

USB 3.1 Gen 1 USB-C to HDMI Adapter (M/F), Thunderbolt 3 Compatible, 2048 x 1152 (1080p)

MODEL NUMBER: U444-06N-HD

Description

The U444-06N-HD USB 3.1 Gen 1 USB-C to HDMI Adapter (M/F) helps you transmit digital audio and 1080p video from your tablet, laptop, Chromebook, MacBook, smartphone or PC to an HDMI-enabled television, monitor or projector. It's an ideal tool for giving video presentations in conference rooms and classrooms, editing multiple documents on a larger screen or streaming video for digital signage in crystal-clear 1080p.

You can extend video from your primary display to another, duplicate the same video on both displays or change the second display to your primary.

Connect the reversible USB-C plug to your source device's USB-C or Thunderbolt 3 port. The fumble-free USB-C plug connects in either direction to ensure fast, easy connection every time. Then, connect the HDMI port to your display using an HDMI cable (sold separately).

The U444-06N-HD adapter supports HD video resolutions up to 2048 x 1152 (including 1080p) at 60 Hz and 5.1-channel surround sound. It also supports USB 3.1 Gen 1 data transfer rates up to 5 Gbps. You can use up to six adapters to connect six additional displays to a Windows device at the same time.
