Single 8-Channel Multiplexer/Demultiplexer

**TC4052B**

Differential 4-Channel Multiplexer/Demultiplexer

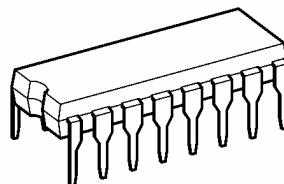

**TC4053B**

Triple 2-Channel Multiplexer/Demultiplexer

TC4051B, TC4052B and TC4053B are multiplexers with capabilities of selection and mixture of analog signal and digital signal. TC4051B has 8 channels configuration. TC4052B has 4 channel × 2 configuration and TC4053B has 2 channel × 3 configuration. The digital signal to the control terminal turns "ON" the corresponding switch of each channel, with large amplitude (VDD – VEE) can be switched by the control signal with small logical amplitude (VDD – VSS). For example, in the case of VDD = 5 V VSS = 0 V and VEE = -5 V, signals between -5 V and +5 V can be switched from the logical circuit with single power supply of 5 volts. As the ON-resistance of each switch is low, these can be connected to the circuits with low input impedance.

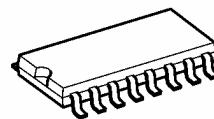

Note: xxxFN (JEDEC SOP) is not available in Japan.

## TC4053B

## Truth Table

Control C	Impedance between IN-OUT (Note)
H	0.5 to $5 \times 10^2 \Omega$
L	$>10^9 \Omega$

Note: See electrical characteristics

## Absolute Maximum Ratings (Note)

Characteristics	Symbol	Rating	Unit
DC supply voltage	V <sub>DD</sub> -V <sub>SS</sub>	-0.5 to 20	V
DC supply voltage	V <sub>DD</sub> -V <sub>EE</sub>	-0.5 to 20	V
Control input voltage	V <sub>CIN</sub>	V <sub>SS</sub> - 0.5 to V <sub>DD</sub> + 0.5	V
Switch I/O voltage	V <sub>I</sub> /V <sub>O</sub>	V <sub>EE</sub> - 0.5 to V <sub>DD</sub> + 0.5	V
Control input current	I <sub>CIN</sub>	$\pm 10$	mA
Potential difference across I/O during ON	V <sub>I</sub> -V <sub>O</sub>	-0.5 to 0.5	V
Power dissipation	P <sub>D</sub>	300 (DIP)/180 (SOIC)	mW
Operating temperature range	T <sub>opr</sub>	-40 to 85	°C
Storage temperature range	T <sub>stg</sub>	-65 to 150	°C

Note: Exceeding any of the absolute maximum ratings, even briefly, lead to deterioration in IC performance or even destruction.

Using continuously under heavy loads (e.g. the application of high temperature/current/voltage and the significant change in temperature, etc.) may cause this product to decrease in the reliability significantly even if the operating conditions (i.e. operating temperature/current/voltage, etc.) are within the absolute maximum ratings and the operating ranges.

Please design the appropriate reliability upon reviewing the Toshiba Semiconductor Reliability Handbook ("Handling Precautions"/"Derating Concept and Methods") and individual reliability data (i.e. reliability test report and estimated failure rate, etc.).

## Operating Ranges (Note)

Characteristics	Symbol	Test Condition			Min	Typ.	Max	Unit
DC supply voltage	V <sub>DD</sub> -V <sub>SS</sub>	—			3	—	18	V
	V <sub>DD</sub> -V <sub>EE</sub>	—			3	—	18	
Control input voltage	V <sub>IN</sub>	—			V <sub>SS</sub>	—	V <sub>DD</sub>	V
Input/output voltage	V <sub>IN</sub> /V <sub>OUT</sub>	—			V <sub>EE</sub>	—	V <sub>DD</sub>	V

Note: The operating ranges must be maintained to ensure the normal operation of the device.  
Unused Control inputs must be tied to either V<sub>DD</sub> or V<sub>SS</sub>.

**RESTRICTIONS ON PRODUCT USE**

20070701-EN

- The information contained herein is subject to change without notice.
- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.  
In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc.
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document shall not be used or embedded to any downstream products of which manufacture, use and/or sale are prohibited under any applicable laws and regulations.
- Please contact your sales representative for product-by-product details in this document regarding RoHS compatibility. Please use these products in this document in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances. Toshiba assumes no liability for damage or losses occurring as a result of noncompliance with applicable laws and regulations.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

#### Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помошь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помошь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
