short period of time.

Accessories — Auxiliary devices such as cable clamps, endbells, gaskets, or any number of mechanical hardware devices that can be added to a connector.

Alloy — A composition of two or more elements, of which at least one is a metal. In connector applications it is usually a combination of metals which is used to create an alloy superior in performance to any of its individual components.

Alternating Current — A flow of electricity which reaches a maximum in one direction, decreases to zero, then reverses itself and reaches maximum in the opposite direction. This cycle is repeated continuously. The number of such cycles per second is the frequency. The average value of the voltage during any cycle is zero. Abbreviated ac.

Ambient Temperature — The temperature of the environment surrounding the connector. Usually the air. Normally used as the reference when specifying the OPERATING TEMPERATURE range of the connector.

Ampere — A unit of electrical current or rate of flow of electrons. One volt across one ohm of resistance causes a current of 1 ampere. Abbreviated Amp or A.

Anodize — A protective, insulating oxide layer formed on a metal by electrolytic action. Occasionally used as the outer most layer in connector plating, anodize is a very tough, non-conductive plating.

Attenuation — Power loss in an electrical system, expressed in decibels.

AWG — American Wire Gauge. A standard for wire diameters based on the approximate circular mil area of the wire. As numbers get larger, wire diameters decrease in size (a size 16 AWG wire has a larger diameter than a size 22 AWG).

Backshell — (Also known as Endbell) The outer rear end of the connector which is attached by means of internal threads or screws. It adapts the connector to its wire connections in a variety of ways. Typical backshells might have cable clamps to secure a wire bundle, ridges for heat shrink tubing, pipe threads, or shielded termination mechanisms. Backshells may be straight, 90°, or 45°.

Bandwidth — The range of frequencies within which performance falls within specific limits. Usually the bandwidth is given as an operating range and the operating specifications apply only to that bandwidth, unless otherwise stated.

Bar — A centimeter-gram-second unit of pressure (force exerted on a unit of area) equal to 1,000,000 dynes per square centimeter. Formerly known as microbar. Its symbol is b.

Base Metal — The metal which the connector or connector component is made and over which various platings will be deposited.

Beryllium Copper — An alloy of copper used to make contacts. It is relatively expensive, but has superior spring qualities, is resistant to fatigue, and can operate at higher temperatures than other materials such as phosphor bronze. It is used when numerous insertion and extraction cycles are required.

Body — The main portion of the connector made of the shell, insulator, and contacts.

Boot — A rear accessory, usually made of a resilient material, which is used around a multiconductor cable to add additional insulation, strength, abrasion resistance, or sealing.

Brass — Metal alloy of copper and zinc used for contacts. It is low cost, an excellent conductor, and resists fatigue.

Breakdown — An electrical discharge through a connector insulator or insulation on a wire. A catastrophic failure mode.

Breakdown Voltage — The voltage at which an insulator ruptures.

Breakout — The point at which wires are separated from a multi-conductor cable or wire bundle for routing to other points.

C — Abbreviation for Centigrade, or more properly Celsius, since the term Centigrade was officially abandoned by international agreement in 1948. See CELSIUS.

Cable Assembly — A cable (or bundle of cables) with plugs and/or receptacles on each end.

Cable Clamp — A rear connector clamping accessory which tightens over a cable or wire bundle to provide strain relief to the cable. The cable clamp may be part of a more elaborate endbell or it may be used alone. Some cable clamps also provide cable jacket sealing using a resilient gland; for example the MS3057-C, others provide only strain relief.

Cadmium — A metallic element chemically related to zinc and mercury, widely used for plating. It has an extraordinary ability to resist outdoor corrosion. It is especially resistant to alkali. Cadmium is electrically conductive and it is easy to solder. Its symbol is Cd.

CECC — Abbreviation for Electronic Components Committee of CENELEC, the European committee for Electrotechnical Standardization. CECC uses the IEC test methods, and thus is based upon worldwide standards.

Celsius — A temperature scale in which the freezing point of water is 0° and the boiling point is 100° at normal atmospheric pressure. Formerly known as Centigrade, but officially changed to Celsius by international agreement in 1948.

CEN — Abbreviation for European Committee for Standardization. A European standards group corresponding to the ISO at the European level.

CENELEC — Abbreviation for European Committee for Electrical Standardization. A European standards group corresponding to the IEC at the European level.

Chamfer — A bevel cut on the inside edge of an insulator contact cavity or a mounting hole. In a contact cavity the chamfer is intended to guide the mating pin into the cavity. In a mounting hole it is a countersink to accept a cone shaped bolt.

Characteristic Impedance — The characteristic impedance of a transmission line is the impedance of the line when it is terminated in a perfect load (a load that absorbs all the energy and reflects none, such that VSWR = 1.00).

Clearance Hole — See Through Hole.

Closed Entry — An insulator design which limits the diameter of the mating contacts.

Glossary of Terms

Closed Socket Contact — A socket contact in which the mating cavity limits the entry of a contact or probe having a diameter larger than the mating pin.

Coax — Abbreviation for coaxial.

Coaxial Cable — A cable that comprises a single copper wire surrounded by insulating material, wire shielding or mesh, and a plastic protective sheath.

Component — An essential functional part of the connector.

Contact — The conductive element in a connector which makes the actual connection between the wire and the mating connector for the purpose of transferring electrical energy. Ideally the contact should add nothing to the circuit. In the real world, however, contacts typically have a small CONTACT RESISTANCE and associated potential drop.

Contact Alignment — The overall play that a contact has in the insulator cavity to allow the mating contacts to self align. Also called contact float.

Contact Arrangement — See LAYOUT.

Contact Cavity — A defined hole in the connector insulator into which the contacts fit. The cavities are generally marked with a unique designation or number for ease of identification.

Contact Resistance — The maximum amount of resistance which a contact introduces into the connection when carrying a specified current (usually stated in milliohms). When not stated, values are typically given for "Initial" or "new" contacts. Most specifications also limit the maximum resistance during or after each of a series of extreme tests, such as "Contact Resistance After Corrosion Test". These figures are typically slightly higher than "Initial".

Contact Retention — The maximum allowable axial load which can be applied to a contact from either direction without it being dislodged from the insulator. Usually stated in Newtons or pounds of force.

Contact Separation Force — The force required to separate a pair of mated contacts. Usually stated in Newtons or pounds of force.

Contact Size — This usually relates to the maximum size wire this contact can nominally accommodate. It is based on that AWG size most closely corresponds to the circular mil area of the engaging end of a pin contact for that size. For example, a size 16 contact can accommodate a size 16 AWG wire maximum and the pin corresponds to the CMA of a size 16 AWG. Note, however, that oversized crimp pots are available for some crimp contacts which will allow, for example, a size 16 contact to accommodate a size 14 AWG wire.

Contact Spacing — The distance between the centers of adjacent contacts.

Creepage — The conduction of electricity across the surface of an insulator.

Creepage Distance — The shortest distance between contacts of opposite polarities, or between a live contact and ground, measured over the surface of the insulator.

Creepage Path — A path across the surface of the insulator between two conductors. Lengthening the path reduces the possibility of arc damage.

Crimp — A method of attaching a contact to a wire through the application of pressure.

Crimp Contact — A contact which is terminated to a wire by means of crimping with an appropriate die and tool. After termination, an insertion tool is normally used to insert the crimped contact into the connector. Removable crimp contacts can be FRONT RELEASE or REAR RELEASE. An extraction tool is usually required to remove the contact.

Crosstalk — Undesired electrical currents in conductors caused by electromagnetic or electrostatic coupling from other conductors or from external sources. Also, leakage of optical power from one optical conductor to another.

CSA — Abbreviation for Canadian Standards Association.

Current — The movement of electrons through a conductor. Current is measured in amperes. Its symbol is I.

Current Rating — The maximum current that a particular wire, contact, or connector can accommodate. NOTE: When several wires are used in a single connector or elevated temperature or altitude is involved, derating curves must be applied to these ratings. A typical derating system is MIL-W-5088 which allows the user to calculate the derating effects of current, ambient temperature, number of wires in the bundle, and altitude.

Decibel — A standard unit of measure for transmission gain or loss. It expresses the ratio of power input to power output. Abbreviated dB. The term dBm is used when 1 milliwatt is the reference level.

Derating — To reduce the voltage, current, or power rating of a connector to improve its reliability or to permit operation at high ambient temperatures or altitudes.

Derating Curve — A graph of the change in power handling capability of a connector as a function of ambient temperature or altitude. Typically the graphed function is curved, hence the name.

Diallyl Phthalate — A thermosetting plastic used for insulators and some types of connector housings. It has outstanding resistance to chemicals, excellent dimensional stability, and superior electrical insulating properties.

Dielectric — An insulator used to isolate two conductors having a low loss factor (RF cables). The perfect insulator is a vacuum.

Dielectric Constant — That property (K) of an insulating material which is the ratio of the parallel capacitance (C) of a given configuration of electrodes with the material as the dielectric, to the capacitance of the same electrode configuration with a vacuum as the dielectric.

Digital — A signal comprising discrete elements.

DIN — Abbreviation for Deutsche Industrie Norm, a German standards organization.

Direct Current — An essentially constant value of current that flows in only one direction. Abbreviated dc.

Dust Cap — A cover used in place of a mating connector to seal it against dirt and moisture. Usually secured to the connector by a captive chain, wire, or rope.

Electroplating — To deposit a metal on the surface of a conductor using electrolysis.

EMI/RFI — Electro-Magnetic Interference and Radio Frequency Interference. This is unwanted stray electronic radiation which may enter, and/or be emitted by an electronic system. The most common method of shielding interconnections against this radiation is to use wires with a metallic braided shield and a connector system which will extend the shield through the interconnection. This type of design will keep radiation from entering, or being emitted by the system. Backshells for shielded cable and connectors with threads or grounding fingers are typically used for this purpose. Call for the specific EMI/RFI accommodations of the connectors in this catalog.

Glossary of Terms

EN — Abbreviation for Euro Norm. A European market-wide product standard.

Endbell — See BACKSHELL.

Extraction Tool — A device used to remove a (removable) contact from a connector insulator. The extraction tool may be inserted into the mating face of the insulator (FRONT RELEASE) or the wire side (REAR RELEASE). In either case, the contact comes out the rear, or wire side, of the connector.

Fahrenheit — A temperature scale in which the freezing point of water is defined as 32° and the boiling point is 212° at normal atmospheric pressure. See the conversion tables for converting Fahrenheit to Celsius. Abbreviated F.

Female Contact — See SOCKET CONTACT.

Ferrule — A bell shaped ring which is placed over a WIRE SEALING GROMMET to provide uniform axial compression of the grommet and to minimize the transmission of torque to the grommet when the backshell is screwed on to the rear of the connector. Ferrules are a part of the sealing mechanism at the rear of a connector. Ferrules are normally a separate component part of the connector although some backshells have integrated ferrules. Ferrules are usually made from a thermoplastic material, but occasionally ferrules are made of metal.

Finish — The metallic coatings used on contacts and metal connectors. These are thin layers of metal designed to improve conductivity, solderability, or to resist corrosion. Typical contact finishes are gold or silver. Typical shell finishes are olive drab over cadmium, electroless nickel, or black anodize.

Flange — A square mounting flange with four mounting holes for bolting the connector to a panel. The mounting holes may be through holes or threaded.

Flanged Receptacle — (Also known as a Box Mount or Wall Mount) The shell of this connector has a square flange with mounting holes at each corner. Mounting holes are usually through holes, but may be threaded. Flanged receptacles can usually be front or rear panel mounted depending upon panel thickness. Some connectors have two different versions, one for front mounting, and one for rear panel mounting.

Flash Plating — As commonly used in connector terminology, flash refers to extremely thin platings of metal, for example: gold flash is a very thin plating of gold. So thin, that the thickness is generally not specified.

Front Mounting — A receptacle that can only be mounted to the front of a panel with its mounting FLANGE outside the equipment.

Front Release — For crimp type removable contacts, front release means that the appropriate extraction tool is *inserted from the front*, or mating face, of the connector. The contact is then pushed out the *rear* (wire side) of the connector.

Gas Tight — The mating of two contact surfaces which are so tight that corrosive gasses can not enter the joint.

Gold — A precious metal that is more conductive than silver or copper. Because it does not corrode and is highly conductive, it is used as plating for contacts. Its chemical symbol is Au.

Grommet Cavity — A defined hole in the WIRE SEALING GROMMET through which the wires are passed. The cavities are generally marked with a unique designation or number for ease of use.

Guide Pin — A special pin which is inserted into a socket contact before the contact can be inserted into the connector insulator. Guide pins provide a rounded surface at the front of the socket and greatly aid in pushing the contact into the insulator thus avoiding damage to both the insulator and the contact. Typically, small size socket contacts require the use of guide pins while larger sizes can be inserted without them.

Harness — A group of wires or cables bundled together with attached connectors and/or components in a preshaped assembly.

Hz — Symbol for Hertz, an international unit of frequency equal to one cycle per second. That is, 20,000 Hz is 20,000 cycles per second.

I/O — Input/Output

IEC — Abbreviation for the International Electrotechnical Commission. An international organization that develops standards exclusively for electrical engineering. CENELEC is the equivalent organization at the European level.

Impedance Match — When a transmission line is terminated so that $VSWR = 1.00$. Another definition is when a source is terminated in an impedance that allows optimum energy transfer.

Indentor — The part of a crimping die which indents the contact barrel to form the actual crimp. Indentors normally make six or eight multiple indentions for each crimp.

Initial — A test result taken prior to any other environmental testing. For example, contact resistance is frequently specified "Initial", that is, with "new" contacts. Most specifications also limit the maximum resistance during or after each of a series of extreme tests, such as "Contact Resistance After Corrosion Test". These figures are typically slightly higher than "Initial".

Insert — See INSULATOR.

Insert Arrangement — See LAYOUT.

Insert Retention Force — The maximum allowable force which should be applied to the face of the insulator without dislodging it from the shell or causing any change in connector performance specifications. Usually stated in Newtons or pounds of force.

Insertion Force — The effort, usually stated in ounces or Newtons, required to engage two contacts or connector halves.

Insertion Loss — The attenuation that results when a transducer is inserted in a transmission line. It is the ratio of the power input to the transducer to the power out of the transducer expressed in decibels.

Insertion Tool — A small, hand-held tool used to insert contacts into a connector.

Insulation — A material that has high electrical resistance and is suitable for covering or encasing electrical components to prevent a short circuit.

Insulation Displacement Connector (IDC) — A connector contact with sharp tines which pierce and displace the wire insulation and make direct electrical connection with the conductor. Normally used with multipin connectors which must be terminated to flat cable. This is a fast, low cost method to terminate many conductors simultaneously.

Insulation Resistance — The minimum resistance (usually stated in Megohms) between adjacent contacts and between the contacts and the shell at a specific voltage. When not stated, values are typically given for new insulators. Most specifications also specify minimum resistance figures during or after each of a series of extreme tests, such as "Insulation Resistance During Dry Heat".

Insulation Support — An extended portion at the rear of a crimp contact that is crimped around the wire insulation to provide extra strain relief. This crimp is in addition to the crimp over the conductor which provides the actual electrical termination.

Glossary of Terms

Insulator — The insulating element into which the contacts are mounted in a connector. This can be a resilient material, thermoplastic, or a thermoset compound, among other materials.

Insulator Rotation — A method of differentiating a circular connector if more than one connector with the same sex and layout is to be used in a system. The insulator is permanently positioned in the shell so that only a connector with the same degree of rotation can be mated with it. Possible rotations are specific to each layout with some layouts having many possible rotations and others having none. A chart of valid rotations is listed by layout for connectors capable of being rotated. Most connector series use the military convention of assigning letter designations for specific degrees of rotation (for example: W, X, Y, Z). See KEYING.

Interchangeable — The characteristic of connectors in which a connector half of one manufacturer or series will directly replace that of another manufacturer and provide the same electrical and mechanical function.

Intermateable — The characteristic of connectors in which a connector half of one manufacturer or series will mate directly with the connector half of another manufacturer.

Intermittent — Occurring at intervals. A connection which passes electrical current only in random or undesirable intervals.

Intermountable — The characteristic of connectors in which one manufacturer's connector or series will mount in exactly the same panel space and mounting holes as another manufacturer's product.

ISO — Abbreviation for the International Standards Organization. A group that operates at the international level and sets most standards for industry, with the exception of electrical engineering and telecommunications which are set by the IEC and ITU respectively. CEN is the equivalent organization at the European level.

Jacket — The outermost layer of insulation in a cable composed of several wires.

Jackscrew — A screw attached to one half of a connector pair used to mechanically align, draw them together, and lock them in place.

Key — A mechanism used to polarize connectors by the user. See KEYING.

Keying — A method of differentiating a connector if more than one connector with the same sex and layout is to be used in a system. The key is usually a pin or other projection which can be located in a contact cavity or slot. The key will prevent a connector without a matching orifice from mating. Keying and POLARIZATION serve the same function, but keying can be done by the user, while polarization is manufactured into the connector and normally can not be altered by the user.

Layout — The number, size, and geometric arrangement of the contacts in a connector. When a connector is said to have a certain "layout" it refers to a specific contact configuration. For example, Combo D® has 2 pages of drawings showing the arrangement of the contacts in the insulator. Each of these contact cavity arrangements can be referred to as a layout.

Locator — A part of a crimping tool TURRET. Rotation of the locator sets the tool for a particular size or sex contact. See TURRET.

Male Contact — See PIN CONTACT.

Mating Life — The minimum number of times a connector can be mated and unmated and still meet all of its design specifications. The maximum life may be much higher than this figure.

Mil — One thousandth of an inch (.001). Used in the United States as a unit of length in wire diameters and linear dimensions.

Mil-Spec — Abbreviation for Military Specification.

Milliampere — One one-thousandth (.001) of an ampere. Abbreviated mA.

Millimeter — Metric unit of linear measure. 1 millimeter = .03937 inches. Abbreviated mm.

Milliohm — One one-thousandth (.001) of an ohm. Abbreviated mΩ.

mm² — Millimeters squared. A standard for wire diameters used in Europe instead of AWG. As numbers get larger, wire diameters increase in size. The relationship between mm² and AWG is reverse logarithmic. 1 mm² = 1973 circular mils. A conversion graph is needed to make accurate comparisons between AWG and mm². Call for assistance.

Mounting Clip — Any of a variety of mounting accessories used to secure a connector or connector pair to a rigid surface.

Multi-Conductor Cable — Two or more individual wires surrounded by a jacketing material.

Nest — The portion of a crimping die that supports the contact barrel during crimping.

Newton — A unit of acceleration. One Newton is the force capable of accelerating 1 kilogram to one meter per second per second. 1 pound force = 4.448221 Newtons. Abbreviated N.

Ohm — The unit of electrical resistance. One ohm is the value of resistance through which a potential difference of one volt will maintain a current of one ampere. Its symbol is the Greek letter omega (Ω).

Operating Temperature — The range of AMBIENT TEMPERATURES over which the connector can operate and still meet all of its design specifications.

Operating Voltage — The range of voltages over which the connector can be operated. Safety precautions must be taken anytime a voltage in excess of 50V is to be used in a circuit. Check your local and national codes for guidelines.

Outgassing — The circumstance in which an insulator releases gasses trapped within it under a vacuum or conditions of decreased pressure, high heat, or both.

Panel — The outside surface of a piece of equipment on to which connectors are mounted. The panel is usually made of metal.

Panel Mount — A connector designed to be mounted on a panel by means of screws or jam nut.

PCB — Abbreviation for Printed Circuit Boards.

Performance Class 1 — Performance class per European specification DIN 41652, specifying contact performance to 500 mating cycles, followed by testing per DIN 41640, Part 21. The contact is subjected to severe environmental conditions, including industrial gasses, after the 500 mating cycles, and must meet basic contact resistance, engaging force, and separation force tests.

Performance Class 2 — Performance class per European specification DIN 41652, specifying contact performance to 200 mating cycles, followed by testing per DIN 41640, Part 21. The contact is subjected to severe environmental conditions, including industrial gasses, after the 200 mating cycles, and must meet basic contact resistance, engaging force, and separation force tests.

Glossary of Terms

Performance Class 3 — Performance class per European specification DIN 41652, specifying contact performance to 50 mating cycles, followed by testing per DIN 41640, Part 21. The contact is subjected to severe environmental conditions, including industrial gasses, after the 50 mating cycles, and must meet basic contact resistance, engaging force, and separation force tests.

Peripheral Seal — A resilient seal used to keep moisture from entering the connector at the point where the plug and receptacle shells meet. A common method is to use flat gaskets on receptacles and O-rings on plugs.

Phosphor Bronze — An alloy of copper, tin, and phosphorus used to make spring contacts. It is typically used in lower cost contacts where frequent insertions and withdrawals and high temperatures are not a factor.

Pin — A male contact. See PIN CONTACT.

Pin Contact — The contact which has a long shaft at the engagement end which enters the socket contact.

Plating — See FINISH.

Plug — The male portion of a connector pair usually employing a coupling nut to secure it to the receptacle half. A plug may have either pin or socket contacts.

Polarization — A mechanical mechanism that allows connector halves to intermate in only one specific orientation. This can be accomplished by asymmetrical shapes of the two halves as in a D Subminiature connector, insulator rotation, keys, keyways, ramps, or other means. Polarization prevents connectors of the same size and/or same layout from intermating when this is undesirable, such as when two otherwise identical connectors are used on the same panel. Polarization is typically done by the assembler and can not be changed by the user, while keying is typically done by the user with an auxiliary keying device.

Polarizing Pin — A mechanism used to polarize connectors, manufactured into the connector. See KEYING.

Potting — The permanent sealing of a cable to a connector using an insulating material such as potting compound to exclude moisture or provide strain relief. See POTTING CUP.

Potting Compound — A sealing material used in potting to fill a potting cup.

Potting Cup — A bell-shaped (plastic) backshell with an enlarged opening for the wires. After the connector is loaded with wired contacts, the potting cup is attached to the rear of the connector. The inside of the cup is then filled with a potting compound. When the compound hardens, it forms a solid, permanent, watertight mass around the wires.

Potting Ring — A portion of the POTTING CUP which secures the bell shaped cup to the rear of the connector, usually by means of internal threads.

Pre-Tin — To apply tin-lead solder to the contact solder cup and/or conductor prior to soldering the two together.

Rear Mounting — A receptacle that mounts through the panel from the rear, with its mounting flange inside the equipment. Typically, rear mount receptacles are slightly longer than front mount types to allow for the thickness of the panel. Flange mount receptacles usually come in front and rear mount versions. All Jam nut receptacles are rear mount.

Rear Release — For crimp type removable contacts, rear release means that the appropriate extraction tool is *inserted from the rear*, or wire side, of the connector. The contact is then pulled out the rear of the connector.

Receptacle — The connector half that mates with the plug. The receptacle has threads, pins or ramps which engage the coupling nut on the plug, locking the two halves together. A receptacle may have either pin or socket contacts.

REF — Abbreviation for Reference.

Removable Contact — A contact which can be inserted and removed from the insulator by the user. An insertion tool and extraction tool are normally required to insert and remove the contact.

Removal Tool — See EXTRACTION TOOL

Resistance — That property of a substance which impedes current and results in the dissipation of power in the form of heat. The unit of resistance is the ohm.

Return Loss — The ratio of the power reflected from a discontinuity in a transmission line to the power incident.

RFI — See EMI/RFI.

Root Mean Square — The square root, of the average of the squares, of the values of a periodic quantity (like alternating current), taken through one complete period. It is the effective quantity of a periodic quantity. Abbreviated rms.

Salt Spray Test — A test, or series of tests, in which mated and/or unmated connectors are subjected to salt water under specified conditions. Used to test the connector's resistance to corrosion and any associated degradation in electrical function.

Screw Machine Contact — A contact made from a solid bar or rod using screw machine operations. Some screw machine contacts include secondary elements which are welded, crimped, or formed around the basic screw machined part to complete the contact.

Selective Plating — The application of metal PLATING to selective areas of the contact, particularly those areas subject to wear. Precious metal platings may be applied selectively to those contact surfaces responsible for the electrical connection, reducing the contact cost without sacrificing electrical performance.

Shell — The outside case of a connector into which the insulator and contacts are situated.

Shell Size — A standard system developed for military circular connectors for indicating the diameter of the shell. The system is based upon $\frac{1}{16}$ " increments, that is, a size 16 shell is one inch in diameter.

Shield Effectiveness — The ability of a shield to screen out undesirable signals.

Shock — An abrupt impact applied to a stationary object. It is usually expressed in gravities (g).

Socket — A female contact. See SOCKET CONTACT.

Socket Contact — The contact which has an opening at the engagement end to accept the pin contact.

Solder Contact — A contact which is terminated to the wire with solder. Solder contacts are normally bonded into the insulator and can not be removed by the user. The alternative is crimp contacts to which a wire is attached by crimping. Crimp contacts can usually be inserted and removed by the user.

Solder Cup — The end of a SOLDER CONTACT is designed to accept a wire which will then be soldered to the contact.

Stamped and Formed Contact — Contacts made by stamping and forming a sheet of metal rather than by machining metal stock. Also see SCREW MACHINE CONTACTS.

Glossary of Terms

Star Clip — One of several designs used for screw machine socket contacts. A tiny plated star shaped clip is captivated inside a solid barrel into which the pin contact fits. The clip creates a multi-point area of mechanical and electrical continuity between the mated contacts.

Stripper — A tool to remove insulation from a wire.

Test Voltage — The range of voltages over which the connector has been tested per the perimeters in the applicable specification.

Thermoplastic — A plastic material that can be softened by heat and rehardened into a solid state by cooling. This process can be accomplished using a variety of techniques.

Thermoset — A plastic material which hardens when heat and pressure are applied. Unlike thermoplastic, it cannot be remelted or remolded.

Through Hole — (Also known as a clearance hole) A mounting hole without threads.

Turret — An interchangeable device which is attached to a CRIMP TOOL that allows the tool to crimp a range of contacts. Each turret is made to crimp a specific style contact or a range of contacts and/or wire gauges. See LOCATOR.

UL — Abbreviation for Underwriter's Laboratories, a corporation supported by a group of underwriters for the purpose of establishing safety standards covering certain types of equipment and components in the United States.

UL 94V-0 — A flammability performance rating set by Underwriter's Laboratories for plastics.

V — Symbol for volt.

Vac — Volts, alternating current.

Vdc — Volts, direct current.

Vibration — A continuously reversing change in the magnitude of a given force.

Volt — The unit of measurement of electromotive force. It is equivalent to the force required to produce a current of 1 ampere through a resistance of one ohm.

Voltage — The force which causes current to flow through an electrical conductor. Its symbol is E. The greatest effective difference in potential between and two conductors of a circuit.

Voltage Drop — The difference in voltage between two points in a circuit due to the loss of electrical pressure as a current flows through an impedance.

Voltage Rating — The maximum voltage which a connector can sustain without breaking down or varying from design specifications.

Voltage Standing Wave Ratio — If a signal is sent down a transmission line any discontinuity will send a reflection back in the opposite direction.

Wire Sealing Grommet — A resilient disc with holes in it to accommodate the individual wires entering the rear of the connector. Each cavity forms a tight seal against the wire insulation (as long as wires within the specified diameter are used). The grommet seals the back of the connector against moisture, dirt, and air. The grommet is normally held in place and compressed by a backshell and/or ferrule. It is usually a separate component, but may be part of the insulator itself. Also see GROMMET CAVITY.

Wire Size — A numerical designation for conductor diameter. This catalog uses American Wire Gauge (AWG) which is based on the approximate circular mil area of the wire. See AWG and mm².

Wrap Post Contact — A type of contact which is terminated by wrapping wire around a post in a manner that deforms the wire and creates a gas-tight connection between the wire and the post. This method is slow and labor intensive. If used at all, it is used in prototype work.

Obsolete Products

General Application Connectors ♦

| | | |
|--|--|---|
| <p>D*C <i>Burgun D</i> with snap-in, rear release machined or stamped crimp contacts. Refer to D*U products.</p> | <p>D*PF Straight and 90° PCB applications, UL 94V-0 rated. Refer to D* products.</p> | <p>D*11148 D*(SMT) SMT – Surface Mount D, no replacement, only through holes available. Refer to ZED* products.</p> |
| <p>D*P 90° connectors for I/O applications, UL 94V-0 rated. Refer to D*U products</p> | <p>AD* Part number change only. Refer to ZD* products.</p> | <p>D*P1 Machined pressfit replaced by stamped pressfit. Refer to D*NG products.</p> |
| | | <p>D*TC Part number change only. Refer to D* products.</p> |

Product Safety Information

THIS NOTE MUST BE READ IN CONJUNCTION WITH THE PRODUCT DATA SHEET/CATALOG. FAILURE TO OBSERVE THE ADVICE IN THIS INFORMATION SHEET AND THE OPERATING CONDITIONS SPECIFIED IN THE PRODUCT DATA SHEET/CATALOG COULD RESULT IN HAZARDOUS SITUATIONS.

1 MATERIAL CONTENT AND PHYSICAL FORM

Electrical connectors do not usually contain hazardous materials. They contain conducting and non-conducting materials and can be divided into two groups.

- a) Printed circuit types and low cost audio types which employ all plastic insulators and casings.
- b) Rugged, Fire Barrier and High Reliability types with metal casings and either natural rubber, synthetic rubber, plastic or glass insulating materials. Contact materials vary with type of connector and also application and are usually manufactured from either: Copper, copper alloys, nickel, alumel, chromel or steel. In special applications, other alloys may be specified.

2 FIRE CHARACTERISTICS AND ELECTRIC SHOCK HAZARD

There is no fire hazard when the connector is correctly wired and used within the specified parameters. Incorrect wiring or assembly of the connector or careless use of metal tools or conductive fluids, or transit damage to any of the component parts may cause electric shock or burns. Live circuits must not be broken by separating mated connectors as this may cause arcing, ionisation and burning. Heat dissipation is greater at maximum resistance in a circuit. Hot spots may occur when resistance is raised locally by damage, e.g. cracked or deformed contacts, broken strands of wire. Local overheating may also result from the use of the incorrect application tools or from poor quality soldering or slack screw terminals. Overheating may occur if the ratings in the product Data Sheet/Catalog are exceeded and can cause breakdown of insulation and hence electric shock.

If heating is allowed to continue it intensifies by further increasing the local resistance through loss of temper of spring contacts, formation of oxide film on contacts and wires and leakage currents through carbonisation of insulation and tracking paths. Fire can then result in the presence of combustible materials and this may release noxious fumes. Overheating may not be visually apparent. Burns may result from touching overheated components.

3 HANDLING

Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers.

Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to installation/use and rejected if found to be damaged.

4 DISPOSAL

Incineration of certain materials may release noxious or even toxic fumes.

5 APPLICATION

Connectors with exposed contacts should not be selected for use on the current supply side of an electrical circuit, because an electric shock could result from touching exposed contacts on an unmated connector. Voltages in excess of 30 V ac or 42.5 V dc are potentially hazardous and care should be taken to ensure that such voltages cannot be transmitted in any way to exposed metal parts of the connector body. The connector and wiring should be checked, before making live, to have no damage to metal parts or insulators, no solder blobs, loose strands, conducting lubricants, swarf, or any other undesired conducting particles. Circuit resistance and continuity check should be made to make certain that there are no high resistance joints or spurious conducting paths. Always use the correct application tools as specified in the Data Sheet/Catalog.

Do not permit untrained personnel to wire, assemble or tamper with connectors. For operation voltage please see appropriate national regulations.

IMPORTANT GENERAL INFORMATION

(i) Air and creepage paths/Operating voltage
The admissible operating voltages depend on the individual applications and the valid national and other applicable safety regulations.

For this reason the air and creepage path data are only reference values. Observe reduction of air and creepage paths due to PC board and/or harnessing.

(ii) Temperature

All information given are temperature limits. The operation temperature depends on the individual application.

(iii) Other important information

ITT Cannon continuously endeavours to improve their products. Therefore, ITT Cannon products may deviate from the description, technical data and shape as shown in this catalog and data sheets.

ITT Cannon manufactures the highest quality products available in the marketplace; however these products are intended to be used in accordance with the specifications in this publication. Any use or application that deviates from the stated operating specifications is not recommended and may be unsafe. No information and data contained in this publication shall be construed to create any liability on the part of ITT Cannon. Any new issue of this publication shall automatically invalidate and supersede any and all previous issues. A limited warranty applies to ITT Cannon products. Except for obligations assumed by ITT Cannon under this warranty, ITT Cannon shall not be liable for any loss, damage, cost of repairs, incidental or consequential damages of any kind, whether or not based on express or implied warranty, contract, negligence or strict liability arising in connection with the design, manufacture, sale, use or repair of the products. Product availability, prices and delivery dates are exclusively subject to our respective order confirmation form; the same applies to orders based on development samples delivered. This publication is not to be construed as an offer. It is intended merely as an invitation to make an offer. By this publication, ITT Cannon does not assume responsibility or any liability for any patent infringements or other rights of third parties which may result from its use. Reprinting this publication is generally permitted, indicating the source. However, ITT Cannon's prior consent must be obtained in all cases.

We are focused on your world with Innovation, Experience, Reliability & Responsiveness.

Don't blink.

No industry in the world moves faster than electronics. Take a snapshot of it today, and it all changes by tomorrow.

When you need to bring your products to market more quickly, you most likely seek a partner who moves just as fast as you do. A company at the forefront with the latest in products and service.

At ITT Cannon, we have made it our business to understand your world. Or should we say, the many parts of your world:

The places in the world where you do business.

The products you bring to the world.

The service you require from suppliers to compete in the world.

At ITT Cannon, we are proud of a heritage that helped pioneer the electronics industry from its infancy in the early part of this century, to the highly advanced technologies of the present.

Today, we serve nearly every industry in which the increased demand for reliable and innovative interconnect systems is critical:

Computers (Personal computers, portables and peripherals)

Telecommunications (Network systems and services/LAN; mobile)

Transportation (Automobiles, heavy-duty vehicles, rail and mass transit)

Military/Aerospace (Commercial and military aircraft, defense and space)

Industrial (Factory automation and instrumentation)

Medical (Diagnostic equipment)

Broadcasting

Consumer Products

As ITT Cannon begins our ninth decade in business, we are proud to provide our global and regional customers with the most reliable electronic products and services available:

Interconnects and cable assemblies

RF connectors

Switches and conductive rubber switchpads

Test accessories

I/O card, memory card and smart card interconnects

Local area network components (copper and fiber optic)

Turn-key network systems and services

Customer use tooling

A commitment to concurrent engineering helps you reach your markets faster

Let us bring our spirit of innovation to your world. Experienced engineering teams located throughout the globe work hand-in-hand with our customers. And since these teams are thoroughly networked together, you benefit from 24 hour-a-day concurrent engineering capability. These teams advance your project from initial product concepts to final design and into production.

Our teams are experts in computer-based design, modeling and analysis to assure robust product designs. We are also well-versed in performance simulation, as well as verification of mechanical and electrical properties. ITT Cannon utilizes Pro/ENGINEER* software which allows us to develop products and manufacturing processes concurrently, and to easily evaluate multiple design alternatives. This means better designed products, produced faster and at a lower cost.

ITT Cannon's Integrated Product Development process (IPD) allows us to minimize cycle time for first article and volume production.

Worldwide capacity to meet all of your delivery requirements

Our decades of manufacturing experience, help us bring the latest products to your world. With automated manufacturing capacity strategically located in North America, Europe and Asia, we can produce products in either large or small quantities to quickly meet your exact requirements.

ITT Cannon is able to modify existing products to suit special customer requirements. With global manufacturing capacity in every continent, we are also able to source product from the location that best suits your needs. This means we have the flexibility to select the most advantageous shipping methods and other logistical options.

ITT Cannon has established Centers of Excellence for world class capabilities such as: Machining, stamping, surface plating, molding, cable assembly and network systems technology — all utilizing the most advanced CAM equipment.

R E L I A B I L I T Y

We don't stop at "world class quality" — Continuous improvement is our standard

Our goal is to bring world class electronics to your world. This commitment to perfection has helped ITT Cannon's global facilities earn ISO 9000 certification. We have invested in world class process controls for both assembly and component manufacturing.

ITT Cannon has also met or exceeded the quality system requirements from all customers who have conducted audits. We participate in ship-to-stock programs with many of these customers worldwide and have received numerous quality and preferred supplier awards from customers throughout the world in each of the industries we serve.

R E S P O N S I V E N E S S

A singular focus on responding to your needs

We know that to be responsive, we must know your world inside and out: your particular company, your industry and your challenges. Each of ITT Cannon's thousands of employees worldwide is focused on responding to you with timely and dependable information — and on ensuring that we keep the commitments we make. For instance, our globally linked computer system tracks the status of your order anywhere in the world.

You also benefit from our field applications and sales network, which provides industry-specific knowledge to help you design in the best product for your application.

Our distribution network is one of the most extensive in the industry, and can provide you off-the-shelf product to meet the most challenging delivery requirements.

A N I N V I T A T I O N T O S H A R E Y O U R W O R L D

Innovation. Experience. Reliability. Responsiveness.

At ITT Cannon, these are the strengths that we bring to our customers each and every day. Just as we have for nearly nine decades. We pride ourselves on a level of service and manufacturing know-how that has enabled us to lead our industry. Exceeding your expectations — not just meeting them — is how we approach every project.

With the world moving faster all the time, ITT Cannon is a partner who can help you get your products to market not just on time, but ahead of the competition.

At ITT Cannon, we realize that each customer we serve has their own special needs and expectations. That is why we would welcome the opportunity to discuss your project, your company, your industry — yes, your world.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
