

## Features

- 5 ns pin-to-pin logic delays
- System frequency up to 178 MHz
- 72 macrocells with 1,600 usable gates
- Available in small footprint packages
  - 44-pin PLCC (34 user I/O pins)
  - 44-pin VQFP (34 user I/O pins)
  - 48-pin CSP (38 user I/O pins)
  - 64-pin VQFP (52 user I/O pins)
  - 100-pin TQFP (72 user I/O pins)
  - Pb-free available for all packages
- Optimized for high-performance 3.3V systems
  - Low power operation
  - 5V tolerant I/O pins accept 5V, 3.3V, and 2.5V signals
  - 3.3V or 2.5V output capability
  - Advanced 0.35 micron feature size CMOS Fast FLASH™ technology
- Advanced system features
  - In-system programmable
  - Superior pin-locking and routability with Fast CONNECT™ II switch matrix
  - Extra wide 54-input Function Blocks
  - Up to 90 product-terms per macrocell with individual product-term allocation
  - Local clock inversion with three global and one product-term clocks
  - Individual output enable per output pin
  - Input hysteresis on all user and boundary-scan pin inputs
  - Bus-hold circuitry on all user pin inputs
  - Full IEEE Standard 1149.1 boundary-scan (JTAG)
- Fast concurrent programming
- Slew rate control on individual outputs
- Enhanced data security features
- Excellent quality and reliability
  - Endurance exceeding 10,000 program/erase cycles
  - 20 year data retention
  - ESD protection exceeding 2,000V
- Pin-compatible with 5V-core XC9572 device in the 44-pin PLCC package and the 100-pin TQFP package

WARNING: Programming temperature range of  
 $T_A = 0^\circ \text{C}$  to  $+70^\circ \text{C}$

## Description

The XC9572XL is a 3.3V CPLD targeted for high-performance, low-voltage applications in leading-edge communi-

cations and computing systems. It is comprised of four 54V18 Function Blocks, providing 1,600 usable gates with propagation delays of 5 ns. See [Figure 2](#) for overview.

## Power Estimation

Power dissipation in CPLDs can vary substantially depending on the system frequency, design application and output loading. To help reduce power dissipation, each macrocell in a XC9500XL device may be configured for low-power mode (from the default high-performance mode). In addition, unused product-terms and macrocells are automatically deactivated by the software to further conserve power.

For a general estimate of  $I_{CC}$ , the following equation may be used:

$$I_{CC}(\text{mA}) = MC_{HS}(0.175 \cdot PT_{HS} + 0.345) + MC_{LP}(0.052 \cdot PT_{LP} + 0.272) + 0.04 \cdot MC_{TOG}(MC_{HS} + MC_{LP}) \cdot f$$

where:

$MC_{HS}$  = # macrocells in high-speed configuration

$PT_{HS}$  = average number of high-speed product terms per macrocell

$MC_{LP}$  = # macrocells in low power configuration

$PT_{LP}$  = average number of low power product terms per macrocell

$f$  = maximum clock frequency

$MCTOG$  = average % of flip-flops toggling per clock (~12%)

This calculation was derived from laboratory measurements of an XC9500XL part filled with 16-bit counters and allowing a single output (the LSB) to be enabled. The actual  $I_{CC}$  value varies with the design application and should be verified during normal system operation. [Figure 1](#) shows the above estimation in a graphical form. For a more detailed discussion of power consumption in this device, see Xilinx

application note [XAPP114, "Understanding XC9500XL CPLD Power."](#)

Function Block outputs (indicated by the bold line) drive the I/O Blocks directly.

## Absolute Maximum Ratings<sup>(2)</sup>

| Symbol    | Description                                      | Value       | Units |
|-----------|--------------------------------------------------|-------------|-------|
| $V_{CC}$  | Supply voltage relative to GND                   | -0.5 to 4.0 | V     |
| $V_{IN}$  | Input voltage relative to GND <sup>(1)</sup>     | -0.5 to 5.5 | V     |
| $V_{TS}$  | Voltage applied to 3-state output <sup>(1)</sup> | -0.5 to 5.5 | V     |
| $T_{STG}$ | Storage temperature (ambient) <sup>(3)</sup>     | -65 to +150 | °C    |
| $T_J$     | Junction temperature                             | +150        | °C    |

### Notes:

- Maximum DC undershoot below GND must be limited to either 0.5V or 10 mA, whichever is easier to achieve. During transitions, the device pins may undershoot to -2.0 V or overshoot to +7.0V, provided this over- or undershoot lasts less than 10 ns and with the forcing current being limited to 200 mA. External I/O voltage may not exceed  $V_{CCINT}$  by 4.0V.
- Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those listed under Operating Conditions is not implied. Exposure to Absolute Maximum Ratings conditions for extended periods of time may affect device reliability.
- For soldering guidelines and thermal considerations, see the [Device Packaging](#) information on the Xilinx website. For Pb-free packages, see [XAPP427](#).

## Recommended Operation Conditions

| Symbol             | Parameter                                            |                                            | Min | Max               | Units |
|--------------------|------------------------------------------------------|--------------------------------------------|-----|-------------------|-------|
| V <sub>CCINT</sub> | Supply voltage for internal logic and input buffers  | Commercial T <sub>A</sub> = 0°C to 70°C    | 3.0 | 3.6               | V     |

### Notes:

1. Global control pin.
2. GTS1 for TQ100.
3. GTS1 for PC44, VQ44, CS48, and VQ64.
4. The pin-outs are the same for Pb-free versions of packages.

**Notes:**

1. The pin-outs are the same for Pb-free versions of packages.

## Device Part Marking and Ordering Combination Information

Sample package with part marking.

### Notes:

- Due to the small size of chip scale packages, part marking on these packages does not follow the above sample and the complete part number cannot be included in the marking. Part marking on chip scale packages by line:
  - Line 1 = X (Xilinx logo), then truncated part number (no XC), i.e., 95xxxXL.
  - Line 2 = Not related to device part number.
  - Line 3 = Not related to device part number.
  - Line 4 = Package code, speed, operating temperature, three digits not related to device part number. Package codes: C1 = CS48, C2 = CSG48.

| Device Ordering and Part Marking Number | Speed (pin-to-pin delay) | Pkg. Symbol | No. of Pins | Package Type                     | Operating Range <sup>(1)</sup> |

## Warranty Disclaimer

THESE PRODUCTS ARE SUBJECT TO THE TERMS OF THE XILINX LIMITED WARRANTY WHICH CAN BE VIEWED AT <http://www.xilinx.com/warranty.htm>. THIS LIMITED WARRANTY DOES NOT EXTEND TO ANY USE OF THE PRODUCTS IN AN APPLICATION OR ENVIRONMENT THAT IS NOT WITHIN THE SPECIFICATIONS STATED ON THE THEN-CURRENT XILINX DATA SHEET FOR THE PRODUCTS. PRODUCTS ARE NOT DESIGNED TO BE FAIL-SAFE AND ARE NOT WARRANTED FOR USE IN APPLICATIONS THAT POSE A RISK OF PHYSICAL HARM OR LOSS OF LIFE. USE OF PRODUCTS IN SUCH APPLICATIONS IS FULLY AT THE RISK OF CUSTOMER SUBJECT TO APPLICABLE LAWS AND REGULATIONS.

## Revision History

The following table shows the revision history for this document.

| Date     | Version | Revision                                                                                                                                                         |
|----------|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 09/28/98 | 1.0     | Initial Xilinx release.                                                                                                                                          |
| 08/28/01 | 1.1     | Added VQ44 package.                                                                                                                                              |
| 06/20/02 | 1.2     | Updated $I_{CC}$ equation, page 1. Updated Component Availability table. Added additional $I_{IH}$ test conditions and measurements to DC Characteristics table. |
| 05/27/03 | 1.3     | Updated $T_{SOL}$ from 260 to 220°C. Added Part Marking and updated Ordering Information.                                                                        |
| 08/21/03 | 1.4     | Updated Package Device Marking Pin 1 orientation.                                                                                                                |
| 07/15/04 | 1.5     | Added Pb-free documentation                                                                                                                                      |
| 09/15/04 | 1.6     | Added $T_{APRPW}$ specification to AC Characteristics.                                                                                                           |
| 04/29/05 | 1.7     | No change to documentation.                                                                                                                                      |
| 07/15/05 | 1.8     | Move to Product Specification                                                                                                                                    |
| 03/22/06 | 1.9     | Add Warranty Disclaimer.                                                                                                                                         |
| 04/03/07 | 2.0     | Add programming temperature range warning on page 1.                                                                                                             |

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
