

Corcom EMI/RFI Filter Product Overview

TE Connectivity offers over 300 solutions for EMI/RFI problems associated with susceptibility, as well as compliance with international emissions standards. Corcom filters are available in a wide range of single and 3-phase designs as well as IEC inlet and power entry modules which can combine several functions to reduce cost, space and labor. Solutions are also available for DC applications and applications requiring extremely high performance with feedthrough filters and capacitors for a wide range of applications.

FILTER TYPE POWER LINE FILTERS

PERFORMANCE ← General Purpose →

Approvals	UL / CSA / VDE	UL / CSA / VDE	UL / CSA / VDE
Features	<p>General purpose RFI Filters for high impedance load / low current</p> <ul style="list-style-type: none"> • General purpose • Wide variety of termination options • Meets low leakage current requirements of VDE portable equipment and non-patient medical equipment 	<p>General purpose RFI power line filters for high impedance loads</p> <ul style="list-style-type: none"> • Well suited to applications where pulsed, continuous and/ or intermittent RFI interference is present • EK models meet the very low leakage current requirements for VDE portable equipment and non-patient care medical equipment • Available with ground line inductor (choke) 	<p>Enhanced differential mode performance K Series RFI line filters</p> <ul style="list-style-type: none"> • Higher performance line to line attenuation than the K Series • E version meets the very low leakage current requirements for VDE portable equipment and non-patient care medical equipment • V version features same high performance with more cost-effective design

← Superior Performance → General & High Purpose Superior Performance

UL / CSA / VDE UL / CSA UL / CSA / VDE

High Performance RFI Power Line Filters for Switching Power Supplies

- Superior common-mode and premium differential-mode attenuation
- Smaller package sizes than the EP Series
- ET models with low leakage current
- Medical versions available in the HT Series

High Frequency Power Line Filter or Power Entry Module

- High common and differential mode performance from 10kHz to 1GHz
- Available with an IEC inlet, fuseholder and switch
- Suitable for applications where computers are used to process secret or confidential information

DC filters available in a wide variety of versions for DC system RFI issues

- DA Series - Compact RFI Line Filter with DC Inlet Connection
- DB Series - High Current DC Inlet Filter and Connectors
- DC Series - General purpose line filters for DC applications up to 125VDC with many options
- P Series - adaptable power entry module for DC rated applications

AC & DC rated feedthrough filters and capacitors for highest rated performance

- FFA (AC rated) & FFD (DC rated) feedthrough filters
- AFC (AC rated) & AFD (DC rated) feedthrough capacitors
- Offers high reliability & performance for high frequency applications
- Custom versions available

Screw mounting

.25 [6.3] spade terminals, wire leads, terminal bolt & nut, or IEC 60320-1 C14

Wire leads

Spade terminals, PCB pins, wire leads, DA or DCB connector, or terminal bolt & nut

Screw terminal

.25 [6.3] spade terminals, wire leads, or terminal bolt & nut

Wire leads, or IEC 60320-1 C14

Spade terminals, PCB pins, wire leads, DA or DCB connector, or terminal bolt & nut

Screw terminal

Wide band attenuation for applications with very high RFI emissions including:

- Consumer electronics
- Single phase industrial applications
- Drive motors and controllers
- Commercial & building equipment

Ideal filter series for hardened applications where computers are used to process secret or confidential information.

- Network routing equipment
- Servers
- Switching equipment
- Wireless cabinets
- Ethernet hubs
- Base stations
- Repeater stations
- Power supplies for all types of communications equipment

Universal applications including;

- Servers and routers
- Base stations
- Transportation
- Telecom
- MRI rooms
- High current switch mode power supplies
- Military and aerospace

Wide band RFI suppression for industrial 3-phase applications with very high RFI emissions including:

- Machine tools
- Elevators & escalators
- Frequency converters
- Industrial cabinets

Specially suited for regeneration systems of returning power. Wide banded RFI suppression for industrial 3-phase applications with very high RFI emissions including:

- 3-phase inverters & converters
- Variable speed motor drives
- Process automation equipment
- Elevators & escalators
- Machine tools

Wide band RFI suppression for WYE applications with very high RFI emissions including:

- Frequency converters with very long motor cables
- Machine tools

Ideal for industrial 3-phase applications with extremely high noise emissions including:

- High current motor drives
- Spot-welding machines
- Any difficult application with very difficult noise suppression

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
