

AS3711

Product Brief

High Current Power Management Unit for Portable Devices

1 General Description

The AS3711 is a compact System PMU with integrated battery charger and back light driver.

The device offers advanced power management functions. All necessary ICs and peripherals in a battery powered mobile device are supplied by the AS3711. It features 3 DCDC buck converters (4MHz), one buck controller as well as 8 low noise LDOs. The supply voltages are programmable via the serial control interface.

The three step-up converter generate voltages for e.g. the backlight, classD amplifier, USB host support or LCD display supply. Both constant voltage (for e.g. OLED supply) as well as constant current (white LED backlight) operations with three current sinks are possible. An internal voltage protection is limiting the output voltage in the case of external component failures.

AS3711 contains a linear or switching mode Li-Ion battery charger with constant current and constant voltage. The maximum charging current is 1.5A. An integrated battery switch and an optional external switch are separating the battery during charging or whenever an external power supply is present. With this switch it is also possible to operate with no or deeply discharged batteries. A programmable current limit can be used to control the maximum current used from a USB supply. Additional features are a 30V OV protection and battery temperature supervision.

The single supply voltage may vary from 2.7V to 5.5V.

2 Key Features

Power Management

Voltage Generation

- 4 DCDC step down regulators
 - DVM (0.6V-3.3V; 1x 1.2-1.5A, 2x 0.7-1A)
 - controller mode for 2-3A supplies
 - 50uA quiescent current
 - selectable switching frequency (4, 3 or 2MHz)
 - 2A with combined DCDC 2 & 3
- 2 analog low noise LDOs, 6 digital LDOs
 - 2x 1.2-3-3V, 6x 0.9-3.3V; 150-300mA
 - 30uA quiescent current (low power mode)
- 1 ultra low power always on LDO 2.5V, 10mA
- power supply supervision
- 4sec and 8sec emergency shut-down
- hibernation function

HV Backlight Driver

- 2x step up with external transistor
- voltage control mode and over-voltage protection
- 3 programmable current sinks (max. 40mA)
- e.g. 500mA@5V; 40mA@50V
- possible external PWM dimming input (DLS, CABAC)

Battery Charger

- prog. trickle charging (25-220mA)
- prog. constant current charging (up to 1500mA)
- prog. constant voltage charging (3.9V-4.25V)
- charger time-out and temperature supervision
- selectable current limitation for USB mode
- integrated battery switch & ideal diode (linear mode)
- external battery switch control (switching mode)
- external 30V OV protection

General

Supervisor

- automatic battery monitoring with interrupt generation and selectable warning level
- automatic temperature monitoring with interrupt generation and selectable warning and shutdown levels

Real Time Clock

- ultra low power 32kHz oscillator
- sec and minute counter, auto wake-up
- selectable alarm (seconds or minutes)
- 32kHz clock output to peripheral
- <1uA total power consumption

4 General Purpose IOs

- 10bit general purpose ADC input
- wake-up/sleep and DVM input
- PWM (DLS, CABAC) dimming input
- status output for: charger, low battery, power good and step-up overcurrent
- Q32k clock output
- interrupt output
- PWM output
- step-up feedback input

OTP programmable BOOT Sequence

- programmable regulator default voltages
- programmable start-up sequence

General Purpose ADC

- 10bit resolution
- several internal / external sources
 - VUSB, VSUP, CHGIN, VBAT
 - GPIOx, CURRx
 - XOUT32K, SENSEN_SU1
 - chip temperature

Control Interface

- I2C control lines, including watchdog
- Power-Up input
- bidirectional reset, with selectable delay
- ultra low power standby mode

Power-On Reset Circuit

Packaging

QFN56 7x7mm 0.4mm pitch

Application

Portable Media Players, Portable Navigation Devices, E-Books, Mobile Internet Devices, Tablet PCs

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
