

VIDEO NOISE REDUCER

■ GENERAL DESCRIPTION

The NJM2210 is a video noise reducer IC of which operation is to reduce noise contained in video color and luminance signal and at the same time to correct outline of horizontal and vertical image signal.

The NJM2210 is suit for VCR camera especially.

■ PACKAGE OUTLINE

NJM2210D

NJM2210M

■ FEATURES

- Operating Voltage (+4.75V~+5.25V)
- It can compose Combtype Filter, with CCD 1H delay line by that connect with
- It can be useful as Switching Noise Reduce Mode and Enhance Mode that are because of to Comb type Filter
- Package Outline DIP8, DMP8
- Bipolar Technology

■ RECOMMENDED OPERATING CONDITION

- Operating Voltage 4.75~5.25V

■ PIN CONFIGURATION

■ TEST CIRCUIT

## APPLICATION NOTE

The NJM2210 is an integrated circuit of composing variable comb type filter which reduces noise mixed at chroma or luminance signal of VCR camera or others. Time delay element of comb type filter is fit to CCD delay element, not to glass delay line. The circuit is the most excellent FB with NULL system. Fig.1 is its basic block diagram and Fig.2 is actual block diagram of NJM2210.

Fig.3 is one of application examples.

This video noise reducer is composed of NJM2210, three capacitances for combination, one capacitance for signal bypass and CCD delay element. The NJM2210 is applicable to both of chroma and luminous signal with each fitted CCD delay element. The control terminal for switching reduce and enhance operates as enhance (increasing of high frequency part) with high level input and reduce (decreasing of high frequency part) with low level input. Its threshold level is about 2.25V at 5V supply voltage. Fig.4 is basic operating characteristics.

Fig.4 Basic Operating Characteristic

The comb type filter has special frequency characteristics like Fig.5 and is widely used to separate luminance and color signal in VCR circuit. The NJM2210 is automatic video signal noise reducer and signal enhancer. Fig.6 shows video signal wave form and its frequency component.

5

The NJM2210 operates automatically as noise reducer with low supply voltage to Pin 7 and signal enhancer with high voltage to Pin 7.

Fig.7 shows output characteristics when applied high or low voltage to Pin 7. This system is adding and subtracting form of signals and so the output characteristic distortion comb type filter comes from phase difference of each system. The NJM2210 phase difference is 2 degree at 4MHz. High dynamic range of video signal is realized by high supply voltage.

Fig.8 shows vertical and horizontal enhance on display. Vertical enhance is signal treatment within 1H of horizontal synchronous time. Horizontal enhance is signal treatment between each horizontal synchronous signal and Fig.9 shows this.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
