How to Use This Catalog

TO-220 Heat Sinks

7022 Channel style heat sink with folded back fins

Icons indicate that a mounting kit, grease or epoxy can be used with the heat sink

Semiconductor devices have been included in photos to assist in determining mounting position.

Detailed description illustrates the heat sink's differentiating features.

Thermal graphs show natural and forced convection based on black anodize finish. For information on how to use a thermal graph, please refer to page 11.

Mechanical drawing dimensions as shown are mm (inches)

Channel style heat sink with folded back fins for increased cooling surface area. Available with tin plated solderable tabs for easy attachment to the printed circuit card.

Ordering information will specify the base heat sink with available accessories.

Material and finish information is shown for each part

Material: 1.27 (0.050) Thick Aluminum
Finish: See Table

ORDERING INFORMATION

| Part Number | Description | Finish | Dia of PCB Plated Thru Hole for Tabs |
|-------------|-----------------------------------------|--------------------|--------------------------------------|
| 7022BG | Channel heat sink with folded back fins | Black anodize | |
| 7022PBG | Channel heat sink with folded back fins | Pre-black anodize* | |
| 7022B-MTG | With solderable tabs | Black anodize | 2.90 (0.114) |
| 7022PB-MTG | With solderable tabs | Pre-black anodize* | 2.90 (0.114) |

* Edges cut during the manufacturing process will be unfinished. See page XX for more information

POPULAR OPTIONS: 7022B- G
 Base part no. A RoHS Compliant

Aavid has a large selection of popular options to enhance your heat sink selection. This section will indicate the most popular options available.

| Position | Code | Description | Location | Details |
|----------|---------|---------------------------------------------------------------|----------|---------|
| A | TC11-MT | Insulated device mounting clip for TO-220 and solderable tabs | Hole X | Page |

For additional options see page xx

Detailed indexes are available to select additional options.

KEY

- H = Horizontal mount
- V = Vertical mount
- H-V = Either horizontal or vertical depending on device leads
- θ_n = Natural convection thermal resistance based on a 75°C heat sink temperature rise

How to select a heat sink

The basic equation for heat transfer or power dissipation may be stated as follows:

$$P_D = \frac{\Delta T}{\Sigma R_{\theta}}$$

Where:

P_D = the power dissipated by the semiconductor device in watts.

ΔT = the temperature difference of driving potential which causes the flow of heat.

ΣR_{θ} = the sum of the thermal resistances of the heat flow path across which ΔT exists.

The above relationship may be stated in the following forms:

$$P_D = \frac{T_J - T_A}{R_{\theta JC} + R_{\theta CS} + R_{\theta SA}} \quad P_D = \frac{T_C - T_A}{R_{\theta CS} + R_{\theta SA}} \quad P_D = \frac{T_S - T_A}{R_{\theta SA}}$$

Where:

T_J = the junction temperature in °C (maximum is usually stated by the manufacturer of the semiconductor device).

T_C = case temperature of the semiconductor device in °C.

T_S = temperature of the heat sink mounting surface in thermal contact with the semiconductor device in °C.

T_A = ambient air temperature in °C.

$R_{\theta JC}$ = thermal resistance from junction to case of the semiconductor device in °C per watt (usually stated by manufacturer of semiconductor device).

$R_{\theta CS}$ = thermal resistance through the interface between the semiconductor device and the surface on which it is mounted in °C per watt.

$R_{\theta SA}$ = thermal resistance from mounting surface to ambient or thermal resistance of heat sink in °C per watt.

The above equations are generally used to determine the required thermal resistance of the heat sink ($R_{\theta SA}$), since the heat dissipation, maximum junction and/or case temperature, and ambient temperature are known or set.

Figure 1 indicates the location of the various heat paths, temperatures and thermal resistances.

The common practice is to represent the system with a network of resistances in series as shown in Figure 2.

FIGURE 1

FIGURE 2

How To Select a Heat Sink

Example A

Find a space saving heat sink to keep a TO-220 device below the maximum 150°C junction temperature in natural convection. Device will be screw mounted with an electrically conductive interface.

Given:

$$P_D = 6 \text{ watts}$$

$$R_{\theta JC} = 3^\circ\text{C/W (from semiconductor manufacturer)}$$

$$T_J \text{ max} = 150^\circ\text{C (from semiconductor manufacturer)}$$

$$T_A \text{ max} = 65^\circ\text{C}$$

A Kondux™ pad is a good choice for electrically conductive applications. Thermal resistance for Kondux™ can be determined from the following graph.

At 2 in-lb of torque the thermal resistance is approximately $R_{\theta CS} = 0.5^\circ\text{C/W}$

Using equation 1, solve for $R_{\theta SA}$

$$R_{\theta SA} = \frac{150 - 65}{6} - (3 + 0.5) = 10.7^\circ\text{C/W}$$

The Index by Heat Sink Style on page 8 lists space saving heat sinks. Several models are in the 10 °C/W range. Choose the one that best fits the application and verify thermal resistance from graph.

Part number 593202B03500G shows a 60 °C temperature rise at 6 watts.

$$R_{\theta SA} = \frac{60}{6} = 10.0^\circ\text{C/W}$$

Which meets the above requirement in natural convection.

Example B

Find a heat sink to keep a TO-220 device below the maximum 150 °C junction temperature in forced convection at 400 ft/min. Device must be electrically insulated and mounted with a labor saving clip.

Given:

$$P_D = 12 \text{ watts}$$

$$R_{\theta JC} = 2.5^\circ\text{C/W (from semiconductor manufacturer)}$$

$$T_J \text{ max} = 140^\circ\text{C (from semiconductor manufacturer)}$$

$$T_A \text{ max} = 50^\circ\text{C}$$

A Hi-Flow® pad works great with clip mounting and provides the necessary electrical insulation. Thermal resistance for Hi-Flow® at low pressure is 1.15°C/W (from page 87). Using equation 1, solve for $R_{\theta SA}$

$$R_{\theta SA} = \frac{140 - 50}{12} - (2.5 + 1.15) = 3.85^\circ\text{C/W}$$

Many styles are available. If board space is a concern, 533202B02551G (pg 55) meets the requirements.

According to the above graph, an airflow of 400 ft/min results in a thermal resistance of 3°C/W. This is less than the required thermal resistance of 3.85°C/W and is therefore acceptable under these airflow conditions.

If height is a concern, 533702B02552G would meet the requirements and is only 1.0" tall

Hi-Flow® is a trademark of the Bergquist Company

The performance graphs you will see in this catalog (see graph 579802) are actually a composite of two separate graphs which have been combined to save space. The small arrows on each curve indicate to which axis the curve corresponds. Thermal graphs are published assuming the device to be cooled is properly mounted and the heat sink is in its recommended mounting position.

GRAPH A

GRAPH A is used to show heat sink performance when used in a natural convection environment (i.e. without forced air). This graph starts in the lower left hand corner with the horizontal axis representing the heat dissipation (watts) and the vertical left hand axis representing the rise in heat sink mounting surface temperature above ambient (°C). By knowing the power to be dissipated, the temperature rise of the mounting surface can be predicted. Thermal resistance in natural convection is determined by dividing this temperature rise by the power input (°C/W).

EXAMPLE A: Aavid part number 579802 is to be used to dissipate 3 watts of power in natural convection. Because we are dealing with natural convection, we refer to graph "A". Knowing that 3 watts are to be dissipated, follow the grid line to the curve and find that at 3 watts there is a temperature rise of 75°C. To get the thermal resistance, divide the temperature rise by the power dissipated, which yields 25°C/W.

579802

GRAPH B

GRAPH B is used to show heat sink performance when used in a forced convection environment (i.e. with forced air flow through the heat sink). This graph has its origin in the top right hand corner with the horizontal axis representing air velocity over the heat sink LFM* and the vertical axis representing the thermal resistance of the heat sink (°C/W). Air velocity is calculated by dividing the output volumetric flow rate of the fan by the cross-sectional area of the outflow air passage.

$$\text{Velocity (LFM)}^* = \frac{\text{Volume (CFM)}^{**}}{\text{area (ft}^2\text{)}}$$

EXAMPLE B: For the same application we add a fan which blows air over the heat sink at a velocity of 400 LFM. The addition of a fan indicates the use of forced convection and therefore we refer to graph "B". This resistance of 9.50°C/W is then multiplied by the power to be dissipated, 3 watts. This yields a temperature rise of 28.5°C.

CONVERTING VOLUME TO VELOCITY

Although most fans are normally rated and compared at their free air delivery at zero back pressure, this is rarely the case in most applications. For accuracy, the volume of output must be derated 60%–80% for the anticipation of back pressure.

EXAMPLE: The output air volume of a fan is given as 80 CFM. The output area is 6 inches by 6 inches or 36 in² or 25 ft². To find velocity:

$$\text{Velocity (LFM)} = \frac{\text{Volume (CFM)}}{\text{area (ft}^2\text{)}}$$

$$\text{Velocity} = \frac{80}{0.25} = 320$$

Velocity is 320 LFM, which at 80%, derates to 256 LFM.

DESIGN ASSISTANCE

Aavid can assist in the design of heat sinks for both forced and natural convection applications. Contact us for help with your next thermal challenge. For more information, visit our web site at: www.shopaavid.com

* Linear feet per minute

** Cubic feet per minute

Solder anchor attachment

Aavid's unique Solder anchor attachment method uses two or four small Solder anchors attached to the circuit card and a wire spring clip to securely fasten the heat sink to the device. This method is rugged, compact and allows for easy removal in case of rework.

All products include a phase change pad suitable for most IC package styles to optimize thermal performance. Models are available with a single or dual spring clips for additional thermal interface pressure. Solder anchors are ordered separately.

Push pin attachment

Push pin heat sinks require two 3.10mm holes in the circuit card to quickly attach the heat sink over the device. The one piece design makes assembly a snap. Pressure is maintained by the tension of the push pin coil springs to ensure even pressure across the device. Push pins provide a greater margin of reliability in applications where gravity or vibration may cause tapes or adhesives to fail. The addition of a phase change pad optimizes thermal performance.

BGA-Tape Attachment

Heat sinks for plastic BGA packages

Pressure sensitive, thermally conductive adhesive tape easily and reliably bonds a heat sink to an integrated circuit package. Tapes provide high thermal conductivity and exceptional bonding properties. Adhesives are formulated for plastic and metal/ceramic packages.

Material: Aluminum

1. For tape specifications see page 88
2. Natural convection thermal resistance based on a 75° C heat sink temperature rise.
3. Forced convection thermal resistance based on an entering 1.0 m/s (200LFM) airflow.

BGA-Clip Attachment

Clip attachment

Aavid's BGS Clip heat sinks provide a mechanical attachment alternative to tape applications where it is desirable to attach the heat sink directly to the device. The unique clip uses spring pressure to ensure even contact across the device while the end plates firmly engage the edge of the package, locking the heat sink in place. Each heat sink uses pre-applied thermal grease for optimum thermal performance.

Material: Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| IC Pkg. Size (mm) | Part Number | "W" (mm) | "L" (mm) | "H" (mm) | IC Pkg. Style | θ_{n1} | θ_{f2} | Interface | Clip |

For more information on Thermalcote™ see page 113.

Bi Directional

Designed for applications with airflow traveling in a single direction, these heat sinks are suitable for a variety of standard square IC packages. Models are available with pre-applied thermal tape for easy attachment to the IC. Epoxy attach models are also available.

Material: Aluminum

4. Forced convection thermal resistance based on an entering 1.0 m/s (200LFM) airflow.

5801 Slide on heat sink with staggered fins

Slide on heat sink with staggered fins attaches to 8 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces. Available in two finishes.

Material: 0.63 (0.025) Thick Aluminum
Finish: See Table

ORDERING INFORMATION

| Part Number | Finish |
|---------------|-----------------------------------------------|
| 580100B00000G | Black anodize |
| 580100W00000G | Black anodize with black paint on bottom side |

5010 Angle fin heat sink

Angle fin heat sink is a simple low cost solution for cooling DIP devices. Suitable for 14 and 16 pin packages and available in two finish options. Easily attaches using thermal epoxy.

Material: 1.27 (0.050) Thick Aluminum
Finish: See Table

ORDERING INFORMATION

| Part Number | Finish |
|---------------|--------------------|
| 501000J00000G | Pre black anodize* |
| 501000B00000G | Black anodize |

* Edges cut during the manufacturing process will be unfinished. See page 110 for more information.

5602, 5802 Slide on heat sink with angled fins

Slide on heat sink with angled fins attaches to 14 and 16 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces. Available in two finishes.

Material: 0.63 (0.025) Thick Aluminum
Finish: See Table

ORDERING INFORMATION

| Part Number | Device Pkg Style | Finish | "A" Dim |
|---------------|------------------|-----------------------------------------------|--------------|
| 560200B00000G | Ceramic | Black anodize | 7.87 (0.310) |
| 560200W00000G | Ceramic | Black anodize with black paint on bottom side | 7.87 (0.310) |
| 580200B00000G | Plastic | Black anodize | 6.35 (0.250) |
| 580200W00000G | Plastic | Black anodize with black paint on bottom side | 6.35 (0.250) |

5806 Slide on heat sink with staggered fins

Slide on heat sink with staggered fins attaches to 28 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces.

Material: 0.81 (0.032) Thick Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description |
|---------------|----------------------------------------|
| 580600B00000G | Slide on heat sink with staggered fins |

5803 Slide on heat sink with staggered fins

Slide on heat sink with staggered fins attaches to 18 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces.

Material: 0.63 (0.025) Thick Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description |
|---------------|----------------------------------------|
| 580300B00000G | Slide on heat sink with staggered fins |

5804 Slide on heat sink with staggered fins

Slide on heat sink with staggered fins attaches to 20 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces.

Material: 0.63 (0.025) Thick Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description |
|---------------|----------------------------------------|
| 580400B00000G | Slide on heat sink with staggered fins |

5805 Slide on heat sink with staggered fins

Slide on heat sink with staggered fins attaches to 24 pin DIP packages quickly and easily. The heat sink features double spring action and locking catch to firmly attach the device creating a thermal conduction path on both the top and bottom surfaces.

Material: 0.81 (0.032) Thick Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description |
|---------------|----------------------------------------|
| 580500B00000G | Slide on heat sink with staggered fins |

5085, 5086, 5087 Extruded epoxy attach on heat sink with straight fins

Extruded epoxy attach on heat sink with straight fins attaches to 24, 28, and 40 pin DIP packages quickly and easily. May be added before or after final board assembly. No additional board space is required.

Material: Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | DIP Package | "A" Dim |
|---------------|-------------|---------------|
| 508500B00000G | 24 pin | 31.75 (1.250) |
| 508600B00000G | 28 pin | 36.83 (1.450) |
| 508700B00000G | 40 pin | 50.80 (2.000) |

For epoxy information see pages 114-115.

6284 Extruded epoxy attach heat sink

Extruded epoxy attach heat sink which requires no additional board space is suitable for narrow DIP packages. May be added before or after final board assembly. No additional board space is required. Attaches to 28 pin DIP.

Material: Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description |
|-------------|------------------------------------------------|
| 6284BG | Extruded epoxy attach heat sink for 28 pin DIP |

For epoxy information see pages 114-115.

5011, 5012 Extruded epoxy attach heat sink with straight fins

Material: Aluminum
Finish: Black Anodize

Extruded epoxy attach heat sink with straight fins attaches to 14 and 16 pin DIP packages quickly and easily. May be added before or after final board assembly. No additional board space is required. Available in two fin directions.

ORDERING INFORMATION

| Part Number | Description | Figure |
|---------------|----------------------------------------------------|--------|
| 501100B00000G | Extruded epoxy attach heat sink with straight fins | A |
| 501200B00000G | Extruded epoxy attach heat sink with straight fins | B |

For epoxy information see pages 114-115.

5731 Surface mount heat sink for D-PAK (TO-252) package semiconductors

Surface mount heat sink for D-PAK (TO-252) package semiconductors remove the heat indirectly without contacting the device like traditional through hole heat sinks. The device and the heat sink are soldered directly to a modified drain pad creating a thermal transfer path from package tab to the heat sink.

Material: 0.63 (0.025) Thick Copper
Finish: Tin Plated

Refer to Figure A and B on page 26 for board footprint information

ORDERING INFORMATION

| Part Number | Packaging |
|---------------|------------------------|
| 573100D00010G | 13" Reel, 250 per reel |
| 573100D00000G | Bulk, 500 per bag |

See page 25 for tape and reel information

5733 Surface mount heat sink for D² PAK (TO-263) package semiconductors

Surface mount heat sink for D² PAK (TO-263) package semiconductors remove the heat indirectly without contacting the device like traditional through hole heat sinks. The device and the heat sink are soldered directly to a modified drain pad creating a thermal transfer path from package tab to the heat sink.

Material: 0.63 (0.025) Thick Copper
Finish: Tin Plated

Refer to Figure A and B on page 26 for board footprint information

ORDERING INFORMATION

| Part Number | Packaging |
|---------------|------------------------|
| 573300D00010G | 13" Reel, 250 per reel |
| 573300D00000G | Bulk, 500 per bag |

See page 25 for tape and reel information

7106 Surface mount heat sink for D² PAK (TO-263), power SO-10 (MO-184) and SO-10 package semiconductors

Surface mount heat sink for D² PAK (TO-263), power SO-10 (MO-184) and SO-10 package semiconductors remove the heat indirectly without contacting the device like traditional through hole heat sinks. The device and the heat sink are soldered directly to a modified drain pad creating a thermal transfer path from package tab to the heat sink.

Material: 0.63 (0.025) Thick Copper
Finish: Tin Plated

Refer to Figure C on page 26 for board footprint information

ORDERING INFORMATION

| Part Number | Packaging |
|-------------|------------------------|
| 7106D/TRG | 13" Reel, 200 per reel |
| 7106DG | Bulk, 500 per bag |

See page 25 for tape and reel information

7109 Surface mount heat sink for D² PAK (TO-263) package semiconductors

Surface mount heat sink for D² PAK (TO-263) package semiconductors remove the heat indirectly without contacting the device like traditional through hole heat sinks. The device and the heat sink are soldered directly to a modified drain pad creating a thermal transfer path from package tab to the heat sink.

ORDERING INFORMATION

| Part Number | Packaging |
|-------------|------------------------|
| 7109D/TRG | 13" Reel, 125 per reel |
| 7109DG | Bulk, 500 per bag |

See below for tape and reel information

Refer to Figure D on page 26 for board footprint information

Material: 0.63 (0.025) Thick Copper
Finish: Tin Plated

5734 Surface mount heat sink for D³ PAK (TO-268) package semiconductors

Surface mount heat sink for D³ PAK (TO-268) package semiconductors remove the heat indirectly without contacting the device like traditional through hole heat sinks. The device and the heat sink are soldered directly to a modified drain pad creating a thermal transfer path from package tab to the heat sink.

ORDERING INFORMATION

page 99

Material: 1.27 (0.050) Thick Aluminum
Finish: Black Anodize

High performance channel style heat sink with folded back fins for greater cooling capacity in a minimum of space when mounted horizontally. Folded back fin design maximizes surface area without increasing the vertical space required by the heat sink.

ORDERING INFORMATION

| Part Number | Description |

TO-220 Heat Sinks

PF750, PF758 Slip on heat sink featuring integrated tabs

Slip on heat sink is tin plated and has integrated tabs for soldering to the PC board. Locating features provide simple device alignment and spring action holds the device for good thermal contact.

Material: 0.71 (0.028) Thick Aluminum
Finish: Tin Plate

ORDERING INFORMATION

| Part Number | Description | "A" Dim | "B" Dim |
|-------------|-----------------------------|--------------|-------------|
| PF750G | Slip on heat sink with tabs | 19.00(0.748) | 3.00(0.118) |
| PF758G | Slip on heat sink with tabs | 24.00(0.945) | 5.20(0.205) |

PF752 Slip on heat sink

Slip on heat sink has locating features for simple device alignment. Spring action holds the device for good thermal contact.

Material: 0.71 (0.028) Thick Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description |
|-------------|-------------------|
| PF752G | Slip on heat sink |

PF720, PF723 Slip on heat sink

Slip on heat sink has locating features for simple device alignment. Spring action holds the device for good thermal contact. Available with or without solderable mounting tabs

Material: 0.71 (0.028) Thick Aluminum
Finish: Pre-Black Paint*

ORDERING INFORMATION

| Part Number | Description |
|-------------|---------------------------------------|
| PF720G | Slip on heat sink, no solderable tabs |
| PF723G | With solderable tabs |

* Edges cut during manufacturing process will be unfinished

5744, 5745, 5746, 5749 Low cost, labor saving, slide on heat sink featuring spring action

Low cost, labor saving, slide on heat sink features spring action to firmly hold the device tab to the heat sink providing maximum metal to metal contact and good thermal conduction. Available with solderable tabs for horizontal or vertical mounting to the PC board.

Material: 0.63 (0.025) Thick Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description | Figure | "A" Dim | Dia of PCB Plated Thru Hole for Tabs |
|---------------|-------------------------------------------------|--------|---------------|--------------------------------------|
| 574402B00000G | Low cost slide on heat sink, no solderable tabs | A | 19.05 (0.750) | |

For additional options see page 82

5741 Low cost, labor saving, slide on heat sink featuring spring action

Low cost, labor saving, slide on heat sink features spring action to firmly hold the device tab to the heat sink providing maximum metal to metal contact and good thermal conduction. Includes a clearance hole in the top side to allow the use of optional hardware to attach device and heat sink to circuit board or other surface. Also available with solderable tabs for vertical mounting to the PC board.

Material: 0.63 (0.025) Thick Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description | Dia of PCB Plated Thru Hole for Tabs |

TO-220 Heat Sinks

5751, 5793, 5794 Snap down style heat sink featuring two side fins

Snap down style heat sink features two side fins that act as springs to hold the semiconductor firmly to the heat sink. Models include an integrated clip and device locking catch for more robust applications. Available for both standard and bevel edged TO-220 packages.

For additional options see page 83

TO-220 & TO-218 & TO-247 Heat Sinks

SW25, SW38, SW50, SW63

Extruded heat sink with unequal channel widths

Extruded heat sink with unequal channel widths front and back can accommodate a TO-220, TO-218, or TO-247 devices. Includes two solderable mounting pins which permit vertical mounting and eliminate stress on device leads. Available in three heights. Version without hole uses clip 5901 (sold separately) to attach device. See page 97 for clip information.

NOTE 1: This hole not present in SW25 model

Material: Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description | "A" Dim | Holes | Dia of PCB Plated Thru Hole for Pins |

| SW50-4G | With device mounting holes | 50.00 (1.968) | Yes | 3.00 (0.118) |
| SW63-2G | Extruded heat sink with unequal channel widths front and back | 63.00 (2.480) | No | 3.00 (0.118) |
| SW63-4G | With device mounting holes | 63.00 (2.480) | Yes | 3.00 (0.118) |

5297, 5298, 5299, 5300

Extruded heat sink with large radial fins

Extruded heat sink with large radial fins features equal channel widths on both sides for single or dual device mounting. Includes two solderable mounting pins which permit vertical mounting and eliminate stress on device leads. Available in four heights for TO-220, TO-218, and TO-247 devices.

Material: Aluminum
Finish: Black Anodize

5334, 5335, 5336, 5337 Extruded heat sink with large radial fins

Extruded heat sink with large radial fins and channel clip attach feature makes device attachment easy. Includes clip and two solderable mounting pins which permit vertical mounting and eliminate stress on device leads. Available in four heights for TO-220, TO-218, and TO-247 devices.

SEE NOTE 1

SEE NOTE 1

NOTE 1: Graph depicts single device models. Dual device models exhibit a 15% performance increase.

Material: Aluminum
Finish: Black Anodize

TO-220 & TO-218 & TO-247 Heat Sinks

BW38, BW50, BW63

Wide extruded heat sink with unequal channel

Wide extruded heat sink with unequal channel widths on front and back can accommodate a TO-220, TO-218, or TO-247 device. Includes two solderable mounting pins which permit vertical mounting and eliminate stress on device leads. Available in three heights. Versions without hole use clip 6801 (sold separately) to attach device. See page 97 for clip information.

Material: Aluminum
Finish: Black Anodize

ORDERING INFORMATION

SW25-6, SW38-6 Extruded heat sink with unequal channel widths

Extruded heat sink with unequal channel widths front and back can accommodate a TO-220 or TO-202 device. Includes two solderable mounting pins which permit vertical mounting and eliminate stress on device leads. Clip 5901 (sold separately) can be used to attach device. See page 97 for clip information.

NOTE 1: This hole not present in SW25 series

Material: Aluminum
Finish: Black Anodize

TO-220 & TO-218 & TO-247 & Multiwatt Heat Sinks

6396, 6398, 6399, 6400 High power extruded heat sink with large radial fins

High power extruded heat sink with large radial fins and solderable shoulder pins allows vertical mounting without stress on the device leads. Available with shoulder pins to provide fixed clearance between the bottom of the heat sink and the board. Available in four heights for TO-220, TO-218, TO-247 and multiwatt devices.

TO-218 Heat Sinks

5922 Plug in style heat sink

Plug in style heat sink requires no hardware to attach to the device. The four spring action clips apply even pressure eliminating gaps between the heat sink and device which rob thermal performance.

ORDERING INFORMATION

| Part Number | Description | Dia of PCB Plated Thru Hole for Tabs |

5740 Low cost slide on heat sink

Low cost slide on heat sink provides positive retention with an integral locking tab. The spring tension ensures excellent thermal contact for maximum performance. Requires no hardware to mount.

Material: 0.63 (0.025) Thick Aluminum
Finish: See Table

ORDERING INFORMATION

| Part Number | Finish |
|---------------|---------------|
| 574004B00000G | Black anodize |
| 574004U00000G | Unfinished |

5742, 5796, 5797 Low cost slide on cooler heat sink

Low cost slide on cooler heat sink is easy to assemble to the device and requires no mounting hardware. Models have fins on both sides, or the left or right. Available with or without staked on solderable tab for easy board mounting.

FIGURE A

Material: 0.63 (0.025) Thick Aluminum
Finish: Black Anodize

FIGURE B

Note: Fins on Left or Right. Right hand fin model shown.

ORDERING INFORMATION

| Part Number | Description | Figure | Dia of PCB Plated Thru Hole for Tabs |

For additional options see page 84

TO-202 Heat Sinks

5769, 5773, 5774 Slim low profile channel style heat sink

Grease & Epoxy page 112

Mounting Kits page 99

Slim low profile channel style heat sink is notched to accommodate the TO-202 center tab packages. Available in 3 heights.

Material: 1.27 (0.050) Thick Aluminum
 Finish: Black Anodize

ORDERING INFORMATION

| Part Number | "A" Dim |
|---------------|---------------|
| 576904B00000G | 6.35 (0.250) |
| 577304B00000G | 9.53 (0.375) |
| 577404B00000G | 12.70 (0.500) |

For additional options see page 84

6034 Space saving staggered fin heat sink

Grease & Epoxy page 112

Mounting Kits page 99

Space saving heat sink features staggered fins for increased cooling efficiency. This verticle mount heat sink features integrated matte tin plated tabs to solder directly to the PC board.

Material: 1.27 (0.050) Thick Copper
 Finish: Tin Plated

ORDERING INFORMATION

| Part Number | Description | Dia of PCB Plated Thru Hole for Tabs |
|-------------|----------------------------------------------------------------------|--------------------------------------|
| 6034DG | Space saving staggered fin heat sink with integrated tin plated tabs | 3.10 (0.122) |

6046, 6047 Compact slide on heat sink

Compact slide on heat sink makes assembly easy. The 6046 features a positive device catch to lock the heat sink to the device.

Material: 0.63 (0.025) Thick Aluminum
 Finish: Pre-Black Anodize*

ORDERING INFORMATION

| Part Number | Description | Figure |
|-------------|----------------------------|--------|
| 6046PBG | With device catch | A |
| 6047PBG | Compact slide on heat sink | B |

*Edges cut during the manufacturing process will be unfinished.
 See page 110 for more information.

5775 Slip on heat sink

Slip on heat sink requires no hardware to attach to the device. Spring pressure ensures excellent retention. May be assembled before or after the device is attached to the board.

Material: 0.63 (0.025) Thick Aluminum
Finish: See Table

ORDERING INFORMATION

| Part Number | Finish |
|---------------|---------------|
| 577500B00000G | Black anodize |
| 577500U00000G | Unfinished |

TV4 Narrow channel style heat sink featuring twisted fins

Narrow channel style heat sink features twisted fins for increased air turbulence for better cooling. Can be mounted horizontally or vertically.

Material: 1.63 (0.064) Thick Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description |
|-------------|--------------------------------------------------|
| TV4G | Narrow channel style heat sink with twisted fins |

PF730, PF732 Slip on heat sink

Slip on heat sink has locating features for simple device alignment. Spring action holds the device for good thermal contact. The tabbed version is made from tin plated copper and the no tab version is lightweight aluminum.

For additional options see page 84

5305 Channel style heat sink with integrated clip

Channel style heat sink with integrated clip features strong spring tension and device locking catch to attach device securely to the heat sink. Available in two finishes.

Material: 0.81 (0.032) Thick Aluminum
Finish: See Table

ORDERING INFORMATION

| Part Number | Finish |
|---------------|---------------|
| 530510U00000G | Unfinished |
| 530510B00000G | Black anodize |

7038 Channel style slide on heat sink featuring an integrated clip and device retaining tab

Channel style slide on heat sink features an integrated clip and device retaining tab to hold the heat sink to the device. Small footprint consumes less board space.

ORDERING INFORMATION

| Part Number | Description |
|-------------|----------------------------------|
| 7038BG | Channel style slide on heat sink |

Material: 0.81 (0.032) Thick Aluminum
Finish: Black Anodize

7148 Copper channel style slide on heat sink featuring an integrated clip and solderable tabs

Copper channel style slide on heat sink features an integrated clip and solderable tabs. Includes a device retaining tab to securely hold the heat sink to the device. Small footprint consumes less board space.

ORDERING INFORMATION

| Part Number | Description | Dia of PCB Plated Thru Hole for Tabs |
|-------------|-----------------------------------------|--------------------------------------|
| 7148DG | Slide on heat sink with integrated clip | 2.54 (0.100) |

Material: 0.81 (0.032) Thick Copper
Finish: Tin Plated

5840 Clip on heat sink featuring louvers

Clip on heat sink features louvers to provide excellent cooling in natural or forced air convection. Spring action provides strong clamping force to securely hold the heat sink to the device. Available with or without solderable tabs.

ORDERING INFORMATION

| Part Number | Description | Dia of PCB Plated Thru Hole for Tabs |
|--------------|--------------------------------------------|--------------------------------------|
| 58400B00000G | Clip on heat sink, no solderable tabs | |
| 58400B03500G | With solderable tabs for vertical mounting | 2.84 (0.112) |

For additional options see page 84

Material: 1.02 (0.040) Thick Aluminum
Finish: Black Anodize

TO-92 Heat Sinks

5752, 5753, 5754 Low cost slip on heat sink

Low cost slip on heat sink features an expandable collar that tightly grips the device meaning no extra mounting hardware is required. Three heights to choose from.

ORDERING INFORMATION

| Part Number | "A" Dim |
|---------------|---------------|
| 575200B00000G | 18.29 (0.720) |
| 575300B00000G | 24.64 (0.970) |
| 575400B00000G | 30.99 (1.220) |

Material: 0.63 (0.025) Thick Aluminum
Finish: Black Anodize

92F Low cost brass clip on heat sink

Low cost brass clip on heat sink requires no hardware to attach to the device. Includes integrated tabs that can be soldered or twisted to attach the heat sink to the board reducing stress on the device leads.

ORDERING INFORMATION

| Part Number | Description | Dia of PCB Plated Thru Hole for Tabs |
|-------------|-------------------------|--------------------------------------|
| 92FG | Brass clip on heat sink | 1.73 (0.068) |

Material: 0.38 (0.015) Thick Brass
Finish: Unfinished

5203 Two piece heat sink

Two piece heat sink adds extra cooling in the same amount of board space as other solutions. Base and top can be ordered separately.

FIGURE A

Material: 1.60 (0.063) Thick Aluminum
Finish: Black Anodize

FIGURE B

ORDERING INFORMATION

| Part Number | Description | Figure |
|---------------|--------------------------------------------|--------|
| 520327B00000G | Two piece heat sink assembly, base and top | |

| 520329B00000G | Base only | A |

For additional options see page 84

5791 Space saving expandable collar heat sink

Space saving expandable collar heat sink has the same footprint as the device being cooled meaning no extra board space is required to fit the heat sink. The expandable collar tightly grips the device meaning no extra hardware is required. May also be used with any diamond or square basket heat sink to form a two piece heat sink for additional cooling. Available in conductive AavSHIELD³ or black anodize finish.

Material: 1.27 (0.050) Thick Aluminum
Finish: See Table

ORDERING INFORMATION

| Part Number | Finish |
|---------------|------------------------|
| 579103B00000G | Black anodize |
| 579103V00000G | AavSHIELD ³ |

5060 Low profile hat section heat sink

Low profile hat section heat sink is ideal for applications where low component heights are required such as card cages with PCBs mounted on 0.500 centers.

Material: 1.27 (0.050) Thick Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | Description |
|---------------|-----------------------------------|
| 506003B00000G | Low profile hat section heat sink |

TO-5 Heat Sinks

3257, 3260 Extruded collar style heat sink with radial fins

Extruded collar style heat sink with radial fins. The split collar design provides a press fit between the transistor and the heat sink creating an excellent thermal conduction path. Available in two heights.

Material: Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | "A" Dim |
|---------------|--------------|
| 325705B00000G | 6.35 (0.250) |
| 326005B00000G | 9.53 (0.375) |

3201, 3202 Extruded collar style heat sink with swept back fins

Extruded collar style heat sink with swept back fins for increased surface area in a small volume. The split collar design provides a press fit between the transistor and the heat sink creating an excellent thermal conduction path. Available in two inside diameters.

Material: Aluminum
Finish: Black Anodize

ORDERING INFORMATION

| Part Number | "A" Dim |
|---------------|--------------|
| 320105B00000G | 8.07 (0.318) |
| 320205B00000G | 7.75 (0.305) |

3230 Extruded collar style heat sink with mounting hole

Extruded collar style heat sink with mounting hole for hardware attachment to the circuit card. The heat sink includes a mount boss that will accept a 4-40 screw for secure mounting in high vibration environments. The split collar design provides a press fit between the transistor and the heat sink creating an excellent thermal conduction path.

Material: Aluminum
Finish: Black Anodize

Thermal solutions go beyond the heat dissipator itself. Aavid offers a total solution package, which includes a number of options and accessory items described in this section of the catalog.

A total thermal solution includes an efficient thermal interface and means of mechanical attachment. Aavid has a full-line of interface materials that can be pre-applied or supplied as an accessory item. Mechanical assembly options include attachment of semiconductors to heat sinks, heat sinks to printed circuit boards, and heat sinks to sockets of CPUs.

Aavid offers the most complete line of value added options of any supplier in the industry. Our full line of accessories includes mounting kits, shoulder washers, insulators, mounting pads, and various grease products and epoxies, which are sold separately, and can be used with a variety of Aavid heat sinks.

This section will provide the most complete solution to your thermal requirement.

How to decipher an Aavid standard 12 digit part number

Aavid standard product line in most cases consists of a 12-digit part number sequence. In most standard offerings, Digits 1 through 4, define the model basic part number. Digits 5 and 6 designate the package style that a particular heat sink is designed to cool. The 7th digit determines the finish, and the 8th identifies the interface material, if one can be used for that particular style heat sink. The 9th and 10th digits define the PC board mounting method, and the 11th and 12th digits define the method of attachment of the package to the heat sink. For digits 8,9,10,11 and 12, the absence of any of those options is always designated by a zero in those positions. Important NOTE: The 12 digit part number sequence is a general format. Due to the different variations and styles of heat sinks, we have included an Option Index on pages 82–84 to show available options and accessories for the products covered in this catalog.

Standard board level:

5748 02 B 0 37 00 G
 A B C D E F G

- A** = Base Part Number
- B** = Package Style
- C** = Finish
- D** = Interface Material
- E** = PC Board Mounting
- F** = Package Mounting
- G** = RoHS Compliant

To order most Aavid heat sinks, you must use a 12 digit part number using the following options:

Digits 5-6: Package style

| CODE | DEVICE |
|------|------------------------|
| 00 | Blank |
| 01 | TO-218 |
| 02 | TO-220, TO-216, TO-217 |
| 03 | TO-3 |
| 04 | TO-202 |
| 05 | TO-5, TO-39 |
| 06 | TO-66 |
| 08 | TO-247 |
| 10 | Multiwatt/SIP |
| 21 | Dual TO-218 |
| 22 | Dual TO-220 |

Digit 7: Finish

| CODE | DESCRIPTION |
|------|-----------------------------|
| B | Black Anodize |
| D | Solderable 100% Tin Finish |
| J | Pre-Black Anodize |
| M | Green Anodize |
| U | Unfinished |
| V | AavSHIELD ³ |
| W | Black Anodize w/Black Paint |

For additional information see page 110

Digit 8: Interface material

| CODE | DESCRIPTION |
|------|-------------------|
| 0 | None |
| 1 | One Kon-Dux™ Pad |
| 2 | Two Kon-Dux™ Pads |
| 3 | One In-Sil-8™ Pad |
| 4 | Two In-Sil-8™ Pad |
| 7 | One Hi-Flow® Pad |
| 8 | Two Hi-Flow® Pads |

For additional information see pages 86 and 87

Digits 9-10: PC Board mounting

Solderable Wave-On™ mounts

| CODE | STAND-OFF | THREAD |
|------|-----------|--------|
| 01 | 0.100" | #6-32 |
| 02 | 0.100" | #4-40 |
| 03 | 0.045" | #4-40 |
| 04* | 0.100" | #6-32 |
| 05 | 0.045" | #6-32 |
| 07 | 0.100" | 3.5mm |
| 09 | 0.200" | #6-32 |
| 13 | 0.129" | #6-32 |

* 0.090 PCB (others 0.062")

How to decipher a Thermalloy origin part number?

Aavid features a variety of Thermalloy origin standard products that consist of a different part number sequence than the standard Aavid 12 digit part numbering system. In most cases, digits 1 through 4, designate the basic model number of the heat sink. Digits 5-6, designate the finish of the heat sink. Digits 6-13 can designate any number of different options that come with a specific model number. (Please refer to Option Index D on page 85 to see Aavid's offerings per base number.)

To order most Thermalloy origin heat sinks you must use the basic part numbering system below:

Standard board level:

6021 - - **G**
A **B** **C** **D** **E**

A = Model Number
B = Finish
C = Productivity Enhancement (if applicable)
D = Second Productivity Enhancement (if applicable)
E = RoHS Compliant Suffix

Popular finishes*

(followed after base number in location B above)

B=Black Anodize
PB= Pre-Black Anodized
D= Tin Plated
U=Clean, No Finish
V=AavSHIELD³

Popular productivity enhancing options:

Digits (Figure C-D above)

P_ = Solderable Roll Pins (see page 94)
TC_ _ = Thermal Clip (see page 98)
CNE_ _ = Clinch Nuts (see page 95)
CNM_ = Clinch Nuts Metric (see page 95)
MT= Mounting Tabs (see page 93)
8223-CL03,8241-CL11 = Alignment Pad (see page 87)
SE_ = Solderable Studs (see page 96)
SF_ = Mounting Studs (see page 96)
G_ = Grafoil[®] Pad (see page 86)
SNM_ = Solderable Nuts Metric (see page 94)
SNE= Solderable Nuts (see page 94)
BGS_ = BGS Clip (page 18)

*For additional information see page 110

Note: For a wide range of part number specific options, please see our Aavid Option Index D on page 85

Option Index A

Available option codes for Aavid 12 digit part numbers. For additional information on option codes see "How to decipher an Aavid 12 digit part number" on page 80. To find the appropriate Option Index for a selected part number please refer to the main product section in the front of the catalog or "How to use this catalog" on page 2.

In-Sil-8™

These silicone based pads provide both thermal conductivity and electrical isolation. In-Sil-8™ pads have a fiberglass carrier that withstands the rigors of assembly, harsh environments and aging under continuous use. In-Sil-8™ pads install faster than traditional mica and grease and will not contaminate solder baths. Screw mounting is recommended to achieve the best thermal performance.

ORDERING INFORMATION

example 12 digit part **507222B_0000G**
Ordering code

The shape and hole pattern of the heat sink will determine the shape and hole pattern of the pad. If you are ordering a heat sink which mounts to a semiconductor on both sides, the ordering code for two pads should be used. To order additional In-Sil™ pads separate, or factory applied variations please contact an Aavid sales rep for inquiries.

KonDux™ / Grafoil® Conducta-Pad**

KonDux™ interface pads are a cost effective alternative to thermally conductive grease compounds. KonDux™ pads are electrically conductive and ideal for use with small, discrete semiconductors. Aavid pre-applies KonDux™ to your heatsink to enhance heat conductance from the semiconductor case and speed your manufacturing process.

ORDERING INFORMATION

example 12 digit part **575703B_0000G**
Ordering code

The shape and hole pattern of the heat sink will determine the shape and hole pattern of the pad. If you are ordering a heat sink which mounts to a semiconductor on both sides, the ordering code for two pads should be used.

| Ultimate compression strength | 12500 psi |
| Service temperature | -240°C to +300°C |
| Liner | None |

Hi-Flow®*

Aavid has added a phase change pad to its line-up. These pads provide low thermal resistance and electrical isolation for low pressure spring mount applications. Above the phase change temperature the material flows to fill in surface irregularities and maximize the heat conduction path.

ORDERING INFORMATION

Alignment Pads

Solderable alignment pads are an innovative way to attach the heat sink to your transistor that could cut your assembly time by more than half. Alignment pads provide cost effective solderability, while providing numerous additional benefits. Alignment pads are factory applied and can be bought separately as well. Please refer to accessory Index D on page 85.

Recommended hole pattern for 8241-CL11G

Interface Material / Double Sided Tape

Double-sided thermal tapes adhere the heat sink to the device and offer good thermal characteristics. They are easy to apply, require no curing time, can be electrically conductive or isolating, and need no mechanical support to provide thermal or physical contact between the device and the heat sink. Aavid can apply one side to a heat sink.

T414 for ceramic or metal packages

Uses a 0.001 inch (0.03 mm) Kapton MT™ filled polyimide film coated on both sides with high-bond strength, pressure-sensitive acrylic adhesive that is loaded with aluminum oxide particles. This provides both good thermal performance and excellent electrical isolation.

| | |
|-----------------------------|-----------------------------|
| Color | Beige |
| Electrical function | Insulating |
| Thickness | 0.127 mm (0.005) |
| Carrier | Kapton MT™ |
| Thermal impedance | 0.60 °C-in ² /w |
| Thermal conductivity | 0.37 w/m-k |
| Breakdown voltage | 5000 VAC |
| Volume resistivity | 5 x 10 ¹⁵ Ohm-cm |
| Lap shear adhesion | 125 (0.862) psi |
| Die shear adhesion | |
| Aluminum 25°C | 150 psi |
| Aluminum 150°C | 15 psi |
| Creep adhesion | |
| 25°C @ 12psi | >50 days |
| 150°C @ 12psi | >10 days |

T405R for ceramic or metal packages

Uses a 0.002 inch (0.05 mm) aluminum foil core coated on both sides with high-bond strength, pressure-sensitive acrylic adhesive that is loaded with aluminum oxide particles. The aluminum foil provides added thermal conductivity for applications where electrical isolation is not required. The combination of filter, expanded metal and embossed surface enhances both tape conformability and thermal performance.

| | |
|-----------------------------|-----------------------------|
| Color | White |
| Electrical function | Conductive |
| Thickness | 0.006 (0.015) |
| Carrier | Aluminum |
| Thermal impedance | 0.54 °C-in ² /w |
| Thermal conductivity | 0.50 w/m-k |
| Breakdown voltage | N/A |
| Volume resistivity | 3 x 10 ⁻² Ohm-cm |
| UL flammability | 94V-0 |
| Rating | U.L.94 |

| 150°C @ 12 psi | >10 days |

T410R / T411 for plastic packages

T410R thermally conductive tape consists of a high bond strength, pressure sensitive acrylic adhesive loaded with aluminum oxide and coated onto a 0.002 inch (0.05mm) aluminum foil carrier. The other side of the foil carrier has a silicone pressure sensitive adhesive which provides excellent adhesion to silicone-contaminated plastics and other low energy surfaces.

T411 thermally conductive tape consists of a high bond strength, pressure sensitive adhesive with an aluminum mesh carrier layer. The mesh carrier allows the tape to conform to curved surfaces of plastic molded IC packages, providing a high adhesive strength attachment for heat sinks. The high performance silicone PSA allows adhesion to silicone-contaminated plastics and other low energy surfaces.

| Typical properties | T410R | T411 |
|--------------------------------------------------------------------------------|----------------|----------------|
| Construction | Acrylic | Silicone |
| Adhesive (to heat sink side) | | |
| Color | White | Clear (silver) |
| Carrier | Aluminum foil | Aluminum mesh |
| Adhesive (onto component side) | Silicone | Silicone |
| Color (to component side) | Clear (Silver) | Clear (Silver) |
| Thickness, mm (inch) | 0.18 (0.007) | 0.28 (0.011) |
| Thermal impedance @ <1 psi °C-cm²/w (°C-in²/w) | 7.1 (1.1) | 6.5 (1.0) |
| Operating temperature range, °C | -50 to +150 | -50 to +150 |
| Lap shear adhesion, psi (MPa) | 60 (0.414) | 14 (0.094) |
| Die shear adhesion, psi (MPa) steel/FR4 | | |
| 25°C | 170 (1.172) | 80 (0.552) |
| 125 °C | 40 (0.276) | 20 (0.138) |

Note: Double Sided Tapes are factory applied only.

Wave-On™ Mounts

Solderable mounts can be factory installed to practically every board-mountable heat sink and flat sided extrusion. The female threaded through holes permit pre-assembly to the semiconductor via machine screws, allowing the heat sink/semiconductor package to be treated as one unit when fitted in PC board through holes for wave soldering.

FEATURES

Saves production time and cost

- Cuts production steps by half
- Factory installation eliminates steps
- Permits soldering in one step
- All the benefits of female threaded mount
- Automated fastening
- Excellent solderability

Better thermal performance

- Built in stand-off adds air space between PCB and heat sink for improved air flow and easier cleaning
- No lockwashers, nuts or separate mounts with various thread lengths

Typical Wave-On™ mount installation

Shur-Lock™ Tabs

Aavid's Shur-Lock™ self locking stand-off tab (U.S. Patent #5,437,561) positively secures any heat sink to the printed circuit board. This Shur-Lock™ tab exhibits many unique design features.

The rounded and bifurcated tip of the Shur-Lock™ solderable tab has been designed to easily snap into any 0.093" diameter hole. Once through the hole, the tab provides a positive resistance to backing or falling out of the hole. In addition, the spring action between the tab and the plated through hole prevents leaning or lift-off of the heat sink prior to or during the soldering process. The tip extension of the Shur-Lock™ tab has been designed to protrude less than 0.060" beyond the back of a standard 0.0625" PC board, which is below the normal lead trimming allowance for assembled PCBs.

Shur-Lock's™ stand-off design facilitates the cleaning of assembled PCBs and permits electrical traces to be routed under the heat sink. The wide base supports of the tab further improve the stability of the heat sink assembly.

|--------------------------------------|---------------------------------|
| Material | Spring steel |
| Finish | Tin plating over a copper flash |
| Pull-out force* | 70 lbs/tab minimum |
| Recommended PCB hole diameter | 0.092" – 0.096" |
| PCB thickness | 0.065" – 0.068" |

Variations of the above specifications are possible. Contact Aavid for additional details for use with thicker PCB sizes, such as 0.093" or other hole diameters. *Vertical force applied to the sink-tab joint.

FEATURES

- Positive PCB engagement
- Integrated PCB stand-off
- Quick "snap-in" assembly design
- Reduces installed assembly cost
- Designed for rugged shock and vibration environments
- Can be installed on a variety of stamped and extruded board level heat sinks

Factory applied only

Tab ordering code 28

Solderable Staked on Tabs

Aavid solderable tabs stake onto heat sinks for solder mounting into the PC board. The tabs are available in a variety of lengths, widths and thicknesses.

Tabs are factory applied for both vertical and horizontal mountings including: step tabs, which keep the heat sink elevated above the board, and tabs with a triangular base for extra stability.

Many of Aavid's tabs are customized. Below are examples of standard tabs. Please consult Aavid's customer service department for information about other tab options.

Solderable Mounting Tabs

Heat sinks ordered with solderable mounting tabs have tin-plated spring steel tabs permanently locked onto the heat sink to provide wave solderability. The solderable tabs are mounted on the heat sink after anodizing, thus eliminating any special coating or handling. The result is a wave solderable heat sink with black anodized performance.

| Suffix | Ordering code | Stand-off height | Features | "A" Dim | "B" Dim | Figure | Recommended PCB plated thru hole: |
|--------|---------------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------|---------------|--------------|--------|-----------------------------------|
| MT | 53 | 5.21 (0.205) | Solderable mounting tab | 15.88 (0.625) | 4.83 (0.190) | A | 2.90 ± 0.10 (0.114 ± 0.004) |
| MT2 | 54 | 8.51 (0.335) | Solderable mounting tab | 19.18 (0.755) | 8.13 (0.320) | A | 2.90 ± 0.10 (0.114 ± 0.004) |
| MT3 | 55 | 5.21 (0.205) | 50 degree beveled corners on stand-off portion reducing board footprint from 7.87 (0.310) to 4.83 (0.190) width. Only tab with this feature. | 15.88 (0.625) | 4.83 (0.190) | A | 2.90 ± 0.10 (0.114 ± 0.004) |
| MT5 | 56 | 5.21 (0.205) | Bifurcated tabs in lieu of triangular shape | 15.88 (0.625) | 4.83 (0.190) | B | 2.95 ± 0.05 (0.116 ± 0.002) |
| MT6 | 57 | 2.92 (0.115) | Bifurcated tabs in lieu of triangular shape | 13.59 (0.535) | 2.54 (0.100) | B | 2.95 ± 0.05 (0.116 ± 0.002) |

Notes: Mounting tabs have unique locking features built into their design. Aavid adds to standard and custom heat sinks. For this reason, the tabs are factory applied, and cannot be sold separately. Please see page 85 for additional tab options.

Solderable Pins / Solderable Nuts

Solderable Pins

Vertically mounted, extruded heat sinks are converted to wave solderable with the addition of solderable roll pins. Roll pins are available with stand-off shoulders in different heights for easier cleaning after wave soldering.

| P2 | 21 | Solid pin w/stand-off shoulder 0.050" | 0.050 | A |
| P3 | N/A | Solid pin w/stand-off shoulder 0.125" | 0.125 | A |
| N/A | 25 | Solid solderable pin | | B |

Solderable Nuts

Solderable nuts are permanently swaged into the heat sink for quick pre-assembly with the transistor. Screws are used to mount to the heat sink and are installed from the top. Solderable nuts feature a closed end that prevents solder from wicking into threads and trapping contaminants or flux. Heat sink and transistor are then handled as a single component and dropped into plated-thru holes in the PC board for wave soldering. (Solderable nuts require slightly larger printed circuit board hole sizes)

FEATURES

- Pre-mounted to heat sink at factory
- Ease of pre-assembly in production
- Mechanical and electrical integrity
- Wave solderability

ORDERING INFORMATION

example 12 digit part **506003B0** -- **00G**

| SNE-2 | 13 | 4.95 (0.195) | 6-32 UNC-2B |

Note: If a part number requires 2 solderable nuts, simply add a "/2" after the solderable nut character suffix on Thermalloy origin parts.

Mechanical drawings showing heat sinks with solderable nuts

Clinch Nuts

Clinch nuts are threaded nuts that allow quick assembly of the transistor to the heat sink. A single screw mounts the transistor to the heat sink, reducing your hardware requirements. Clinch nuts are permanently pressed into the heat sink, and come in a variety of English and Metric threads—CNE designates an English thread, and CNM designates a Metric thread.

Mechanical drawing showing heat sink with clinch nut

Solderable Studs

Threaded solderable studs are permanently swaged in place for quick pre-assembly with the transistor. The device is placed over the stud (s) followed by the lock washer and nut. This entire component is then dropped into plated-thru holes in the printed circuit board for wave soldering. The end of the stud is tin-plated for excellent solderability and extends only 0.040" below a 0.062" PC board to clear lead trimming saws.

Aavid Kool-Klips™

These one piece stainless steel clips eliminate the need for screws, lock washers and nuts in the assembly process, therefore reducing assembly time and cost. These can be bought separately, or found in the 11th or 12th position when deciphering an Aavid Standard product. Please reference Indexes to see which clips are popular with which product offering.

ORDERING INFORMATION

To order clips separately use part number below.
To order a clip as an option use ordering code.

Thermal Clips

Factory-installed ONLY thermal clips, available on many standard heat sinks (shown below) eliminate the use of screws and nuts in assembling the heat sink and transistor. Plastic case transistors slip into place for easy assembly. Thermal clips are available in a variety of configurations. Locking clips have an internal tab to lock the transistor permanently in place.

Mounting Kits

FEATURES

- Pre-packaged in heat-sealed plastic bags for use on assembly line.
- Stock mounting hardware using one number for better control and identification.
- Three different insulating materials available:
Low cost Thermalfilm™
High temperature Mica
High performance Thermalsil™ III
- Other insulator materials available for special order include:
hard anodized aluminum and aluminum oxide.
- Individually packaged for convenient stocking and handling of mounting hardware. Kits contain all hardware necessary to electrically isolate the transistor from the heat sink.

Insulating Shoulder Washers

FEATURES

- Available in nylon or polyphenylene sulfide
- Chemically inert [no known solvents under 200°C (392°F)]
- Maximum recommended service temperature of 260°C (500°F)
- Recommended torque is 0.565Nm to 0.678Nm (5 to 6 inch-pounds) on all shoulder washers except -7, which has recommended torque of 0.452Nm (4 inch-pounds)

Polyphenylene Sulfide PPS Shoulder Washers

Thermalfilm™ Polyimide Plastic Films

Thermalfilm™ and Thermalfilm™ MT are low cost polyimide plastic insulating films designed to be an improved replacement for mica. These insulators have a distinctive amber color and can be easily recognized and assembled on a production line.

Thermalfilm™ MT, made from high performance Kapton™ MT material, provides thermal conductivity nearly 2-5 times greater than standard Thermalfilm™. Both insulators have an extremely high resistance to flow or thin out under high compressive stresses, particularly at elevated temperatures. Excellent physical, mechanical and electrical properties remain nearly constant over a wide range of temperatures and frequencies. They are radiation resistant, have no melting points, and have no known organic solvents. The polyimide plastic film is UL listed as a component in UL's publication "Component – Plastic Material" dated September 18, 1969. The UL card number is E39505R, Guide QMFZ2 filed by E. I. du Pont de Nemours & Co., Inc. Thermalfilm™ is rated 94-V/0.

ORDERING INFORMATION

For standard pre-cut sizes of Thermalfilm™ and Thermalfilm™ MT see page 102.

Mica and Thermalsil™ III

Thermalsil™ III provides excellent thermal conductivity and electrical resistance. It is used as an electrically-isolating interface material composed of silicone elastomer binder with a thermally conductive filler. It is reinforced with glass cloth to resist tearing and cut-through due to burrs on transistors or heat sinks.

Thermalsil™ III eliminates the need for grease application and conforms to mounting surfaces under clamping pressure for optimum heat conduction. The finely woven glass cloth provides the thinnest possible matrix for enhanced thermal resistance. Thermalsil™ III is available in any configuration with adhesive backing.

Mica insulators provide high maximum operating temperatures (550°C) and excellent electrical properties.

| Thickness | 0.15mm (0.006 inch) | |
| Color | Gray-Green | |
| Tensile strength | 6.1 x 10 ⁷ Pa (8786 psi) | |
| Hardness, shore A | 87 | |
| Elongation | 2% or less | |
| Thermal | | |
| Thermal conductivity | 0.92 W/(m °C) (0.532 Btu/hr. ft °F) | |
| Flame resistance | UL 94V-0 | UL card #E-58126 (S) |
| Service temperature | -60°C to 180°C (-76°F to 356°F) | |

Insulators – Aluminum Oxide

Aluminum Oxide

Aluminum oxide has unique thermal conductivity qualities and features low loss factors at high frequencies. It has high compressive strength, high volume resistivity, low thermal expansion and resists radiation.

Aluminum oxide insulating washers have a dielectric strength of approximately 21.7×10^3 volts/mm for .76mm material (550 volts/mil for 0.030 inch material) and 16.9×10^3 volts/mm for 1.57mm material (430 volts/mil for 0.062 inch material). The thermal conductivity of aluminum oxide is $15.06W/(m^{\circ}C)$ at $75^{\circ}C$.

| PROPERTY | CHEMICAL – TYPICAL VALUE | TEST METHOD |
|----------------------------------------|-------------------------------------------------------------------|--------------------------------------------------------------------|
| Al_2O_3 | 94% nominal | Spectrographic analysis (100%-% by wt. of total metallic impurity) |
| ELECTRICAL | | |
| Dielectric constant 25°C (77°F) | 8.9 (1MHz) | ASTM D150-70 |
| | 8.9 (10GHz) | ASTM D2520-70 |
| Dissipation factor 25°C (77°F) | 0.0001 (MHz) | ASTM D150-70 |
| | 0.0010 (10GHz) | ASTM D2520-70 |
| Electrical resistivity 25°C (77°F) | $>10^{11}$ ohm-cm | ASTM D1829-66 |
| Dielectric strength (AC) | 8.66×10^3 volts/mm (6.35mm thick) | ASTM D116-69 |
| | [220 volts/mil (0.250" thick)] | |
| | 16.73×10^3 volts/mm (1.27mm thick) | |
| | [425 volts/mil (0.050" thick)] | |
| | 28.35×10^3 volts/mm (0.25mm thick) | |
| | [720 volts/mil (0.010" thick)] | |
| PHYSICAL | | |
| Density | $3.62 g/cm^3$ (226 lb/ft ³) | ASTM C20-70 |
| Hardness | 78 (Rockwell 45 N) | ASTM E18-67 |
| MECHANICAL | | |
| Flexural strength 25°C (77°F) | 3.17×10^8 Pa (minimum) [46,00 psi (minimum)] | ACMA Test #2 |
| | 3.52×10^8 Pa (typical) [51,000 psi (typical)] | |
| Modules of elasticity | 2.83×10^{11} Pa (41 x 10 ⁶ psi) | ASTM C623-69T |
| Poisson's ratio | 0.21 | ASTM C623-69T |
| Tensile strength 25°C (77°F) | 1.93×10^8 Pa (28,000 psi) | ACMA Test #4 |
| Compressive strength 25°C (77°F) | 2.10×10^8 Pa (305,000 psi) | ASTM C528-63T |
| THERMAL | | |
| Coefficient of thermal expansion | $7.9 \times 10^{-6}/^{\circ}C$ ($4.4 \times 10^{-6}/^{\circ}F$) | ASTM C372-56 |
| Thermal conductivity | $18.01 W/(m^{\circ}C)$ @ 25°C | ASTM C408-58 |
| | $14.24 W/(m^{\circ}C)$ @ 100°C | |
| | $79.56 W/(m^{\circ}C)$ @ 400°C | |
| Specific heat (100°C) | 8.79×10^3 KJ/kg°C [2.1×10^4 Btu/lb °F] | ASTM C351-61 |
| Melting point | $>3600^{\circ}C$ (6512°F) | |
| Maximum temperature for continuous use | $1700^{\circ}C$ (3100°F) | |

Aluminum Oxide for TO-3

8923-1, 8923-2, 8924 Stanchion Pads

FEATURES

- Reduces stress on leads during wave solder and post-soldering operations
- Provides stable mount to resist shock and vibration damage to leads
- 8923-1, 8923-2, and 8924 fit the TO-220

ORDERING INFORMATION

| Part number | "A" Dim | "B" Dim | "C" Dim |
|-------------|--------------|---------------|--------------|
| 8923-1G | 2.54 (0.100) | 20.32 (0.800) | 8.00 (0.315) |
| 8923-2G | 1.27 (0.050) | 19.05 (0.750) | 8.00 (0.315) |
| 8924G | 1.27 (0.050) | 19.05 (0.750) | 7.87 (0.310) |

Note: Tolerances ± 0.25 (0.010) unless otherwise specified.
 Material is nylon 6/6 rated 94 V-0

TO-3 Insulating Covers

Insulating covers are designed to provide protection from accidental shock during field service or repair.

Pan head screws not provided—MS 51957-30 or equivalent recommended—secure the cover to the TO-3. At the typical mounting screw torque of 0.68–0.90 Nm (6-8 inch pounds), the TO-3 cover material cold-flows around the screw head to securely fasten the cover.

Included are No.6 split washers as inserts to provide electrical connection of mounting screws to the TO-3 collector and an insulating snap-in cover for the screw heads. A test probe hole is provided in the top of the cover.

The 8903VB is made from thermoplastic polyester that meets the requirements of UL Bulletin 94 V-O. In addition to its excellent flammability rating, thermoplastic polyester offers resistance to most chemical environments, heat deflection temperature to 215.6°C (420°F) and UL continuous use temperature of 130°C (266°F).

ORDERING INFORMATION

| Part number | Material | Color | Flammability standards |
|-------------|-------------------------|-------|--------------------------------------------|
| 8903NWX | Nylon | White | Self-extinguishing UL 94 V-2 |
| 8903VBG | Thermoplastic polyester | Black | Self-extinguishing UL 94 V-0 UL 492 Type 1 |

Teflon-filled Acetal Insulators for TO-3

| Part number | Fits notch | "A" Dim |
|-------------|--------------|--------------|
| 103G | 4.83 (0.190) | 4.90 (0.193) |
| 109G | 6.35 (0.250) | 6.35 (0.250) |

Teflon-filled Acetal Bushings for TO-3

| Part number | "I.D." | "O.D." | "T" |
|-------------|-------------------------|-------------------------|-------------------------|
| 110G | 5.03/5.21 (0.198/0.205) | 6.81/6.98 (0.268/0.275) | 1.57/1.40 (0.062/0.055) |
| 113G | 6.43/6.60 (0.253/0.260) | 7.82/8.00 (0.308/0.315) | 1.57/1.40 (0.062/0.055) |

FEATURES

- Prevent heat damage during soldering
- Facilitate board clean-up
- Prevent solder bridges
- Assure uniform device height

PRODUCT INFORMATION

| Suffix | Base material | MAXIMUM OPERATING TEMPERATURE | | Color |
|--------|----------------------------------------------|-------------------------------|---------------|------------|
| | | Continuous | Deflection | |
| NG | Nylon base resin per ASTM STD D4066-82-PA111 | 121.0°C 250°F | 243.3°C 470°F | Natural |
| DAPG* | Diallyl Phthalate per MIL-M-14G type SDG | 204.4°C 400°F | 282.2°C 540°F | Black only |

* All "DAP" mounting pads meet UL 94 V-0

Note: Please specify material for each mounting pad: "N" = nylon; "DAP" = Diallyl Phthalate.
Example: 7717-3NG, 7717-86DAPG

| Finish | Aavid Code | Thermalloy Suffix | Description |
|-----------------------------|------------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Black Anodize | B | B | Recommended for increased thermal performance. Anodize is electrically isolating and does not provide electrical insulation. |
| AavSHIELD ³ | V | V | For corrosion protection or painting only. Color variation may be expected with this finish. Chromate is electrically conductive. Does not provide electrical insulation. |
| Tin Plating | D | D | Allows heat sink to be soldered to the PC Board. |
| Pre-Black Anodized | J | PB | Edges cut during the manufacturing process will be unfinished. |
| Green Anodize | M | | Alternative finish to Black anodize. Recommended for increased thermal performance. Electrically isolating but does not provide electrical insulation. |
| Unfinished | U | U | Clean, no finish. |
| Black Anodize w/Black Paint | W | | Paint on mounting surface prevents metal from contacting the circuit thus avoiding shorts. |

ORDERING INFORMATION

Aavid code – Finish option must be noted by one of the above letters in the 7th position. Aavid's standard finish is black anodize (B) unless otherwise noted.

example 12 digit part **530122B00000G**

| | | |
|---|---|---|
| | | |
| A | B | C |

A = Base part
B = Finish code
C = RoHS compliant

Thermalloy origin suffix – The suffixes should be added after the model number to indicate the desired finish.

example
 Thermalloy origin part **6396B G**

| | | |
|---|---|---|
| | | |
| A | B | C |

A = Model number
B = Finish suffix
C = RoHS compliant

Note : All thermal graphs reflect black anodize finish.

Snap-On Ejectors / Pullers

FEATURES

- Saves time – no roll pin required
- Excellent for retrofit applications
- Material is nylon per ASTM D4066-82PA162F11
- Cost no more than conventional ejector/puller
- Rated at 222.5N (50 lbs.) / ejector force per pair
- One piece – no assembly required
- May be heat stamped

ORDERING INFORMATION

Part number
5021NG

Standard Ejectors / Pullers

FEATURES

- Lever action releases card from its connector safely and quickly
- Cards, their components and connectors are less frequently damaged when extracting PC boards
- No special extraction tools are needed for board removal
- Material is nylon per ASTM D4066-82 PA120B4413F24, UL 94 V-O rated (natural color)
- Roll pins are provided (NAS 561-P3-4)

Sil-Free™

Sil-Free™ 1020 is a metal-oxide-filled, silicone-free synthetic grease specially formulated to enhance heat transfer across the interface between the semiconductor case and the heat sink without the migration or contamination associated with silicone-based products.

Dry interface case-to-sink thermal resistance is typically reduced 50% to 75% with proper application of Sil-Free™ 1020.

This virtually "no-bleed", high-performance compound will not dry out, harden, melt, or run, even after long-term continuous exposure to temperatures up to 200°C. Even in a vacuum atmosphere (10-5 Torr, 24 hours@100°C), Sil-Free™ 1020 exhibits virtually "no bleed" or evaporation.

ORDERING INFORMATION

* It is recommended that the containers be turned over every 6 months to minimize settling for ease of mixing

Ther-O-Link™

Ther-O-Link™ is a silicone-based thermal compound that cost effectively enhances the heat transfer between a semiconductor case and a heat sink. Easy to apply, Ther-O-Link™ substantially reduces dry interface thermal resistance, while providing long life under a variety of conditions.

ORDERING INFORMATION

| Part number | Package | Size |

Ultrastick™

Aavid's Ultrastick™ is a unique phase-change thermal interface material that surpasses grease in thermal performance and long-term stability. This solid, silicone-free, paraffin-based thermal compound changes phase at 60°C, with a concurrent volumetric expansion that fills gaps between the mating surfaces. Ultrastick™ comes in a convenient applicator bar, allowing for neat, fast application to both heat sink and component surfaces. One cost-effective application leaves a thin, film-like deposit, providing excellent heat transfer and low interface thermal resistance.

ORDERING INFORMATION

* Recommended max. storage temperature: 40°C (105°F)

Thermalcote™

Thermalcote™ is a superior thermal joint compound of thermally loaded silicone based grease for use with all heat sinks. It improves the transfer of thermal energy across the metal to metal interfaces between the transistor or rectifier case and the heat sink. Thermalcote™ conducts heat approximately 15 times better than air and more than 4 times better than unloaded silicone grease. It is non-toxic, extremely stable, and neither cakes or runs from -40° to 204°C (-40°F to 399°F).

ORDERING INFORMATION

Thermalcote™ II

Thermalcote™ II was developed as the sensible alternative to silicone-based thermal greases. Thermalcote™ II employs a highly conductive synthetic base fluid that enables the finished product to exhibit the same thermal characteristics as the silicone-based products.

Thermalcote™ II contains no silicone. The high lubricity of the base oil permits efficient application to both semiconductor case or heat sink, and it will effectively fill the microscopic air gaps on the metal-to-metal mating surfaces. It is non-toxic, extremely stable, and neither cakes or runs from -40° to 200°C (-40°F to 392°F).

Ther-O-Bond™ Adhesive

ORDERING INFORMATION

| Part number | Description | Package/Kit | Size |
|---------------|-------------------|--------------------------------------|--------------------|
| 159900F00000G | Ther-O-Bond™ 1500 | Resin and hardener | 0.946 liter (1 qt) |
| 161000F00000G | Ther-O-Bond™ 1600 | 2-Part plastic kit | 10gm (0.35 oz) |
| 164000F00000G | Ther-O-Bond™ 1600 | 2-Part plastic kit | 40gm (1.40 oz) |
| 200000F00000G | Ther-O-Bond™ 2000 | Adhesive syringe Activator bottle | 25ml 13ml |

Ther-O-Bond™ 1500

Ther-O-Bond™ 1500 is a versatile epoxy casting system developed for high performance, production potting and encapsulating applications where low shrinkage and rapid air evacuation are required. This formulation has a very low surface tension and a flowable viscosity, which affords excellent air release. Ther-O-Bond™ 1500 adheres to rigid plastics and laminates, metals and ceramics, has a low coefficient of thermal expansion and is readily machined and shaped with ordinary shop tools. The fully cured epoxy system is an excellent electrical insulator which provides good resistance to electrolysis, leakage and corrosion from water, weather, gases and chemical compounds.

HANDLING CHARACTERISTICS

| | |
|-----------------------------------------|-------------|
| Mix ratio by weight, resin to hardener: | 100 to 15 |
| Mixed viscosity @ 25°C, cps: | 1000 - 1500 |
| Work-life @ 25°C | 45 Minutes |
| Gel time @ 25°C | 3-6 Hours |
| Cure schedule @ 25°C | 8 Hours |
| Cure schedule @ 65°C | 1 Hour |
| Cure schedule @ 100°C | 0.5 Hour |

PHYSICAL PROPERTIES

| | |
|------------------------------|------------|
| Color | Black |
| Specific gravity | 1.5 |
| Operating temp, °C | -60 to 155 |
| Heat distortion temp, °C | 100 |
| Hardness, shore D: | 88 |
| Thermal conductivity W/(m°C) | 1.26 |
| Compressive strength, psi | 14,000 |
| Dissipation factor, | 0.01 |
| Self extinguishing: | yes |
| C.T.E. (ppm/°C) | 25 |
| Tensile strength (@25°C) | 9200 psi |
| Dielectric | 800 |
| Shelf life | 18 months* |

* Stated shelf life is from date of manufacture. To allow for inventory cycle, product shipped from Aavid will have less than 18 months remaining shelf life. Aavid guarantees a minimum of 3 months remaining shelf life. Please adjust order quantity so all product will be consumed within 3 months of date of shipment.

Ther-O-Bond™ 2000

Ther-O-Bond™ 2000 acrylic adhesive cures rapidly at room temperature, while providing a repairable, thermally conductive bond.

Ther-O-Bond™ 1600

For smaller applications, Ther-O-Bond™ 1600 produces a stable, durable, high-impact bond, with good heat transfer characteristics. It is a thixotropic (smooth paste) thermally conductive epoxy system used for staking thermistors, diodes, resistors, integrated circuits and other heat sensitive components to printed circuit boards. This two-part adhesive develops strong, durable, high impact bonds at room temperature, which improve heat transfer while maintaining electrical insulation. Ther-O-Bond™ 1600 bonds readily to itself, to metals, silica, steatite, alumina, sapphire and other ceramics, glass, plastics and many other materials because its coefficient of thermal expansion provides a good match for those materials over a fairly wide temperature range.

HANDLING CHARACTERISTICS

| | |
|-----------------------------------------|------------|
| Mix ratio by weight, resin to hardener: | 100 to 5 |
| Mixed viscosity @ 25°C, cps: | 33,000 |
| Work-life @ 25°C | 45 Minutes |
| Gel time @ 25°C | 3-6 Hours |
| Cure schedule @ 25°C | 8 Hours |
| Cure schedule @ 65°C | 1 Hour |
| Cure schedule @ 100°C | 0.5 Hour |

PHYSICAL PROPERTIES

| | |
|------------------------------------|------------|
| Color | Blue |
| Specific gravity: | 2.30 |
| Operating temp, °C | -70 to 115 |
| Hardness, shore D: | 90 |
| Izod impact, F1 Lbs/Inch of notch | 0.49 |
| Thermal conductivity W/(m°C) | 0.85 |
| C.T.E. (ppm/°C) | 25 |
| Tensile strength (@25°C) | 9200 psi |
| Tensile lap shear, psi | 2900 |
| Dielectric strength (volts/mil) | 410 |
| Dielectric constant (1 KHz @ 25°C) | 5.9 |
| Dissipation factor, KH@ 25°C | 5.9 |
| Shelf life | 18 months* |

PRODUCT INFORMATION

| | |
|---------------------------------|------------|
| Color | White |
| Thermal conductivity W/(m°C) | 0.48 |
| C.T.E. (ppm/°C) | 25 |
| Tensile strength (@25°C) | 2360 psi |
| Dielectric strength (volts/mil) | 220 |
| Shelf life | 18 months* |

* Stated shelf life is from date of manufacture. To allow for inventory cycle, product shipped from Aavid will have less than 18 months remaining shelf life. Aavid guarantees a minimum of 3 months remaining shelf life. Please adjust order quantity so all product will be consumed within 3 months of date of shipment.

Thermalbond™

Thermalbond™ is a thermally conductive, high strength epoxy adhesive. It provides exceptional adhesion to copper, aluminum, steel, glass, ceramics, and most plastics. Thermalbond™ also has a coefficient of thermal expansion compatible with aluminum, copper, and brass, making it particularly well suited for thermally bonding semiconductors and other components to chassis or heat sinks.

ORDERING INFORMATION

| Part number | Net weight |
|-------------|-----------------------|
| 4949G | 0.8 oz (25 gram kit) |
| 4950G | 1.7 oz (50 gram kit) |
| 4951G | 3.5 oz (100 gram kit) |
| 4952G | 7.0 oz (200 gram kit) |
| 4953G | 4 lbs (1814 grams) |

MIXING INSTRUCTIONS

Mix resin thoroughly before removing material. Add 7.1 parts of RT-7 hardener to 100 parts of resin by weight, or 17 parts of RT-7 hardener to 100 parts of resin by volume. Adhesive will set up in:

| | |
|------------------------|-------------------------|
| 24 hrs at 25°C (77°F) | 1 hr. at 100°C (212°F) |
| 2 hrs. at 65°C (149°F) | 30min. at 130°C (266°F) |

Note: For maximum electrical and physical properties, a post cure is necessary. Post cure at room temperature for 4 days or for 4 hours at 93°C (200°F).

HANDLING CHARACTERISTICS

Typical electrical and physical properties at room temperature with RT-7 hardener

| | |
|-------------------------------------------------------------------------------------|---------------------------------------------------------|
| Color | Green |
| Specific gravity | 2.35 |
| Working viscosity | 25,000 cps |
| Thermal conductivity | 1.34W/(m °C) (0.77 Btu/hr ·ft· °F) |
| Thermal resistivity | 29.4°C in/watt |
| Tensile strength | 6.34 x 10 ⁷ Pa (9,2000 psi) |
| Compressive strength | 1.44 x 10 ⁸ Pa (20,9000 psi) |
| Bond shear strength aluminum to aluminum, 25.4mm (1") overlap @ 25°C, (77°F) | 3.17 x 10 ⁷ Pa (4,60000 psi) |
| Thermal coefficient of expansion | 24 x 10 ⁻⁶ /°C (1.32 x 10 ⁻⁶ /°F) |
| Water absorption, % after 10 days@ 25°C (77°F) | 0.20 |
| Hardness, Shore D | 86 |
| Volume resistivity | 1.0 x 10 ¹⁶ |
| Dielectric strength | 59.1 x 10 ³ volts/mm (1500 volts/mil) |

| Dielectric factor@25°C (77°F) 100KHz | 0.020 |
| Operating temperatures | -65°C to 155°C (-85°F to 311°F) |
| Linear shrinkage | 0.002 in/in |
| Shelf life | 12 months* |
| Pot life@25°C (77°F) | 2-3 hours |
| Suggested stripping agent | Miller-Stephenson MS 111 |
| Cleaning solvent | Acetone |

* Stated shelf life is from date of manufacture. To allow for inventory cycle, product shipped from Aavid will have less than 12 months remaining shelf life. Aavid guarantees a minimum of 3 months remaining shelf life. Please adjust order quantity so all product will be consumed within 3 months of date of shipment.

The Total Integrated Solution for Cooling Electronics®

Aavid has the expertise to design and manufacture cooling solutions spanning the entire range of thermal efficiency and mechanical complexity. The board level products displayed in this catalog represent only a fraction of our capabilities. Most applications require custom solutions, which is why so many leading electronics companies partner with Aavid.

For demanding applications Aavid can design and validate custom innovative solutions utilizing the most advanced engineering resources saving you precious development time. Our manufacturing facilities, located in strategic markets around the globe, deliver cost effective products providing you a competitive advantage. From concept to production, Aavid can enable your design anywhere in the world.

Experts at solving cooling challenges ranging from networking, telecom and consumer electronics, to power and biomedical devices. Utilizing the latest CFD/FEA and experimental techniques we can:

- Perform conjugate analyses with conduction, convection and radiation
- Optimize venting and fan placement
- Increase power density
- Reduce noise, cost and size.
- Increase MTBF

Dedicated thermal engineers characterize your system and provide the most advanced and effective cooling solutions, saving thousands in engineering resources, thermal modeling software, and test hardware.

Aavid's expertise covers 4 major cooling mechanisms: natural convection, forced convection, fluid phase change, and liquid cooling. The above graph is a starting point to determine which technology can be used for your system configuration.

For more information regarding any of these cooling mechanisms, please contact Aavid at:

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
