## **ORDERING INFORMATION**

See detailed ordering and shipping information in the package dimensions section on page 8 of this data sheet.

## **Single Low Noise Operational Amplifier**

The NE/SA/SE5534/5534A are single high-performance low noise operational amplifiers. Compared to other operational amplifiers, such as TL083, they show better noise performance, improved output drive capability, and considerably higher small-signal and power bandwidths.

This makes the devices especially suitable for application in high quality and professional audio equipment, in instrumentation and control circuits and telephone channel amplifiers. The op amps are internally compensated for gain equal to, or higher than, three. The frequency response can be optimized with an external compensation capacitor for various applications (unity gain amplifier, capacitive load, slew rate, low overshoot, etc.).

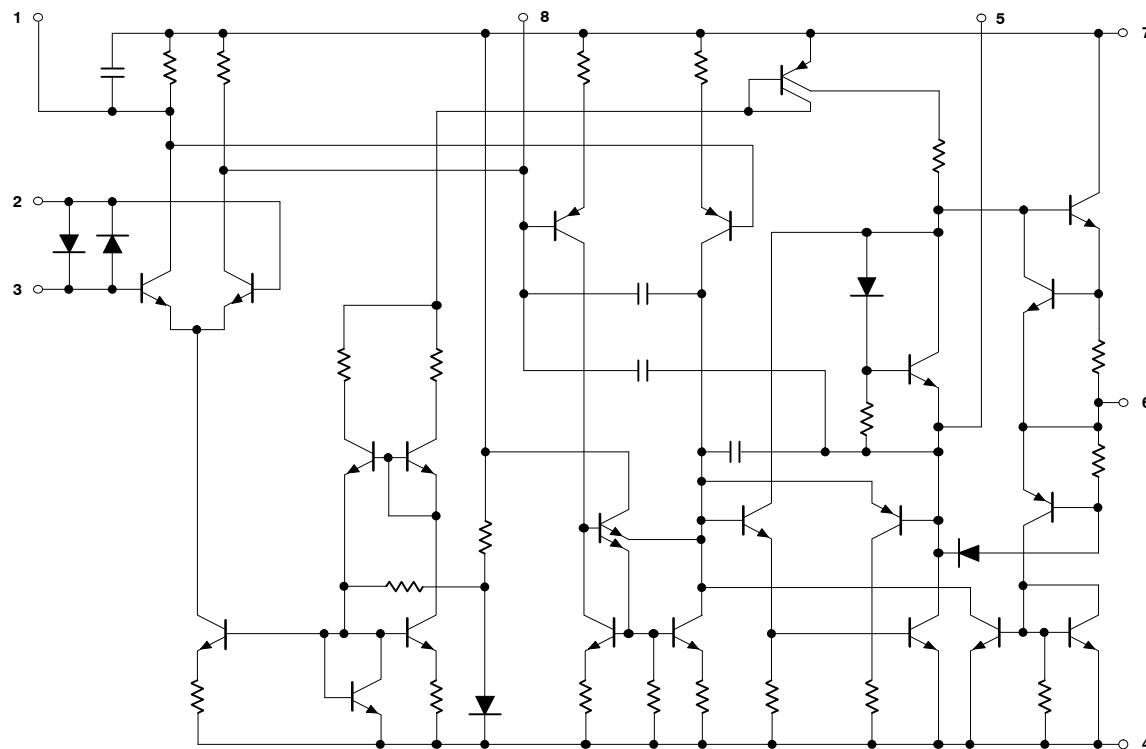

### **Features**

- Small-Signal Bandwidth: 10 MHz
- Output Drive Capability:  $600 \Omega$ , 10 V<sub>RMS</sub> at  $V_S = \pm 18$  V
- Input Noise Voltage:  $4 \text{ nV}/\sqrt{\text{Hz}}$
- DC Voltage Gain: 100000
- AC Voltage Gain: 6000 at 10 kHz
- Power Bandwidth: 200 kHz
- Slew Rate: 13 V/ $\mu$ s
- Large Supply Voltage Range:  $\pm 3.0$  to  $\pm 20$  V
- Pb-Free Packages are Available

### **Applications**

- Audio Equipment
- Instrumentation and Control Circuits
- Telephone Channel Amplifiers
- Medical Equipment

**Figure 1. Equivalent Schematic**

## MAXIMUM RATINGS

Rating	Symbol	Value	Unit
Supply Voltage	$V_S$	$\pm 22$	V
Input Voltage	$V_{IN}$	$\pm V$ Supply	V
Differential Input Voltage (Note 1)	$V_{DIFF}$	$\pm 0.5$	V
Operating Temperature Range NE SA SE	$T_{amb}$	0 to +70 -40 to +85 -55 to +125	°C
Storage Temperature Range	$T_{stg}$	-65 to +150	°C
Junction Temperature	$T_j$	150	°C
Power Dissipation at 25°C	$P_D$	1150 750	mW
Thermal Resistance, Junction-to-Ambient	$R_{\theta JA}$	130 158	°C/W
Output Short-Circuit Duration (Note 2)	—	Indefinite	—
Lead Soldering Temperature (10 sec max)	$T_{sld}$	230	°C

Stresses exceeding Maximum Ratings may damage the device. Maximum Ratings are stress ratings only. Functional operation above the Recommended Operating Conditions is not implied. Extended exposure to stresses above the Recommended Operating Conditions may affect device reliability.

1. Diodes protect the inputs against overvoltage. Therefore, unless current-limiting resistors are used, large currents will flow if the differential input voltage exceeds 0.6 V. Maximum current should be limited to  $\pm 10$  mA.
2. Output may be shorted to ground at  $V_S = \pm 15$  V,  $T_{amb} = 25^\circ\text{C}$ . Temperature and/or supply voltages must be limited to ensure dissipation rating is not exceeded.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

#### Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помошь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помошь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
