

## General purpose input/output rail-to-rail low power operational amplifiers

Datasheet — production data

### Features

- Operating range  $V_{CC} = 2.5$  V to 6 V
- Rail-to-rail input and output
- Extended  $V_{icm}$  ( $V_{DD} - 0.2$  V to  $V_{CC} + 0.2$  V)
- Capable of driving a  $32\ \Omega$  load resistor
- High stability: 500 pF
- Available in SOT23-5 micropackage, SO-8, SO-14, TSSOP8, TSSOP14, and MiniSO-8 package
- Operating temperature range:  $-40\text{ }^{\circ}\text{C}$ ,  $+125\text{ }^{\circ}\text{C}$

### Applications

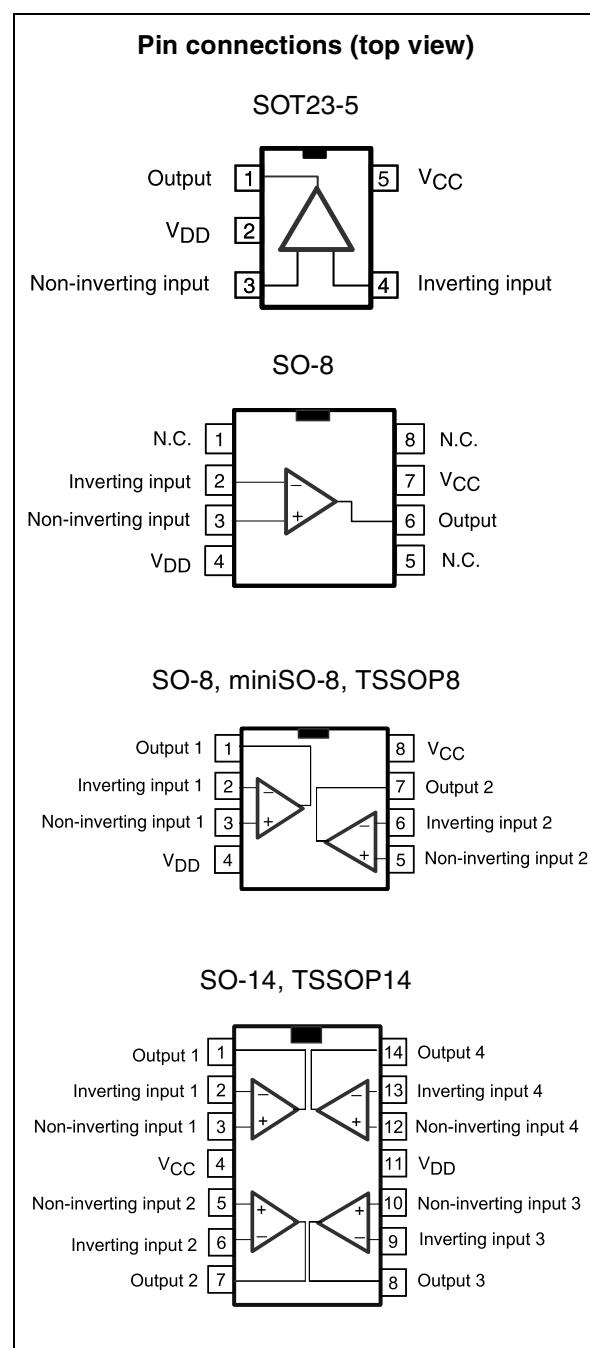

- Battery powered applications
- Audio driver (headphone driver)
- Sensor signal conditioning
- Laptop/notebook computers

### Description

The TSV358 and TSV324 (dual and quad) devices are low voltage versions of the LM358 and LM324 commodity operational amplifiers. The TSV321 device is the single version. The TSV321/358/324 devices are able to operate with voltages as low as 2.5 V and feature both I/O rail-to-rail.

The common mode input voltage extends 200 mV beyond the supply voltages at  $25\text{ }^{\circ}\text{C}$  while the output voltage swing is within 100 mV of each rail with a  $600\ \Omega$  load resistor. At  $V_{CC} = 3$  V, these devices offer 1.3 MHz of gain bandwidth product and provide high output current capability with a typical value of 80 mA.

These features make the TSV3xx family ideal for active filters, general purpose low voltage applications, and general purpose portable devices.

# 1 Absolute maximum ratings and operating conditions

**Table 1. Absolute maximum ratings**

| Symbol     | Parameter  | Value                                  | Unit |
|------------|--|--|------|
| $V_{CC}$   | Supply voltage <sup>(1)</sup>  | 7                                      | V    |
| $V_{id}$   | Differential input voltage <sup>(2)</sup>  | $\pm 1$                                | V    |
| $V_{in}$   | Input voltage  | $V_{DD} -0.3$ to $V_{CC} +0.3$         | V    |
| $T_{stg}$  | Storage temperature  | -65 to +150                            | °C   |
| $T_j$      | Maximum junction temperature   | 150                                    | °C   |

|            | Lead temperature (soldering, 10 s)   | 250                                    | °C   |
|            | Output short-circuit duration  | See <sup>(7)</sup>                     |      |

1. All voltages values, except differential voltage are with respect to network terminal.
2. Differential voltages are the non-inverting input terminal with respect to the inverting input terminal. If  $V_{id} > \pm 1$  V, the maximum input current must not exceed  $\pm 1$  mA. When  $V_{id} > \pm 1$  V, an input series resistor must be added to limit input current.
3. Short-circuits can cause excessive heating and destructive dissipation.  $R_{th}$  are typical values.
4. Human body model: 100 pF discharged through a 1.5 kΩ resistor between two pins of the device, done for all couples of pin combinations with other pins floating.
5. Machine model: a 200 pF capacitor is charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor  $< 5 \Omega$ ), done for all couples of pin combinations with other pins floating.
6. Charged device model: all pins plus package are charged together to the specified voltage and then discharged directly to ground.
7. Short-circuits from the output to  $V_{CC}$  can cause excessive heating. The maximum output current is approximately 80 mA, independent of the magnitude of  $V_{CC}$ . Destructive dissipation can result from simultaneous short-circuits on all amplifiers.

**Table 2. Operating conditions**

| Symbol     | Parameter   | Value  | Unit               |
|------------|---|--|--------------------|
| $V_{CC}$   | Supply voltage  | 2.5 to 6   | V                  |
| $V_{icm}$  | Common mode input voltage range<br>$T_{amb} = 25 \text{ }^{\circ}\text{C}, 2.5 \leq V_{CC} \leq 6 \text{ V}$<br>$T_{min} < T_{amb} < T_{max}, 2.5 \leq V_{CC} \leq 5.5 \text{ V}$ | $V_{DD} - 0.2$ to $V_{CC} + 0.2$<br>$V_{DD}$ to $V_{CC}$ | V                  |
| $T_{oper}$ | Operating free air temperature range  | -40 to + 125   | $^{\circ}\text{C}$ |

## 2 Electrical characteristics

**Table 3. Electrical characteristics at  $V_{CC} = +3\text{ V}$ ,  $V_{DD} = 0\text{ V}$ ,  $R_L$ ,  $C_L$  connected to  $V_{CC}/2$ , and  $T_{amb} = 25^\circ\text{C}$  (unless otherwise specified)**

### 3 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK is an ST trademark.

#### 3.1 SOT23-5 package information

**Figure 19. SOT23-5 package outline**

**Table 5. SOT23-5 package mechanical data**

| Symbol | Dimensions  |      |      |       |      |       |
|--------|-------------|------|------|-------|------|-------|
|        | Millimeters |      |      | Mils  |      |       |
|        | Min.        | Typ. | Max. | Min.  | Typ. | Max.  |
| A      | 0.90        |      | 1.45 | 35.4  |      | 57.1  |
| A1     | 0.00        |      | 0.15 | 0.00  |      | 5.9   |
| A2     | 0.90        |      | 1.30 | 35.4  |      | 51.2  |
| b      | 0.35        |      | 0.50 | 13.7  |      | 19.7  |
| C      | 0.09        |      | 0.20 | 3.5   |      | 7.8   |
| D      | 2.80        |      | 3.00 | 110.2 |      | 118.1 |

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

#### Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помошь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помошь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
