

Hermetic Infrared Emitting Diode

OP130 Series

Features:

- TO-46 hermetically sealed package
- Focused and non-focused optical light pattern
- Enhanced temperature range
- Mechanically and spectrally matched to other OPTEK devices
- Choice of power ranges
- Choice of narrow or wide irradiance pattern

Description:

Each **OP130** series device is a 935 nm gallium arsenide (GaAs) infrared LED mounted in a hermetically sealed TO-46 package that provides an enhanced temperature range with a variety of power ranges. The TO-46 housing also offers high power dissipation and superior protection for hostile environments.

Each **OP130** device has a narrow beam with an inclusive angle at half power points of 18°. Each **OP130W** series device has a broad irradiance pattern of 50° at half power points, providing relatively even illumination over a large area. *These devices are designed to efficiently operate with OP800, OP593, OP598 and OP599 phototransistors or the OP830 photodarlington.*

Please refer to Application Bulletins 208 and 210 for additional design information and reliability (degradation) data.

Custom electrical, wire and cabling and connectors are available. Contact your local representative or OPTEK for more information.

Applications:

- Non-contact reflective object sensor
- Assembly line automation
- Machine automation
- Machine safety
- End of travel sensor
- Door sensor
