

DATA SHEET

SKY13292-365LF: 0.25 - 2.15 GHz 4x2 Switch Matrix with Tone/Voltage Decoder

Applications

- DBS switching systems
- cable TV/modems

Features

- Broadband frequency range: 0.25 to 2.15 GHz
- Tone and voltage, or mode control switching
- High isolation: 40 dB typical @ 900 MHz
- Four RF inputs, two RF outputs
- Low current consumption: 8.5 mA typical @ 5 V
- Miniature QFN (20-pin, 4 x 4 mm) package (MSL1, 260 °C per JEDEC J-STD-020)

NEW

Skyworks offers lead (Pb)-free, RoHS (Restriction of Hazardous Substances) compliant packaging.

Figure 1. SKY13292-365LF Block Diagram

Description

The SKY13292-365LF is a four-input to two-output switch matrix intended for Direct Broadcast Satellite (DBS) switching and cable TV/modem applications. The SKY13292-365LF enables 16 states, directing any of the four inputs to either of the two outputs. Switch states are selected using tone and voltage signals together with logic levels applied to mode control inputs. The switch can operate over a temperature range of -40 °C to +85 °C.

The SKY13292-365LF is manufactured in a compact, 4 x 4 mm, 20-pin Quad Flat No-Lead (QFN) package.

A functional block diagram is shown in Figure 1. The pin configuration and package are shown in Figure 2. Signal pin assignments and functional pin descriptions are provided in Table 1.

Figure 2. SKY13292-365LF Pinout – 20-Pin QFN (Top View)

Table 1. SKY13292-365LF Signal Descriptions

Pin #	Name	Description	Signal Type	I/O	Pin #	Name	Description	Signal Type	I/O
1	OUT1	RF channel output #1, 250 to 2150 MHz	RF	O	11	I3	RF input #3, 250 to 2150 MHz	RF	I
2	T1	Tone detector input #1	AC	I	12	CT	No connection. This pin must be left open.	DC	–
3	V1	Voltage detector input #1	DC	I	13	V2	Voltage detector input #2	DC	I
4	CR	No connection. This pin must be left open.	DC	–	14	T2	Tone detector input #2	AC	I
5	I1	RF input #1, 250 to 2150 MHz	RF	I	15	OUT2	RF channel output #2, 250 to 2150 MHz	RF	O
6	GND	Ground	GND	–	16	N/C	No connection. This pin must be left open.	DC	–
7	I2	RF input #2, 250 to 2150 MHz	RF	I	17	B2	Mode control input #2	DC	I
8	GND	Ground	GND	–	18	B1	Mode control input #1	DC	I
9	I4	RF input #4, 250 to 2150 MHz	RF	I	19	P0	Mode control input #0		
10	GND	Ground	GND	–	20	VDD	Supply voltage, +5 V	DC	I

Technical Description

The SKY13292-365LF is controlled by a pair of DC voltage levels applied to V1 (pin 3) and V2 (pin 13) combined with 22 kHz signal levels applied to T1 (pin 2) and T2 (pin 14). These signals are supplied from a set top box, receiver, etc., that is controlled by the user.

The configuration of the switch, itself, is controlled by the logic levels applied to P0 (pin 19), B1 (pin 18), and B2 (pin 17).

A pair of SKY13292-365LF 4x2 switches can be used to form a 4x4 switch. Figure 3 shows a suggested implementation in which

one of the 4x2 switches is mounted on the top side of a printed circuit board, with the second 4x2 switch mounted on the back side of the printed circuit board.

The four RF input signals, which may come from a variety of sources but are shown here coming from four separate low-noise block converters, are split and routed directly to the inputs of the top-side switch and through vias to the inputs of the back-side switch.

Figure 3. Suggested Implementation of Two 4x2 Switches

With each of the configuration inputs (P0, B1, and B2) of the top-side switch held at 0 V, and each of the configuration inputs of the back-side switch held at 5 V, the same logic controls from each of the 4 receivers selects any specific input signal.

For example, if the user of receiver 1 wants to receive the signal from antenna 1, polarization 1, through low-noise block A, that receiver must send a 22 kHz tone and a control voltage greater than the threshold voltage to switch 1. If the user of receiver 3 also wants to receive the signal from antenna 1, polarization 1, through low-noise block A, that receiver must also send a 22 kHz tone and a control voltage greater than the threshold voltage to switch 2.

Other logic configurations are possible. Refer to the truth Tables in this Data Sheet.

Electrical and Mechanical Specifications

The absolute maximum ratings of the SKY13292-365LF are provided in Table 2. Electrical specifications are provided in Table 3.

Typical performance characteristics of the SKY13292-365LF are illustrated in Figures 4 through 9.

The state of the SKY13292-365LF is determined by the logic provided in Tables 4 through 13.

Table 2. SKY13292-365LF Absolute Maximum Ratings

Parameter	Symbol	Minimum	Typical	Maximum	Units
Supply voltage	V _{DD}			5.5	V
Mode select input voltage				5.5	V
Polarization input control voltage				21	V
RF input power	P _{IN}			+15	dBm
Storage temperature	T _{STG}	-65		+150	°C
Operating temperature	T _{OP}	-40		+85	°C

Note: Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

CAUTION: Although this device is designed to be as robust as possible, Electrostatic Discharge (ESD) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions should be used at all times.

Table 3. SKY13292-365LF Electrical Specifications (Note 1) (1 of 2)
(V_{DD} = 0 and 5 V, T_{OP} = +25 °C, Characteristic Impedance [Z₀] = 50 Ω, Unless Otherwise Noted)

Parameter	Symbol	Test Condition	Min	Typical	Max	Units
Tone frequency	T _{F1} , T _{F2}	V _{RF} = 100 mVp-p, with 10 nF external DC blocking capacitor	18	22	26	kHz
Tone threshold voltage (Note 2)	T _{T1} , T _{T2}	@ 22 kHz	100	170	350	mVp-p
RF Switch Specifications						
Insertion loss	IL	0.25 to 0.95 GHz		7.5	8.0	dB
		0.95 to 2.15 GHz		9.0	10.0	dB
Insertion loss flatness		0.25 to 0.95 GHz		0.7	1.0	dB
		0.95 to 2.15 GHz		2.0	3.0	dB
Isolation	Iso	Normalized to insertion loss				
		0.25 to 0.95 GHz	38	40		dB
		0.95 to 2.15 GHz	28	30		dB
Input return loss		0.25 to 0.95 GHz				
		I1, I2, I3, I4 OUT1, OUT2	10 8	15 10		dB dB
1 dB Input Compression Point	IP1dB	0.25 to 0.95 GHz		+15		dBm
Tone/Voltage Detector Specifications						
Polarization select input current	I _{PT1} , I _{PT2}	V _{P1} and V _{P2} = 21 V		200		μA
Polarization select threshold voltage	V _{TP1} , V _{TP2}		14.0	14.5	15.0	V
Polarization switching time	T _{SPOL}			0.9		μs
Tone frequency	T _{F1} , T _{F2}		7	22	650	kHz
Tone threshold voltage	T _{T1} , T _{T2}	@ 22 kHz without external capacitor	45	170	900	Vp-p
Tone input impedance	T _{ZIN1} , T _{ZIN2}	@ 22 kHz including external 10 nF series blocking capacitor		2		kΩ

Table 3. SKY13292-365LF Electrical Specifications (Note 1) (2 of 2)
($V_{DD} = 0$ and 5 V, $T_{OP} = +25$ °C, Characteristic Impedance [Z_0] = 50 Ω , Unless Otherwise Noted)

Parameter	Symbol	Test Condition	Min	Typical	Max	Units
Mode Control Specifications						
Control input current	I_{DIG}	$0\text{ V} \leq V_{CTRL} \leq V_{DD}$		1		μA
Control input low logic level	V_{LOW}		0		1	V
Control input high logic level	V_{HIGH}		$V_{DD} - 1$	V_{DD}	$V_{DD} + 0.5$	V
Power Supply						
Supply voltage	V_{DD}		4.0	5.0	5.5	V
Supply current	I_{DD}			8.5		mA

Note 1: Performance is guaranteed only under the conditions listed in this Table.

Note 2: The SKY13292-365LF detects 22 kHz signaling amplitudes across the full specified range of the DiSeqC bus functional specification.

Typical Performance Characteristics

($V_{DD} = 5$ V, $T_{OP} = +25$ °C, $P_{IN} = 0$ dBm, Characteristic Impedance [Z_0] = 50 Ω , Unless Otherwise Noted)

Evaluation Board Description

The SKY13292-365LF Evaluation Board is used to test the performance of the SKY13292-365LF 4x2 Switch Matrix. A recommended application schematic is provided in Figure 10. An assembly drawing for the Evaluation Board is shown in Figure 11.

Package Dimensions

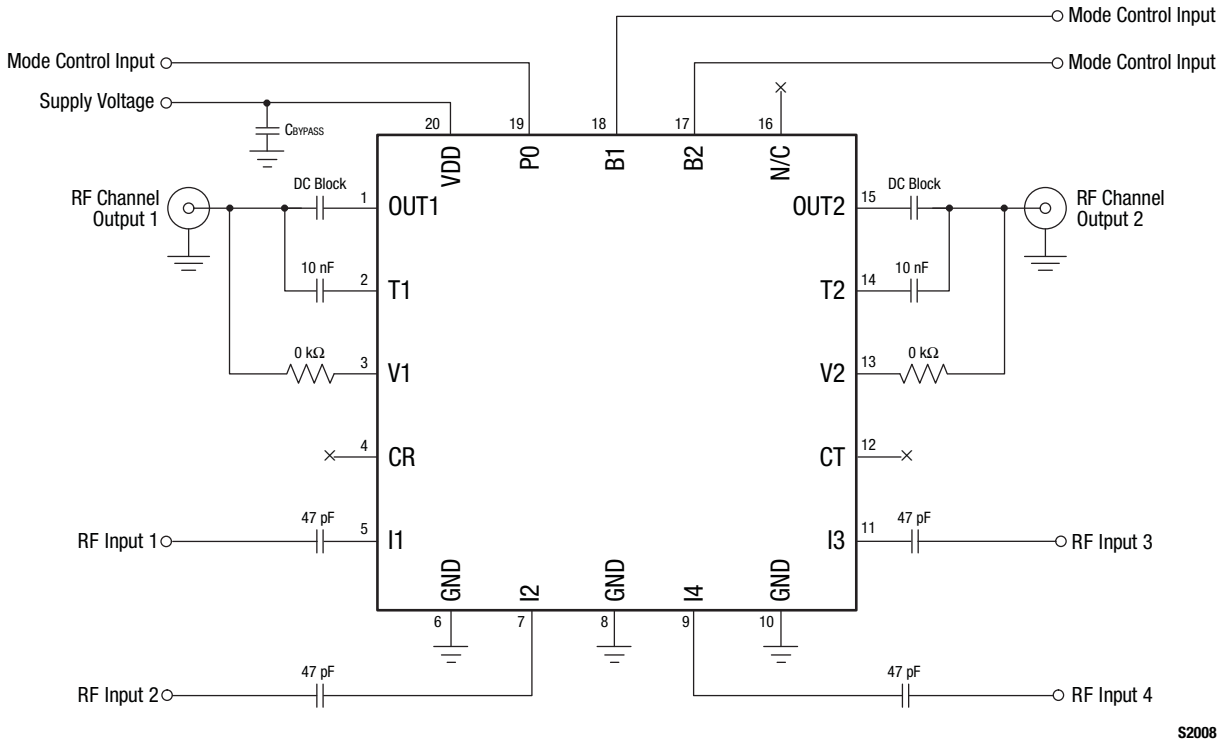

The PCB layout footprint for the SKY13292-365LF is provided in Figure 12. Typical case markings are shown in Figure 13. Package dimensions for the 20-pin QFN are shown in Figure 14, and tape and reel dimensions are provided in Figure 15.

Package and Handling Information

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

THE SKY13292-365LF is rated to Moisture Sensitivity Level 1 (MSL1) at 260 °C. It can be used for lead or lead-free soldering.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

Figure 12. SKY13292-365LF PCB Layout Footprint (Top View)

Figure 13. Typical Case Markings (Top View)

All measurements are in millimeters.
 Dimensioning and tolerancing according to ASME Y14.5M-1994.
 Coplanarity applies to the exposed heat sink slug as well as the terminals.
 Dimension applies to metalized terminal and is measured between 0.15 mm and 0.30 mm from terminal tip.

Notes:

1. Carrier tape material: black conductive polystyrene, non-bakeable
2. Cover tape material: transparent conductive HSA
3. Cover tape size: 9.2 mm width
4. All measurements are in millimeters

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
