Description

The [STEVAL-POEL45W1](#) Power over Ethernet (PoE) powered LED driver reference design delivers a power output of 45 W and dims LEDs down to 1% of the maximum brightness without any flicker. The solution supports remote dimming control via Bluetooth with the [PoE_Lighting](#) Android application (available on [Google Play](#)).

You can use this reference design to develop complete indoor network-powered lighting solutions with IP-based Powered Devices (PDs), without additional AC power infrastructure, and extend the functionality to include remote data management via existing LAN networks.

The reference design features a highly integrated [PM8805](#) IEEE802.3bt-compliant Powered Device (PD) PoE interface, a high efficiency [LED6000](#) LED driver able to source up to 3 A_{DC} current, and a certified [SPBTLE-1S](#) Bluetooth Low Energy module, compliant with BT specifications v4.2 and BQE qualified.

The [STSW-POEL45FW](#) board firmware is programmed via the [STSW-BNRG1STLINK](#) utility.
