BERGQUIST GAP FILLER TGF 1100SF is a high performance, thermally conductive liquid gap filling material whichexhibits low modulus properties then cures to a soft,flexible eastomer, helping reduce thermal cycling stresses during operation and virtually eliminating stress during assembly of low-stress applications.

The mixed system will cure at ambient. BERGQUIST GAP FILLER TGF 1100SF offers infinite thickness variations with little or no stress to the sensitive components during or following assembly. BERGQUIST GAP FILLER TGF 1100SF is not intended for use in thermal interface applications requiring a mechanical structural bond.

TYPICAL APPLICATIONS

- Hard disk assemblies
- Silicone-sensitive electronics
- Filling various gaps between heat-generating devices to heat sink and housing
- Mechanical switching relay
- Silicone-sensitive optic components
- Dielectric for bare-leaded devices
