

# Compact Power Connectors

*30 amps up to 450 amps*

**APP**  
Anderson Power Products®

Anderson Power Products®, an ISO 9001:2000 certified company, is a world leader in the design and manufacture of quick-disconnect power connectors. Our connectors are rated from 30 amps to 450 amps and up to 250 or 600 volts, AC/DC and comply with major worldwide specifications. With over one hundred years of power connection and device experience, we provide off-the-shelf and custom solutions for OEMs.

### Note:

- (1) For patent / trademark information, please see [www.andersonpower.com](http://www.andersonpower.com).
- (2) Use APP recommended crimp tooling. Crimping by other means may disturb contact position in the housing and / or produce high resistance in the mated connection, which can cause melting and other hazardous conditions. Please see [www.andersonpower.com](http://www.andersonpower.com), tooling section, for the recommendations, changes / additions and tips on connector crimping / soldering or preventative maintenance.
- (3)  All products in this catalog are RoHS compliant. For RoHS compliant information on individual part numbers, please see [www.andersonpower.com](http://www.andersonpower.com) for the RoHS lookup index tool.

### FEATURES

- **Positive latching**

*Integral latches with ergonomic release provide over 50 lbs retention*

- **Available in straight, right angle, panel mount, blind mate and bus bar styles**

*The flexibility of the PowerMod®HP system serves a broad range of electronics applications*

- **Touch safe female connectors**

*Provide IP20 protection for safe, energized use outside the electronics cabinet*

- **Polarized dual pole connectors with optional hex key**

*Dual pole housings prevent shorting from reverse mating and the optional hex key allows the user to create unique mating schemes*

- **Strain relief option**

*Reduces risk of wire insulation creep and reduces transmission of wire loads to contacts improving service life*

- **Low connector mating forces**

*Connectors are easily mated and un-mated*

- **Silver plated, high conductivity contacts**

*Offers greater longevity for high power, elevated temperature applications*

- **Ease of assembly**

*Intuitive design allows for simplicity of assembly*

### PRODUCT INFORMATION

PowerMod®HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry. The product family provides; cost effective reliability, superior safety and ergonomics, with broad design flexibility. The positive latch and optional strain relief of PowerMod®HP connectors ensure superior reliability. The contacts are extremely durable and rated for circuit interruption (true hot-pluggable). Our touch-safe female housing design with integral latch release presents a new standard for high power connector safety and ergonomics. The housings are black UL94 V-0 material with latches in blue for clear identification.

The PowerMod®HP family offers excellent design flexibility with the availability of 10 different connector types.

- Single Pole Straight Male
- Single Pole Right Angle Female
- Single Pole Straight Female
- Single Pole Bus Bar Mount
- Dual Pole Straight Male
- Dual Pole Right Angle Female
- Dual Pole Straight Female
- Dual Pole Female Blind Mate Panel Mount
- Dual Pole Male Panel Mount
- Dual Pole Male Blind Mate Panel Mount

All PowerMod®HP connectors are available in American and metric wire sizes for further design freedom. APP offers pneumatic and hydraulic bench tools as well as hand tools for the products which are also compatible with many third-party crimp tooling.

Applications: Back-Up Power, Power Supplies, Cellular Infrastructure, Telecommunications, Industrial Power.

# Connector Family - Series A

Single Pole Right Angle Female

Single Pole Male & Female

Bus Bar Mount

Dual Pole Right Angle Female

Dual Pole Male & Female

Dual Pole Panel Mount Male

Dual Pole Blindmate Female

Dual Pole Blindmate Male

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe, positive latching, PowerMod HP female connector design presents a new standard for high power connector safety. The ergonomic latch release is simple to operate and is colored blue for clear identification. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series A contacts are available in #6 to #2 American wire gauge and 16mm<sup>2</sup> to 35mm<sup>2</sup> metric wire sizes for global design freedom. Our optional strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe, positive latching, PowerMod HP female connector design presents a new standard for high power connector safety. The ergonomic latch release is simple to operate and is colored blue for clear identification. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series A contacts are available in #6 to #2 American wire gauge and 16mm<sup>2</sup> to 35mm<sup>2</sup> metric wire sizes for global design freedom. Our optional strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

### Features

- **Positive Latching**  
*Integral latches with ergonomic release provide over 50 lbs retention*
- **Touch safe female connectors**  
*Provides IP20 protection for safe, energized use outside the electronics cabinet*
- **High performance, hot pluggable female contacts**  
*Our patented design provides greater longevity for high power, elevated temperature applications*
- **Strain relief option**  
*Reduces risk of wire insulation creep and reduces transmission of wire loads to contacts improving service life*
- **Low connector mating forces**  
*Connectors are easily mated and un-mated*

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

### Features

- **Low connector mating forces**  
*Connectors are easily mated and un-mated*
- **Silver plated, high conductivity contacts**  
*Offers greater longevity for high power, elevated temperature applications*
- **Ease of assembly**  
*Intuitive design allows for simplicity of assembly*

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe, positive latching, PowerMod HP female connector design presents a new standard for high power connector safety. The ergonomic latch release is simple to operate and is colored blue for clear identification. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series A contacts are available in #6 to #2 American wire gauge and 16mm<sup>2</sup> to 35mm<sup>2</sup> metric wire sizes for global design freedom. Our optional strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

### Features

- **Positive latching**  
*Integral latches with ergonomic release provide over 50 lbs retention*
- **Strain relief option**  
*Reduces risk of wire insulation creep and reduces transmission of wire loads to contacts improving service life*
- **Low connector mating forces**  
*Connectors are easily mated and un-mated*
- **Silver plated, high conductivity contacts**  
*Offers greater longevity for high power, elevated temperature applications*
- **Ease of assembly**  
*Intuitive design allows for simplicity of assembly*

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe, positive latching, PowerMod HP female connector design presents a new standard for high power connector safety. The ergonomic latch release is simple to operate and is colored blue for clear identification. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series A contacts are available in #6 to #2 American wire gauge and 16mm<sup>2</sup> to 35mm<sup>2</sup> metric wire sizes for global design freedom. Our optional strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

### Features

- **Positive latching**  
*Integral latches with ergonomic release provide over 50 lbs retention*
- **Touch safe female connectors**  
*Provides IP20 protection for safe, energized use outside the electronics cabinet*
- **High performance, hot pluggable female contacts**  
*Our patented design provides greater longevity for high power, elevated temperature applications*
- **Strain relief option**  
*Reduces risk of wire insulation creep and reduces transmission of wire loads to contacts improving service life*
- **Low connector mating forces**  
*Connectors are easily mated and un-mated*

Our \*strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

\* Strain relief not optional on right angle

### Features

- **Right angle connector**  
*Offers short mated length for tight wiring applications*
- **Positive latching**  
*Integral Latches with ergonomic release provide over 50 lbs retention*
- **Touch safe female connectors**  
*Provides IP20 protection for safe, energized use outside the electronics cabinet*
- **High performance, hot pluggable female contacts**  
*Our patented design provides greater longevity for high power, elevated temperature applications*
- **Low connector mating forces**  
*Connectors are easily mated and un-mated*

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe PowerMod HP female panel connector is designed for high power connector safety. Male panel connectors are designed for blind mating with female panel connectors or positive latching with female cable connectors. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series A contacts are available in #6 to #2 American wire gauge and 16mm² to 35mm² metric wire sizes for global design freedom.

Our optional blind mating hardware accommodates up to +/- .125" (3mm) of misalignment and is available for both male and female panel connectors.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

### Features

- **Positive latching**

*Integral Latches with ergonomic release provide over 50 lbs retention*

- **Low connector mating forces**

*Connectors are easily mated and un-mated*

- **Blind mate panel mount option**

*Provides over +/- .125" (3mm) of float mount capability*

- **Ease of assembly**

*Intuitive design allows for simplicity of assembly*

# PowerMod® HP

## Dual Pole Panel Mount

### Blind Mate Female - Series A

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe PowerMod HP female panel connector is designed for high power connector safety. Male panel connectors are designed for blind mating with female panel connectors or positive latching with female cable connectors. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series A contacts are available in #6 to #2 American wire gauge and 16mm<sup>2</sup> to 35mm<sup>2</sup> metric wire sizes for global design freedom.

Our optional blind mating hardware accommodates up to +/- .125" (3mm) of misalignment and is available for both male and female panel connectors.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

## Features

- **Blind mate panel mount option**  
*Provides over +/- .125" (3mm) of float mount capability*
- **Touch safe female connectors**  
*Provides IP20 protection for safe, energized use outside the electronics cabinet*
- **High performance, hot pluggable female contacts**  
*Our patented design provides greater longevity for high power, elevated temperature applications*
- **Low connector mating forces**  
*Connectors are easily mated and un-mated*
- **Ease of assembly**  
*Intuitive design allows for simplicity of assembly*

### FEATURES

- **Positive latching**

*Integral latches with ergonomic release provide over 50 lbs retention*

- **Available in straight, right angle, panel mount, blind mate and bus bar styles**

*The flexibility of the PowerMod®HP system serves a broad range of electronics applications*

- **Touch safe female connectors**

*Provide IP20 protection for safe, energized use outside the electronics cabinet*

- **Polarized dual pole connectors with optional hex key**

*Dual pole housings prevent shorting from reverse mating and the optional hex key allows the user to create unique mating schemes*

- **Strain relief option**

*Reduces risk of wire insulation creep and reduces transmission of wire loads to contacts improving service life*

- **Low connector mating forces**

*Connectors are easily mated and un-mated*

- **Silver plated, high conductivity contacts**

*Offers greater longevity for high power, elevated temperature applications*

- **Ease of assembly**

*Intuitive design allows for simplicity of assembly*

### PRODUCT INFORMATION

PowerMod®HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry. The product family provides; cost effective reliability, superior safety and ergonomics, with broad design flexibility. The positive latch and optional strain relief of PowerMod®HP connectors ensure superior reliability. The contacts are extremely durable and rated for circuit interruption (true hot-pluggable). Our touch-safe female housing design with integral latch release presents a new standard for high power connector safety and ergonomics. The housings are black UL94 V-0 material with latches in blue for clear identification.

The PowerMod®HP family offers excellent design flexibility with the availability of 10 different connector types.

- Single Pole Straight Male
- Single Pole Right Angle Female
- Single Pole Straight Female
- Single Pole Bus Bar Mount
- Dual Pole Straight Male
- Dual Pole Right Angle Female
- Dual Pole Straight Female
- Dual Pole Female Blind Mate Panel Mount
- Dual Pole Male Panel Mount
- Dual Pole Male Blind Mate Panel Mount

All PowerMod®HP connectors are available in American and metric wire sizes for further design freedom. APP offers pneumatic and hydraulic bench tools as well as hand tools for the products which are also compatible with many third-party crimp tooling.

Applications: Back-Up Power, Power Supplies, Cellular Infrastructure, Telecommunications, Industrial Power.

# Connector Family - Series B

Single Pole Right Angle Female

Single Pole Male & Female

Bus Bar Mount

Dual Pole Right Angle Female

Dual Pole Male & Female

Dual Pole Panel Mount Male

Dual Pole Blindmate Female

Dual Pole Blindmate Male

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe, positive latching, PowerMod HP female connector design presents a new standard for high power connector safety. The ergonomic latch release is simple to operate and is colored blue for clear identification. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series B contacts are available in 1/0 to 4/0 American wire gauge and 50mm² to 95mm² metric wire sizes for global design freedom. Our optional strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

### Features

- **Positive latching**  
*Integral latches with ergonomic release provide over 50 lbs retention*
- **Strain relief option**  
*Reduces risk of wire insulation creep and reduces transmission of wire loads to contacts improving service life*
- **Low connector mating forces**  
*Connectors are easily mated and unmated*
- **Silver plated, high conductivity contacts**  
*Offers greater longevity for high power, elevated temperature applications*
- **Ease of assembly**  
*Intuitive design allows for simplicity of assembly*

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe, positive latching, PowerMod HP female connector design presents a new standard for high power connector safety. The ergonomic latch release is simple to operate and is colored blue for clear identification. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series B contacts are available in 1/0 to 4/0 American wire gauge and 50mm² to 95mm² metric wire sizes for global design freedom. Our optional strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

### Features

- **Positive Latching**

*Integral latches with ergonomic release provide over 50 lbs retention*

- **Touch safe female connectors**

*Provides IP20 protection for safe, energized use outside the electronics cabinet*

- **High performance, hot pluggable female contacts**

*Our patented design provides greater longevity for high power, elevated temperature applications*

- **Strain relief option**

*Reduces risk of wire insulation creep and reduces transmission of wire loads to contacts improving service life*

- **Low connector mating forces**

*Connectors are easily mated and unmated*

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe, positive latching, PowerMod HP female connector design presents a new standard for high power connector safety. The ergonomic latch release is simple to operate and is colored blue for clear identification. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series B contacts are available in 1/0 to 4/0 American wire gauge and 50mm<sup>2</sup> to 95mm<sup>2</sup> metric wire sizes for global design freedom. Our \*strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

\* Strain relief not optional on right angle

### Features

- **Right angle connector**  
*Offers short mated length for tight wiring applications*
- **Positive latching**  
*Integral Latches with ergonomic release provide over 50 lbs retention*
- **Touch safe female connectors**  
*Provides IP20 protection for safe, energized use outside the electronics cabinet*
- **High performance, hot pluggable female contacts**  
*Our patented design provides greater longevity for high power, elevated temperature applications*
- **Low connector mating forces**  
*Connectors are easily mated and un-mated*

Single Pole Right  
Angle Female

Single Pole Female

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe, positive latching, PowerMod HP female connector design presents a new standard for high power connector safety. The ergonomic latch release is simple to operate and is colored blue for clear identification. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series B contacts are available in 1/0 to 4/0 American wire gauge and 50mm² to 95mm² metric wire sizes for global design freedom. Our optional strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

### Features

- **Positive latching**  
*Integral latches with ergonomic release provide over 50 lbs retention*
- **Strain relief option**  
*Reduces risk of wire insulation creep and reduces transmission of wire loads to contacts improving service life*
- **Low connector mating forces**  
*Connectors are easily mated and un-mated*
- **Silver plated, high conductivity contacts**  
*Offers greater longevity for high power, elevated temperature applications*
- **Ease of assembly**  
*Intuitive design allows for simplicity of assembly*

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe, positive latching, PowerMod HP female connector design presents a new standard for high power connector safety. The ergonomic latch release is simple to operate and is colored blue for clear identification. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series B contacts are available in 1/0 to 4/0 American wire gauge and 50mm² to 95mm² metric wire sizes for global design freedom. Our \*strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

### Features

- **Right angle connector**  
*Offers short mated length for tight wiring applications*
- **Positive latching**  
*Integral Latches with ergonomic release provide over 50 lbs retention*
- **Touch safe female connectors**  
*Provides IP20 protection for safe, energized use outside the electronics cabinet*
- **High performance, hot pluggable female contacts**  
*Our patented design provides greater longevity for high power, elevated temperature applications*
- **Low connector mating forces**  
*Connectors are easily mated and un-mated*

\* Strain relief not optional on right angle

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe PowerMod HP female panel connector is designed for high power connector safety. Male panel connectors are designed for blind mating with female panel connectors or positive latching with female cable connectors. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series B contacts are available in 1/0 to 4/0 American wire gauge and 50mm² to 95mm² metric wire sizes for global design freedom.

Our optional blind mating hardware accommodates up to +/- .125" (3mm) of misalignment and is available for both male and female panel connectors.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

### Features

- **Positive latching**  
*Integral Latches with ergonomic release provide over 50 lbs retention*
- **Low connector mating forces**  
*Connectors are easily mated and un-mated*
- **Blind mate panel mount option**  
*Provides over +/- .125" (3mm) of float mount capability*
- **Ease of assembly**  
*Intuitive design allows for simplicity of assembly*

# PowerMod® HP

## Dual Pole Panel Mount

### Blind Mate Female - Series B

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe PowerMod HP female panel connector is designed for high power connector safety. Male panel connectors are designed for blind mating with female panel connectors or positive latching with female cable connectors. Housings are a black UL94 V-0 flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Series B contacts are available in 1/0 to 4/0 American wire gauge and 50mm² to 95mm² metric wire sizes for global design freedom.

Our optional blind mating hardware accommodates up to +/- .125" (3mm) of misalignment and is available for both male and female panel connectors.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

## Features

- **Blind mate panel mount option**  
*Provides over +/- .125" (3mm) of float mount capability*
- **Touch safe female connectors**  
*Provides IP20 protection for safe, energized use outside the electronics cabinet*
- **High performance, hot pluggable female contacts**  
*Our patented design provides greater longevity for high power, elevated temperature applications*
- **Low connector mating forces**  
*Connectors are easily mated and un-mated*
- **Ease of assembly**  
*Intuitive design allows for simplicity of assembly*

### FEATURES

- **Mixed power and signal contacts**

*Use of a single connector simplifies system tolerances and manufacturing*

- **Industry standard contacts**

*Allows for cross mating with competitive product*

- **Wide selection of contact termination**

*Provides the designer a wide variety of packaging options*

- **First-mate and last-mate capability**

*Grounds and powers the system before mating of signal circuits*

- **Integral guide pins**

*Corrects misalignment during blind mating*

- **Optional floating mount**

*Reduces fatiguing stress on connectors during blindmating*

### PRODUCT INFORMATION

Anderson Power Products new line of power drawer series connectors gives our customers more selections than ever, to meet their power connector needs. These cost effective, mixed power and signal drawer connectors are manufactured using the same high quality standards that have made APP a leader in the power connector industry for years. The 35 and 75 amp Power Drawer connectors are a cost-effective, mixed power and signal drawer connector. The connectors are used on "N + 1" power supply and inverter systems.

APP's versatile Power Drawer connectors offers the designer a wide variety of options. The 75 amp Power Drawer can be configured with up to four #8 AWG, nine #12 AWG and twenty-four #20 AWG contacts. Both pin and socket contacts are available with crimp, solder cup or printed circuit board termination. The 35 amp Power Drawer can be configured with up to eight #12 AWG, eight #16 AWG, four #16 AWG, four #12 AWG and twenty-one #20 AWG contacts. Both connectors can be cross-mated with competitor product.

The connector's pin contacts can also be specified for first-mate and last-mate connection. This allows the electronic system to be grounded and mating electronically verified, before the power circuits are energized. The APP Power Drawer connectors also feature integral guide pins, which correct misalignment during blind mating. Additionally, the connector offers an optional floating mount, reducing the fatigue stress on the connector during blind mating. The drawer series can be used for a wide range of drawer-type applications such as rectifiers, inverters, mainframe computers, servers telecommunications and network equipment.

Anderson Power Products new line of power drawer series connectors gives our customers more selections than ever to meet their power connector needs. These cost effective, mixed power and signal drawer connectors are manufactured using the same high quality standards that have made APP a leader in the power connector industry for years. The drawer series can be used for a wide range of drawer-type applications such as rectifiers, mainframe computers, telecommunications, and network equipment. If power and signal is required, let Anderson Power Products be "Your Best Connection."

## FEATURES

- **Industry standard contacts**  
*Allows for cross mating with competitive product*
- **Wide selection of contact termination**  
*Provides the designer a wide variety of packaging options*
- **First-mate and last-mate capability**  
*Grounds and powers the system before mating of signal circuits*
- **Integral guide pins**  
*Corrects misalignment during blind mating*

## WIRE/TOOLING INFORMATION

### Wire Strip Length

The following table represents Anderson Power Products recommended strip lengths for the wire.

| Contact Size | Wire Size | Strip Length |      |
|--------------|-----------|--------------|------|
|              |           | inches       | mm   |
| #20          | #24 - #20 | .21          | 5.33 |
| #16          | #20 - #16 | .27          | 6.86 |
| #12          | #14 - #12 | .27          | 6.86 |

### Tooling

The following table represents the crimp tooling recommended for crimp contacts. Consult APP factory for ordering information.

| Part Number | Description                                               |             |
|-------------|-----------------------------------------------------------|-------------|
| PM1000G1    | Four indent hand tool                                     |             |
| PM1001G1    | Loose crimp piece machine - semi automatic                |             |
| Size (AWG)  | Type                                                      | MIL-STD     |
| 12 to 24    | Crimp Tool                                                | M22520/1-01 |
|             | Turret Head and Locator                                   | M22520/1-02 |
| 100G1       | Insertion & Removal Tool Kit (#12, #16, #20 AWG contacts) |             |

## WIRE/TOOLING INFORMATION

### Wire Strip Length

The following table represents Anderson Power Products recommended strip lengths for the wire.

| Contact Size | Wire Size | inches | mm   |
|--------------|-----------|--------|------|
| #20          | #24 - #20 | 0.21   | 5.3  |
| #12          | #14 - #12 | 0.27   | 6.9  |
| #8           | #10 - #8  | 0.50   | 12.7 |

### Tooling

The following table represents the crimp tooling recommended for crimp contacts. Consult APP factory for ordering information.

| Part Number | Description                                              | Size             |
|-------------|----------------------------------------------------------|------------------|
| PM1000G1    | Four indent hand tool                                    | 12 AWG to 24 AWG |
| PM1001G1    | Loose crimp piece machine                                | 12 AWG to 24 AWG |
| Size        | Type                                                     | MIL-STD          |
| 12 to 24    | Crimp Tool                                               | M22520/1-01      |
|             | Turret Head and Locator                                  | M22520/1-02      |
| 8 to 10     | Crimp Tool                                               | M22520/23-01     |
|             | Indenter Head                                            | M22520/23-02     |
|             | Locator                                                  | M22520/23-09     |
| 100G2       | Insertion & Removal Tool Kit (#8, #12, #20 AWG contacts) |                  |

## DIMENSIONS

### Housing Dimensions

|        | -A-   | -B-   | -C-   | -D-   | -E-  |

[www.andersonpower.com](http://www.andersonpower.com)

## FEATURES

- **High performance #16 contact**  
*Rated to 30 amps per UL 1977 and IEC512-3 test 5a*
- **Mechanical polarized housings**  
*Housings only mate one-way, ensuring proper circuit mating*
- **PCB, panel or cable mounting**  
*Product flexibility for a wide variety of system packaging*
- **Optional positive latches and back shells**  
*Provides additional safety and security*
- **Optional sequential contact mating**  
*Up to 4 pin contact lengths can be specified to create Make First / Break Last and Make Last / Break First circuits*

## PRODUCT INFORMATION

The Anderson Power Product's PowerMod® connector family was developed to provide a high density power connector system with maximum design flexibility.

The product family is available in 13 sizes:

- Single row 3, 4, 6 and 8 circuit connector
- Two row 6, 8, 12 and 16 circuit connectors
- Three row 9, 12, 18, 24 and 30 circuit connectors

The PowerMod® connector family can be configured for almost any application;

- Male PCB solder mount straight and right angle
- Female PCB solder mount straight and right angle
- Male cable to cable straight
- Female cable to cable straight

The product family also offers optional positive latches, back shells and panel mounting clips.

The PowerMod® connector family offers even more application flexibility with up to four sequential pin mating options for Mate First / Break Last and Make Last / Break First circuits.

All Data Subject To Change Without Notice

The PowerMod® connector family offers minimum size and high power. The high performance contacts and insulator are rated for 30 amps continuous. Applications requiring lower operating temperatures can be de-rated using our current-temperature chart.

The one row female PowerMod connectors are offered in 3, 4, 6 and 8 circuit sizes. The connectors are available with straight crimp, straight PCB or right angle PCB contacts.

APP connectors are manufactured using the finest materials and world-class manufacturing processes. They embody the highest quality in the industry and meet all applicable industry standards.

## FEATURES

### • High performance contacts

*Rated to 30 amps per IEC 512-3*

### • Mechanically polarized housings

*Only mate one-way, ensuring proper mating*

### • High reliability positive retention latches

*Are made from stainless steel to provide optimum performance*

### • PCB, panel or cable mounting

*A wide variety of contact styles with optional mounting brackets, panel clips and back-shell hoods provide broad design flexibility*

PCB contacts and mounting accessories are designed for a board thickness of 1.60mm (.063) with a contact protrusion of 2.10 (.083).  
Other contact lengths are available upon request.

All Data Subject To Change Without Notice

The PowerMod® connector family offers minimum size and high power. The high performance contacts and insulator are rated for 30 amps continuous. Applications requiring lower operating temperatures can be de-rated using our current-temperature chart.

The one row male PowerMod connectors are offered in 3, 4, 6 and 8 circuit sizes. The connectors are available with straight crimp, straight PCB or right angle PCB contacts.

APP connectors are manufactured using the finest materials and world-class manufacturing processes. They embody the highest quality in the industry and meet all applicable industry standards.

## FEATURES

- Mechanically polarized housings

*Only mate one-way, ensuring proper mating*

- **High reliability positive retention latches**

*Are made from stainless steel to provide optimum performance*

- PCB, panel or cable mounting

*A wide variety of contact styles with optional mounting brackets, panel clips and back-shell hoods provide broad design flexibility*

- **Optional sequential contact mating**

4 pin contact lengths can be custom specified for make-first/break-last or make-last/break-first circuits

PCB contacts and mounting accessories are designed for a board thickness of 1.60mm (.063) with a contact protrusion of 2.10 (.083). Other contact lengths are available upon request.

All Data Subject To Change Without Notice

The PowerMod® connector family offers minimum size and high power. The high performance contacts and insulator are rated for 30 amps continuous. Applications requiring lower operating temperatures can be de-rated using our current-temperature chart.

The two row female PowerMod connectors are offered in 6, 8, 12 and 16 circuit sizes. The connectors are available with straight crimp, straight PCB or right angle PCB contacts.

APP connectors are manufactured using the finest materials and world-class manufacturing processes. They embody the highest quality in the industry and meet all applicable industry standards.

### FEATURES

- **High performance contacts**  
*Rated to 30 amps per IEC 512-3*
- **Mechanically polarized housings**  
*Only mate one-way, ensuring proper mating*
- **High reliability positive retention latches**  
*Are made from stainless steel to provide optimum performance*
- **PCB, panel or cable mounting**  
*A wide variety of contact styles with optional mounting brackets, panel clips and back-shell hoods provide broad design flexibility*

## ORDERING INFORMATION

### With Latch

| Part Number | Description                       |
|-------------|-----------------------------------|
| PM206FRALOO | 2x3 FEMALE Right Angle PCB Solder |
| PM208FRALOO | 2x4 FEMALE Right Angle PCB Solder |
| PM212FRALOO | 2x6 FEMALE Right Angle PCB Solder |
| PM216FRALOO | 2x8 FEMALE Right Angle PCB Solder |

### No Latch

| Part Number | Description                       |
|-------------|-----------------------------------|
| PM206FRAOOO | 2x3 FEMALE Right Angle PCB Solder |
| PM208FRAOOO | 2x4 FEMALE Right Angle PCB Solder |
| PM212FRAOOO | 2x6 FEMALE Right Angle PCB Solder |
| PM216FRAOOO | 2x8 FEMALE Right Angle PCB Solder |

### Right Angle PCB Snap Bracket & Latch

| Part Number | Description                       |
|-------------|-----------------------------------|
| PM206FRALSB | 2x3 FEMALE Right Angle PCB Solder |
| PM208FRALSB | 2x4 FEMALE Right Angle PCB Solder |
| PM212FRALSB | 2x6 FEMALE Right Angle PCB Solder |
| PM216FRALSB | 2x8 FEMALE Right Angle PCB Solder |

### Right Angle PCB Snap Bracket & No Latch

| Part Number | Description                       |
|-------------|-----------------------------------|
| PM206FRAOSB | 2x3 FEMALE Right Angle PCB Solder |
| PM208FRAOSB | 2x4 FEMALE Right Angle PCB Solder |
| PM212FRAOSB | 2x6 FEMALE Right Angle PCB Solder |
| PM216FRAOSB | 2x8 FEMALE Right Angle PCB Solder |

### Right Angle PCB Bracket With Hole & Latch

| Part Number | Description                       |
|-------------|-----------------------------------|
| PM206FRALHB | 2x3 FEMALE Right Angle PCB Solder |
| PM208FRALHB | 2x4 FEMALE Right Angle PCB Solder |
| PM212FRALHB | 2x6 FEMALE Right Angle PCB Solder |
| PM216FRALHB | 2x8 FEMALE Right Angle PCB Solder |

### Right Angle PCB Bracket With Hole & No Latch

| Part Number | Description                       |
|-------------|-----------------------------------|
| PM206FRAOHB | 2x3 FEMALE Right Angle PCB Solder |
| PM208FRAOHB | 2x4 FEMALE Right Angle PCB Solder |
| PM212FRAOHB | 2x6 FEMALE Right Angle PCB Solder |
| PM216FRAOHB | 2x8 FEMALE Right Angle PCB Solder |

PCB contacts and mounting accessories are designed for a board thickness of 1.60mm (.063) with a contact protrusion of 2.10 (.083).  
Other contact lengths are available upon request.

# Two Row Straight PCB (female)

## DIMENSIONS - mm(in.)

### 2 Row - PCB Straight Solder Connector

### 2 Row - PCB Hole Layout For Straight Solder Connector

[www.andersonpower.com](http://www.andersonpower.com)

The PowerMod® connector family offers minimum size and high power. The high performance contacts and insulator are rated for 30 amps continuous. Applications requiring lower operating temperatures can be de-rated using our current-temperature chart.

The three row male PowerMod connectors are offered in 6, 8, 12 and 16 circuit sizes. The connectors are available with straight crimp, straight PCB or right angle PCB contacts.

APP connectors are manufactured using the finest materials and world-class manufacturing processes. They embody the highest quality in the industry and meet all applicable industry standards.

## FEATURES

- Mechanically polarized housings

Only mate one-way, ensuring proper mating

- **High reliability positive retention latches**

*Are made from stainless steel to provide optimum performance*

- PCB, panel or cable mounting

*A wide variety of contact styles with optional mounting brackets, panel clips and back-shell hoods provide broad design flexibility*

- **Optional sequential contact mating**

4 pin contact lengths can be custom specified for make-first/break-last or make-last/break-first circuits

## SPECIFICATIONS

## Electrical

|                                   |                    |

| 2 - 16           | 53.5      | 2.11 |

See accessory section for panel clip and mounting clip cut-out dimensions.

## ORDERING INFORMATION

### Cable Connector

| Part<br>Number | Description              |
|----------------|--------------------------|
| PM206MOOLOO    | 2x3 MALE Cable Connector |
| PM208MOOLOO    | 2x4 MALE Cable Connector |
| PM212MOOLOO    | 2x6 MALE Cable Connector |
| PM216MOOLOO    | 2x8 MALE Cable Connector |

### Panel Mount With Mounting Clip

| Part<br>Number | Description              |
|----------------|--------------------------|
| PM206MOOLMC    | 2x3 MALE Cable Connector |
| PM208MOOLMC    | 2x4 MALE Cable Connector |
| PM212MOOLMC    | 2x6 MALE Cable Connector |
| PM216MOOLMC    | 2x8 MALE Cable Connector |

### With Clam Shell Hood & Strain Relief

| Part<br>Number | Description              |
|----------------|--------------------------|
| PM206MOOLCH    | 2x3 MALE Cable Connector |
| PM208MOOLCH    | 2x4 MALE Cable Connector |
| PM212MOOLCH    | 2x6 MALE Cable Connector |
| PM216MOOLCH    | 2x8 MALE Cable Connector |

### Panel Mount With Screws

| Part<br>Number | Description              |
|----------------|--------------------------|
| PM206MOOLSC    | 2x3 MALE Cable Connector |
| PM208MOOLSC    | 2x4 MALE Cable Connector |
| PM212MOOLSC    | 2x6 MALE Cable Connector |
| PM216MOOLSC    | 2x8 MALE Cable Connector |

### With Snap-in Panel Clip

| Part<br>Number | Description              |
|----------------|--------------------------|
| PM206MOOLPC    | 2x3 MALE Cable Connector |
| PM208MOOLPC    | 2x4 MALE Cable Connector |
| PM212MOOLPC    | 2x6 MALE Cable Connector |
| PM216MOOLPC    | 2x8 MALE Cable Connector |

## ORDERING INFORMATION

### With Latch

| Part Number | Description                     |
|-------------|---------------------------------|
| PM206MRALOO | 2x3 MALE Right Angle PCB Solder |
| PM208MRALOO | 2x4 MALE Right Angle PCB Solder |
| PM212MRALOO | 2x6 MALE Right Angle PCB Solder |
| PM216MRALOO | 2x8 MALE Right Angle PCB Solder |

### No Latch

| Part Number | Description                     |
|-------------|---------------------------------|
| PM206MRAOOO | 2x3 MALE Right Angle PCB Solder |
| PM208MRAOOO | 2x4 MALE Right Angle PCB Solder |
| PM212MRAOOO | 2x6 MALE Right Angle PCB Solder |
| PM216MRAOOO | 2x8 MALE Right Angle PCB Solder |

### Right Angle PCB Snap Bracket & Latch

| Part Number | Description                     |
|-------------|---------------------------------|
| PM206MRALSB | 2x3 MALE Right Angle PCB Solder |
| PM208MRALSB | 2x4 MALE Right Angle PCB Solder |
| PM212MRALSB | 2x6 MALE Right Angle PCB Solder |
| PM216MRALSB | 2x8 MALE Right Angle PCB Solder |

### Right Angle Latch PCB Snap Bracket & No Latch

| Part Number | Description                     |
|-------------|---------------------------------|
| PM206MRAOSB | 2x3 MALE Right Angle PCB Solder |
| PM208MRAOSB | 2x4 MALE Right Angle PCB Solder |
| PM212MRAOSB | 2x6 MALE Right Angle PCB Solder |
| PM216MRAOSB | 2x8 MALE Right Angle PCB Solder |

### Right Angle PCB Bracket With Hole & Latch

| Part Number | Description                     |
|-------------|---------------------------------|
| PM206MRALHB | 2x3 MALE Right Angle PCB Solder |
| PM208MRALHB | 2x4 MALE Right Angle PCB Solder |
| PM212MRALHB | 2x6 MALE Right Angle PCB Solder |
| PM216MRALHB | 2x8 MALE Right Angle PCB Solder |

### Right Angle PCB Bracket With Hole & No Latch

| Part Number | Description                     |
|-------------|---------------------------------|
| PM206MRAOHB | 2x3 MALE Right Angle PCB Solder |
| PM208MRAOHB | 2x4 MALE Right Angle PCB Solder |
| PM212MRAOHB | 2x6 MALE Right Angle PCB Solder |
| PM216MRAOHB | 2x8 MALE Right Angle PCB Solder |

PCB contacts and mounting accessories are designed for a board thickness of 1.60mm (.063) with a contact protrusion of 2.10 (.083).  
Other contact lengths are available upon request.

## Two Row Straight PCB (male)

## DIMENSIONS - mm(in.)

## 2 Row - PCB Straight Solder Connector

### 2 Row - PCB Hole Layout For Straight Solder Connector

| 2 - 16           | 53.5 | 2.11 | 35 | 1.38 | 47.3 | 1.86 |

## ORDERING INFORMATION

## With Latch

| Part Number | Description                  |
|-------------|------------------------------|
| PM206MBALOO | 2x3 MALE Straight PCB Solder |
| PM208MBALOO | 2x4 MALE Straight PCB Solder |
| PM212MBALOO | 2x6 MALE Straight PCB Solder |
| PM216MBALOO | 2x8 MALE Straight PCB Solder |

## No Latch

| Part Number | Description                 |
|-------------|-----------------------------|
| PM206MBA000 | 2x3 PIN Straight PCB Solder |
| PM208MBA000 | 2x4 PIN Straight PCB Solder |
| PM212MBA000 | 2x6 PIN Straight PCB Solder |
| PM216MBA000 | 2x8 PIN Straight PCB Solder |

### Push On PCB Fastener & Latch

| Part Number | Description                  |
|-------------|------------------------------|
| PM206MBALSP | 2x3 MALE Straight PCB Solder |
| PM208MBALSP | 2x4 MALE Straight PCB Solder |
| PM212MBALSP | 2x6 MALE Straight PCB Solder |
| PM216MBALSP | 2x8 MALE Straight PCB Solder |

### Push On PCB Fastener & No Latch

| Part Number | Description                 |
|-------------|-----------------------------|
| PM206MBAOSP | 2x3 PIN Straight PCB Solder |
| PM208MBAOSP | 2x4 PIN Straight PCB Solder |
| PM212MBAOSP | 2x6 PIN Straight PCB Solder |
| PM216MBAOSP | 2x8 PIN Straight PCB Solder |

## Self-tapping Screws For PCB Mount & Latch

| Part Number | Description                  |
|-------------|------------------------------|
| PM206MBALST | 2x3 MALE Straight PCB Solder |
| PM208MBALST | 2x4 MALE Straight PCB Solder |
| PM212MBALST | 2x6 MALE Straight PCB Solder |
| PM216MBALST | 2x8 MALE Straight PCB Solder |

### Self-tapping Screws For PCB Mount & No Latch

| Part Number | Description                 |
|-------------|-----------------------------|
| PM206MBAOST | 2x3 PIN Straight PCB Solder |
| PM208MBAOST | 2x4 PIN Straight PCB Solder |
| PM212MBAOST | 2x6 PIN Straight PCB Solder |
| PM216MBAOST | 2x8 PIN Straight PCB Solder |

PCB contacts and mounting accessories are designed for a board thickness of 1.60mm (.063) with a contact protrusion of 2.10 (.083). Other contact lengths are available upon request.

The PowerMod® connector family offers minimum size and high power. The high performance contacts and insulator are rated for 30 amps continuous. Applications requiring lower operating temperatures can be de-rated using our current-temperature chart.

The three row female PowerMod connectors are offered in 9, 12, 18, 24 and 30 circuit sizes. The connectors are available with straight crimp, straight PCB or right angle PCB contacts.

APP connectors are manufactured using the finest materials and world-class manufacturing processes. They embody the highest quality in the industry and meet all applicable industry standards.

### FEATURES

- **High performance contacts**

*Rated to 30 amps per IEC 512-3*

- **Mechanically polarized housings**

*Only mate one-way, ensuring proper mating*

- **High reliability positive retention latches**

*Are made from stainless steel to provide optimum performance*

- **PCB, panel or cable mounting**

*A wide variety of contact styles with optional mounting brackets, panel clips and back-shell hoods provide broad design flexibility*

### SPECIFICATIONS

#### Electrical

Current rating

IEC 512-3, UL 1977

30 Amps

Voltage Rating UL & CSA

600 Volts (AC/DC)

Creepage/Clearance Distance

3.2 mm (.125") Min

Contact Resistance per IEC 512-2

3 milliohms

Dielectric Strength per IEC 512-2

2200 V

Contact Wire Range (AWG)

#24 to #12

(mm²) \*

0.25 to 4.0

Operating Temperature Range °C

-55° to 180°

°F

-67° to 356°

File No. E26226

\* Stranding, IEC class 5 or lower

#### Mechanical

Connect/Disconnect Cycles

No Load per IEC 512-5

1000 cycles

Mating/Unmating Force per IEC 512-13

10 oz (3N) avg.

Contact Retention per IEC 512-8

18 lb (80N) Crimps

9 lb (40N) PCB Connector

#### Materials

Insulator

PPS UL94 V-0, material group IIIa

Socket Body

Copper alloy, 200 µ inch Sn Bright over Ni

Socket Contact

BeCu, 30 µ inch Au over Ni

Retention Clips

Stainless steel

Hoods

PBT UL94 V-0

### ORDERING INFORMATION

[www.andersonpower.com](http://www.andersonpower.com)

The PowerMod® connector family offers minimum size and high power. The high performance contacts and insulator are rated for 30 amps continuous. Applications requiring lower operating temperatures can be de-rated using our current-temperature chart.

The three row male PowerMod connectors are offered in 9, 12, 18, 24 and 30 circuit sizes. The connectors are available with straight crimp, straight PCB or right angle PCB contacts.

APP connectors are manufactured using the finest materials and world-class manufacturing processes. They embody the highest quality in the industry and meet all applicable industry standards.

## FEATURES

- **Mechanically polarized housings**  
*Only mate one-way, ensuring proper mating*
- **High reliability positive retention latches**  
*Are made from stainless steel to provide optimum performance*
- **PCB, panel or cable mounting**  
*A wide variety of contact styles with optional mounting brackets, panel clips and back-shell hoods provide broad design flexibility*
- **Optional sequential contact mating**  
*4 pin contact lengths can be custom specified for make-first/break-last or make-last/break-first circuits*

## SPECIFICATIONS

Standard Power Clip

Dual Pole Power Clip

Rocker Power Clip

## FEATURES

- **High 300A current rating**  
*Small size provides dense power packaging*
- **Mates with .125 inches or 3mm flat bus bar blade**  
*Simplifies construction and lowers cost*
- **Hot pluggable contact**  
*Supports hot swapping on 48 volt DC bus*
- **UL and CUR recognized**  
*Product safety and electrical performance has been verified to the highest standards*

## PRODUCT RANGE

### Materials

Housing: Polyester, UL 94 V-0

Contact Band: Beryllium copper alloy per C17200

Plating gold: 0.4 to 0.6 microns over 2 to 5 microns nickel

Contact Holder: Copper alloy C11000

Plating gold: 0.1 to 0.2 microns

### Electrical

Continuous Current Ratings (1):

300 amp maximum, 200 amp @30 °C

Voltage Rating UL & CSA up to 600V (AC/DC)

Hot Plug Ratings(2):

100 amp @48 volts

200 amp @ 42 volts

### Mechanical

Forces:

Insertion (lbs) - 10 to 20 maximum

Extraction (lbs) - 5 to 10 minimum

Mating Cycles:

Normal 500

Hot Plug 250

(1) Ratings using nickel plated tab

(2) Ratings using gold plated, solid copper tab

## PRODUCT INFORMATION

Anderson Power Products® (APP), a leader in power interconnect solutions, offers the Power Clip® connector as part of the diversified family of electrical power connectors. Designed as a low cost interconnection between two perpendicular power bus bars, the Power Clip® is used in "N+1" rectifier, power supply and switching power supply applications.

The high-performance contact of the Power Clip® provides low-voltage drop and superior amperage carrying capability. Because the clip accepts a solid .125 inches or 3mm thick nickel or gold plated rectangular bus bar tab, there is no need for a mating connector.

The Power Clip® has been evaluated to UL1977 and CSA standard C22.2 No. 182.3-M1987 and is rated for up to 300 amps of continuous service. The product is also UL approved for true hot plug current interruption of 100A at 48V and 200A at 42V using a gold bus bar tab.

File No. E26226

The Anderson Power Products Power Clip is designed as a low cost interconnection between two perpendicular power bus bars. The product's high performance contact offers low voltage drop and superior amperage carrying capability. There is no mating connector to the Power Clip as it accepts a solid .125 inches or 3mm thick nickel or gold plated rectangular bus bar tab.

The product is often used in "N+1" rectifier, power supply and switching power supply applications. The Power Clip's design enables the connector to be blind mated in the deepest racks.

The Power Clip is recognized to UL1977 and CSA standard C22.2 and is rated for up to 300 amps continuous service. The product is also UL approved for hot plug current interruption of 100A at 48V and 200A at 42V using a gold plated bus bar tab.

## FEATURES

- **High 300A current rating**  
*Small size provides dense power packaging*
- **Mates with .125 inches or 3mm flat bus bar blade**  
*Simplifies construction and lowers cost*
- **Blind mating design**  
*Allows greater vertical chassis manufacturing tolerances*
- **Hot pluggable contact**  
*Supports hot swapping on 48 volt DC bus*
- **UL and CUR recognized**  
*Product safety and electrical performance has been verified to the highest standards*

## PRODUCT SPECIFICATIONS

### Materials

Housing: Polyester, UL 94 V-0  
Contact Band: Beryllium copper alloy per C17200  
Plating gold: 0.4 to 0.6 microns over 2 to 5 microns nickel  
Contact Holder: Copper alloy C11000  
Plating gold: 0.1 to 0.2 microns

### Mechanical

Forces:  
Insertion - 10 lbs maximum  
Extraction - 5 lbs minimum  
Mating Cycles:  
Normal 500  
Hot Plug 250

### Electrical

Continuous Current Ratings (1):  
300 amp maximum, 200 amp @30 °C  
Voltage Rating

| PCL01       | Power Clip Connector |

## TEMPERATURE CHART

The graph shows the Power Clip electrical performance in terms of temperature rise and voltage drop at currents from 150A to 350A. The set up for the test consisted of the following:

- Six Power Clips were mounted on a bus bar that was .25 x 1.75 x 6.0 inches in diameter.
- The test samples were connected in series using 1/0 AWG wire attached to a 1" long and .125" thick nickel plated mating blades.

**Mating Blade**

The Anderson Power Products Rocker Power Clip is designed as a low cost interconnection between two perpendicular power bus bars. The products high performance contact offers low voltage drop and superior amperage carrying capability. There is no mating connector to the Rocker Power Clip as it accepts a solid .125 inches or 3mm thick nickel or gold plated rectangular bus bar tab.

As a result of the Rocker's base, this Power Clip allows for 6 degrees of float, for improved blindmating. The product is often used in "N+1" rectifier, power supply and switching power supply applications. The Rocker Power Clip's design enables the connector to be blind mated in the deepest racks.

The Rocker Power Clip is recognized to UL1977 and CSA standard C22.2 and is rated for up to 300 amps continuous service.

The product is also UL approved for hot plug current interruption of 100A at 48V and 200A at 42V using a gold plated bus bar tab.

### Mating Blade

The Anderson Power Products Dual Pole Power Clip is designed as a low cost interconnection between two perpendicular power bus bars. The product's high performance contacts offer low voltage drop and superior amperage carrying capability. There is no mating connector to the Dual Pole Power Clip as it accepts a solid .125 inches or 3mm thick nickel or gold plated rectangular bus bar tab.

The product is often used in "N+1" rectifier, power supply and switching power supply applications. The Dual Pole Power Clip's design enables the connector to be blind mated in the deepest racks.

The Dual Pole design allows for mating to a two pole laminated bus bar or double sided PSB tab. This will allow for feed and return with one single socket.

The Dual Pole Power Clip is recognized to UL1977 and CSA standard C22.2 and is rated for up to 300 amps continuous service.

## 65 to 250 Amp Filter Connector

### Two Pole Male & Female Connector Family

#### Features

- Available in a variety of capacitance values

ACARA connector offer excellent EMI suppression to very high frequencies

- Field disconnect with positive latch

ACARA mating and un-mating does not require an electrician. The positive latch mechanism keeps connectors mated.

- Polarized housings with user selective key

Housings only mate one-way preventing reverse polarity. The user selective key can be used to prevent mating of similar ACARA connectors with different ratings.

- Reduces assembly cost and components

The ACARA system reduces wire preparation and crimping up to 80%

#### PRODUCT INFORMATION

Anderson Power Products and Schaffner EMC, leaders in the fields of power interconnect and EMI suppression have partnered to produce the ACARA system of EMI filtered electrical power connectors. ACARA filtered connectors are available in a variety of capacitance values and offer excellent EMI suppression to very high frequencies (6 GHz).

The male filter connector is designed for a fast, error-proof assembly. The female power connector is polarized to the male connector reducing risk of installation error. The optional connector keying further enables the system designer to insure proper site installation.

The ACARA system greatly reduces the number of components and labor required for assembly and installation. The products are certified to all applicable requirements of UL and EN.

# Two Pole Male Filter & Female Power Connector

The ACARA male filter connector has a current-carrying conductor passing through the center of each capacitor. This co-axial conductor forms one terminal of the capacitor. The other capacitor terminal is an earthed metal ground-plane which is mounted to the bulkhead plate via the specially designed structural plastic housing and integral EMI gasket. This design feature is common to all ACARA filters and ensures that any radio frequency currents carried on the central conductor are shunted to earth by the capacitor.

Because of the extremely low series inductance resulting from this type of construction, the self-resonant frequency of the ACARA capacitor is very high. Typical frequency response is shown in Figure 1. As frequency increases, the impedance of the feed-through capacitor decreases steadily to provide excellent performance to beyond 6 GHz. Some small resonances can be expected in the performance characteristics of the ACARA capacitor. This is attributable to distributed inductance within the capacitor and can cause its high frequency response to vary slightly from the theoretical.

The ACARA filter connector delivers superior high frequency attenuation, preventing radio frequency emission and protecting sensitive computers, switching and cellular equipment.

## TEMPERATURE CHARTS

The ACARA female power connector is designed for safety and performance. The plastic housing is polarized to the male filter connector preventing the installer from reversing polarity which can result in injury to the installer and severe damage to the system. By using the optional 6 position key, the system designer can further restrict connector mating to insure that ACARA connectors of different capacitance or operating voltage can not be mated at field installation. The positive latch and wire strain relief of the ACARA power connector further enhance the safety of the system. The wire strain relief acts as a secondary mechanism to insure contact retention and it prevents creep of the wire insulation jacket which can expose bare conductor and result in electrical shock. The positive latch prevents accidental un-mating but allows for immediate power disconnect for emergency service or repair.

The patent pending ACARA socket contact offers superior electrical performance, hot mating (hot plug), low insertion forces and high mating durability. The socket contact is employs a high conductivity copper alloy and a steel spring. This design provides superior conductivity and precise contact forces. The amperage performance of the ACARA connector versus temperature is shown in figure 2. The precise contact forces of the ACARA socket contact delivers low mating forces and excellent mating durability. The two sacrificial arms of the ACARA socket contact enables hot plug and disconnect for emergency service or repair.

The combined safety, electrical and mechanical performance of the ACARA system is unique among electrical power connectors.

# 65 to 100 amp Male Filter Connector

## 150 to 250 Amp Filter Connector

### Two Pole Male & Female Power Connector

Anderson Power Products and Schaffner EMC, leaders in the fields of power interconnect and EMI suppression have partnered to produce the ACARA system of EMI filtered electrical power connectors. ACARA filtered connectors are available in a variety of capacitance values and offers excellent EMI suppression to very high frequencies (6 GHz).

The male filter connector is designed for a fast, error-proof assembly. The female power connector is polarized to the male connector reducing risk of installation error. The optional connector keying further enables the system designer to insure proper site installation.

The ACARA system greatly reduces the number of components and labor required for assembly and installation. The products are certified to all applicable requirements of UL and EN.

### FEATURES

- **Available in a variety of capacitance values**

ACARA capacitor/connector offer excellent EMI suppression to very high frequencies

- **Field disconnect with positive latch**

ACARA mating and un-mating does not require an electrician. The positive latch mechanism keeps connectors mated.

- **Polarized housings with user selective key**

Housings only mate one-way preventing reverse polarity. The user selective key can be used to prevent mating of similar ACARA connectors.

- **Reduces assembly cost and components**

The ACARA system reduces wire preparation and crimping up to 80%

# Two Pole Male Filter & Female Power Connector

The ACARA male filter connector has a current-carrying conductor passing through the center of each capacitor. This co-axial conductor forms one terminal of the capacitor. The other capacitor terminal is an earthed metal ground-plane which is mounted to the bulkhead plate via the specially designed structural plastic housing and integral EMI gasket. This design feature is common to all ACARA filters and ensures that any radio frequency currents carried on the central conductor are shunted to earth by the capacitor.

Because of the extremely low series inductance resulting from this type of construction, the self-resonant frequency of the ACARA capacitor is very high. Typical frequency response is shown in Figure 1. As frequency increases, the impedance of the feed-through capacitor decreases steadily to provide excellent performance to beyond 6 GHz. Some small resonances can be expected in the performance characteristics of the ACARA capacitor. This is attributable to distributed inductance within the capacitor and can cause its high frequency response to vary slightly from the theoretical.

The ACARA filter connector delivers superior high frequency attenuation, preventing radio frequency emission and protecting sensitive computers, switching and cellular equipment.

## TEMPERATURE CHARTS

The ACARA female power connector is designed for safety and performance. The plastic housing is polarized to the male filter connector preventing the installer from reversing polarity which can result in injury to the installer and severe damage to the system. By using the optional 6 position key, the system designer can further restrict connector mating to insure that ACARA connectors of different capacitance or operating voltage can not be mated at field installation. The positive latch and wire strain relief of the ACARA power connector further enhance the safety of the system. The wire strain relief acts as a secondary mechanism to insure contact retention and it prevents creep of the wire insulation jacket which can expose bare conductor and result in electrical shock. The positive latch prevents accidental un-mating but allows for immediate power disconnect for emergency service or repair.

The patent pending ACARA socket contact offers superior electrical performance, hot mating (hot plug), low insertion forces and high mating durability. The socket contact is employs a high conductivity copper alloy and a steel spring. This design provides superior conductivity and precise contact forces. The amperage performance of the ACARA connector versus temperature is shown in figure 2. The precise contact forces of the ACARA socket contact delivers low mating forces and excellent mating durability. The two sacrificial arms of the ACARA socket contact enables hot plug and disconnect for emergency service or repair.

The combined safety, electrical and mechanical performance of the ACARA system is unique among electrical power connectors.

## TEMPERATURE RISE & TEMPERATURE DE-RATING

### A) Reading the Chart

Temperature rise charts show the associated heat rise as a result of applied current to the connector. Heat rise is expressed as a  $T^{\circ}\text{C}$ .  $T_{\text{ambient}} - T_{\text{(maximum w/ applied current)}} = T$ . The chart on the right shows the heat rise curve for the PM216XXX connector. Separate curves are shown for #12 AWG and 4mm<sup>2</sup> wire. Interpreting the curves, if 30 amps is applied continuously to the connector, the heat rise will be 160°C for #12, 85°C for 4mm<sup>2</sup> wire.

### B) Ambients and Maximum Operating Temperature

Connector devices are rated or derated by the wiring configuration and the environment. Factors to be considered are the wire enclosure characteristics, connector housing and wire insulation characteristics, the number of wires in an enclosed area such as a raceway, and the ambient operating temperatures. The housing and wire insulation limits are specified by UL and are the limiting factor in determining the suitability of an application. The following guidelines should be met:  $T^{\circ}\text{C (ambient)} + T^{\circ}\text{C (at applied current)} < T^{\circ}\text{C (connector)}$  and  $T^{\circ}\text{C (wire insulation)}$  where  $T^{\circ}\text{C (connector)} = \text{temperature limit of the connector housing}$  and  $T^{\circ}\text{C (wire insulation)} = \text{the temperature limit of the wire insulation}$ .

The connector housing and wire insulation operating temperature limits are specified by the manufacturer and often recognized by safety agencies; UL, CSA, TUV, Etc. These limits often determine the suitability of connector and wire selection for an application. To determine suitability of an application the operating temperature limits of both the connector housing and the wire insulation should be less than the sum of the ambient temperature,  $T^{\circ}\text{C ambient} + T^{\circ}\text{C ratings}$ , operating temperature ratings for connector and wire.

This calculation can be determined for individual connectors and wire sizes and expressed as a Temperature De-rating Chart (shown at right). Interpreting the curves, using a 12AWG wire in a 60°C ambient condition the maximum applied current for the connector would be 28 amps. This is the maximum allowable current for the connector in the conditions of this application. Further de-rating may be desirable to meet temperature limitations of the wire insulation or temperature limitations of the greater electronic systems.

[www.andersonpower.com](http://www.andersonpower.com)

**Applicator**

A semi-automatic termination machine consisting of an upper and lower half that is used to crimp contacts onto wire. Used in conjunction with an electrical/mechanical press.

**AWG**

American Wire Gauge. A standard system for designating wire diameters.

**Contact Resistance**

The electrical resistance of metallic surfaces at their interface in the contact area under specified conditions when carrying a specified test current.

**Contact Retention**

Minimum axial load in either direction which a contact must withstand while remaining firmly fixed in its normal position within a housing.

**Crimp Retention**

The axial load which a contact can withstand without separation from the wire.

**Crimp Termination**

A connection in which a metal sleeve is secured to a conductor by mechanically deforming the sleeve with presses or automated crimping machines, eliminating the need for solder. Suitable for all wire types.

**Cycle Controlled**

To determine if repetitive on/off conditions result in degrading the contact system which may lead to failures such as “thermal run away”.

**Dielectric Strength (Withstanding Voltage)**

The highest potential difference (voltage) that an insulation material of given thickness can withstand for a specified time without occurrence of electrical breakdown through its bulk.

**Finger Proof**

A connector intended for usage external to the end equipment shall have live parts protected against exposure to contact by persons when assembled, installed, and mated as intended, as determined by UL Articulated probe.

**Flammability**

The measure of a material's ability to support combustion. Often tested per UL94.

**Heat Rise**

Temperature rise associated with the electrical load applied to a mated connection.

**Hot Plug**

Live connector insertion/extractions in battery pack installations.

**Insulation Resistance**

Ratio of applied voltage to the total current between the two electrodes in contact with a specific insulation.

**Locator**

Device for positioning contacts into crimping dies.

**Make First/Break Last (Sequencing)**

Protective measure against excess currents, short circuits, and ground faults by contacts used to interrupt the fault current flow before connector mating.

**Operating Temperature Range**

Connector temperature rating established by materials used – plastic, finish, and the base metal. Applying an electrical load will result in a temperature rise that is additive to the operating ambient.

**Polarization**

A technique of eliminating symmetry so that parts may only be mated one way.

**Pulse (Surge) Current**

Highest instantaneous current that will run through a system.

**Strain Relief**

A means of termination or installation that reduces the transfer of mechanical stress from the conductor.

**Termination**

Means of joining contacts to a conductor.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
