

## Adjustable shunt voltage reference IC (automotive for SOT23-5)

Datasheet - production data

### Description

The TS431 is a low-voltage, three-terminal, adjustable shunt voltage reference. The output voltage can be set to any value between  $V_{ref}$  (1.24 V) and 6 V using two external resistors. The TS431 is able to operate at a lower voltage (1.24 V) and lower cathode current than the widely-used TL431 and TL1431 shunt voltage reference. When driving an optocoupler, the TS431 is particularly suitable for regulating 3.3 V switching power supplies.

### Features

- AEC-Q100 qualified (SOT23-5)
- Low voltage operation: 1.24 to 6 V
- 2%, 1% and 0.5% voltage precision
- Wide operating range cathode current: 60  $\mu$ A to 30 mA
- Low output impedance: 0.2  $\Omega$
- Typically stable for any capacitive loads
- ESD protection:
  - Human body model: 2 kV
  - Machine model: 200 V
- 100 ppm/ $^{\circ}$ C temperature coefficient
- Automotive grade version available

1. Limits are 100% production tested at 25 °C. Behavior at the temperature range limits is guaranteed through correlation and by design.
2. See definition below.

#### Definition of output voltage change over temperature range

$\Delta V_{ref}$  is defined as the difference between the maximum and minimum values obtained over the full temperature range.

$$\Delta V_{ref} = V_{ref\text{ max}} - V_{ref\text{ min}}$$

## 4 Application information

The TS431 is a general-purpose low-power adjustable shunt voltage reference, capable of operating with a cathode current as low as 60  $\mu\text{A}$  and up to 30 mA.

The main static parameters of the TS431 voltage reference are specified in [Table 4 on page 5](#).

Since the TS431 is designed for general-purpose applications with a broad range of cathode currents, voltages and loads, when designing with the device in applications requiring fast dynamic response (turn-on/off and/or pulsed load conditions) it should be considered that upon application of power, the time required for the  $V_{KA}$  voltage to reach its final value within a specified error range depends on several factors, among which the temperature, cathode current and capacitive load inrush current are the most influential. The dynamic response of the device to fast turn-on/off, load and temperature changes is optimized when the cathode current is not in the lower end of the operating range ( $I_K > 500 \mu\text{A}$ ).

## 5 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK® is an ST trademark.

1. Qualification and characterization according to AEC-Q100 and AEC-Q003 or equivalent, advanced screening according to AEC-Q001 and AEC-Q002 or equivalent.

## 7 Revision history

**Table 9. Document revision history**

| Date        | Revision | Changes                                                                                                                                                                                                                                                         |
|-------------|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1-Sep-2003  | 1        | Initial release.                                                                                                                                                                                                                                                |
| 1-Oct-2005  | 2        | PPAP references inserted in the datasheet. See the order codes table.<br>Minor changes to formatting and grammar.                                                                                                                                               |
| 2-Jan-2006  | 3        | TS431AIYLT PPAP reference inserted. See the order codes table.                                                                                                                                                                                                  |
| 22-Sep-2006 | 4        | Included footnote on automotive grade qualification to order codes table.<br>Updated package information (changed mils to inches).                                                                                                                              |
| 25-Apr-2007 | 5        | Resized graphics on cover page.<br>Moved definition of output voltage change from <i>Table 3</i> footnote to separate section below table.<br>Corrected errors in SOT23-5 package mechanical data.<br>Removed erroneous drawing for TO92 tape & reel package.   |
| 30-Aug-2007 | 6        | Updated drawing for TO92 bulk package.<br>Modified footnote related to automotive grade qualification in <i>Table 5: Order codes</i> , and re-ordered order codes.                                                                                              |
| 27-Aug-2010 | 7        | Modified note for package SOT23-5 on page 1.                                                                                                                                                                                                                    |
| 15-Nov-2012 | 8        | Modified note 1 <i>Table 5 on page 12</i> .                                                                                                                                                                                                                     |
| 17-Dec-2012 | 9        | Added note 1 <i>Table 2 on page 2</i> and <i>Section 3 on page 7</i> .                                                                                                                                                                                          |
| 12-Mar-2013 | 10       | Added features Automotive grade version available in cover page.                                                                                                                                                                                                |
| 30-Nov-2017 | 11       | Added automotive qualification for SOT23-5 in the whole document.<br>Updated main title on page 1.<br>Added Section 1: Pinout on page 3.<br>Updated Table 1 on page 4 (removed note 1).<br>Added Table 3 on page 4.<br>Minor modifications throughout document. |
| 27-Jun-2018 | 12       | Added precision value in <i>Table 8: Order codes</i> .                                                                                                                                                                                                          |

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
