

# Series 92

## Characteristics

The Series 92 with its short stroke pushbuttons, making it especially suited for:

- PCB mounting

This series can be used to replace a membrane keypad if only a few buttons are needed.

## Functions

The Series 92 incorporates the following functions:

- Indicator
- Pushbutton
- Illuminated pushbutton

## Market segments

The EAO Series 92 is especially suited for applications in the segments:

- Machinery and Automation
- Medicinal technology
- Laboratory and measuring equipment

Please refer to the EAO website to obtain detailed information regarding this series [www.products.eao.com](http://www.products.eao.com)  
Configure a product to your exact needs and request a quotation.

|  <p><b>Mounting flange</b></p> |          |
| <b>92-960.0</b>   | 0.001 kg |

**Lens remover**

**Additional Information**

- For lens IP 40 only

| Part No.   | Weight   |
|--|----------|
|  <p><b>Lens remover</b></p> |          |
| <b>18-910</b>  | 0.002 kg |

## Mounting tool

### Additional Information

- For tightening or loosening of the fixing nut

| Part No.  | Weight   |
|---|----------|
| <br><b>Mounting tool</b> |          |
| 01-907  | 0.020 kg |

## Dismantling tool

### Additional Information

- For actuator dismantling of switching element, illumination element and mounting flange

| Part No.   | Weight   |
|--|----------|
| <br><b>Dismantling tool</b> |          |
| 92-971.0   | 0.002 kg |

Drawings

Single-LED

Drilling plan (element side)

- A Fixing holes for mounting flange (92-960.0)
- B Holes for LED
- C Holes for centering pins

Bauteil layout 1

Single-LED

Drilling plan (element side)

- A Fixing holes for mounting flange (92-960.0)
- B Holes for LED
- C Holes for contact pins  
Pad max. Ø 2.5 mm  
Through-connection recommended

Bauteil layout 2

## Pushbutton and Illuminated pushbutton

### Switching system

Short-travel switching system with 2 independent contact points and tactile operation.

Guarantees reliable switching even of very light loads.  
Fitted with 1 normally open contact.

### Material

#### Lens

Polycarbonate (PC)

#### Front bezel

Thermoplastic Elastomer (TPE)

#### Frame

Thermoplastic Polyester (PBT)

#### Material of contact

Gold (Au)

#### Switching element

Thermoplastic Polyester (PET, PBT) and Polyacetale (POM)

#### Actuator housing

Thermoplastic Polyester (PBT)

### Mechanical characteristics

#### Tightening torque

Fixing screw 40Ncm recommended  
Fixing nut max. 50Ncm

#### Actuating force

2.7 N ± 1 N measured at the switching element  
5 N measured at the lens

#### Actuating travel

Switching element 0.4 mm

#### Rebound time

≤ 1 ms

#### Resistance to heat of soldering

250 °C, 3 s (PCB assembly)  
320 °C, 3 s (when using a soldering iron)

#### Mechanical lifetime

≥ 1 Million operations as per IEC 60512-5-9a

### Electrical characteristics

#### Contact resistance

Starting value (initial) ≤ 100 mΩ as per IEC 60512-2-2b

#### Isolation resistance

≥ 10<sup>9</sup> Ω between all terminals at 100 VDC, as per IEC 60512-2-3a

#### Electrical life

≥ 500 000 operations at 42 VDC, 50 mA as per IEC 60512-5-9c.  
When attention is paid to the direction of current flow from terminal 3/4 to 1/2 the electrical life can be prolonged.

#### Electrostatic discharge (ESD)

15 kV

#### Switch rating

|                   |                   |
|-------------------|-------------------|
| Switching voltage | min. 50 mV AC/DC  |
|                   | max. 42 V AC/DC   |
| Switching current | min. 10 μA AC/DC  |
|                   | max. 100 mA AC/DC |
| Power rating      | max. 2 W          |

#### Electric strength

500 VAC, 50 Hz, 1 min, as per IEC 60512-2-4a

### Environmental conditions

#### Storage temperature

-40 °C ... +80 °C

#### Operating temperature

-25 °C ... +70 °C

#### Front protection

Switching element IP 40 (fluxproof to DIN 41640 Part 84)  
front IP 67 or IP 40

#### Shock resistance

(semi-sinusoidal)  
max. 500 m/s<sup>2</sup>, pulse width 11 ms, 3-axis,  
as per EN IEC 60068-2-27

#### Vibration resistance

(sinusoidal)  
max. 100 m/s<sup>2</sup> at 10 Hz ... 500 Hz, 10 cycles, 3-axis,  
as per EN IEC 60068-2-6

### Approvals

#### Declaration of conformity

CE

*EAO reserves the right to alter specifications without further notice.*

## General notes

If desired, the actuators of the series 92 can be supplied ready marked. With your order please enclose a list of the desired markings or a drawing, showing the type or size of script or the symbols desired.

### 1. Laser engraving (Fig. 1)

In addition to the most commonly used world languages, in DIN1451-3 close spacing, other typefaces are available as Scandinavian, Slavic, Greek, Russian and Polish. Red, blue and black lenses are filled with white colour. Other colour lenses are filled in black. Standard height of letters is 2 mm. If the height is not specified, we will supply 2 mm engraved letters.

### 2. Hot stamping (Fig. 1)

For larger series it is worth considering markings by means of hot stamping. We will be pleased to advise you. For letters and figures, typefaces with 2.5 mm, 3 mm and 4 mm are available.

### 3. Film inserts (Fig. 2)

Instead of using engraving, the actuator can be fitted with transparent film inserts. However, for this purpose the use of transparent lens caps is recommended. If smoked lens caps are used the lettering does not become visible until the LED is alight. Max. size of film insert 11.4 x 11.4 mm for IP 40 10.4 x 10.4 mm for IP 67 Film thickness 0.2 mm.

All dimensions in mm

| Height of letters h | Number of lines | Number of capital letters per line (target value) | Number of small letters per line (target value) |
|---------------------|-----------------|---|---|
| 3                   | 2               | 5-6   | 6   |
| 4                   | 2               | 4   | 4   |
| 5                   | 1               | 3   | 3-4   |
| 6                   | 1               | 2-3   | 3   |
| 8                   | 1               | 2   | 2   |

# 92 Application guidelines

## Suppressor circuits

When switching inductive loads such as relays, DC motors, and DC solenoids, it is always important to absorb surges (e.g. with a diode) to protect the contacts. When these inductive loads are switched off, a counter emf can severely damage switch contacts and greatly shorten lifetime.

Fig. 1 shows an inductive load with a free-wheeling diode connected in parallel. This free-wheeling diode provides a path for the inductor current to flow when the current is interrupted by the switch. Without this free-wheeling diode, the voltage across the coil will be limited only by dielectric breakdown voltages of the circuit or parasitic elements of the coil. This voltage can be kilovolts in amplitude even when nominal circuit voltages are low (e.g. 12VDC) see Fig. 2.

The free-wheeling diode should be chosen so that the reverse breakdown voltage is greater than the voltage driving the inductive load. The DC blocking voltage (VR) of the free-wheeling diode can be found in the datasheet of a diode. The forward current should be equal or greater than the maximum current flowing through the load.

**To get an efficient protection, the free-wheeling diode must be connected as close as possible to the inductive load!**

Switching with inductive load  
Fig. 1

Counter EMF  
over load without free-wheeling diode  
Fig. 2

## Note for soldering

### Process parameter for wave soldering

Basic specification for wave soldering J-STD 75 W4C

|  |                                  |
|--|----------------------------------|
| Maximum temperature on the component side of the pcb<br>(Temperature must not exceed during the entire processing) | 120 °C                           |
| Preheating phase (t1 ... t2)<br>Ramp up  | 70 ... 120 sec<br>typ. + 1°C/sec |
| Ramp up to maximum temperature (t2 ... t3)   | not defined                      |
| Maximum temperature on the soldering side (Temp 3)<br>Maximum time of soldering process (t3 ... t4)                | 250 °C<br>3 sec                  |
| Ramp down at 170 °C:   | typ. -2 °C/sec                   |

**Temperature curve wave soldering**

Green curve: Temperature on the component side of the pcb  
 Red curve: Temperature on the soldering side of the pcb

Room temperature: Temp 1

Preheating: Temperature process = Temp 1 ... Temp 2  
 Process time = t1 ... t2

Ramp up to soldering temperature: Process time = t2 ... t3

Soldering phase: Temperature process = Temp 3  
 Process time = t3 ... t4

**Iron soldering**

Basic specification for iron soldering IEC 60068-2-20

Maximum temperature at tip of iron: 320 °C

Maximum soldering time: 3 sec

**Cleaning/Lacquering**

The switching elements are not sealed. Cleaning up the PCB may damage the contacts in the switching elements. For this reason, the following points should be noted:

- When soldering make sure that the flux does not pass on the upper side of the PCB.
- When cleaning the PCB with detergents ensure that no dust or other debris may get inside of the switching elements.
- Ensure that no lacquer penetrates into the interior of the switching element when lacquering the PCB.

**Storage of components**

To obtain the optimum solderability of the components, the following points should be noted during storage:

- Do not store components in locations with high temperature or humidity.
- Do not expose components to corrosive gases.
- Avoid direct sunlight for a long period.

# 92 Application guidelines

## Arrangement mounting flange

The arrangement of the mounting flanges and their number is determined by the size of the front panel or PCB. To ensure uniform, tactile switching, we recommend a layout of the flanges as per adjacent sketch.

For large PCBs with several switching elements we recommend the following procedure:

1. Fit the actuator to the front panel.
2. Clip the mounting flange to the rear of the intended actuator.
3. Screw the PCB with the components soldered to it to the assembled mounting flange.

This arrangement applies to PCBs 1.6 mm thick.

## Dismantling mounting flange

The tool Part No. 92-971.0 must be used for removing the mounting flange from the actuator. Before removing the flange, the PCB fixing screws must be loosened.

If the number of actuators is insufficient, use the spacer Part. No. 92-965.0 which can be attached to the front panel.

The spacer can be adjusted to the following front panel thicknesses: 1.5/2.2/3/3.5/4 mm and can be stuck to the back of the panel free of dirt and grease.

## Index from Part No.

| Part No.      | Page | Part No.   | Page |

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
