Assembly instructions for TEN and THN heatsinks

Example: TEN30-2412W1 with heatsink TEN-HS2

The product label on converter has to be removed before mounting the heat-sink.

1. Lay out the assembly and check it for any missing components or for any damage.
2. From the converter, remove the product label, including any remaining glue (best with benzine) and, if required, apply a hand-written part number / lot number marking on the side wall of the converter
3. Remove the protective foil from the adhesive thermal pad on the heat sink
4. Apply the heatsink to the converter and secure it by the two spring fixation clips included with the heat sink assembly
