

S1D13T04 EPD Timing Controller

April 2013

EPSON's S1D13T04 EPD timing controller provides a quick to market solution for a range of Pervasive Displays' small EPD panels. The S1D13T04 handles all heavy EPD timing related driving requirements. The S1D13T04 contains several waveform modes which allow the user to select the mode that best meets their display update speed and image quality requirements. In addition, display update flexibility is provided in the form of partial and full updates to the entire display or just a selected area. The S1D13T04 features a SPI serial host interface with a fully defined command set, making image transfer and display quick and easy. The S1D13T04 only requires a few external passive components to be fully operational. In addition to the already low power consumption during active display updates, there is an ultra-low power sleep mode for use during idle periods.

■ Features

• Host Interface

- Internal Oscillator running at 14MHz
- Serial Host interface:
 - 4-wire standard SPI interface (SCK, NCS, SDI, SDO)
 - 1-wire HRDY busy signal (Configurable for Open-drain operation)
 - Optional Sleep Mode implementation
 - 1-wire Wakeup signal wire
 - 1-wire Sleep status.

• Power

- Single voltage input, Typ 3.0V
- Built-in regulator for Core VDD

• Power Modes

- Run Mode
 - Low power operation for display update operation
- Sleep Mode
 - Ultra low power mode for temporary idle control from Host system
 - Resume is triggered by Wakeup pin

• Package

- SQFN7 48-Pin (7mm x 7mm)

• EPD Panel Support

- Pervasive Display 1.44", 2.0" and 2.7" panels
- 1bpp temperature compensated waveform
- Hardware Rotation:
 - Supports: 0° and 180° rotation for ease of panel placement on customer design

• EPD Panel Power Modes

- Auto – the panel is automatically powered on and off for each display update
- Manual – panel power is left on between updates for faster successive updates

• Display Update Modes Supported

- Full Update – performs updates on the full display
- Partial Update – performs updates on changed pixels only (full display is scanned)
- Area Update – in addition to Full and Partial Updates, performs updates only on the window targeted by start position and window size

• Host Image Loading

- Supports 1bpp full image loading
- Supports area window image loading

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
