The OPV314YAT and OPV314YBT are identical electrically and optically and differ only in pin out. Refer to mechanical drawings for details. This product's combination of features including high speed, high output power and concentric beam makes it an ideal transmitter for integration into all types of data communications equipment.

Applications:

- Fiber channel
- Gigabit Ethernet
- ATM
- VSR (very short reach)
- Intra-system links applications
- Optical backplane interconnects
