

Description

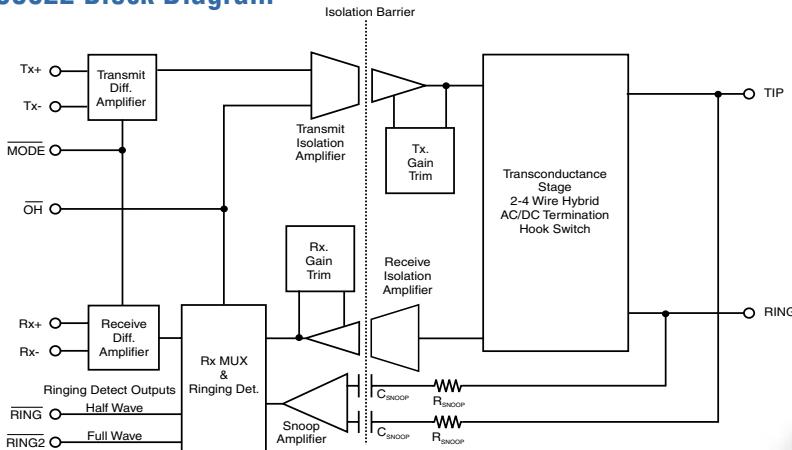

LITELINK™ III is a single-package silicon phone line interface (PLI)/ Data Access Arrangement (DAA) used in voice and data communication applications to make connections between host equipment and telephone networks.

The CPC5622 is the latest LITELINK III PLI device that features simultaneous phone line ringing detect and Caller-ID (CID) monitoring. This eliminates additional discrete components thereby simplifying the DAA design particularly for international telephony applications where CID occurs before ringing. In addition, the CPC5622 offers both half-wave and full-wave ringing detect outputs to support most codec, DSP and modem devices.

LITELINK provides a high-voltage isolation barrier, AC and DC phone line termination, switch hook, 2-wire to 4-wire hybrid, ringing detection, and on-hook signal detection.

LITELINK can be used in both differential and single-ended signal applications. LITELINK uses on-chip optical components and external resistors to form a complete voice or high-speed data phone line interface. LITELINK eliminates the need for the large isolation transformers or capacitors used in other interface configurations and incorporates the required high-voltage isolation barrier in the surface-mount SOIC package.

CPC5622 Block Diagram

Features

- Concurrent ringing detection and Caller-ID monitoring for worldwide applications
- Half-wave and full-wave ringing detection are provided on the CPC5622
- New 3kV_{rms} internal isolation voltage barrier
- Superior voice solution with low noise, excellent part-to-part gain accuracy
- Very low 8mA line-side current draw
- Transmit power of up to +6 dBm into 600Ω
- Data access arrangement (DAA) solution for modems with speeds up to V.92
- 3.3 or 5V power supply operation
- Caller-ID signal reception function
- Easy interface with modem ICs and voice CODECs
- Programmable AC termination impedance for global applications with select voice codec partners
- Worldwide dial-up telephone network compatibility
- CPC5622 can be used in circuits that comply with the requirements of TIA/EIA/IS-968 (FCC part 68), UL1950, UL60950, EN60950, IEC60950, EN55022B, CISPR22B, EN55024, and TBR-21
- Line-side circuit powered from telephone line
- Compared to other silicon DAA solutions, LITELINK:
 - Uses fewer passive components
 - Takes up less printed-circuit board space
 - Uses less telephone line power
 - Offers simplified operation
 - Is a single IC-solution

Applications

- Computer telephony and gateways, such as VoIP
- PBXs
- Satellite and cable set-top boxes
- V.92 (and other standard) modems
- Fax machines
- Voicemail systems

LITELINK III Evaluation Board and Reference Design

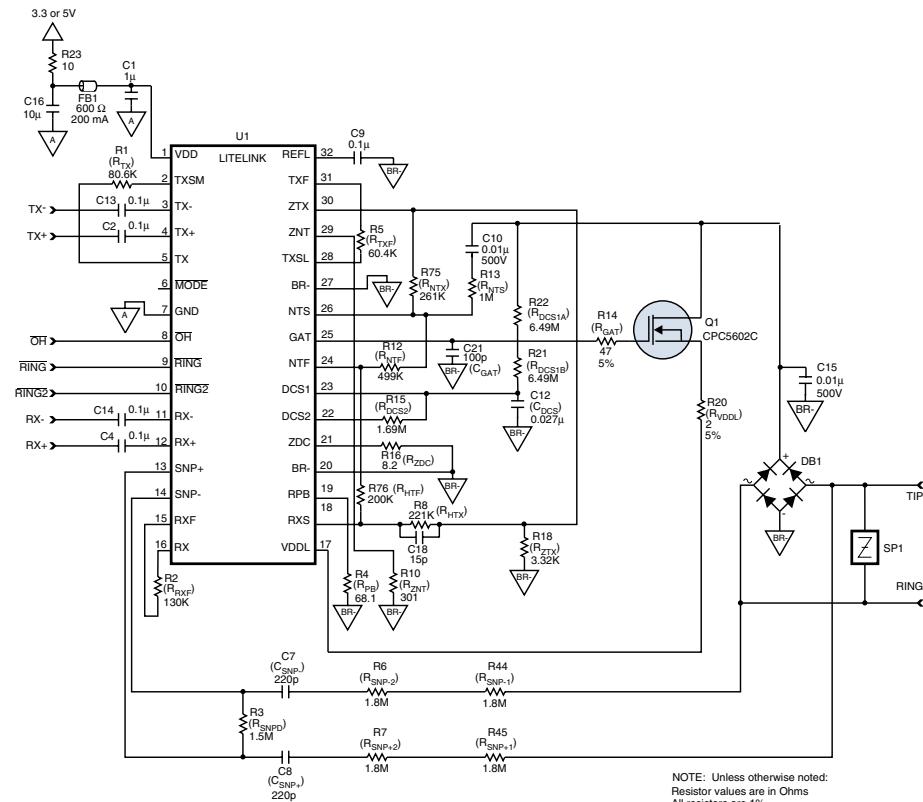

Clare provides a complete telephone line interface/DAA with LITELINK III. The LITELINK III family of products includes:

- CPC5602 FET optimized for use with LITELINK III
- CPC5601 programmable driver for setting multiple AC and DC terminations with one circuit
- Complete reference designs including modem and FXO

Visit the Clare web site for more information on the complete LITELINK III solution, including application notes covering:

- Loop current detection with LITELINK
- Customizing Caller-ID signal gain and ringing signal detection threshold
- Enhanced pulse dialing with LITELINK
- Design layout guidelines to help meet regulatory requirements
- Increased LITELINK transmit power
- Ground start supervision circuit
- Updating current LITELINK II designs to LITELINK III
- Understanding LITELINK Display Feature Signal Routing and Applications

LITELINK III Resistive Termination Reference Design Schematic

NOTE: Unless otherwise noted:
Resistor values are in Ohms
All resistors are 1%.
Capacitor values are in Farads.

Ordering Information

Part #	Description
CPC5622A	32-pin PLI, tubed
CPC5622ATR	32-pin PLI, tape and reel

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помошь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помошь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
