Description

The IDT6168 is a 16,384-bit high-speed static RAM organized as 4K x 4. It is fabricated using IDT's high-performance, high-reliability

CMOS technology. This state-of-the-art technology, combined with innovative circuit design techniques, provides a cost-effective approach for high-speed memory applications.

Access times as fast 15ns are available. The circuit also offers a reduced power standby mode. When $\overline{CS}$ goes HIGH, the circuit will automatically go to, and remain in, a standby mode as long as $\overline{CS}$ remains HIGH. This capability provides significant system-level power and cooling savings. The low-power (LA) version also offers a battery backup data retention capability where the circuit typically consumes only 1 μ W operating off a 2V battery. All inputs and outputs of the IDT6168 are TTL-compatible and operate from a single 5V supply.

The IDT6168 is packaged in either a space saving 20-pin, 300-mil ceramic or plastic DIP or a 20-pin LCC providing high board-level packing densities.

Military grade product is manufactured in compliance with the latest revision of MIL-STD-883, Class B, making it ideally suited to military temperature applications demanding the highest level of performance and reliability.

Timing Waveform of Write Cycle No. 1 ($\overline{WE}$ Controlled Timing)^(1,2,5)

Timing Waveform of Write Cycle No. 2 ($\overline{CS}$ Controlled Timing)^(1,2,5)

NOTES:

1. $\overline{WE}$ or $\overline{CS}$ must be HIGH during all address transitions.
2. A write occurs during the overlap of a LOW $\overline{CS}$ and a LOW $\overline{WE}$.
3. t_{WR} is measured from the earlier of $\overline{CS}$ or $\overline{WE}$ going HIGH to the end of the write cycle.
4. During this period, the I/O pins are in the output state and input signals should not be applied.
5. If the $\overline{CS}$ LOW transition occurs simultaneously with or after the $\overline{WE}$ LOW transition, the outputs remain in the high impedance state.
6. Transition is measured $\pm 200\text{mV}$ from steady state.
