**Note the following details of the code protection feature on Microchip devices:**

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

**Object of Declaration:** MCP39F501 Power Monitor PICtail™ Evaluation Board

EU Declaration of Conformity

This declaration of conformity is issued by the manufacturer.

The development/evaluation tool is designed to be used for research and development in a laboratory environment. This development/evaluation tool is not intended to be a finished appliance, nor is it intended for incorporation into finished appliances that are made commercially available as single functional units to end users. This development/evaluation tool complies with EU EMC Directive 2004/108/EC and as supported by the European Commission's Guide for the EMC Directive 2004/108/EC (8<sup>th</sup> February 2010).

This development/evaluation tool complies with EU RoHS2 Directive 2011/65/EU.

For information regarding the exclusive, limited warranties applicable to Microchip products, please see Microchip's standard terms and conditions of sale, which are printed on our sales documentation and available at [www.microchip.com](http://www.microchip.com).

### NOTICE TO CUSTOMERS

All documentation becomes dated, and this manual is no exception. Microchip tools and documentation are constantly evolving to meet customer needs, so some actual dialogs and/or tool descriptions may differ from those in this document. Please refer to our web site ([www.microchip.com](http://www.microchip.com)) to obtain the latest documentation available.

Documents are identified with a “DS” number. This number is located on the bottom of each page, in front of the page number. The numbering convention for the DS number is “DSXXXXXXXXA”, where “XXXXXXXX” is the document number and “A” is the revision level of the document.

For the most up-to-date information on development tools, see the MPLAB® IDE online help. Select the Help menu, and then Topics to open a list of available online help files.

## INTRODUCTION

This chapter contains general information that will be useful to know before using the MCP39F501 Power Monitor PICTail™ Evaluation Board. Items discussed in this chapter include:

- Document Layout
- Conventions Used in this Guide
- Recommended Reading
- The Microchip Web Site
- Customer Support
- Document Revision History

## DOCUMENT LAYOUT

This document describes how to use the MCP39F501 Power Monitor PICTail™ Evaluation Board as a development board for the MCP39F501 device. The manual layout is as follows:

- **Chapter 1. “Product Overview”** – Provides important information about the MCP39F501 Power Monitor PICTail™ Evaluation Board.
- **Chapter 2. “Installation and Operation”** – Provides important information on using the MCP39F501 Power Monitor PICTail™ Evaluation Board including a getting started section that describes wiring the line and load connections.
- **Chapter 3. “Hardware”** – Includes details on the function blocks of the power monitor including the analog front end design, and power supply design.
- **Appendix A. “Schematic and Layouts”** – Shows the schematic and layout diagrams
- **Appendix B. “Bill of Materials (BOM)”** – Lists the parts used to build the MCP39F501 Power Monitor PICTail™ Evaluation Board.

## CONVENTIONS USED IN THIS GUIDE

This manual uses the following documentation conventions:

### DOCUMENTATION CONVENTIONS

Description	Represents	Examples
<b>Arial font:</b>		
Italic characters	Referenced books	<i>MPLAB® IDE User's Guide</i>
	Emphasized text	...is the <i>only</i> compiler...
Initial caps	A window	the Output window
	A dialog	the Settings dialog
	A menu selection	select Enable Programmer
Quotes	A field name in a window or dialog	"Save project before build"
Underlined, italic text with right angle bracket	A menu path	<u><i>File&gt;Save</i></u>
Bold characters	A dialog button	Click <b>OK</b>
	A tab	Click the <b>Power</b> tab
N'Rnnnn	A number in verilog format, where N is the total number of digits, R is the radix and n is a digit.	4'b0010, 2'hF1
Text in angle brackets < >	A key on the keyboard	Press <Enter>, <F1>
<b>Courier New font:</b>		
Plain Courier New	Sample source code	#define START
	Filenames	autoexec.bat
	File paths	c:\mcc18\h
	Keywords	_asm, _endasm, static
	Command-line options	-Opa+, -Opa-
	Bit values	0, 1
	Constants	0xFF, 'A'
Italic Courier New	A variable argument	<i>file.o</i> , where <i>file</i> can be any valid filename
Square brackets [ ]	Optional arguments	mcc18 [options] <i>file</i> [options]
Curly brackets and pipe character: {   }	Choice of mutually exclusive arguments; an OR selection	errorlevel {0 1}
Ellipses...	Replaces repeated text	var_name [, var_name...]
	Represents code supplied by user	void main (void) { ... }

## RECOMMENDED READING

This user's guide describes how to use MCP39F501 Power Monitor PICtail™ Evaluation Board. Another useful documents is listed below. The following Microchip document is available and recommended as a supplemental reference resource.

**MCP39F501 Data Sheet – “Single-Phase Power-Monitoring IC with Calculation and Event Detection” (DS20005256)**

This data sheet provides detailed information regarding the MCP39F501 device.

## THE MICROCHIP WEB SITE

Microchip provides online support via our web site at [www.microchip.com](http://www.microchip.com). This web site is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the web site contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

## CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or field application engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

Technical support is available through the web site at:  
<http://www.microchip.com/support>.

## DOCUMENT REVISION HISTORY

### Revision A (August 2014)

- Initial Release of this Document.

# MCP39F501 Power Monitor PICtail™ Evaluation Board User's Guide

---

---

NOTES:

**Chapter 1. Product Overview**

**1.1 INTRODUCTION**

The MCP39F501 Power Monitor PICTail™ Evaluation Board provides the option of a fully functional single-phase power monitor, along with a development platform. This low-cost design does not use any transformers and requires few external components. The device calculates active power, reactive power, RMS current, RMS voltage, power factor, line frequency and other typical power quantities as defined in the MCP39F501 data sheet.

The *MCP39F501 Power Monitor Utility* software is used to calibrate and monitor the system, and can be used to create custom calibration setups. For some accuracy requirements, only a single point calibration may be needed.

**FIGURE 1-1:** MCP39F501 Power Monitor PICTail™ Evaluation Board.

## 1.2 WHAT THE MCP39F501 POWER MONITOR PICTAIL™ EVALUATION BOARD KIT INCLUDES

This MCP39F501 Power Monitor PICtail™ Evaluation Board kit includes:

- MCP39F501 Power Monitor PICtail™ Evaluation Board and Case (ADM00509)
- Line Cable
- Load Cable
- USB Cable
- Important Information Sheet

## Chapter 2. Installation and Operation

### 2.1 GETTING STARTED

To use the MCP39F501 Power Monitor PICTail™ Evaluation Board, follow the steps described below. The meter design uses a 5A load for nominal current and a maximum current ( $I_{MAX}$ ) of 15A. It is not recommended to draw more than 15A through the AC plugs mounted on the Printed Circuit Board (PCB).

To get started, follow the next steps.

#### 2.1.1 Step 1: Wiring connections

Figure 2-1 identifies the line and load connections of the MCP39F501 Power Monitor PICTail™ Evaluation Board.

**FIGURE 2-1:** Connecting the MCP39F501 Power Monitor PICTail™ Evaluation Board.

#### 2.1.2 Step 2: Connect the Line Cable to the Meter and plug into appropriate power plug

The meter will turn on when the line connection has between 90V to 230V.

#### 2.1.3 Step 3: Connect the USB cable to a PC with the installed “MCP39F501 Power Monitor Utility” software

Select the correct COMM port and the following message should appear:

**FIGURE 2-2:** Successful Connection Between PC and Evaluation Board.

---

NOTES:

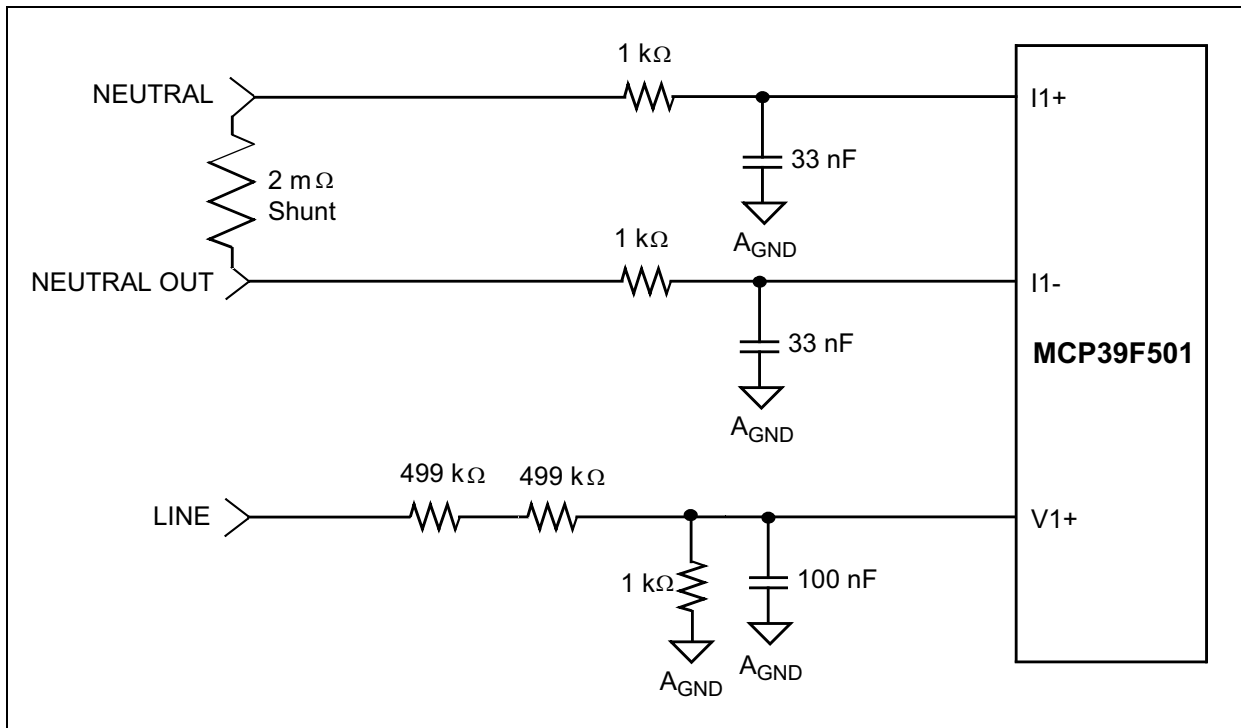

**Chapter 3. Hardware**

**FIGURE 3-1:** Top View – Hardware Components.

## 3.1 INPUT AND ANALOG FRONT END

The MCP39F501 Power Monitor PICtail™ Evaluation Board comes populated with components designed for 90V to 230V line voltage. The neutral side of the phase goes through a 2 mΩ shunt connected directly to the MCP39F501 for current measurement. The line side of the phase goes through a 1000:1 voltage divider and into the device for voltage measurement.

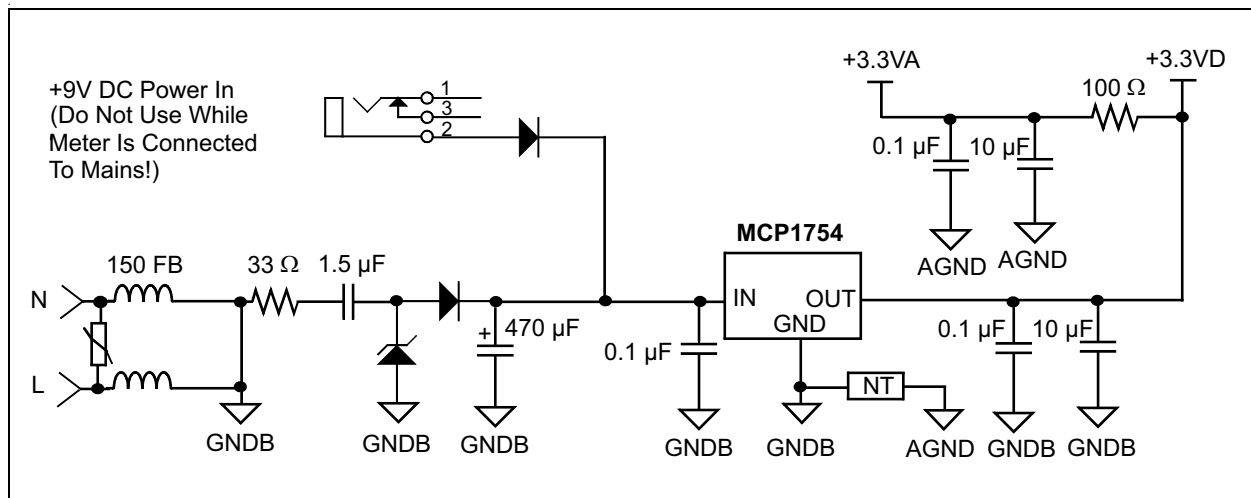

**FIGURE 3-2:** Analog Front End Circuitry.

**Note:** All of the analog circuitry associated with this part of the circuit is connected to the analog ground plane, AGND. Similar grounding and layout approaches should be used in all MCP39F501 applications. For complete schematic and PCB layout information, see [Appendix A. “Schematic and Layouts”](#) and [Appendix B. “Bill of Materials \(BOM\)”](#).

## 3.2 LOW-COST POWER SUPPLY CIRCUIT

The low-cost power supply circuit for the MCP39F501 Power Monitor PICtail™ Evaluation Board uses a capacitively divided half-wave rectified signal, and a +3.3V voltage regulator.

**FIGURE 3-3:** Low-Cost Power Supply Circuit.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
