

1.8 V input/output, rail-to-rail, low power operational amplifiers

Features

- Operating range from $V_{CC} = 1.8$ to 6 V
- Rail-to-rail input and output
- Extended V_{icm} ($V_{CC-} - 0.2$ V to $V_{CC+} + 0.2$ V)
- Low supply current (120 μ A)
- Good accuracy (1 mV max for A version)
- Gain bandwidth product (530 kHz)
- High unity gain stability (able to drive 500 pF)
- ESD tolerance (2 kV)
- Latch-up immunity
- Available in SOT23-5 micropackage

Applications

- Two-cell battery-powered systems
- Battery-powered electronic equipment
- Cordless phones
- Cellular phones
- Laptops
- PDAs

Description

The TS185x (single, dual and quad) can operate with voltages as low as 1.8 V. They feature both input and output rail-to-rail (1.71 at $V_{CC} = 1.8$ V, $R_L = 2$ k Ω), 120 μ A current consumption and 530 kHz gain bandwidth product.

With this low consumption and a sufficient GBP for many applications, these operational amplifiers are well-suited to all kinds of battery supplied and portable applications.

The TS1851 is housed in the space-saving 5-pin SOT23-5 package, which simplifies board design (outside dimensions are 2.8 mm x 2.9 mm).

	CDM: charged device model ⁽⁶⁾	1.5	kV
	Lead temperature (soldering, 10sec)	250	°C
	Output short-circuit duration	See note ⁽⁷⁾	

- All voltage values, except differential voltages, are with respect to network terminal.
- Differential voltages are the non-inverting input terminal with respect to the inverting input terminal. If $V_{id} > \pm 1$ V, the maximum input current must not exceed ± 1 mA. When $V_{id} > \pm 1$ V, add an input series resistor to limit the input current.
- Short-circuits can cause excessive heating. Destructive dissipation can result from simultaneous short-circuits on all amplifiers.
- Human body model: a 100 pF capacitor is charged to the specified voltage, then discharged through a 1.5 k Ω resistor between two pins of the device. This is done for all couples of connected pin combinations while the other pins are floating.
- Machine model: a 200 pF capacitor is charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor < 5 Ω). This is done for all couples of connected pin combinations while the other pins are floating.
- Charged device model: all pins and package are charged together to the specified voltage and then discharged directly to ground through only one pin. This is done for all pins.
- Short-circuits from the output to V_{CC} can cause excessive heating. The maximum output current is approximately 48 mA, independent of the magnitude of V_{CC} . Destructive dissipation can result from simultaneous short-circuits on all amplifiers.

Table 3. Operating conditions

Symbol	Parameter	Value	Unit
V_{CC}	Supply voltage	1.8 to 6	V
V_{icm}	Common-mode input voltage range $T_{op} = 25^{\circ}\text{C}$, $1.8 \leq V_{CC} \leq 6\text{ V}$ $T_{min} < T_{op} < T_{max}$, $1.8 \leq V_{CC} \leq 5.5\text{ V}$	$V_{CC-} - 0.2$ to $V_{CC+} + 0.2$ V_{CC-} to V_{CC+}	V
T_{oper}	Operating free-air temperature range	-40 to + 125	$^{\circ}\text{C}$

2 Electrical characteristics

Table 4. Electrical characteristics measured at $V_{CC+} = +1.8\text{ V}$, $V_{CC-} = 0\text{ V}$, with C_L and R_L connected to $V_{CC}/2$, $T_{\text{amb}} = 25^\circ\text{C}$ (unless otherwise specified) ⁽¹⁾

4 Ordering information

Table 13. Order codes

Order code	Temperature range	Package	Packing	Marking
TS1851ID/IDT	-40°C to +125°C	SO-8	Tube or tape & reel	1851I
TS1851AID/AIDT				1851AI
TS1851ILT		SOT23-5L	Tape & reel	K161
TS1851AILT				K162
TS1852ID/IDT		SO-8	Tube or tape & reel	1852I
TS1852AID/AIDT				1852AI
TS1852IPT		TSSOP8 (Thin shrink outline package)	Tape & reel	1852I
TS1852AIPT				1852A
TS1852IST		MiniSO-8	Tape & reel	K161
TS1852AIST				K162
TS1854ID/IDT		SO-14	Tube or tape & reel	1854I
TS1854AID/AIDT				1854AI
TS1854IPT		TSSOP14 (Thin shrink outline package)	Tape & reel	1854I
TS1854AIPT				1854A

5 Revision history

Table 14. Document revision history

Date	Revision	Changes
01-Feb-2002	1	First release.
01-May-2005	2	Modifications on AMR Table 2 on page 3 (explanation of V_{id} and V_i limits)
22-May-2007	3	Added limits in temperature in Table 4 , Table 5 , and Table 6 . Added SVR in Table 6 (SVR parameter removed from Table 4 and Table 5). Added equivalent input voltage noise in Table 4 , Table 5 , and Table 6 . Added R_{thjc} values in Table 2 on page 3 . Updated Table 13: Order codes .
12-Mar-2010	4	Updated document format. Modified headings, added root part number TS185xA and added Table 1: Device summary on cover page. Modified Iout parameters in temperature, added limits at Tamb and improved typical values of A_{vd} in Table 4 , Table 5 and Table 6 . Updated package information in Chapter 3 . Removed order codes for DIP package from Table 13 .

Please Read Carefully:

Information in this document is provided solely in connection with ST products. STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, modifications or improvements, to this document, and the products and services described herein at any time, without notice.

All ST products are sold pursuant to ST's terms and conditions of sale.

Purchasers are solely responsible for the choice, selection and use of the ST products and services described herein, and ST assumes no liability whatsoever relating to the choice, selection or use of the ST products and services described herein.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted under this document. If any part of this document refers to any third party products or services it shall not be deemed a license grant by ST for the use of such third party products or services, or any intellectual property contained therein or considered as a warranty covering the use in any manner whatsoever of such third party products or services or any intellectual property contained therein.

UNLESS OTHERWISE SET FORTH IN ST'S TERMS AND CONDITIONS OF SALE ST DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE AND/OR SALE OF ST PRODUCTS INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION), OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.

UNLESS EXPRESSLY APPROVED IN WRITING BY AN AUTHORIZED ST REPRESENTATIVE, ST PRODUCTS ARE NOT RECOMMENDED, AUTHORIZED OR WARRANTED FOR USE IN MILITARY, AIR CRAFT, SPACE, LIFE SAVING, OR LIFE SUSTAINING APPLICATIONS, NOR IN PRODUCTS OR SYSTEMS WHERE FAILURE OR MALFUNCTION MAY RESULT IN PERSONAL INJURY, DEATH, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE. ST PRODUCTS WHICH ARE NOT SPECIFIED AS "AUTOMOTIVE GRADE" MAY ONLY BE USED IN AUTOMOTIVE APPLICATIONS AT USER'S OWN RISK.

Resale of ST products with provisions different from the statements and/or technical features set forth in this document shall immediately void any warranty granted by ST for the ST product or service described herein and shall not create or extend in any manner whatsoever, any liability of ST.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
