

HLMP-HG70/71, HLMP-HL70/71

5 mm Standard Oval Red and Amber LEDs

Data Sheet

Description

These Precision Optical Performance Oval LEDs are specifically designed for full color/video and passenger information signs. The oval shaped radiation pattern and high luminous intensity ensure that these devices are excellent for wide field of view outdoor applications where a wide viewing angle and readability in sunlight are essential. The package epoxy contains UV inhibitors to reduce the effects of long term exposure to direct sunlight.

Applications

- Gas Price Signs
- Mono Color Signs – Marquee

Features

- Well defined spatial radiation pattern
- High brightness material
- Available in Red and Amber
 - Red AlInGaP 626 nm
 - Amber AlInGaP 590 nm
- Superior resistance to moisture
- Standoff and non-standoff Package
- Tinted and diffused
- Typical viewing angle 40° x100°

Package Dimensions

A

B

Notes:

All dimensions in millimeters (inches).

Tolerance is ± 0.20 mm unless other specified

Device Selection Guide

Part Number	Color and Dominant Wavelength λ_d (nm) Typ ^[3]	Luminous Intensity I _v (mcd) at 20 mA ^[1,2,5]		Standoff	Package Drawing	Typical Viewing angle (°) ^[4]
		Min	Max			
HLMP-HG70-VX0DD	Red 626	1150	1990	No	A	40 x 100
HLMP-HG71-VX0DD	Red 626	1150	1990	Yes	B	
HLMP-HL70-WY0DD	Amber 590	1380	2400	No	A	
HLMP-HL71-WY0DD	Amber 590	1380	2400	Yes	B	

Notes:

1. The luminous intensity is measured on the mechanical axis of the lamp package and it is tested with pulsing condition.
2. The optical axis is closely aligned with the package mechanical axis.
3. Dominant wavelength, λ_d , is derived from the CIE Chromaticity Diagram and represents the color of the lamp.
4. $\theta_{1/2}$ is the off-axis angle where the luminous intensity is half the on-axis intensity.
5. Tolerance for each bin limit is $\pm 15\%$

Part Numbering System

HLMP – H x xx – x x x xx

Absolute Maximum Ratings ($T_J = 25^\circ\text{C}$)

Parameter	Red/ Amber	Unit
DC Forward Current ^[1]	50	mA
Peak Forward Current	100 ^[2]	mA
Power Dissipation	120	mW
LED Junction Temperature	130	°C
Operating Temperature Range	-40 to +100	°C
Storage Temperature Range	-40 to +100	°C

Notes:

1. Derate linearly as shown in Figure 4.
2. Duty Factor 30%, frequency 1 kHz.

Electrical / Optical Characteristics ($T_J = 25^\circ\text{C}$)

Parameter	Symbol	Min.	Typ.	Max.	Units	Test Conditions
Forward Voltage Red & Amber	V_F	1.8	2.1	2.4	V	$I_F = 20\text{ mA}$
Reverse Voltage ^[3] Red & Amber	V_R	5			V	$I_R = 100\text{ }\mu\text{A}$
Dominant Wavelength ^[1] Red Amber	λ_d	618.0 584.5	626.0 590.0	630.0 594.5	nm	$I_F = 20\text{ mA}$
Peak Wavelength Red Amber	λ_{PEAK}		634 594		nm	Peak of Wavelength of Spectral Distribution at $I_F = 20\text{ mA}$
Thermal resistance	$R\theta_{J-PIN}$		240		°C/W	LED Junction-to pin
Luminous Efficacy ^[2] Red Amber	η_v		190 490		lm/W	Emitted Luminous Power/ Emitted Radiant Power
Thermal coefficient of λ_d Red Amber			0.05 0.09		nm/°C	$I_F = 20\text{ mA};$ $+25^\circ\text{C} \leq T_J \leq +100^\circ\text{C}$

Notes:

1. The dominant wavelength is derived from the Chromaticity Diagram and represents the color of the lamp.
2. The radiant intensity, I_e in watts per steradian, maybe found from the equation $I_e = I_v / \eta_v$ where I_v is the luminous intensity in candela and η_v is the luminous efficacy in lumens/ watt.
3. Indicates product final testing condition, long term reverse bias is not recommended.

Intensity Bin Limit Table (1.2 : 1 Iv Bin Ratio)

Bin	Intensity (mcd) at 20 mA	
	Min	Max
V	1150	1380
W	1380	1660
X	1660	1990
Y	1990	2400

Tolerance for each bin limit is $\pm 15\%$

V_F Bin Table (V at 20 mA)

Bin ID	Min	Max
VD	1.8	2.0
VA	2.0	2.2
VB	2.2	2.4

Notes:

1. Tolerance for each bin limit is ± 0.05 V.
2. V_F binning only applicable to Red and Amber color.

Red Color Range

Min Dom	Max Dom	Chromaticity Coordinate			
618.0	630.0	x	0.6872	0.3126	0.6890 0.2943
		y	0.6690	0.3149	0.7080 0.2920

Tolerance for each bin limit is ± 0.5 nm

Amber Color Range

Bin	Min Dom	Max Dom	Chromaticity Coordinate			
1	584.5	587.0	x	0.5420	0.4580	0.5530 0.4400
			y	0.5370	0.4550	0.5570 0.4420
2	587.0	589.5	x	0.5570	0.4420	0.5670 0.4250
			y	0.5530	0.4400	0.5720 0.4270
4	589.5	592.0	x	0.5720	0.4270	0.5820 0.4110
			y	0.5670	0.4250	0.5870 0.4130
6	592.0	594.5	x	0.5870	0.4130	0.5950 0.3980
			y	0.5820	0.4110	0.6000 0.3990

Tolerance for each bin limit is ± 0.5 nm

Note:

1. All bin categories are established for classification of products. Products may not be available in all bin categories. Please contact your Avago representative for further information.

Avago Color Bin on CIE 1931 Chromaticity Diagram

Precautions:

Lead Forming:

- The leads of an LED lamp may be preformed or cut to length prior to insertion and soldering on PC board.
- For better control, it is recommended to use proper tool to precisely form and cut the leads to applicable length rather than doing it manually.
- If manual lead cutting is necessary, cut the leads after the soldering process. The solder connection forms a mechanical ground which prevents mechanical stress due to lead cutting from traveling into LED package. This is highly recommended for hand solder operation, as the excess lead length also acts as small heat sink.

Soldering and Handling:

- Care must be taken during PCB assembly and soldering process to prevent damage to the LED component.
- LED component may be effectively hand soldered to PCB. However, it is only recommended under unavoidable circumstances such as rework. The closest manual soldering distance of the soldering heat source (soldering iron's tip) to the body is 1.59mm. Soldering the LED using soldering iron tip closer than 1.59mm might damage the LED.

- ESD precaution must be properly applied on the soldering station and personnel to prevent ESD damage to the LED component that is ESD sensitive. Do refer to Avago application note AN 1142 for details. The soldering iron used should have grounded tip to ensure electrostatic charge is properly grounded.
- Recommended soldering condition:

	Wave Soldering [1, 2]	Manual Solder Dipping
Pre-heat temperature	105 °C Max.	-
Preheat time	60 sec Max	-
Peak temperature	260 °C Max.	260 °C Max.
Dwell time	5 sec Max.	5 sec Max

Note:

- 1) Above conditions refers to measurement with thermocouple mounted at the bottom of PCB.
 - 2) It is recommended to use only bottom preheaters in order to reduce thermal stress experienced by LED.
- Wave soldering parameters must be set and maintained according to the recommended temperature and dwell time. Customer is advised to perform daily check on the soldering profile to ensure that it is always conforming to recommended soldering conditions.

Note:

1. PCB with different size and design (component density) will have different heat mass (heat capacity). This might cause a change in temperature experienced by the board if same wave soldering setting is used. So, it is recommended to re-calibrate the soldering profile again before loading a new type of PCB.
2. Avago Technologies' high brightness LED are using high efficiency LED die with single wire bond as shown below. Customer is advised to take extra precaution during wave soldering to ensure that the maximum wave temperature does not exceed 260°C and the solder contact time does not exceeding 5sec. Over-stressing the LED during soldering process might cause premature failure to the LED due to delamination.

Avago Technologies LED Configuration

Note: Electrical connection between bottom surface of LED die and the lead frame is achieved through conductive paste.

- Any alignment fixture that is being applied during wave soldering should be loosely fitted and should not apply weight or force on LED. Non metal material is recommended as it will absorb less heat during wave soldering process.

Note: In order to further assist customer in designing jig accurately that fit Avago Technologies' product, 3D model of the product is available upon request.

- At elevated temperature, LED is more susceptible to mechanical stress. Therefore, PCB must allowed to cool down to room temperature prior to handling, which includes removal of alignment fixture or pallet.
- If PCB board contains both through hole (TH) LED and other surface mount components, it is recommended that surface mount components be soldered on the top side of the PCB. If surface mount need to be on the bottom side, these components should be soldered using reflow soldering prior to insertion the TH LED.
- Recommended PC board plated through holes (PTH) size for LED component leads.

LED component lead size	Diagonal	Plated through hole diameter
0.45 x 0.45 mm (0.018x 0.018 inch)	0.636 mm (0.025 inch)	0.98 to 1.08 mm (0.039 to 0.043 inch)
0.50 x 0.50 mm (0.020x 0.020 inch)	0.707 mm (0.028 inch)	1.05 to 1.15 mm (0.041 to 0.045 inch)

- Over-sizing the PTH can lead to twisted LED after clinching. On the other hand under sizing the PTH can cause difficulty inserting the TH LED.

Example of Wave Soldering Temperature Profile for TH LED

Recommended solder:
Sn63 (Leaded solder alloy)
SAC305 (Lead free solder alloy)

Flux: Rosin flux

Solder bath temperature: 255°C ± 5°C
(maximum peak temperature = 260°C)

Dwell time: 3.0 sec - 5.0 sec
(maximum = 5sec)

Note: Allow for board to be sufficiently cooled to room temperature before exerting mechanical force.

Ammo Packs Drawing

Note: All dimensions in millimeters (inches)

Packaging Box for Ammo Packs

Note: The dimension for ammo pack is applicable for the device with standoff and without standoff.

Packaging Label:

(i) Avago Mother Label: (Available on packaging box of ammo pack and shipping box)

Avago TECHNOLOGIES STANDARD LABEL LS0002 RoHS Compliant e3 max temp 260C	
(1P) Item: Part Number	(Q) QTY: Quantity
(1T) Lot: Lot Number	CAT: Intensity Bin
LPN:	BIN: Refer to below information
(9D)MFG Date: Manufacturing Date	
(P) Customer Item:	
(V) Vendor ID:	(9D) Date Code: Date Code

Customer P/N: 		CAT: Intensity Bin 	
Supplier Code: 		BIN: Refer to below information 	
		DATECODE: Date Code 	

Acronyms and Definition:

BIN:

- (i) Color bin only or VF bin only
(Applicable for part number with color bins but without VF bin OR part number with VF bins and no color bin)

OR

- (ii) Color bin incorporated with VF Bin
(Applicable for part number that have both color bin and VF bin)

Example:

- (i) Color bin only or VF bin only
BIN: 2 (represent color bin 2 only)
BIN: VB (represent VF bin "VB" only)
- (ii) Color bin incorporate with VF Bin

DISCLAIMER: Avago's products and software are not specifically designed, manufactured or authorized for sale as parts, components or assemblies for the planning, construction, maintenance or direct operation of a nuclear facility or for use in medical devices or applications. Customer is solely responsible, and waives all rights to make claims against avago or its suppliers, for all loss, damage, expense or liability in connection with such use.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
