

mikroTFT

Breakout board for 320 x 240 px TFT Touch Screen provided with screw holes which simplify integration.

TO OUR VALUED CUSTOMERS

I want to express my thanks to you for being interested in our products and for having confidence in MikroElektronika.

The primary aim of our company is to design and produce high quality electronic products and to constantly improve the performance thereof in order to better suit your needs.

Introduction to mikroTFT

The mikroTFT board contains 2.8" TFT color display **MI0283QT-9A** with 320 x 240 pixel resolution. Display is driven by **ILI9341** display controller, capable of showing advanced graphical content. Each pixel can display 262K different colors. TFT display is covered with a **resistive touch panel** which can be used as input device. For further connectivity **two 1x26 side headers** are provided. The board can be used as a development tool, but can also be integrated into a final device. **Mounting holes** (\varnothing 2.29 mm) provided in each corner enable easier integration.

board**

The **mikroTFT board** is designed in the same form factor as MikroElektronika's **mikromedia boards**. It allows you to use mikroTFT while developing your prototype, and to easily switch to mikromedia board later on. This compatibility allows you to plan integration features in

advance. Whichever solution you choose - either a full-featured development board such as mikromedia, or a custom made controller board with mikroTFT as your touch screen - you can have the same front panel and same integration features to take care of.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
