

USB 2.0 Active Extension Repeater Cable (A M/F), 10M (33-ft.)

MODEL NUMBER: **U026-10M**

Description

Tripp Lite's 10-meter (33 ft.) USB 2.0 active extension cable is a bus powered extension cable that can be used to increase the length of a device cable without the worry of signal loss and potential performance problems.

USB limits a cable's length to 16ft. Any length above 16 feet requires the use of an active cable such as this one. This cable has a signal booster built in. The overall cable length can be extended up to 131ft by daisy chaining up to 4 of these active cables. The cable must be plugged directly into a USB port (either on the PC or a hub).

Use a standard 6' 10' or 15' USB A-B cable to reach the desired distance. The U026-10M provides up to 150mA of power to the connected device. If your device requires more than 150mA of power, it will either need to have its own power supply; or, to be plugged into a powered USB 2.0 hub (such as [U222-004-R](#)) that is connected to the U026-10M.
