Notes

1 Final EMI performance is system/shelf dependent.
2 Auto ranging sets power limit based on input voltage at turn on.
3 The difference in output current among any two rectifiers operating in parallel does not exceed a value equal to 15% of the rated current limit. This specification applies for operation with any output current from no load to 110% of maximum.
4 Maximum 15 minute warm up time at light loads below -15 °C. See Application Note 212 for cold start timing data.
5 For operation above 1,524 m (5,000 ft), maximum operation temperature is derated by 2 °C per 305 m (1,000 ft).
6 Output voltage can be modified on the fly between 21-28.5 V (24 V model) or 42-57 V (48 V model) PMBus command.
7 PM BUs communication. Pin names in parenthesis refer to the PMBus version names. UFE2000-96S48PJ and UFE130096S24PJ use PMBus.
