#### **Legal Disclaimer**

The information given in this document shall in no event be regarded as a guarantee of conditions or characteristics. With respect to any examples or hints given herein, any typical values stated herein and/or any information regarding the application of the device, Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind, including without limitation, warranties of non-infringement of intellectual property rights of any third party.

#### **Information**

For further information on technology, delivery terms and conditions and prices, please contact the nearest Infineon Technologies Office ([www.infineon.com](http://www.infineon.com)).

#### **Warnings**

Due to technical requirements, components may contain dangerous substances. For information on the types in question, please contact the nearest Infineon Technologies Office.

Infineon Technologies components may be used in life-support devices or systems only with the express written approval of Infineon Technologies, if a failure of such components can reasonably be expected to cause the failure of that life-support device or system or to affect the safety or effectiveness of that device or system. Life support devices or systems are intended to be implanted in the human body or to support and/or maintain and sustain and/or protect human life. If they fail, it is reasonable to assume that the health of the user or other persons may be endangered.

## 1 Product Brief

The BFP420F is a low noise wideband NPN bipolar RF transistor. The collector design supports voltages up to  $V_{CEO} = 4.5$  V and currents up to  $I_C = 60$  mA. The device is especially suited for mobile applications in which low power consumption is a key requirement. The typical transition frequency is approximately 25 GHz, hence the device offers high power gain at frequencies up to 4.5 GHz in amplifier applications. The device is housed in a thin small flat plastic package with visible leads.

## 2 Features

- General purpose low noise NPN bipolar RF transistor
- Based on Infineon's reliable very high volume 25 GHz silicon bipolar technology
- 0.95 dB minimum noise figure typical at 900 MHz, 3 V, 4 mA
- 16.5 dB maximum gain ( $G_{ma}$ ) typical at 2.4 GHz, 3 V, 15 mA
- 28 dBm  $OIP_3$  typical at 2.4 GHz, 4 V, 40 mA
- 16.5 dBm  $OP_{1dB}$  typical at 2.4 GHz, 4 V, 40 mA
- Popular in discrete oscillators
- Thin, small, flat, Pb-free (RoHS compliant) and Halogen-free package with visible leads
- Qualification report according to AEC-Q101 available

## Applications

As Low Noise Amplifier (LNA) in

- Satellite communication systems: Navigation systems (GPS, Glonass), satellite radio (SDARs, DAB)
- Multimedia applications such as mobile/portable TV, CATV, FM Radio
- ISM applications like RKE, AMR and Zigbee, as well as for emerging wireless applications

As discrete active mixer in RF Frontends

As active device in discrete oscillators

***Attention: ESD (Electrostatic discharge) sensitive device, observe handling precautions***

Product Name	Package	Pin Configuration			Marking
BFP420F	TSFP-4-1	1 = B	2 = E	3 = C	4 = E AMs

### 3 Maximum Ratings

**Table 3-1 Maximum Ratings at  $T_A = 25^\circ\text{C}$  (unless otherwise specified)**

Parameter	Symbol	Values		Unit	Note / Test Condition
		Min.	Max.		
Collector emitter voltage	$V_{CEO}$	—	4.5 4.1	V	Open base $T_A = 25^\circ\text{C}$ $T_A = -55^\circ\text{C}$
Collector base voltage	$V_{CBO}$	—	15	V	Open emitter
Collector emitter voltage	$V_{CES}$	—	15	V	E-B short circuited
Emitter base voltage	$V_{EBO}$	—	1.5	V	Open collector
Base current	$I_B$	—	9	mA	—
Collector current	$I_C$	—	60	mA	—
Total power dissipation <sup>1)</sup>	$P_{tot}$	—	210	mW	$T_S \leq 100^\circ\text{C}$
Junction temperature	$T_J$	—	150	°C	—
Storage temperature	$T_{Stg}$	-55	150	°C	—

1)  $T_S$  is the soldering point temperature.  $T_S$  is measured on the emitter lead at the soldering point of the pcb.

**Attention: Stresses above the max. values listed here may cause permanent damage to the device.**

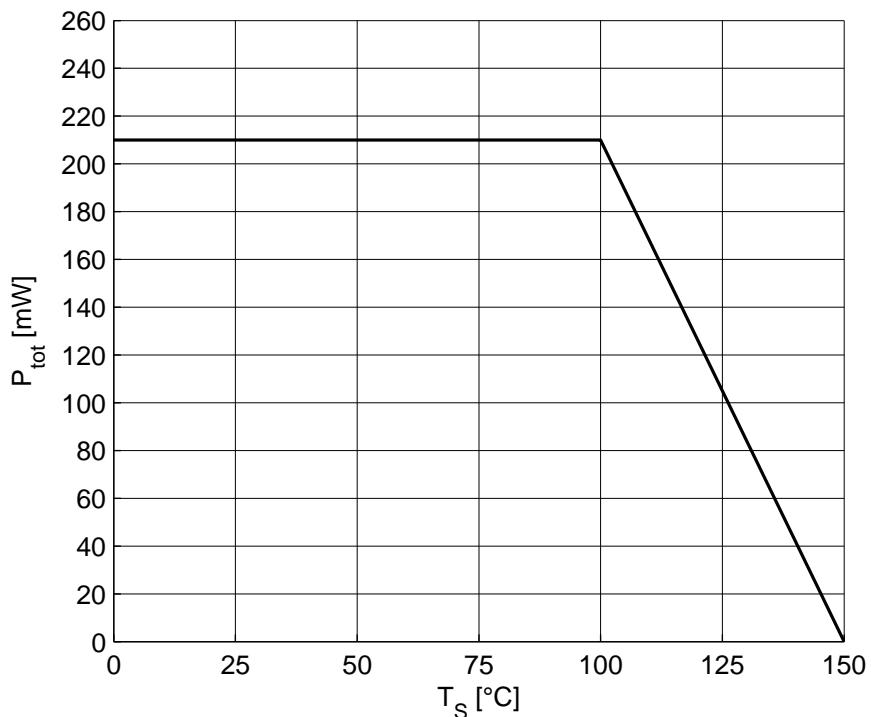

**Exposure to absolute maximum rating conditions for extended periods may affect device reliability. Maximum ratings are absolute ratings; exceeding only one of these values may cause irreversible damage to the integrated circuit.**

## 4 Thermal Characteristics

**Table 4-1 Thermal Resistance**

Parameter	Symbol	Values			Unit	Note / Test Condition
		Min.	Typ.	Max.		
Junction - soldering point <sup>1)</sup>	$R_{thJS}$	—	240	—	K/W	—

1)For the definition of  $R_{thJS}$  please refer to Application Note AN077 (Thermal Resistance Calculation)

**Figure 4-1 Total Power Dissipation  $P_{tot} = f(T_s)$**

## 5 Electrical Characteristics

### 5.1 DC Characteristics

**Table 5-1 DC Characteristics at  $T_A = 25^\circ\text{C}$**

Parameter	Symbol	Values			Unit	Note / Test Condition
		Min.	Typ.	Max.		
Collector emitter breakdown voltage	$V_{(\text{BR})\text{CEO}}$	4.5	5.5	—	V	$I_C = 1 \text{ mA}, I_B = 0$ Open base
Collector emitter leakage current	$I_{\text{CES}}$	— —	— 1	10 30	$\mu\text{A}$ $\text{nA}$	$V_{\text{CE}} = 15 \text{ V}, V_{\text{BE}} = 0$ $V_{\text{CE}} = 3 \text{ V}, V_{\text{BE}} = 0$ E-B short circuited
Collector base leakage current	$I_{\text{CBO}}$	—	1	30	nA	$V_{\text{CB}} = 3 \text{ V}, I_E = 0$ Open emitter
Emitter base leakage current	$I_{\text{EBO}}$	—	10	100	nA	$V_{\text{EB}} = 0.5 \text{ V}, I_C = 0$ Open collector
DC current gain	$h_{\text{FE}}$	60	95	130		$V_{\text{CE}} = 4 \text{ V}, I_C = 5 \text{ mA}$ Pulse measured

### 5.2 General AC Characteristics

**Table 5-2 General AC Characteristics at  $T_A = 25^\circ\text{C}$**

Parameter	Symbol	Values			Unit	Note / Test Condition
		Min.	Typ.	Max.		
Transition frequency	$f_T$	18	25	—	GHz	$V_{\text{CE}} = 3 \text{ V}, I_C = 30 \text{ mA}$ $f = 2 \text{ GHz}$
Collector base capacitance	$C_{\text{CB}}$	—	0.15	0.3	pF	$V_{\text{CB}} = 2 \text{ V}, V_{\text{BE}} = 0$ $f = 1 \text{ MHz}$ Emitter grounded
Collector emitter capacitance	$C_{\text{CE}}$	—	0.46	—	pF	$V_{\text{CE}} = 2 \text{ V}, V_{\text{BE}} = 0$ $f = 1 \text{ MHz}$ Base grounded
Emitter base capacitance	$C_{\text{EB}}$	—	0.55	—	pF	$V_{\text{EB}} = 0.5 \text{ V}, V_{\text{CB}} = 0$ $f = 1 \text{ MHz}$ Collector grounded

### 5.3 Frequency Dependent AC Characteristics

Measurement setup is a test fixture with Bias T's in a  $50 \Omega$  system,  $T_A = 25^\circ\text{C}$

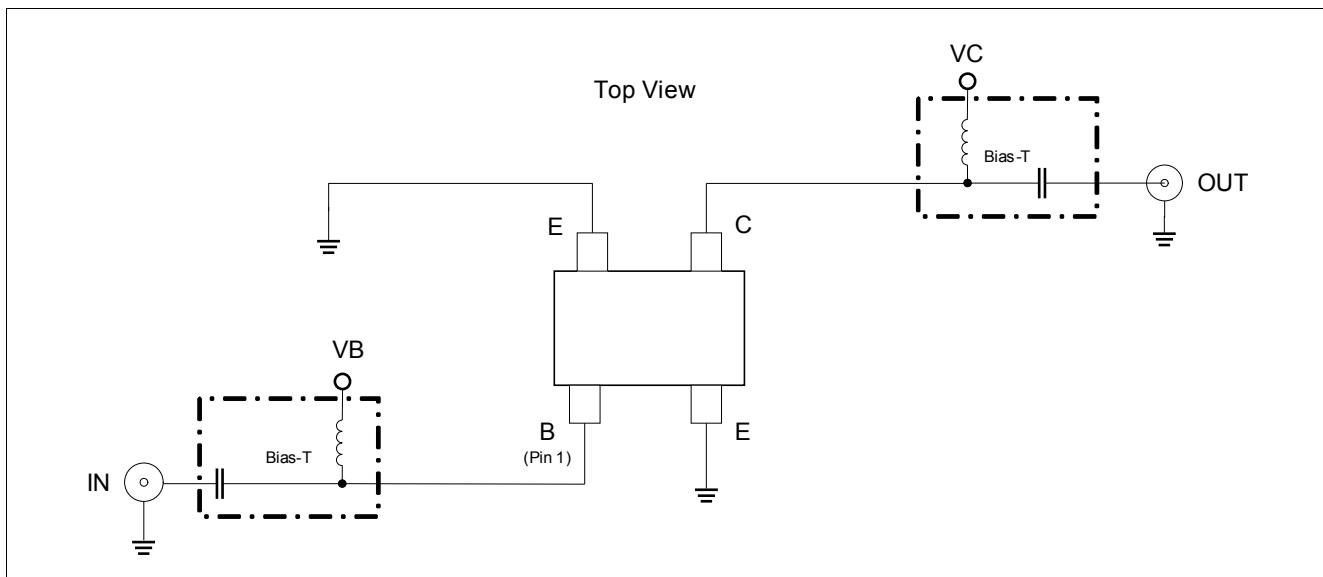

Figure 5-1 BFP420F Testing Circuit

3rd order intercept point at output	$OIP_3$	—	26	—		
1 dB gain compression point at output	$OP_{1dB}$	—	17	—		

**Notes**

1.  $G_{ms} = |S_{21}| / S_{12}|$  for  $k < 1$ ;  $G_{ma} = |S_{21}| / S_{12}|(k - (k^2 - 1)^{1/2})$  for  $k > 1$
2. In order to get the  $NF_{min}$  values stated in this chapter the test fixture losses have been subtracted from all measured results.
3.  $OIP_3$  value depends on termination of all intermodulation frequency components. Termination used for this measurement is  $50 \Omega$  from 0.2 MHz to 12 GHz.

*Note: The curves shown in this chapter have been generated using typical devices but shall not be considered as a guarantee that all devices have identical characteristic curves.  $T_A = 25^\circ\text{C}$ .*

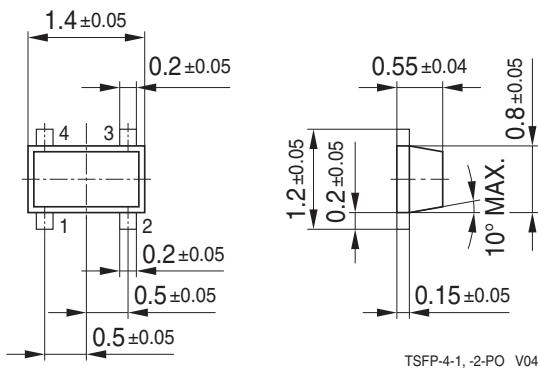

## 6 Simulation Data

For the SPICE Gummel Poon (GP) model as well as for the S-parameters (including noise parameters) please consult our website and download the latest versions before actually starting your design.

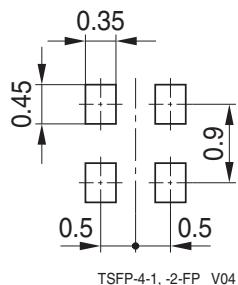

You find the BFP420F SPICE GP model on the official homepage of Infineon RF transistors in MWO- and ADS-format, which you can import into these circuit simulation tools very quickly and conveniently. The model already contains the package parasitics and is ready to use for DC- and high frequency simulations. The terminals of the model circuit correspond to the pin configuration of the device.

The model parameters have been extracted and verified up to 10 GHz using typical devices. The BFP420F SPICE GP model reflects the typical DC- and RF-performance within the limitations which are given by the SPICE GP model itself. Besides the DC characteristics all S-parameters in magnitude and phase, as well as noise figure (including optimum source impedance, equivalent noise resistance and flicker noise) and intermodulation have been extracted.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

#### Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помошь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помошь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
