

### Atmel QT2 Xplained Pro

## Preface

Atmel® QT2 Xplained Pro kit is an extension board that enables the evaluation of a mutual capacitance touch surface using the Peripheral Touch Controller (PTC) module. The kit shows how easy it is to design a capacitive touch surface solution for the PTC without the need for any external components. The kit includes one board with a 4 by 4 touch surface and a 7 by 7 blue LED matrix for a visual feedback of the touch.

# 1. Introduction

## 1.1 Features

- QTouch®
  - 4x4 Mutual Capacitance matrix
- LEDs
  - 49 LED matrix
  - IS31FL3728 LED matrix controller from ISSI
- Xplained Pro hardware identification system

## 1.2 Kit Overview

Atmel QT2 Xplained Pro extension is designed specifically for Xplained Pro MCU boards featuring a MCU with a built-in peripheral touch controller.

The extension board can be used to explore the touch functions on the PTC module in mutual capacitance mode.

**Figure 1-1. QT2 Xplained Pro Extension Board**

## 2. Getting Started

### 2.1 Three Steps to Start Exploring the Atmel Xplained Pro Platform

1. Download and install [Atmel Studio](#).
2. Launch Atmel Studio.
3. Connect QT2 Xplained Pro to an Xplained Pro MCU board and connect a USB cable to DEBUG USB port on the Xplained Pro MCU board.

### 2.2 Connecting QT2 Xplained Pro to the Xplained Pro MCU Board

Atmel QT2 Xplained Pro has been designed to be connected to the header marked EXT1 and EXT2 on the Xplained Pro MCU board.

Development of touch applications will require that you download and install the [Atmel QTouch Library](#) and [Atmel QTouch Composer](#) from the extension gallery in [Atmel Studio](#).

Once the Xplained Pro MCU board is powered the green power LED will be lit and Atmel Studio will auto detect which Xplained Pro MCU- and extension board(s) that is connected. Atmel Studio will present relevant information like datasheets and kit documentation. The kit landing page in Atmel Studio also have the option to launch Atmel Software Framework (ASF) example applications for the kit. The target device is programmed and debugged by the on-board Embedded Debugger. No external programmer or debugger tool is needed.

### 2.3 Design Documentation and Related Links

The following list contains links to the most relevant documents and software for QT2 Xplained Pro.

1. [Xplained Pro products](#)<sup>1</sup> - Atmel Xplained Pro is a series of small-sized and easy-to-use evaluation kits for Atmel AVR<sup>®</sup> 8- and 32-bit microcontrollers. It consists of a series of low cost MCU boards for evaluation and demonstration of features and capabilities of different MCU families.
2. [QT2 Xplained Pro User Guide](#)<sup>2</sup> - PDF version of this User Guide.
3. [QT2 Xplained Pro Design Documentation](#)<sup>3</sup> - Package containing schematics, BOM, assembly drawings, 3D plots, layer plots etc.
4. [Atmel QTouch Library](#)<sup>4</sup> - QTouch Library for Atmel AVR and ARM<sup>®</sup>-based microcontrollers.
5. [Atmel QTouch Composer](#)<sup>5</sup> - Tool for developing capacitive buttons, sliders and wheels applications.
6. [Atmel Studio](#)<sup>6</sup> - Free Atmel IDE for development of C/C++ and assembler code for Atmel microcontrollers.
7. [Integrated Silicon Solution Inc.](#)<sup>7</sup> - IS31FL3728 LED matrix controller manufacturer homepage.

## 3. Xplained Pro

Xplained Pro is an evaluation platform that provides the full Atmel microcontroller experience. The platform consists of a series of Microcontroller (MCU) boards and extension boards that are integrated with Atmel Studio, have Atmel Software Framework (ASF) drivers and demo code, support data streaming and more. Xplained Pro MCU boards support a wide range of Xplained Pro extension boards that are connected through a set of standardized headers and connectors. Each extension board has an identification (ID) chip to uniquely identify which boards are mounted on a Xplained Pro MCU board. This information is used to present relevant user guides, application notes, datasheets, and example code through Atmel Studio. Available Xplained Pro MCU and extension boards can be purchased in the [Atmel Web Store](http://store.atmel.com/CBC.aspx?q=c:100113)<sup>1</sup>.

### 3.1 Hardware Identification System

All Xplained Pro compatible extension boards have an Atmel ATSHA204 CryptoAuthentication™ chip mounted. This chip contains information that identifies the extension with its name and some extra data. When an Xplained Pro extension board is connected to an Xplained Pro MCU board the information is read and sent to Atmel Studio. The Atmel Kits extension, installed with Atmel Studio, will give relevant information, code examples and links to relevant documents. [Table 3-1, “Xplained Pro ID Chip Content” on page 5](#) shows the data fields stored in the ID chip with example content.

**Table 3-1. Xplained Pro ID Chip Content**

Data field	Data type	Example content
Manufacturer	ASCII string	Atmel'\0'
Product Name	ASCII string	Segment LCD1 Xplained Pro'\0'
Product Revision	ASCII string	02'\0'
Product Serial Number	ASCII string	1774020200000010'\0'
Minimum Voltage [mV]	uint16_t	3000
Maximum Voltage [mV]	uint16_t	3600
Maximum Current [mA]	uint16_t	30

### 3.2 Standard Headers and Connectors

#### 3.2.1 Xplained Pro Standard Extension Header

All Xplained Pro kits have one or more dual row, 20-pin, 100mil extension headers. Xplained Pro MCU boards have male headers while Xplained Pro extensions have their female counterparts. Note that all pins are not always connected. However, all the connected pins follow the defined pin-out described in [Table 3-2, “Xplained Pro Extension Header” on page 5](#). The extension headers can be used to connect a wide variety of Xplained Pro extensions to Xplained Pro MCU boards and to access the pins of the target MCU on Xplained Pro MCU board directly.

**Table 3-2. Xplained Pro Extension Header**

Pin number	Name	Description
1	ID	Communication line to the ID chip on extension board.
2	GND	Ground.
3	ADC(+)	Analog to digital converter, alternatively positive part of differential ADC.
4	ADC(-)	Analog to digital converter, alternatively negative part of differential ADC.
5	GPIO1	General purpose I/O.
6	GPIO2	General purpose I/O.
7	PWM(+)	Pulse width modulation, alternatively positive part of differential PWM.
8	PWM(-)	Pulse width modulation, alternatively positive part of differential PWM.

<sup>1</sup> <http://store.atmel.com/CBC.aspx?q=c:100113>

Pin number	Name	Description
9	IRQ/GPIO	Interrupt request line and/or general purpose I/O.
10	SPI_SS_B/GPIO	Slave select for SPI and/or general purpose I/O.
11	TWI_SDA	Data line for two-wire interface. Always implemented, bus type.
12	TWI_SCL	Clock line for two-wire interface. Always implemented, bus type.
13	USART_RX	Receiver line of Universal Synchronous and Asynchronous serial Receiver and Transmitter.
14	USART_TX	Transmitter line of Universal Synchronous and Asynchronous serial Receiver and Transmitter.
15	SPI_SS_A	Slave select for SPI. Should be unique if possible.
16	SPI_MOSI	Master out slave in line of Serial peripheral interface. Always implemented, bus type.
17	SPI_MISO	Master in slave out line of Serial peripheral interface. Always implemented, bus type.
18	SPI_SCK	Clock for Serial peripheral interface. Always implemented, bus type.
19	GND	Ground.
20	VCC	Power for extension board.

## 4. Hardware User Guide

### 4.1 Headers and Connectors

#### 4.1.1 QT2 Xplained Pro Extension Headers

QT2 Xplained Pro implements two [Xplained Pro Standard Extension Header on page 5](#) marked with EXT1 and EXT2 in silkscreen. These headers make it possible to connect the board to a Xplained Pro MCU board with a MCU featuring a PTC module. The pin-out definition for the extension headers can be seen in [Table 4-1, “QT2 Xplained Pro Extension Header 1” on page 7](#) and [Table 4-2, “QT2 Xplained Pro Extension Header 2” on page 7](#).

The X-sensors of the touch pad is available on both EXT1 and EXT2 header on the kit for supporting Xplained Pro MCU kits with and without the EXT2 header.

**Table 4-1. QT2 Xplained Pro Extension Header 1**

Pin on EXT	Function	Description
1	ID	Communication line to ID chip.
2	GND	Ground
3	Y1	Y-line 1
4	Y2	Y-line 2
5	Y3	Y-line 3
6	Y4	Y-line 4
7	X1	X-line 1 (For use with MCU kits without EXT2 header)
8	X2	X-line 2 (For use with MCU kits without EXT2 header)
9	X3	X-line 3 (For use with MCU kits without EXT2 header)
10	X4	X-line 4 (For use with MCU kits without EXT2 header)
11	I2C SDA	
12	I2C SCL	
13	Not Connected	
14	Not Connected	
15	Not Connected	
16	Not Connected	
17	Not Connected	
18	Not Connected	
19	GND	Ground
20	VCC	Target supply voltage

**Table 4-2. QT2 Xplained Pro Extension Header 2**

Pin on EXT	Function	Description
1	Not Connected	
2	GND	Ground
3	X1	X-line 1 (For use with MCU kits with EXT2 header)
4	X2	X-line 2 (For use with MCU kits with EXT2 header)
5	X3	X-line 3 (For use with MCU kits with EXT2 header)
6	X4	X-line 4 (For use with MCU kits with EXT2 header)
7	PWM	PWM for IS31FL3728
8	Not Connected	
9	Not Connected	
10	Not Connected	

Pin on EXT	Function	Description
11	Not Connected	
12	Not Connected	
13	Not Connected	
14	Not Connected	
15	Not Connected	
16	Not Connected	
17	Not Connected	
18	Not Connected	
19	GND	Ground
20	Not Connected	

## 4.1.2 Peripherals

### 4.1.2.1 LEDs

There are 49 blue LEDs arranged in a 7x7 matrix on the QT2 Xplained Pro extension board that can be used to visualize a touch in the QTouch sensor. All LED's on the boards driven by the LED matrix driver (IS31FL3728), which is controlled by I<sup>2</sup>C. For detailed instruction how to interface the LED matrix driver, please refer to the devices datasheet at [ISSI on page 4](#).

### 4.1.2.2 Touch Sensors

QT2 Xplained Pro has one 4x4 mutual capacitance touch surface sensor that can be used as touchpad. Alternatively, the sensor can be configured as a 4 by 4 button array.

#### Note

---

This kit is only supported by Xplained Pro MCU boards that have a MCU with a built-in PTC and a matching pin out that connects all sensors of the extension. Currently supported MCU boards are *SAM D20 Xplained Pro*, *SAM D21 Xplained Pro*, and *SAM D11 Xplained Pro*.

---

## 5. Hardware Revision History and Known Issues

### 5.1 Identifying Product ID and Revision

The revision and product identifier of Xplained Pro boards can be found in two ways; through Atmel Studio or by looking at the sticker on the bottom side of the PCB.

By connecting a Xplained Pro MCU board to a computer with Atmel Studio running, an information window will pop up. The first six digits of the serial number, which is listed under kit details, contain the product identifier and revision. Information about connected Xplained Pro extension boards will also appear in the Atmel Kits window.

The same information can be found on the sticker on the bottom side of the PCB. Most kits will print the identifier and revision in plain text as *A09-nnnn\rr* where *nnnn* is the identifier and *rr* is the revision. Boards with limited space have a sticker with only a QR-code which contains a serial number string.

The serial number string has the following format:

```
"nnnnrrssssssssss"
n = product identifier
r = revision
s = serial number
```

The kit identifier for QT2 Xplained Pro is 2079.

### 5.2 Revision 2

Revision 2 of QT2 Xplained Pro (2079) is the initial released version, there are no known issues.

## 6. Document Revision History

Document revision	Date	Comment
42369A	01/2015	First release

## 7. Evaluation Board/Kit Important Notice

This evaluation board/kit is intended for use for **FURTHER ENGINEERING, DEVELOPMENT, DEMONSTRATION, OR EVALUATION PURPOSES ONLY**. It is not a finished product and may not (yet) comply with some or any technical or legal requirements that are applicable to finished products, including, without limitation, directives regarding electromagnetic compatibility, recycling (WEEE), FCC, CE or UL (except as may be otherwise noted on the board/kit). Atmel supplied this board/kit "AS IS," without any warranties, with all faults, at the buyer's and further users' sole risk. The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user indemnifies Atmel from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge and any other technical or legal concerns.

EXCEPT TO THE EXTENT OF THE INDEMNITY SET FORTH ABOVE, NEITHER USER NOR ATMEL SHALL BE LIABLE TO EACH OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.

No license is granted under any patent right or other intellectual property right of Atmel covering or relating to any machine, process, or combination in which such Atmel products or services might be or are used.

Unless specifically provided otherwise, Atmel products are not suitable for, and shall not be used in, automotive applications. Atmel products are not intended, authorized, or warranted for use as components in applications intended to support or sustain life.

SAFETY-CRITICAL, MILITARY, AND AUTOMOTIVE APPLICATIONS DISCLAIMER: Atmel products are not designed for and will not be used in connection with any applications where the failure of such products would reasonably be expected to result in significant personal injury or death ("Safety-Critical Applications") without an Atmel officer's specific written consent. Safety-Critical Applications include, without limitation, life support devices and systems, equipment or systems for the operation of nuclear facilities and weapons systems. Atmel products are not designed nor intended for use in military or aerospace applications or environments unless specifically designated by Atmel as military-grade. Atmel products are not designed nor intended for use in automotive applications unless specifically designated by Atmel as automotive-grade.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
