FAIRCHILD™

Is Now Part of

ON Semiconductor®

To learn more about ON Semiconductor, please visit our website at
www.onsemi.com

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (_), the underscore (_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at www.onsemi.com. Please email any questions regarding the system integration to Fairchild_questions@onsemi.com.

FXL2SD106
Low-Voltage Dual-Supply 6-Bit Voltage Translator with Auto-Direction Sensing

Features

– Bi-Directional Interface between Two Levels: 1.1V and 3.6V

– Fully Configurable: Inputs and Outputs Track V_{CC} Level

– Non-Preferential Power-up; Either V_{CC} May Be Powered-up First

– Outputs Remain in 3-State until Active V_{CC} Level is Reached

– Outputs Switch to 3-State if Either V_{CC} is at GND

– Power-Off Protection

– Bus hold on Data Inputs Eliminates Need for Pull-up Resistors (Do NOT Use Resistors on the A or B Ports)

– OE and CLK IN are Referenced to V_{CCA} Voltage

– Packaged in 16-Terminal DQFN (2.5mm x 3.5mm)

– Direction Control Not Needed

– 80 Mbps Throughput Translating between 1.8V and 2.5V

– ESD Protection Exceeds:
  – 12kV HBM (B port I/O to GND) (per JESD22-A114 & Mil Std 883e 3015.7)
  – 8kV HBM (A port I/O to GND) (per JESD22-A114 & Mil Std 883e 3015.7)
  – 1kV CDM (per ESD STM 5.3)

General Description

The FXL2SD106 is a configurable dual-voltage-supply translator designed for both uni-directional and bi-directional voltage translation between two logic levels. The device allows translation between voltages as high as 3.6V to as low as 1.1V. The A port tracks the V_{CCA} level and the B port tracks the V_{CCB} level. This allows for bi-directional voltage translation over a variety of voltage levels: 1.2V, 1.5V, 1.8V, 2.5V, and 3.3V.

The device remains in 3-state until both V_{CC} reach active levels, allowing either V_{CC} to be powered-up first. Internal power-down control circuits place the device in 3-state if either V_{CC} is removed.

The OE input, when low, disables both A and B ports by placing them in a 3-state condition. The FXL2SD106 is designed so that OE and CLK IN are supplied by V_{CCA}.

The device senses an input signal on A or B port automatically. The input signal is transferred to the other port.

The FXL2SD106 is not designed for SD card applications. The internal bus hold circuitry conflicts with pull-up resistors. SD cards have internal pull-up resistors on the CD/DAT3 pins.

Power-Up/Power-Down Sequencing

FXL translators offer an advantage in that either V_{CC} may be powered up first. This benefit derives from the chip design. When either V_{CC} is at 0 volts, outputs are in a high-impedance state. The control input (OE) is designed to track the V_{CCA} supply. A pull-down resistor tying OE to GND should be used to ensure that bus contention, excessive currents, or oscillations do not occur during power-up / power-down. The size of the pull-down resistor is based upon the current-sinking capability of the device driving the OE pin.

The recommended power-up sequence is the following:

1. Apply power to the first V_{CC}.

2. Apply power to the second V_{CC}.

3. Drive the OE input high to enable the device.

The recommended power-down sequence is the following:

1. Drive OE input low to disable the device.

2. Remove power from either V_{CC}.

3. Remove power from other V_{CC}.

Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

Symbol	Parameter	Rating
V_{CCA}, V_{CCB}	Supply Voltage	–0.5V to +4.6V

V_I	DC Input Voltage
	  I/O Port A
	  I/O Port B
	  OE, CLK IN
		
		–0.5V to +4.6V
		–0.5V to +4.6V
		–0.5V to +4.6V

V_O	Output Voltage[1]
	  Outputs 3-STATE
	  Outputs Active (A_n)
	  Outputs Active (B_n, CLK OUT)
		
		–0.5V to +4.6V
		–0.5V to V_{CCA} + 0.5V
		–0.5V to V_{CCB} + 0.5V

I_{IK}	DC Input Diode Current at V_I < 0V	–50mA

I_{OK}	DC Output Diode Current at
	  V_O < 0V
	  V_O > V_{CC}
		
		–50mA
		+50mA

I_{OH} / I_{OL}	DC Output Source/Sink Current	–50mA / +50mA
I_{CC}	DC V_{CC} or Ground Current per Supply Pin	±100mA
T_{STG}	Storage Temperature Range	–65°C to +150°C

Note:

1. I_O Absolute Maximum Rating must be observed.

Recommended Operating Conditions[2]

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding them or designing to absolute maximum ratings.

Symbol	Parameter	Rating
V_{CCA} or V_{CCB}	Power Supply Operating	1.1V to 3.6V

	Input Voltage
	  Port A

		1.1–3.6	0	V_I = V_{CCA} or GND; I_O = 0			2.0	

DC Electrical Characteristics $(T_A = -40°C$ to $+85°C)$ (Continued)

Symbol	Parameter	V_{CCA} (V)	V_{CCB} (V)	Conditions	Min.	Typ.	Max.	Units
I_{CCB}[7]	Quiescent Supply Current	1.1–3.6	0	VI = V_{CCB} or GND; IO = 0			-2.0	μA
		0	1.1–3.6	VI = V_{CCA} or GND; IO = 0			2.0	

Notes:

3. This is the output voltage for static conditions. Dynamic drive specifications are given in "Dynamic Output Electrical Characteristics."

4. An external driver must source at least the specified current to switch LOW-to-HIGH.

5. An external driver must source at least the specified current to switch HIGH-to-LOW.

6. "Don't Care" indicates any valid logic level.

7. V_{CCI} is the V_{CC} associated with the input side.

8. Reflects current per supply, V_{CCA} or V_{CCB}.

Note:

12. Skew is the variation of propagation delay between output signals and applies only to output signals on the same port (A$_n$ or B$_n$) and switching with the same polarity (Low-to-High or High-to-Low). See Figure 8.

Maximum Data Rate[13][14]

| V_{CCA} | T_A = -40°C to +85°C, V_CCB = | | | | | Units |
| | 3.0V to 3.6V | 2.3V to 2.7V | 1.65V to 1.95V | 1.4V to 1.6V | 1.1V to 1.3V | |
	Min.	Min.	Min.	Min.	Typ.	
V_{CCA} = 3.0V to 3.6V	100	100	80	60	20	Mbps
V_{CCA} = 2.3V to 2.7V	100	100	80	60	20	Mbps
V_{CCA} =1.65V to 1.95V	80	80	60	40	20	Mbps
V_{CCA} = 1.4V to 1.6V	60	60	40	40	20	Mbps
	Typ.	Typ.	Typ.	Typ.	Typ.	
V_{CCA} = 1.1V to 1.3V	20	20	20	20	20	Mbps

Note:

13. Maximum data rate is guaranteed but not tested.

14. Maximum data rate is specified in megabits per second. See Figure 7. It is equivalent to two times the F-toggle frequency, specified in megahertz. For example, 100 Mbps is equivalent to 50 MHz.

DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION, OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS. THESE SPECIFICATIONS DO NOT EXPAND THE TERMS OF FAIRCHILD'S WORLDWIDE TERMS AND CONDITIONS, SPECIFICALLY THE WARRANTY THEREIN, WHICH COVERS THESE PRODUCTS.

LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION.

As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.

2. A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our external website, www.fairchildsemi.com, under Sales Support.

Counterfeiting of semiconductor parts is a growing problem in the industry. All manufacturers of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed applications, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.

PRODUCT STATUS DEFINITIONS

Definition of Terms

Datasheet Identification	Product Status	Definition
Advance Information	Formative / In Design	Datasheet contains the design specifications for product development. Specifications may change in any manner without notice.
Preliminary	First Production	Datasheet contains preliminary data; supplementary data will be published at a later date. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve design.
No Identification Needed	Full Production	Datasheet contains final specifications. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve the design.
Obsolete	Not In Production	Datasheet contains specifications on a product that is discontinued by Fairchild Semiconductor. The datasheet is for reference information only.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits,General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
