Description

The AS195-306 is a reflective SP5T switch. It is an ideal switch for higher power applications. It can be used for GSM dual-band handset applications where low loss, low current and small size are critical parameters.

Figure 1 shows the block diagram and pinout for the AS195-306LF.

Electrical and Mechanical Specifications

The absolute maximum ratings of the AS195-306LF are shown in Table 2. Recommended operating conditions of the AS195-306LF are provided in Table 3. The electrical specifications are provided in Table 4. Table 5 shows the electrical specifications for nominal operating conditions.

Figures 2, 3, and 4 show the typical performance characteristics for the AS195-306.

ESD HANDLING: Although this device is designed to be as robust as possible, electrostatic discharge (ESD) can damage this device. This device must be protected at all times from ESD when handling or transporting. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD handling precautions should be used at all times.
